We find in the Singapore Papers that the Dutch Government has offered to the British as an equivalent for duties levied in Java on British goods, at a higher rate than they ought to have been, the sum of 6 millions Guilders, which has been refused by the British Government as inadequate. We are ignorant of what the whole amount claimed may be, but we would recommend the British claimants to take what they can get, according to the old adage, that "a bird in the hand is worth ten in the bush," the more so as we perceive that the public press in Holland is beginning to dispute the justice of the British claims, so that the first offer having been refused, it is possible that a second may not be made. We are well aware that the Dutch may bring forward many arguments against the refunding of these duties which are not without weight, i. e. that the consumer in the first instance refunded the importer for the high duties; or that the English ought to have from the very beginning opposed the impost of higher duties, and not to have continued from year to year to pour their manufactures into Java, knowing as they did, that they must be subject to duties not warranted by the Treaty. We consider those interested lucky if they who carry on the negociation should consent to be content with the first offer of 6 millions of guilders.

---

We have, just before our paper going to press, heard of the arrival of the *Rob Roy* from Calcutta 28th January and Singapore 13th February. She brings us the *Singapore Free Press* to the 9th February and a *Singapore Chronicle* of 10th November From the shipping report we observe the arrival there of the *Lord Auckland* and the *Lord William Bentinck*.

The *Cowajee Family* had arrived at Singapore on the 12th February, and was to leave again for China on the 18th. She is said to have only 200 Chests of Opium for this port.

---

LITERATURE KILLS MANY IN CHINA.—From a Correspondent in China.—"One of my domestics this morning was called away by the sudden death of his grandfather, an old man, near eighty. The immediate occasion of his death was a journey of a hundred miles, in order to attend a literary examination. That such a man should attend as a candidate for literary honors, after perhaps nearly sixty years of unsuccessful application, shews at least ardour in the pursuit of his object.

The present case of perseverance, which proved fatal, and similar attempts are caused by a good-natured law made by the Emperor KIEN-LUNG, who was a great patron of old people;—he decreed that all Sew-tsae graduates of seventy, who would attend but once, and go through the exercises after that age, should receive the next degree, called Keu-jin, by a special act of Imperial favor, without any regard to the merit of their essays.

But this law, which originated in the most gracious intentions, causes annually, in different parts of the country, the death of several persons. The candidates at these examinations have to sit, whilst composing their essays, two days and two nights at a time, in little sentry boxes, where they cannot lie down; and surrounded by the smoke caused in cooking for them; and this is repeated thrice; so that altogether they sit up often, in extremely hot weather, six nights! This toil and inconvenience, not at all pleasant to young men, is frequently fatal to the old persons who attempt it.

And there is another circumstance which is far from being pleasing to a Chinese mind. No dead body can be carried out at the gate of a place dedicated to the Emperor, as these places and all public offices are. To do so, is deemed unlucky. The only course therefore to be pursued with those who die over night in the midst of the examination is, to dig a hole in the wall, and drag the corpse through it, when it is laid down outside the wall, with a mat over it, till the relations come and take it away.—*Indo Chinese Gleaner.*

NOTICE—is hereby given that the Undersigned will receive Sealed Tenders of Cash for Bills of £1000 (payable at thirty days sight, in sets of £200 each) on the Right Honorable the Lords Commissioners of His Majesty's Treasury on or before 12 o'clock the 21st Instant.

Macao, 6th March, 1837.

EDWARD ELMSLIE.
*Secretary & Treasurer to the Superintendent.*

P. S. Please to superscribe the word "Tender" on the envelope of the letter.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.787156 of a Tl. per cubit.
2nd ,, ,, 1200 do. & under 1600 ,, 0.722091 ,, ,,
3rd ,, ,, under 1200 do. 0.562341 ,, ,,

N B The cubit is 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 13 6 to $ 4320; 2d class from $ 3709 to $ 3780; 3rd class from $ 3709 and under. The Cumshaw or cent. Fee is paid by all vessels 1600 Taels or $ 2223. Linguists fee $ 1734 and Compradore's fee $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—Are without alteration.

COTTON YARNS.—Has rather improved, but our highest quotation is only obtainable for good quality and the lower numbers.

WOOLLENS.—Are a little more in demand, but without any advance in price.

METALS.—Very dull with a tendency to decline.

RICE.—Continues very low, and the weather is favorable for the next crop.

STRAIT PRODUCE.—The late arrivals have caused a decline in pepper, for which $ 9½ could be with difficulty obtained. BANCA TIN is still in demand, but STRAITS rather declining, and the inferior qualities would not sell within $ 6 a 8 of our quotation. Good BETELNUT would fetch about $ 3½.

COTTON.—The market is in the most depressed state, and there is little prospect of improvement, as parties all appear anxious to sell. One or two parcels of Timnevelly have been sold during the week a 9.8. Bengals have been disposed of as low as 9.5 a 10. For Bandas and other descriptions proportionally low, also the inferior Bombay kind. Of good Surat there is none.

The stock on the 1st was reported at.

| | | Bales. |
|---|---|---|
| Bombay | 22,027 deliveries in Februars | 2853. |
| Bengal | 28,188 ,, | 4003. |
| Madras | 16,809 ,, | 2176. |
| | 67,424 ,, | 9032. |

and two other ships are daily expected from each of the Presidencies.

OPIUM.—Our quotations are nearly nominal and rather on the decline. No decision has yet been made known regarding the admission of Opium, and parties seem hardly so sanguine as before, at least there is less speculation. Meanwhile we hear that arrangements have been made with the Mandarins to continue the old system on paying $50 a 60 per Chest, but they have not yet taken effect. We have no correct report yet of the touch of the new Bengal Opium—it is said to be about the same as last year, but both the Benares and Patna are considerably short in weight. The Malwa by the late arrivals is rather soft, but generally of good quality, the weight 102 a 103 catties. The *Rob Roy* is the last arrival from Bengal, and the *Motichund Amichund* from Bombay.

TURKEY remains without enquiry.

### EXPORTS.

TEA.—We have no alteration to make in our last week's quotations.

RAW SILK.—The better qualities continue scarce, and without reduction in price.

VOL. 2d. No. 28. CANTON, SATURDAY, MARCH, 18TH, 1837. No. 80.

## LITERARY,

*( From the Indo Chinese Gleaner )*

### MEMORABILIA OF HEANG CHUNG.

A statesman and general under the Ming Dynasty, A. D. 1460.

Chung's first entrance into public life was from the literary rank of Tsin-sze. He was attending on the Emperor Ying-tsung, when that monarch and his northern Court fell into the hands of the Tartars, by whom Chung was doomed to the menial office of attending on horses. This duty however afforded him the means of making his escape He stole two horses, and galloped off southward till both the horses were tired out, after which he travelled bare-footed seven days and seven nights, before he arrived at the territory in possession of the Chinese.

Chung next gave a display of his discrimination in a case in which he was the means of saving a number of people's lives. He was appointed to fill an official situation in the province of Canton, where a rumour of pirates and banditi existed. It was reported to the military officers that several hundreds of banditti were carrying off whole families from a village; and the army was about to act against them, when Chung interposed and said, it was perfectly incredible that banditti would burden themselves with whole families, the report must be some false alarm, which the event proved to be the case; and no lives were lost,

In the course of seven years he obtained considerable promotion. His post however was an unpleasant one, being infested by bordering banditi, who made descents for the sake of plunder. He stated to the Emperor that the object of these people, was not murder, but plunder; that to destroy them entirely would wound the feelings of benevolence, and on the other hand, to forgive them precipitately would excite feelings of disregard, and a want of respect: all that he asked of the Emperor was permission to act without reporting for a while; which was acceded to. He then returned from Court and spread a report that he was going to raise a powerful army that would exterminate the banditti; which stratagem had the desired effect, viz. that of bringing the borders to submission from an apprehension of impending danger.

Chung displayed his talents in ameliorating the condition of the people under his immediate government. The water for many miles around was brackish and unfit for use, which evil he remedied, by cutting aqueducts which conducted better water from other districts. In consequence of this act of benevolence, the people (blindly) sacrificed to him during his life time, as a god.

When the Chinese troops struggled ineffectually against the bordering Tartar tribes, he wrote to the Emperor, stating that the timidity of the Chinese soldiers arose from want of adequate authority in the generals. The men fear the enemy, said he, more than their own officers. Let it be decreed that all who RETREAT shall be put to death, and then their only chance of life will be in fighting the enemy. This proposal of his was acceded to.

Chung was afterwards appointed to act himself as a General, in which character he displayed great intrepidity and courage. He was engaged, in greater or less important battles, upwards of THREE HUNDRED TIMES, and was the means of suppressing very serious rebellions. He however discovered great severity, and but little regard for the lives of men, so that he was impeached to the Emperor and charged with having slaughtered unnecessarily several hundred thousands of lives.

He replied, "In former times Ma-yuen* when fighting the battles of his country in Cochin-China, where he died in the service, was accused of collecting pearls for himself, when the fact was that he only collected pearl barley to carry home to China: Tang-gae † who had long served and deserved well of his country, was at last, under a false accusation, inclosed in a cage, and died by the hand of the executioner; the one never received emolument and the other lost his life; it is my happiness to live under an Emperor, who can discriminate and prevent my becoming a succession to those victims of jealousy, malice, &c"—The Emperor stood his friend on this occasion and protected him. Again however, a conspiracy of eunuchs and the principal Minister effected his complete degradation, and he was reduced to the plebeian rank. The general murmurs of the Court and of the country caused his restoration, and the fall of his principal enemy He declined entering again into active service, but retired and spent twenty-six years in private life, when he died at the age of 82. He was a frank, intrepid, liberal minded, and independent man: well skilled in military affairs, and diligent in the business of Government.

* Ma-yuen, on setting out on one of his expeditions was attended by a splendid number by of all the officers of the Court. When he bade them farewell, he suggested the following piece of good advice to them. "All men in honor, are yet liable to be abased: as for you Gentlemen, if you wish to avoid degradation, keep a firm restraint upon yourselves in your high situations —endeavour to remember my plain address to you." The event turned out as he feared, with one of the leading Ministers "who being puffed up with his honors, brought misery upon himself." When taking leave of his friends on his last expedition, he said, "I have long feared, that it would not be my lot to die in the service of my country."—His army perished by the heat in Cochin-China, and he himself died in a mountain cave.

† Ma-yuen and Tang-gae both lived during the 2nd century. (Vide Sing-poo.)

IMPERIAL PLOUGHING.—A Yu-she has accused the officers of Court for negligence at the Imperial ploughing match. It has long been a custom in China, derived from high antiquity, for the Emperor and the nobles of his Court, to go out into the fields, personally, once every year, and plough a certain piece of ground. The Emperor ploughs nine furrows, the princes of the Empire five, the nobles four, and so on in rotation, according to the various gradations of rank. At the late annual ploughing there appears to have been great negligence on the part of the nobles. When his Majesty had performed his share of the ceremony, he departed, instead of ascending the stage to witness the performances of his nobles, as was usual. The princes then did their part, and also departed. After which, the civil officers first dispersed, and the military officers, staring for some time at each other, ploughed but one furrow, and went away. "All which," the Emperor says, "was extremely negligent and improper. The princes, although they did no more than their duty, yet by their exactness in the performance of it, shewed that they had a respect for ancient ceremonies for which they deserve praise and reward. But as to the nobles, if at the annual ploughing they could be thus careless and negligent, just because I did not personally inspect them—how much more sluggish and negligent will they be, when placed in offices of trust in various parts of the Empire: let them by no means escape severe punishment. Let the Censor who accused the military officers be rewarded by increase of rank—but where is the Censor who should have accused the civil officers? let the nobles of the Court examine into this, and if it shall appear that the Censor of the civil officers was there witnessing the abuse of the ceremony, and neglected to report, let him be tried for the offence: but if it shall appear that he himself first decamped, and did not wait to see the ceremony performed, let him be more severely dealt with."

### CAPT. HORSBURGH.

*From the Singapore Free Press 6th February.*

As we are now publishing from the Asiatic Journal for last September, a brief sketch of the industrious and useful career of the late lamented Mr. HORSBURGH, the occasion seems to invite us to return, as we intimated our intention in a former number of doing, to the proposed scheme for erecting a Light-house, or series of Light-houses, as well in commemoration of the name and services of that eminent hydrographer, as to impart additional value to the important information which he has communicated to the world. Our countrymen at Canton, among whom the desire originated, are, we think, entitled to claim not only the merit of merely proposing a public tribute to his memory, but also of suggesting at the same time a plan in itself of the highest utility, and calculated to ensure success by the interests which it can scarcely fail to engage in contributing to its accomplishment. The primary intention, in fact, and secondary object become so intimately blended, that it cannot be said to be more a plan to confer honor on the dead, than to provide for the safety of the living by the important aids to navigation which it contemplates and embraces. The project however, as it derives its origin from the services rendered to mankind at large by Mr. HORSBURGH, will no doubt, even continue when carried into effect, to be associated with his name; and the HORSBURGH LIGHT HOUSES may thus also serve to proclaim to a future and distant generation the esteem in which exertions in the cause of humanity were held in this, and that the example of a benefactor of his age has not been in vain. But calculations of a more business-like nature here interpose, and in recalling us from any dreams of the future remind us that, in imitation of the sagacious Mrs Glass while engaging in a much more humble undertaking, we must begin with the beginning and "*first catch*" our light-houses. Towards the attainment of this grand object the sums already subscribed in Canton promise well, amounting as they do to about Sp. dollars 4,200 by the latest accounts; but this we trust and believe is only a much-as around which contributions worthy of the name and cause which inspired the undertaking are yet destined to accumulate. The liberal spirit evinced in that quarter is well worthy of imitation, and we hope that the earnest feeling with which the Canton Committee appear to be imbued in furthering the undertaking will extend itself to those whom they have appointed to co-operate with them in other places—"in every quarter of the globe," as they themselves say, "from whence the pages of the *Directory* have pointed the way to the East." Projects of this description require to be pushed forward with vigour by those to whom the care of advancing them is entrusted, and nothing, as we believe experience amply testifies, is more conducive to their failure than that long delay in setting about their accomplishment which affords entrance to the languid indifference which so often succeeds an opposite tempest of mind. We should not of course recommend any degree of haste inconsistent with due enquiry on *every* essential point—but the most eligible sites on which to construct a chain of lights in this neighbourhood would no doubt be determined among nautical men, acquainted with the intricacies of its navigation, without dispute or difficulty. Respecting *Pedra Branca*, which has been proposed or rather fixed upon for one, there is not likely to be any difference of opinion—and we think the next step ought to be to settle the other points on which it would most conduce to the security of navigation in the Straits to have lights established. A very competent judge residing in this Settlement has we understand suggested a floating light on the 24 fathom bank, on the North Stands—and a stationary light-house on *Bara* Island, as sufficient to render the navigation of the Straits of Malacca easy to all—an opinion which consists with what we have ourselves before heard expressed by others. In addition to these, a light on *Pulo Sapata*, in the Chinese Sea, as suggested by a correspondent of this paper some months ago, would prove of the highest importance, as the thick weather and currents which prevail in the North East monsoon, place vessels running down from China at that season of the year, in imminent danger of being wrecked upon the coast of that Island. The establishment of a light house in that situation may however be from some causes impracticable—and it is of course to those quarters where their feasibility is beyond all dispute that the public attention should in the first place be directed.

The next important question connected with the establishment of light-houses in the Straits is of course the expenses attending their erection and maintenance. On this point we are without any guide—but we have heard the cost rated at about 7,500 dollars for one on *Pedra Branca*—3,000 Drs. for that on *Bara* Island—and 10,000 Drs. for the floating light on the North Sands These however are mere rough estimates, framed upon no particular data and, we should say, rather under than above the mark. But no just approximation can we presume be made without reference to those whose particular avocation it is to superintend such undertakings—more particularly in the case of a floating light. It is desirable, we should think, that estimates by a competent person should be laid before the public with as little delay as possible; and every requisite means taken to shew within what limits the undertaking may be finally and successfully completed. With respect to the expenses of maintenance and superintendence after the light-houses should be constructed, there is no doubt we believe that the Government in India would provide the requisite funds by imposing a tonnage duty, upon the numerous vessels which annually pass through the Straits and partly perhaps by a small tax upon the Opium Trade, which to such an immense value is yearly conveyed down the Straits of Malacca. The tonnage duty on vessels would require to be very moderate in order to provide a very considerable fund for that purpose—and would besides be more than fully made up by saving the time and trouble of nightly anchoring as they now do on a voyage down the Straits—that being a precaution which the presence of lights on the places mentioned would enable them with the utmost safety to dispense with. To raise a sum by subscription which would suffice as well to construct light-houses on the sites above specified, as also to leave a surplus of which the annual interest would be sufficient to defray the expenses of keeping them up, must we imagine be beyond the expectations even of the most sanguine—if that would require, as we believe it would, not less than an annual outlay of Sp. drs. 5,000 and probably more. We entertain, however, no apprehensions on that score —the establishment of these lights would of course of such inestimable advantage to shipping that a general voluntary contribution for the purpose from that source would, we are sure, not be wanting, even if Government should not interpose with regulations to secure it.

### SINGAPORE CHAMBER OF COMMERCE.

We are happy to have it in our power to announce that a meeting to establish a Chamber of Commerce at this Settlement was held yesterday at the Reading Room, when the proposal met with general approbation, as will be seen from the following Report of the proceedings, which we have received for publication. Another meeting to make the measure final will be held as soon as the Committee, which has been appointed to that task, has prepared a series of Regulations for the use and government of the Chamber.

The following is a minute of the proceedings referred to, viz.—

"At a Meeting of the Merchants, Agents, and others interested in the trade of Singapore, convened by circular, and held at the Reading Room on Wednesday the 8th Feby. 1837, for the purpose of taking into consideration the propriety of establishing of Chamber of Commerce at this Settlement.

A. L. JOHNSTON, Esq.

IN THE CHAIR.

It was proposed by ELLIS JAMES GILMAN, Esq., seconded by R. C HEALEY, Esq., AND UNANIMOUSLY RESOLVED,—

1st.—That an Association be formed under the designation of "THE SINGAPORE CHAMBER OF COMMERCE," for the purpose of watching over the commercial interests of the Settlement.

Proposed by E. BOUSTEAD, Esq., seconded by W. S. LORRAIN, Esq.,

AND UNANIMOUSLY RESOLVED,—

2nd.—That all Merchants, Agents, Shipowners and others interested in the trade of the place, be eligible to become Members of this Association.

Proposed by THOS. SCOTT, Esq., seconded by J. S CLARK, Esq.

AND UNANIMOUSLY RESOLVED,—

3rd.—That a Provisional Committee be now appointed to draw up Rules and Regulations for the government of the Chamber, and to report thereon to a general Meeting to be convened as soon as the same are prepared.

Proposed by W. S. DUNCAN, Esq., seconded by LEWIS FRASER, Esq.,

AND UNANIMOUSLY RESOLVED,—

4th.—That the said Provisional Committee consist of the following five gentlemen:—

EDWARD BOUSTEAD, Esq.
THOMAS SCHILLING, Esq.
ALEXANDER GUTHRIE, Esq.
ELLIS JAMES GILMAN, Esq.
WILLIAM RENSHAW GRANT, Esq.

(Sgd.) A. L. JOHNSTON, *Chairman.*

(Sgd.) E. J. GILMAN, *Secy.* ( pro. tem. )

## CORRESPONDENCE.

### THE VICTORY.

TO THE EDITOR OF THE CANTON PRESS.

Ship Victory, Manila Bay March 4th 1837.

Dear Mr. Editor,

I feel much obliged by your insertion of a portion of the illfated Victory's log, but through the omission of the column relating to the pumpwell and other nautical remarks, the narrative is not in such *ship-shape* order as I could have wished, had I been at hand to aid you in the task.

For example, at 10 A. M. on the 7th of January reef'd the fore sail, at 11.30 wore ship At noon handed the Courses and were then under close reef'd fore top sail and treble reef'd main top sail. on the larboard tack, blowing a hard gale at N.N.E. with severe gusts and a very high confused sea, which swept the decks and broke over the Ship in every direction. At 2 P. M. on the 8th. the gale still increasing, and shipping so much water as to render it difficult to keep the pumps at work owing to the butts and gang-casks continually breaking adrift, and the Ship straining and labouring excessively, furled the fore top sail, and hove to under treble reef'd main top sail.

From this time, both pumps were going with but little intermission, when at 10.30 P. M. the well gained rapidly, a sudden leak was announced with from 2 to 4 feet water in the hold; turned the hands out, set the reef'd fore sail and close reef'd fore top sail, and bore up for the coast of Luconia: by midnight the guns, a chain cable empty butts, water casks, and some cargo had been thrown overboard, the leak still gaining upon us.—It was about this time when a most tremendous sea broke over the ship, laid her on gunwale under, and threw the helmsman over the wheel and seriously injured him; by some unaccountable cause every spoke broke short off the wheel and but for the celerity with which the relieving tackles were manned, the ship must have broached to; the gunner was also much hurt, and five of our best hands were from this moment required to man the relieving tackles; this awful sea carried away the larboard quarter gallery, stove in the starboard quarter boat, washed away the waist bulwark and the heavy strain on masts and rigging broke two lower shrouds. We then scuttled the deck abaft the caddy and cast overboard stores and cargo indiscriminately. At 4 A. M. the leak had increased to 6.6 and was still gaining against every effort at both pumps.

The launch and spars were unshackled, hatches battened down and the stern and inner quarter gallery deal lights being well secured, rousted the heavy mess which continually broke over us and laid the lee gunwale under, but the constant rush of water on deck being occasionally beyond what the ports and scuppers could deliver, tended materially to impede the working of the pumps, and at noon with 9 feet in the well and about 10 leagues from the coast with as much sail on the ship and masts would bear, it was very evident our only hope for safety rested on gaining as speedily as possible, a weather shore and smooth sea. At 2 P. M. the ship betrayed every indication of becoming water logged, steered wild and rose with less

buoyancy to the sea, and the Lascars, who behaved very well throughout, were by t is time nearly exhausted.—Cut away the lee bower anchor and renewed every exertion to save the ship and work our way to the main hold in readiness to bale.—An anxious look out was now kept for land, but the weather was so hazy that fires and lights on the shore first indicated our near approach, at 8 P. M.

And now when all our exertions were cheered with a prospect of speedy relief and safety, one of those disgraceful occurrences took place which too frequently sully the maritime character of our country and involve ships, lives, and property in imminent peril. Some of the European had plundered the cases of gin when they were being thrown overboard, although a vigilant look out was stationed, and whilst spelling the pumps at 8 P. M. three of these scoundrels were exceedingly riotous, and Thomas Jeffery, the stoutest man on board, assaulted the Lascars at the lee pump in the most furious manner, and set the officers and myself at defiance. I never was so thoroughly disgusted with the conduct of men calling themselves British Seamen as at this moment, and most assuredly had any attempt been made to rescue the ringleader, I should not have hesitated an instant to inflict the severest example; however the shew of arms forced the prisoner in irons and deterred his shipmates.—The least reflection will convey conviction on every person's mind as to the fatal consequences which might have ensued had this mutinous and disorderly conduct taken place the night before. But nothing can extenuate such unmanly behaviour, for the plunder was committed, and the riotous excess was in train, before the peril of our situation had been overcome. Why are such crimes suffered with impunity? why is the merchant service of England without a code of vigorous and efficient maritime laws? These are questions which every commercial, and every naval man startle at, but which they have not yet grappled with with becoming energy & unanimity! and I say again, the neglected and unprotected condition of the merchant service of England casts a reproach on the Government of our Country. There are many serious cases of mutiny on board ships that never meet the public eye, but those which have been published to the world, are sufficient for the evil thereof, and loudly proclaim that our mercantile Navy is in a state of degradation and decline, exposed to the wily schemes of disaffected and mutinous seamen, the luring designs of pettifogging lawyers, and the tender mercies of a jury who have no defined law to guide them one way or the other! A very serious mutiny occured on board the ship *Amelia Thompson* on her present voyage, and every harbour East of the Cape of Good Hope, can bear witness to other cases of the kind. The commercial Navy of the United States of America is governed by maritime laws and has the benefit of Marine Courts competent to adjudge and condemn, and thus within the jurisdiction of every port, offences meet with that speedy and ready redress which the welfare of all commercial enterprize necessarily demands; masters of American Vessels have the power to inflict corporal punishment, their authority is defined and recognised by their Government, whilst Great Britain, first and greatest as a Maritime power launches forth her fleets and ships without adequate protection and support, and involves all to whom respect and obedience are due, in one chaos of doubt and hazard, through the difficulties incurred by legal proceedings, and the liabilities which result therefrom!

Pardon Mr. Editor, this long digression, but the question is one which discipline demands, and humanity requires, and it should be speedily investigated and thoroughly established under the dictates of a just and impartial enquiry and before a competent tribunal!—

I will now resume my narrative of the Victory and our disasters, and had not this disgrace attached to some of our crew, I should ever reflect with pride and satisfaction at the zeal and energy by which surrounding dangers were overcome, conscious as I am, that no difficu ty impeded our exertions or checked every ready resource.

> "Though perils did
> Abound as thick as thought could make them, and
> Appear in forms more horrid," yet unpronous duty
> Urged us on, and hope unshaken,
> Never yielded to despair!"

Having restored order, all hands were stationed for the night, and gliding along the coast with a smooth sea, we gradually gained upon the leak till 10 P. M.; however to shew our safety depended on smooth water, several intervening hours of variable winds and a chopping sea, filled the decks every lurch and roll, and plainly told that the ship had settled down, as we had still 7 feet water in the hold at 8 A. M. notwithstanding incessant working of both pumps; at noon on the 9th 6 feet in the Well; Point Capones bearing E. N. E. 3 or 4 with light winds and a smooth sea. During the 10th and the whole night of the 11th, we were beating into, and across, the Bay of Manila against a strong breeze under double reefed top sails and reef'd main sail, and anchored off the city at 10 A. M. on the 11th, which completed four days and nights of incessant labour, and most of this time every officer and man were continually drenched, those amongst us who had any clothes remaining found them wet, in fact there was not a dry spot in the whole ship On the 12th apprehension of the ship being on fire roused us again, and I verily believe that the excessive heat found in the hold would very soon have produced spontaneous ignition; indeed when the several Commanders of American Vessels came on board, they were so fully assured that we were on fire, that I was urged to slip and run the ship on shore, and here I must do justice to the prompt, zealous and friendly assistance and attention I received from them and Captain Wildridge of the Runnymede upon this, and other occasions. Thank God we have escaped all these perils, and I hope every one belonging to the *Victory* shares with me in feelings of gratitude for our safety! I am happy to say the cargo has turned out in much better condition than we had reason to expect. Warehousing the betel-nut has completely recovered what was thought had perished.—Throughout all those operations and by the zealous application of my agents, we have experienced the utmost liberality from the Government, restrictions have been withheld and customs have been abandoned to serve our views in a very generous manner. We are proceeding in a due course of legal measures for the final disposal of the *Victory* and this stage of our affairs requires the patience of Job, but what cannot be cured, must be endured; with sound timbers and a staunch frame as attested by the surveys, the Spanish-built with ready means can make a good Ship of her, but to hazard repairs on my own responsibility would be incurring the risk of heavy expences, and waste of time, and prove highly detrimental to the interest of all parties concerned.—I am Mr. Editor.—Your's truly.

CHRIS. R. BIDEN.

P S. A survey has been held on the Cotton at the Custom-house which was found so completely saturated with salt water and many of the bales burst and internall in such a state of burning heat, that it became necessary to open, dry, and restrew the whole.

---

H. B. M's. COMMISSION.

Sir,—I hear it reported abroad that the Viceroy's answer to Capt. Elliot's application to come to Canton has been approved of by the Emperor. It is therefore possible that we may before long again see the Commission among us in Canton.

It is on every account most desirable that a step of such importance to the interests of all here should not be rashly taken. The Chinese are forcing away foreigners, some of them British subjects. If the Commission is not prepared to sanction this; and, yet more, should it's members think it their duty to oppose it, their coming will place them and us in a curious position

It is known that measures are in progress against the Linthi fleet, and that the local Government has positive orders to put an end to this part of the trade. Are the members of the Commission prepared for this knotty point? Or is the presence of a British authority in Canton to save ion whatever the Chinese may do?

Deep interests are involved in these questions, and some others; as in the case of a homicide at Whampoa or Canton; and it may be questioned whether any so great good can be hoped for from the coming of these Gentlemen to Canton, as to outweigh the risk of the consequences which may follow

At any rate, I would suggest whether the Merchants and all other British subjects should not be first consulted. It is their interests which are at stake, and it would be, methinks, scarce fair to make them undergo dangers of which they disapproved If on the other hand it should be proved that it is wished that the Commission should come to Canton, it's powers and the objects of its coming being first understood, a great deal of awkward responsibility will be removed from the a, and in case of things, as probable, turning out badly, the commercial community will have but itself to blame.

If you consider the above worth a corner in your paper and a few remarks *pro or con*, it will oblige Your humble servant.

March, 17th 1836. A BRITISH SUBJECT.

---

TO THE EDITOR OF THE CANTON PRESS,

Dear Mr. Editor,

I beg you will have the goodness to give this a place in your paper, and will feel obliged if you will inform me through the medium of your columns, if I can obtain back from the consignee (of a ship now in Whampoa) the amount of Duty I have been forced to pay on goods brought up here absolutely by the negligence of the commander or the commanding officer.

My Bills of Lading were signed for goods deliverable in Canton, with instructions from the owner to ship them for elsewhere in certain cases, to effect which I obtained an order from the consignee; requesting the commanding officer to *keep the goods on board until called for*. The officer acting directly against the face of this (Yankee) Ordr, has sent up the goods, and I have to pay a heavy duty on the same! Pay, how am I to set in the affair?

Your's obediently,

NO YANKEY.

Canton, 14th March, 1837.

P. S. I hope this will be sufficient to hint at some of our *now a day's* Consignees, and *called by name* Captains.

---

# CANTON PRESS,

March 18th 1837

We published some time ago the Viceroy's report to the Emperor concerning H. B. M. Superintendents at Macao, favorable to Capt. Elliot's application to be allowed to come to Canton. We now hear that that report was received in Pecking on the 14th of the 12th moon, (23th January); the Imperial answer to it is dated the 18th of the first moon (2nd February and was received here on the 8th of the 2nd moon (14th inst) The Imperial Edict grants the request of the Governor of Canton, that Capt. Elliot should be allowed to reside at Canton, and we may consequently expect to see H B. M. Commissioners arrive here very soon.

Seven members of the Committee of the Chamber of Commerce are now absent, and the public is interested to know, how these vacancies have been filled up; it would be desirable that the Committee should inform the public of the names of the new members, which has not hitherto been done.

We understand that the Governor still persists in his resolution to expel from Canton several of the older foreign residents as named in one of his former Edicts, and it is probable that they will be obliged partially to obey. It is somewhat singular that two thirds of the then named individuals, have, actuated of course by circumstances not connected with the Governor's order, already left Canton. This coincidence with the commands of the local Government will no doubt by them be construed into acts of laudable obedience.

In another part we give Captain Biden's letter detailing the circumstances under which the *Victory* was oblige l to put into Manila.

*Fire at Macao.*—The day before yesterday, the cannon from the forts announced that a fire had broken out in the town, and some Chinese houses in the Prava Pequena were soon observed to be burning. Our people immediately went to the spot, and their exertions arrested the progress of the flames, which were soon subdued without spreading to the neighbourhood. After the fire had been put out, a scuffle took place, in which the Alferes J. M. S. Britto, and three others of our people, and two Chinese or perhaps more were wounded, not only on the spot of the fire, but in other streets also from the attacks of some straggling slaves on the latter. Our Governor, who went to the spot, seeing the riotous conduct of the rabble, directed that the Alderman in charge of the Chinese affairs should immediately address a letter to the Mandarin demanding satisfaction and punishment of the rioters; and while this letter was being drawn up, a message was sent to the mandarin complaining that our good offices should have met such bad returns from the Chinese. The Mandarin sent his secretary and other confidential servants to offer satisfaction to the Governor, promising that he would do it in person on the next day, and asking the Governor to withdraw the troops and slaves from the street. Thus public tranquility was restored, every body went home, and the official letter was sent that same night.

Yesterday the Mandarin visited the Governor and thanked him for the assistance given at the fire, and said after many excuses for what had happened, that he could not have foreseen this disturbance; it was only afterwards that he knew it had been caused by vagabond Chinese, who some three days ago had behaved in the same manner at the Chinese bay, that these vagabonds had then fled, but returned; but that he, the Mandarin, would institute a rigid examination, and punish severely the guilty parties.

We congratulate Macao that this disturbance has so soon been quelled without compromise of our national dignity; and this we owe to the presence of mind and prudence of our Governor. *Translated from the Macaista Imparcial.*

The above account of the fire does not explain the cause of the riot that followed, which was that several Portuguese and Foreigners, in order to prevent the spreading of the flames, began to pull down some of the adjacent houses, which the Chinese would not suffer. We hear it said that the Governor's presence was but little heeded by the Chinese, whose violence of attack was such that the Garrison, one of it's officers having been wounded, would have had to withdraw, had not the Custom-house slaves been ordered to their assistance. The Governor himself was threatened by the mob, and some of the foreigners would also have suffered in their skin more severely than they did, had not the length and rapidity of their legs soon carried them beyond pursuit of the hostile Chinese.

A fire broke out in the suburbs of Canton at about midnight on the 13th. It began at the northern part of Sha-ming, distant about a quarter of a mile from the foreign Factories, but the wind being southerly, the safety of these was not endangered. It broke out either in or near a fire work shop, and burned with great violence, spreading into and destroying several oil and tea-ware-houses, but was apparently nearly got under at about 2 o'clock, when it broke out afresh with great violence, having attacked another Oil-shop. Soon after it exhausted itself from want of fuel, the houses near having been pulled down. We had opportunity to observe that the engines from bad management are not near so efficient as they might be made, it being now the practice of the firemen to play the water high into the air, whence it descends so thicker than rain into the burning houses, and of course doing very little or no good It would be well to point this out to the Chinese in charge of the engines.

We give in this paper a translation of a document issued by the Mandarin of Macao against the shipping of Cumsingmoon, which seems to have drawn upon it the particular animadversion of the local Government, and it is generally spoken of as probable that some serious demonstrations are to be made to prevent it for the future. The threat of placing cannon at different military and naval stations near Cumsingmoon, seems for this once not to be an empty one, and we hear it said that several positions commanding the Cumsingmoon, are being fortified. We also hear mention made of five ships about being constructed to aid in destroying the audacious foreigners, and of unusual activity in the naval department, the complement of which is to be made up with Salt-Junks, which for that purpose have been surveyed by order of the Vice-roy.

The *Cowasjee Family* has arrived, and by her we have received Calcutta papers to the 20th January and the Singapore Chronicle to the 11th and Free Press to the 16th February. We extract the following from the latter paper.

"The fate of the Bombay ship *John Fanneman*, Capt. Wilson, for whose safety fears have for some time past been entertained, is at last put beyond a doubt. Yesterday the second and third Officers, and forty-three lascars, belonging to that unfortunate vessel arrived here by the Cochin Chinese ship *Lirfang*, from *Quin-Hon*, bringing accounts we are sorry to state, of the loss of the *Fanneman* on the night of the 18th Dec. on the *North Shoal* of the Paracels in the China Sea. The whole of the crew, with the exception of the chief-officer and four lascars reached *Quin-hon* in safety in the boats, where they were nearly five weeks, and Capt. Wilson, the fourth Officer and the remainder of the crew are hourly expected here in another Cochin Chinese vessel. We learn with pleasure that during the whole of their stay at *Quin-Hon* they experienced the kindest treatment from the Cochin Chinese Fuller particulars connected with the loss of the vessel will no doubt transpire after the arrival of Capt. Wilson himself."

We have since learnt that the *Cowasjee Family* spoke the other Cochin-Chinese vessel but a few days sail from Singapore. Capt. Wilson and the remainder of the crew were on board, but it is with much regret that we learn that the chief mate, Mr. Shakespeare, a very promising young man, was drowned in attempting to save himself from the ship.

In another column will be found a letter signed "No Yankee" which we have admitted merely as touching a question important to our commercial community, on which we believe there has been frequent difference of opinion. We are not aware of who our correspondent is, and therefore refrain from giving an opinion upon a mere *ex parte* statement, but we totally disapprove of the manner and spirit in which the letter is written; the writer's signature does not recommend him to us, nor does another remark, evidently evincing little friendship for our American neighbours, in which we beg to assure our readers, we do not participate, nor any one of right feeling, we believe, at the present day.

Our Correspondent "A British Subject" has addressed us on a topic which well merits the deepest attention of those interested in the China trade. We have above already stated that the Emperor has consented to the Superintendents coming up to Canton, and we earnestly hope that every step they take will be maturely considered, so as not to involve the property and even lives of the British now resident here. We cannot but suppose that H. M. Superintendents are acting up to orders received from the Home-Government, in coming to Canton, and if such is the case, we see not how they can, as our Correspondent suggests, take the sense of the British residents as to whether their presence here is desired by them or not. If however the Superintendents act on their own responsibility, they ought to be very careful how they put into execution a plan, which it cannot be denied is fraught with great dangers. A very serious objection to the residence of the Superintendents in Canton appears to us to be, that coming under no other powers than those vested in Lord Napier, the Chinese will not treat his successors more respectfully than they treated him, nor will they scruple, should any occurrence render the official interference of the Superintendents necessary, and disagreeable to the Chinese, to send them away as they did their predecessor, knowing that they have in that instance done so with impunity, which may again be the case; but worse than this, we fear that in any case of disturbance or other serious disagreement between the British and Chinese, the latter will look upon the Superintendents as hostages by which they may be enabled to bring the former to their terms.

We see these and other disadvantages possibly resulting from the Superintendents' visit to Canton, but no advantages likely to be derived, to balance the good against the evil.

---

## SHIPPING AT CUM-SING-MOON.*

EDICT FROM THE GOVERNOR.

I, Tang, President of the military board, Governor of the two Kwang provinces &c. again issue an edict on the subject of the merchant vessels of the various barbarian nations anchoring at Cum-sing-moon under the jurisdiction of the Heang-shan-yuen, which it is authenticated is strictly prohibited The ancient laws upon this point are inimutable stern and conclusive.

Formerly when vessels anchored there, it was by chance when they were driven there by stormy weather; but of late years their number has greatly increased, and they congregate there merely to smuggle and cheat the revenue; they are thus constantly causing disturbances and daringly setting the laws at defiance.

I, the Governor, have received an Imperial mandate to enquire well into this matter and to carry the laws into effect against offenders.

Now at Cum-sing-moon there are several respectable families living, who being greatly alarmed at the disturbances caused by the crews of the ships anchored there, when they went on shore, unanimously petitioned their magistrates to protect them by exacting the laws against the barbarians.

I immediately instituted enquiries, but found the ships had all left the place; but fearing the return of some who might be ignorant of the prohibitory laws, I, in the 12th moon of last year issued an edict on the subject, a copy of which I ordered the Hong merchants to transmit to each of the barbarian traders.—This is on record.—

It appears upon examination that the barbarian traders have long been permitted to come to Canton. They ought to be truly grateful to the Great Emperor for this benificent indulgence.

I, the Governor, sincerely wishing to guide and nourish the outside barbarians, in the close of last year issued an edict for their instruction. Most of them having good principles, I supposed they would have understood and obeyed it. But all are not alike gifted; and altho' the number of the obedient is not small, yet I apprehend that amongst them there may be found some ignorant fools who, esteeming my edict as mere empty words, heed it not and continue to defy the laws.—Who then can be responsible for their not returning to Cum-sing-moon?

I have therefore transmitted orders to the Admiral to station several men of war in and about the waters of Cum-sing-moon which are to be under the orders of himself and the Heang-shan Hoo and Yuen.

They are vigilantly to cruise about and guard the place.

Having thus acted in this affair I forwarded a duly prepared report to His Majesty.

That none may say they do not understand, I again and for the third time, issue an edict; let them not therefore imagine I am trifling with them.

In consideration of the barbarians coming from afar I do not rule them with stern majesty.

I again issue this edict, enjoining the Hong-merchants to explain it to the foreigners, that they may order their ships now here to obey the laws. Those which hereafter arrive may either come up to Whampoa and discharge their cargoes, or remain at Lintin. But Cum-sing-moon being in the inner waters they must not be permitted to enter. By acting thus the laws will be respected, disturbances prevented, and peace and harmony be enjoyed by both natives and foreigners.

But if there be any one so regardless of this edict as to enter the Cum-sing-moon harbor, I the Governor will assuredly visit him with the utmost rigor of the law. The men of war stationed there shall have instructions to expel such intruders by force. I will not allow it to be said that I am merely playing and will allow them to do as they like.

If the Hong-merchants pass over this edict as if it were of no consequence, and fail to impress its contents on the foreigners, most assuredly their punishment will be truly awful.

I will say no more to them.

Let the foreigners also weigh well in their minds the subject of this edict, lest hereafter they have no room for repentance.

A special Edict.

Taou Kwang, 17th Year, 2nd Moon, 10th day,

March, 16th 1837.

* We must apologise to our readers, should this translation be found to be too hastily made, for which the few hours before our paper went to press, ere we received the Chinese document, must account.

NOTICE.—The parcels and letters forwarded from China to Batavia per the Colonial Dutch Ship "JOHANNA and SUSANNA" Commander B. BRANDT, have all been lost, in consequence of the Ships boat, in which the Captain was going on shore taking with him the letters and parcels etc: etc: (after a passage of ten days), having been upset at the entrance of the harbour.

M. J. SENN VAN BASEL.

Canton, 16th March 1837.

NOTICE—is hereby given that the Undersigned will receive Sealed Tenders of Cash for Bills of £1000 (payable at thirty days sight, in sets of £200 each) on the Right Honorable the Lords Commissioners of His Majesty's Treasury on or before 12 o'clock the 21st Instant.

Macao, 6th March, 1837. EDWARD ELMSLIE.
*Secretary & Treasurer to the Superintendent.*

P S Please to superscribe the word "Tender" on the envelope of the letter.

## SHIPPING INTELLIGENCE.

ARRIVED.—Dutch *Pleiades*, Berg, from Lombock Brit. *Hero*, Hughes, from Calcutta, January 16th. *Countess of Durham*, Todd, from Samarang. *Falcon*, Middlemist, from London and Java. *Cowasjee Family*, Wallace, from Calcutta, left Sandheads 31st January and Singapore 18th February. Amer. *Oneida*, Tripp, from Manila.

PASSENGERS.—Per *Cowasjee Family*, Messrs. C. B Adam and J. Fergusson.

SAILED or DESPATCHED.—Am. *Henry Clay*. Gilman, for Manila Brit. *Rob Roy*, Mackinnon, for Calcutta. Amer. *Hanover*, Leach, for Batavia. *Delight*, Storey, for Singapore *Roman*, Benson, for New-York. Brit. *Inglis*, Wise, and *Euphrates*, Bucklain, for London. Amer *Neponset*, Scobie, and *Sarah and Amelia*, Gardner, for New-York. This day for Calcutta, the *Cowasjee Family* the *Ruby* to sail in a few days.

PASSENGERS per *Roman*, Mr. and Mrs. Edward Butler, and Mr. P. A. Cany. Per *Inglis*, Messrs J. C. Cousens and J. H. Middleton Per *Cowasjee Family;* Messrs Bell and Lindsay.

The *Victory*, C. Biden, has been condemned at Manila. The *John Bunderman*, hence to Singapore, was lost on the North Island of the Paracels. The chief officer and some of the crew drowned; the remainder reached the Cochin-Chinese coast whence they were sent to Singapore. The *Polonais* we notice, bound here, which put back to Singapore, struck on a shoal "not laid down in any chart," near Balabac.

We hear that letters received from Manila state that the Fairy has at last been found scuttled and sunk in deep water with her masts and even sails standing, in or near the bay of Santa Maria in the Island of Mindanao. We also hear that one of the Manila-men belonging to her, who has been imprisoned at Manila and examined, states that not the Manila-men, but the Lascars were the parties who murdered Captain Mackay; a story which, considering the circumstances attending the commission of the crime, deserves no credit whatever. We hope soon to hear further particulars, and that the hopes of more of the guilty party being arrested, as is now anticipated, may be realized.

The *Lord Lowther*, *Ada*, *Emma Eugenia*, and others are loading for Great Britain.

LATEST DATES from ENGLAND 31st October P *Morrison*. UNITED STATES 16th Oct. P *Benares*. CALCUTTA, 31st January P *Cowasjee Family*. SINGAPORE, February 17th P *ditto*. JAVA, 31st January P *Falcon*. MANILA 4th March P *Charles*. BOMBAY, 3rd January via Bengal.

VESSELS EXPECTED.—From the STRAITS, *Cecilia*, *Peloncle*, *David Clark*. ENGLAND, *Sarah Berry*, *Psyche*, *Cassador*, *Formidable*, *Hindu*, *John Dugdale*. JAVA, *Mercury*, *Ann*. BENGAL, *Hyder*, *Lady Kennaway*, CALCUTTA, *Sir C. Malcolm*, *Heroine*, *Salsette*. MANILA, *Don Antonio*. BOMBAY, *Cornwallis*, *Andover*, *John Fleming*, *Great Tarrant*, *Lady Grant*, *Governor Phillips*, *Neptune*.

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

NOTE. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Camblets, Saltpetre, Ginseng* and other Goods, on which the duties at Whampoa are high.—Ships with *Rice, Cotton* &c. sometimes discharge at Macao or tranship their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The shipments outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary Stationery, Cutlery Crockery ware, &c.*, for foreigners consumption, are sold at Auction duty paid.

*Note. Alum*, and *Cassia* are procurable cheaper at Lintin, Macao, &c.; and *Raw Silk, Silk* piece goods &c, are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

Note. Above rates are from 20th Oct. to 20th April annually; during remaining 6 months the premiums are somewhat higher. Risks on Blocks are $ 9 per Cent per annum, $ 4½ for 6 months, $ 2½ for 3 months and $ ¾ per month.
The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874756 of a Tl. per cubit.
2nd „ „ „ 1200 do. & under 1600 „ 0.7221091 „ „
3rd „ „ „ under 1200 do. 0.5062341 „ „

N B. The cubit is 14¼ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 4300 to $ 4320; 2d class from $ 3700 to $ 3790; 3rd class from $ 3700 and under. The Custom or Present Fee is paid by all vessels 1600 Tsels or $ 2223. Linguists fee $ 173½ and Comprador's fees $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Receiden ships are charged only about $ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—The better qualities of Longcloths bleached and unbleached, continue in fair demand.

COTTON YARN.—we have not to notice any improvement in price in this article.

WOOLLENS.—but few transactions in these have come to our knowledge during the week; they continue very dull. Our quotations for *Longells* are 25 cents lower than before.

STRAITS PRODUCE.—PEPPER is falling, in consequence of several considerable importations. TIN. None but the best Straits Tin is in demand; the second quality would not fetch $ 20, the market being fully supplied with China tin.

LEAD.—is rather declining.

COTTON.—A further decline has taken place from the anxiety of holders to sell before further arrivals. A lot of about 1000 Bales of good Bombay has been sold within this day or two at 9. T. @ 9. 8., and several parcels of Madras and Bengal at not better rates than our quotations.

OPIUM.—For the Bengal drug there has been little or no demand for the last week. In Malwa considerable sales have been effected at a decline in price; and as the demand has been principally for the boats proceeding to Peking, a further reduction is expected when the further accession of stock by the *Ardaseer*. The deliveries to the 15th were, Patna, old 57, new 67; Benares, old 67, new 5; Malwa, old 483, new 150; Total 789 chests.

### EXPORT.

RAW SILK.—None of Canton in the market, and the transactions in Tsatlee and Taysaam have been very limited.

TEA.—Very little is doing, and we have no change to make in last

## LITERARY,

*( From the Ta-ou Chinese Gleaner )*

A SINGULAR EDICT, RE-PECTING THE CAUSES OF THE DRAUGHT OF 1817.

*To the Editor.*

Sir, The following paper is at your disposal.

"An Edict has been respectfully received from on high :

"From the fifth moon of this year, a want of rain prevailed over the whole province of Chin le, and all around the seat of our Imperi l Government. But for several days past, successive reports have been sent up, that at Je-ho, Teen-tsin, and other places, abundant and refreshing showers have fallen. Still, in the vicinity of the capital parching drought continues. I have night and day, with burning anxiety, thought about, and have pushed my inquiries to discover the cause.

"The remissness and sloth of the Officers of Government, constitute an evil which has long been accumulating. It is not the evil of a day; and for several years I have given the most pres ing admonitions on the subject; and have punished many cases which have been discovered. So that recently there appears a little improvement, and for several seasons the weather has been favorable. The drought this season is not perhaps entirely on their account. I have meditated upon it, and am persuaded, that in all probability the reason why the azure heavens above, manifest disapprobation by withholding rain, only for a few hundred Chinese miles around the capital, is, that the dirty and more rebels, who escaped, are secreted somewhere near Peking. Hence it is, that the fertile vapours are fast bound, and the felicitous harmony of the seasons interrupted.

"I hereby order all the various Courts around Peking, to institute a stricter search than they have yet done. If they be satisfied by merely looking at the Mun-pae, (or list of inmates in every house,) it may be, that the rebels have changed their names, and blended themselves with families; and as the papers sent to me are quite nugatory, and intended only to prevent blame; and all the strong commands given to the officers and men become empty words which avail nothing.

"Let all concerned, from this time exert all their wisdom and strength, in searching where the population is crowded, and where facilities of concealment exist; let them search in all Nunneries, Monasteries, and Temples; in retired, mean, distressed, poor places. Let them by all the arts of the police pursue the scrutiny If they once succeed, the baleful construction of vapours, will be dissolved, and genial showers immediately induced. Exert yourselves. If you view this as mere matter of form, lay it aside, and remain inactive, then do you cease to be the servants of our—Ta-tsing Kwo —Tartar Empire, (denominated the great and the pure.) Respect this."

Mr. Editor,

I furnish you with the above facts, and leave speculation to such of your readers as may be disposed to turn their attention to these very singular documents. Amicus.

### LOCUSTS.

In the Chinese provinces on the sea coast, in latitude from 30° to 37° they are subject to inundations of considerable districts from excessive rains. In the Peking Gazette, for June, 1817, it is said, that when the waters are drained off, the spawn of a small fish left behind, which by the heat of the sun becomes a certain insect, called Hwang, (the usual term for locust) and which is extreinely destructive to the subsequent crop of grain; so much so, that the Emperor has directed the governors of provinces themselves to attend to it, and requires that the local officers be at the utmost pains to have them swept away and destroyed, to prevent the calamity which would inevitably arise, if left exposed to the sun. Perhaps the fact here stated, is not generally known, the insertion of it in the Gleaner, will oblige,

Your's, Amicus.

Military Review.—The Admiral of the Fokeen province reports to the Emperor, that having, from the present peaceful state of the coast about Fokeen, obtained leisure from his more regular duties, he has employed himself in inspecting the military of the several stations within his district. He states that although the troops had not been reviewed for some years before, yet they were nevertheless in good discipline: those belonging to the left camp of Kin-mun, and Nan-aou performed their exercise in a superior style, and went through the various evolutions in admirable order; they kept up a constant firing with the matchlocks without intermission; the lancers flourished their weapons and handled the large shields with great skill; the archers were expert, and the riflemen constantly hit the centre of the target: indeed, in every department the troops far surpassed expectation, and may be reckoned among the first class. The soldiers in the right camp of Kin-mun, and Tan-yin, all of them performed their evolutions in a good style, and fired with exactness; those who carried swords and shields fenced well, and the marksmen also hit the mark; these fully equalled my expectations, and may be reckoned in the second class. The sailors also, managed the helm, turned the sails, plied the oar, and performed the various feats of firing whilst ascending the masts, or swimming in the water, with readiness and amazing dexterity: the flags, naval stores, &c. were all complete, and the weapons were kept bright and sharp. The ships and gun-boa s, with the exception of those which were in dock, and of those which had been injured in storms, and were not yet repaired, were all in good order. The officers also, with a few exceptions, were found diligent and attentive to duty. Two sergeants, however, belonging to the left camp of Kin-mun and Nan-aou, being incapable of performing their exercise either on horse back or a-foot, and having several times successively failed of the mark in archery; having moreover, never signalized themselves in action, were degraded to the ranks and their places were filled by men from the ranks who had displayed more skill, and passed a good examination. With respect to the rest, all those officers commissioned and non commissioned, who had hit the centre of the target either on horse back or a-foot several successive times, were rewarded; while others who were but middling archers, but had signalized themselves in action, were allowed a period in which they might exercise, and undergo another examination. With respect to those who were altogether incapable, they were either degraded to a lower rank, or altogether deprived of office."

### MANCHOO MANIFESTO AGAINST THE MING DYNASTY.

*From Doctor Morrison's view of China.*

16 8. In the 3d. year of Theen-ming, correspond ing to the 46th year of Wan-leih, the Manchow Prince, about to enter on the subjugation of the Chinese, wrote down 'Seven great grievances,' of which he had to complain : on account of which, he felt high indignation, and which he was about to revenge. These he laid before Heaven, and announced them to the Deity in a solemn manner. His words are,

'Ere my Grandfather had injured a blade of grass, or usurped an inch of ground that belonged to Ming, Ming causelessly commenced hostilities, and injured him.—This is the first thing to be revenged.

'Although Ming commenced hostilities, we, still desirous of peace, agreed to engrave it on a stone, and take a solemn oath in confirmation of it, that neither Marchow nor Chinese should pass the respective limits; whoever dare to do so, should, the moment he was seen, be destroyed; and that the party which connived at any violation of this treaty, should be exposed to the judgments of Heaven. Notwithstanding this oath, Ming again passed the frontier with troops in order to assist a People called the Ye-hih.——This is the second thing to be revenged.

'When a subject of Ming passed over the frontier and committed depredations in my territory, I, agreeably to the oath above stated, destroyed him. But Ming turned his back on the former treaty confirmed with an oath, complained of what I had done; put to death an Envoy of mine; and having seized ten men on the borders, caused them to be slain.——This is the third thing to be revenged.

'Ming with troops, passed the frontier to assist the Ye-hih, and caused my daughter, already betrothed, to have her destination changed, and be given to another person of the Mun-hoo nation.——This is the fourth thing to be revenged.

'For many generations, I held as my frontier, the Chae-ho hill, and places adjacent; my people cultivated it: but Ming has refused to allow them to reap, and expelled them from thence.——This is the fifth thing to be revenged.

'The Ye-hih committed crimes against Heaven; but Ming acted with partiality and gave entire credit to their statements, whilst he sent a special envoy to me bearing a letter, in which he vilified and insulted me.——This is the sixth thing to be revenged.

Formerly the Ha-tah, assisting the Ye hih, twice came and invaded me. I announced it to Heaven, and reduced the Ha-tah. Ming formed a conspiracy with him and others, to attack me and restore to him his kingdom; and in consequence, the Ye-hih several times invaded the Ha-tah territory.

'In the contentions of neighbouring states, those who obey the will of Heaven conquer; those who oppose the intentions of Heaven are defeated and destroyed. How can those who died by the sword be restored to life; or those who have obtained the people, return them again! Heaven establishes the Princes of a great nation! Why does Ming feel resentment against my country alone?

'The Gih-lun, and other nations, united their forces against me, to invade me. Heaven rejected Gih-lun for commencing bloodshed; but my nation flourished as the Spring. Ming is now assisting the Ye-hih, who are under severe reprehension and wrath; and is thereby opposing the will of Heaven, reversing right and wrong, and acting in the most irregular manner.——This is the seventh thing to be revenged.

'To revenge these seven Injuries, I now go to reduce to order (or, to subjugate) the Dynasty Ming.' 'And he forthwith headed 20,000 horse and foot." (Vide, Tung-hwa-lub, 1 vol. 13 page.)

### CHINESE EXTRACTS.

*Translated for the Canton Press.*

Sun-tsih (Emperor of Tung-woo, one of the three Kingdoms) pronounced sentence of death on Yu-keih for preaching false and heretical doctrines among the people.

Lee-fwan, prime minister, recommended his majesty to spare his life, he said : "I have heard that he is able to command the winds and rain ; his reputation is spread far and wide. The present being a season of drought, had not your majesty better command him to pray for rain, and if he succeed mitigate his punishment."

Sun-tsih replied " we will consider of your suggestion ; let the prisoner be brought before us".

The minister then ordered the Jailor to free Yu-keih from his chains and wooden collar and to bring him in to the Imperial presence

His majesty ordered a platform to be raised which Yu keih was to ascend and pray for rain.

Yu-keih after bathing, and changing his garments, ascended the platform and fixed himself in a post exposed to the rays of a burning sun. He addressed the populace collected to see him in these words, " Tho' I will cause three cubits of refreshing rain to fall, yet the Emperor will have my life : I shall not escape."

A short time after the Emperor came to the platform ; and having commanded silence, informed the bystanders that if at noon no rain should fall, Yu-keih should be burnt alive. He then ordered his attendants to bring combustibles and place them around the platform.

Exactly at noon the wind began to arise in heavy squalls and the dark clouds to congregate in the Heavens.

The Emperor exclaimed " truly this man is an impostor ; altho' the rain clouds are present, yet it is noon and there is no rain. Let the combustibles be fired.

Just as the pile was being lighted, a column of black smoke was seen in the Heaven followed by a loud clap of thunder and immediately the rain fell in torrents, so that in a very short time all the rivers were overflowed and there was three cubits of water in the streets. Yu-keih then raised his voice, and the rain stopped and the sun shone forth.

Upon this the officers and populace having released him from the cords with which he was bound, fell down and knocked head to him, assuring him the Emperor would now pardon him.

Sun-tsih was greatly enraged when he heard of the officers behaviour and calling one of his body guard, gave him his own sword and sent him to slay Yu-keih.

## EXTRACTS.

Chronometers.—Chronometers constructed with glass balance springs, instead of the old metallic ones, are now in course of trial at the Royal Observatory. On comparing the glass with the metallic springs, when the temperatures were raised from 32 degrees to 100 degrees, it was found that while the loss in 24 hours in the gold spring was eight minutes four seconds, that of steel six minutes 25 seconds, and that of palladium two minutes 51 seconds, that of a glass spring was only 40 seconds. These differences are described by the inventors principally to the different degrees in which the substances had their elasticity reduced by an increase of temperature. As glass was thus found to suffer a much smaller loss of elasticity by this cause than metals, they proceeded to construct a glass balance suited to the correction of the small error still occasioned by this cause, employing a glass disc for this purpose. The compensation being complied, the next trial the inventors made, (uniformity of movement) of the glass spring, and it proved to be as perfect as any metallic spring. In common with all other instruments of the same kind they have shown a disposition to progressive acceleration, the cause of which is but little known, but which appears to be influenced by the action of the air.

*English paper.*

### PLANTATION AT CEYLON.

There are at present advertised for sale by auction in the *Ceylon Gazette* more than 6,000 acres of land, applied for by different individuals to Government for the purposes of planting. Most of this lies in the Kandyan country, and is intended principally for Coffee; and from various rumours we conclude that there are applications now in contemplation for a considerable quantity more. The Coffee that has been planted recently in the Interior is, we understand, thriving remarkably well; and by moderate calculations is expected in general to make a considerable return on the fourth year, and to defray the expenses of clearing and planting on the sixth year. A number of Nutmeg plants recently imported from Singapore, have been found to do well; and a small plantation of Sugar-cane lately made in the neighbourhood of Kandy has been found to answer, the juice extracted from the cane affording a fair proportion of sugar of good quality. It is said that a firm at Mauritius are about to engage extensively in the cultivation of sugar in Ceylon, being quite confident of success. The attention of English Capitalists is also directed, we are informed on good authority, to the resources of Ceylon as regards the production of the articles we have just spoken of, as well as the other staple exports of the Island, so that cultivation may be expected soon to convert it rich jungles into luxuriant gardens.

The planting of cinnamon on a small scale by a number of landed proprietors has increased latterly. An example having been set by some English and the more intelligent European descendants, is now being followed by the natives, who before were afraid to encourage the growth of the spice that had subjected them to such rigour in the times of monopoly.

There can be little doubt but that with the cheap and abundant labour to be had throughout the Island, these speculations (if they can be so called, having been already extensively tried with success) will turn out well, and the produce of them meet with an increased consumption though usually not with such pecuniary returns as it now brings. Within the last two years two new Mercantile Houses have been established at Colombo ; at this moment there is another about commencing business, and a fourth it is said, will soon arrive. Where the carcase is, the eagles will be gathered; and so it is that these gentlemen follow trade, but with this advantage that they always increase and improve that of which they partake.

Altogether it is very pleasing to witness the growing prosperity of the Colony, which now bids fair to hold that position in the East, which its rich, abundant and varied resources so eminently entitle it to.—*Observer Dec. 23th.—Ex Lahore.*

*The Siamese Twins.* In the *Journal Hebdomadaire des Sciences Medicales* is an account of our old acquaintances, the Siamese Youths, now at Paris, drawn up by a distinguished physician of that city. They are described as five feet in height, well proportioned, of great muscular strength, and very active ; they walk and run swiftly, and write as well as a single person. Their intellectual faculties are well developed. They speak English perfectly, but have forgotten their native tongue, as they rarely speak to each other. Two persons have en ivoured separately to converse with each at the same time, but both were invariably in one speaker, and conversed alone with him. They endured rain and fatigue in America ; the attack commenced at the same time on both, and the stages of the disease exactly corresponded. Their taste for food is the same, and though not gluttons, they both experience hunger and thirst, go to sleep and awake, at the same instant ; and to wake both it is only necessary to touch one. There is the utmost uniformity in their motions, as if both were set moved by one will. They have never been known to be angry with each other. One, who wishes to perform any act, makes no sign to the other, who, nevertheless, courses without the slightest hesitation.

A proposal to divide the connecting band in very disagreeable to them ; they have a bet remained, first they have always seen any surgical operation as humor as they are united. *Paris Journal for October.*

### SHIP JOHN BANNERMAN.

*From the Singapore Chronicle 16th February.*

So far back as our first number for this year we expressed some apprehension for the safety of the ship *John Bannerman*, and it is with much regret that the loss of that vessel has been confirmed during the past week by the arrival of two of Her Majesty's ships bringing the unfortunate crew and part of the crew of that unfortunate ship. We have been favored with a few particulars respecting the loss of the *Bannerman* which we publish for general information as coming from an authentic source. That vessel left Lintin on the morning of the 17th December ; on the night of the 18th at 10 P. M. when bearing a hard gale from the N. E., she lost her main and mizen topmasts, and while the hands were yet engaged in clearing away the wreck, the ship suddenly struck on the South Island about midnight. The current of the strait at the ordinary one S. S. W ¼ W., and at a time when a W. S. W. current of twenty miles per day prevails, the track would be to the westward of all dangers ; or without taking the current into account, the ship's position at 6 P. M. of the 18th December was 15 miles to the westward of the dead. From 8 to 10 P. M. the vessel's course was S. S. W., and upon the loss of her topmasts she veered up half a point, steering to the principal state appearing in with the land and he made no attempt to alter it, as the only wind. And although all hands were on deck when the ship struck, none it would appear had previously perceived nor heard the roar of the impending danger upon which they were so speedily to be dashed, but in the din and tumult of a gale of wind, the carrying away of masts, combined with the fear and anxiety of steering in a course free from danger, it is probable that none would be looked for nor contemplated. Within five minutes after the mishap the sea made a conspicuous break over the ship, when she began to fill rapidly. The vessel had broken her back ; attention to personal safety now naturally occupied the thoughts of all on board, and after the most in serious exertions the boats, three in number, were at length got out. The first however immediately broke adrift on being lowered with only four men in her, and passed through the breakers upon the shoal into smoother water. The second boat, with an officer and 18 men, then pushed off with the object of bringing back the first to the vessel as the greater proportion of the crew were still on board ship ; but this was found to be impracticable and after remaining a considerable time for the long-boat which had cut yet left the ship, or imagining that so unwieldy and heavy a craft could never pass over the reef, made the best of her way for the coast. The long boat with the commander, chief officer, and 53 men of the ill-fated *Bannerman* escaped across the breakers and in the attempt was swamped, having her bows stove in against the rocks. Every thing in the boat in the way of provision, water, compass es, charts, nautical books and instruments, was swept away, and at this time two it was when the chief officer, Mr. Shakeham, and four of the crew lost their lives. The boat was at length cast upon the shoal where the water was found to be but of insufficient depth to float her, and as it became necessary to make an effort for the preservation of their lives, all hands undertook the arduous task of dragging by main force this heavy long-boat across the shoal for upwards of a mile to distance. After incredible exertions on the part of both officers and men, this work, at first view apparently insurmountable, was happily accomplished, and the boat being once more floated and repaired as circumstances would admit put to sea with such means as the men possessed, consisting of a few old oars and three blankets stitched together as a sail hoisted upon one of them, running before a strong gale to preserve the boat in her injured state from foundering. As it was, the utmost and most preserving activity of all hands was requisite to keep the boat clear of water by incessant baling. In this calamitous condition,

without a morsel of bread or a drop of fresh water to, inspire them with hope or confidence, four days and four nights were thus wretchedly passed by these brave but unfortunate mariners. During this period several of the crew, by imprudently attempting to quench their thirst with salt water, became insane and ultimately died; while seven others after landing at Long-May on the 23rd December perished from mere exhaustion. The survivors, however, met with kind treatment from the Cochin-Chinese at Long-May, and on the day following their first landing, walked over the neck of sand on the western side of Quinhone harbour, crossing afterwards in native boats an extensive lagoon to Ty-ya a village situated upon a point of land running off the main in the neighbourhood of the city of Quinhone. At Ty-ya they had the satisfaction of again meeting with the second officer and the 18 men of the ships crew described above as having left the long-boat from inability to render assistance. Here also they remained until communication could be transmitted by the authorities of the country to the KING of Cochin-China of their hapless state. His Majesty, upon learning particulars and understanding the wrecked strangers were British subjects despatched an interpreter to Ty-ya with orders to attend to their wants. It gives us the most sincere satisfaction to add that the Messenger fulfilled his trust in the kindest and most benevolent manner by providing the whole party with houseroom, clothing, money, as well as provisions and vegetables. Captain Wilson expresses his sense of the hospitable reception given to himself and crew by the Cochin-Chinese as being "impossible to be surpassed any where." A testimony the more merited when we learn that in addition to the above marks of kindness and attention, His Cochin-Chinese Majesty also despatched two of his own ships from Turon to convey the strangers to this port. We cannot but form, after such substantial proofs, the highest opinion of his Majesty's benevolence, and we trust that some suitable acknowledgement may be made in return by the Indian government as well as by the Mercantile and shipping interests of India, the latter of whom are especially concerned in the encouragement of such friendly dispositions on the part of native princes. We have heard it said, indeed, that it was no great stretch of courtesy or manifestation of humanity that the Cochin-Chinese ships should have received orders to call in at Ty-yo on their way hither to take up the strangers, and thereby relieve the government at once of their presence and the expense of their maintenance; but we differ from that opinion entirely, and must say his Majesty of Cochin-China was under no obligation to have taken so parental a care of the foreigners he did; and, unless, therefore, he was in reality a personage who could feel for the misfortunes of others, we may rest assured the opportunity he on this occasion possessed of relieving them would have been disregarded by His Majesty.

## CHINESE SAVED BY THE SHIP

### BUSSORAH MERCHANT.

The following has been kindly transmitted to us by H. B. M's Commissioners.

EXTRACT FROM THE SHIP BUSSORAH MERCHANT'S LOG BOOK.

January 12th 1837 Lat. 11°. 15'. N. Long. 109°. 49'. E. At 9 A. M. observed someting to the westward resembling a wreck, shortened sail, and hauled towards it and found it to be a Junk without masts or udder rand otherwise in a most helpless state, with people on her deck beckoning and making signs and lamentations for assistance; although blowing very hard with much sea on. The starboard quarter boat was lowered and a small line taken to her as a messenger, by which we sent them our small hawser, and they made it fast to their windlass, but in the act of wearing ship to get our boat up (being on the starboard tack) dragged the windlass out of her which knocked one man overboard, who was picked up by our boat and brought to the Ship; it was then resolved that the people should be taken from the wreck at all hazards but before the Boat was dispatched for this purpose, strict orders were given to her crew not to approach the wreck too near, for two reasons; firstly she might be stove, and secondly, the people in the Junk evinced such a degree of eagerness to get from h r that they might have crowded the boat to excess, and endangered the lives of the whole; consequently signs were made to them to get a piece of wood fast to a line and put themselves on it singly, the Boat then picked them up brought them as close as was prudent to the Ship, and they were hauled on board by lines made fast round their middle we succeeded by this method in saving, in 3 trips, 18 men out of 19 which formed her Crew, and that man was drowned by his prematurely jumping overboard immediately after the hawser parted, we supposed he was under the impression, that we were about to desert them; from their anxiety for drink when they first came on board, we suppose they must have been a considerable time without fresh water.

TO THE HONBLE RESIDENT
&c. &c. &c.
SINGAPORE.

Sir,

The above unfortunate men were landed at Pulo Aor on the morning of the 16th instant with the exception of the poor fellow who was knocked overboard by our hawser he died soon after we anchored here last night.

The Rajah of this place has promised to provide the remaining seventeen men with sustenance and a passage to Singapore upon the payment of $ 5 (five Dollars) per head which I trust you will be pleased to pay. I have &c.

***Statement of Tan-Chuen-Nakodah of a Chinese Junk picked up in the China sea by the Ship Bussorah Merchants.***

Tan-chuen states as follows—I was the Nakodah and owner of a Junk belonging to the Island of Pay-ho (in the strain of Formosa); I sailed from Pay-ho for the Island of Ty-wan on the 18th day of the 10th moon (26th November 1836) and sailed from the latter place to return to Pay-ho on the 8th day of the 11th moon (15th December 1836); I had on board a cargo of Rice belonging to the Chiuese government, six soldiers, four government men, and four Passengers. The crew of my Junk including myself were 10 in number making altogether twenty four persons. A few hours after we left Ty-wan; a heavy gale came on and carried away the masts and sails of the Junk and all her upper works. The gale continued for three days, and we were drifting about all the time When the gale had ceased, we found ourselves in the wide sea out of sight of land. On the morning of the 6th day of the 12th moon (12th January 1837) an English Ship hove in sight and 17 of us were taken on board of her, having been then 28 days at sea, and latterly without any water, during which time six of the people died, one fell overboard in endeavouring to get on board the ship On the 10th day of the same moon (16th January 1837) we were all landed at Tan-tech (Pulo-Aor) and were delivered over by the Captain of the English ship to the Chief of that Island. On the 14th day of the same moon (20th January) the Chief of Tan-teh sent us to this settlement where we arrived yesterday. (*Signed*) TAN-CHUEN.

Singapore, 24th January 1837.

*Secretary and Treasurer.*

## IMPERIAL ORDER RESPECTING H. B. M. COMMISSIONERS.

( The following is a translation of the Vice-Roy's communication to the Hong merchants, dated 18th March 1837.)

On the 20th January the report was sent to Emperor, stating that Ellio, the barbarian, was to assume the management of the Merchants and Seamen of his country. The dispatch of the Privy Council containing the Imperial Edict, forwarded by a courier of the military board, arrived in Canton on the 18th March.

Governor Tăng had stated, that after the dissolution of the Company, no Taepan had yet come. In December last year the said nation gave a special appointment to one of its officers to proceed to Canton, and take the general controul of the merchants who had previously come to trade, and also of the Seamen etc.

Since the ships of the said nation continually arrive, there ought to be somebody to controul and occasionally to tranquilize them. Now the said barbarian has received a public official commission for the control of the merchants and sailors. Though his title and rank are not the same with that of a Taepan, the business of controuling does not differ.

He is therefore permitted, according to existing regulations, so as formerly the Taepan, to go up to Canton, and on his arrival at the Provincial City, to manage affairs. The Hoppo is therefore ordered to issue a permit.

When he in future either lives at Canton or at Macao, he ought to conform to the old laws. He is not permitted to exceed the proper time by loitering about and thus to give gradually rise to irregularities.

The high officers are held responsible and must not permit him to create disturbances. For this purpose they ought to issue private orders to the civilians, military officers and Hong-merchants to inform themselves occasionally about the true state of things, investigate and watch over him.

If the said Barbarian performs his duty improperly, acts irregularly and combines with traitorous natives to disobey clandestinely the laws, he shall be driven back to his country, in order to do away with the source of evil.

Let this edict be communicated to him. Respect this.

In accordance to the imperial decree, this letter was forwarded.

# CANTON PRESS,

March 25th 1837.

On the letter signed " No Yankee", which appeared in our paper of last week, the Register observes :"

" We cordially agree with our cotemporary in his disapproval of the tone and manner of the letter signed " No Yankee," which appeared in the *Canton Press* of Saturday last. For the sake of general harmony and good will we regret that it was ever written or printed; and we trust the writer will have the good sense and manliness to retract, as far as it is, now possible, the offensive matter; or, if he does not think proper to do this, that he will stand forth and avow himself."

We perfectly agree with our cotemporary and, had we given the subject a more attentive consideration would not have inserted the obnoxious letter at all, but receiving it only on the Friday preceding the publication of the paper, we wrongly thought that our remarks, condemning the unwarrantable attack on men, than whom no residents in Canton enjoy more the respect of their neighbours, would save us from the imputation that we participated in the slightest degree in feelings such as the writer of the letter " No Yankey" evinces, nor did we suppose to have given offence to our American subscribers by having published the letter, accompanied as it was by our condemnatory remarks.

If herein we were disappointed, we hope that this explanation will convince our American friends that we never intended to give offence, and are sorry that our motives should have been misinterpreted by some.

After having written the above, we received the communication signed "A constant reader" to which we give insertion with the more pleasure since it not only falls in with our own feelings, but being from the pen of a Gentleman, not an American, it may be considered as a type of the general feeling on the subject.

The Hong-merchants Hing tae and Gow-qua have been released, after having been in confinement during a considerable time; the cause of their imprisonment was some gold and sycee silver having been found on board of a Siamese Junk when about leaving the river, which Junk it had been their turn to secure. It is rumoured that their release is to cost them a large sum of money, and that before that is paid they are not allowed to transact business, at least no shipments can leave their Hongs. Thus the Chinese Government interferes with and ruins the only merchants with whom it will allow us to trade.

We give below the Vice Roy's letter to the Hong-merchants informing them that the Emperor had given permission for Capt. Elliot to come to Canton, provided he only controled British merchants and Sailors; if he interferes in any thing else, he is to leave the country directly. We have frequently already adverted to the impolicy of H. M. Commission, such as it is now constituted, and considering the footing on which it stands towards the Chinese Government, residing at Canton, where they will be at the mercy, and open to the insults of the Chinese, without, as far as we can see, being likely thereby to produce any good.

Our arguments against H. M. Commissioners coming to Canton under their present conditions are the following.

1. It will be a triumph to the Chinese
2. It will be a precedent for ever.
3. It will be as an admission of inferiority on our part.
4. It will be a condemnation of the late Lord Napier.
5. It will be an admission that he acted against or without orders from his Government, or that the British merely wished to try what might be obtained by bullying the Chinese.
6. It will be dangerous as showing that as the British have been outbullied in this, so they may in other matters.
7. It will be likely to lead to interruptions of trade in cases now passed over easily.
8. It will be a means of yet further hampering British subjects by making Chinese orders pass through or sanctioned by, British authorities.
9. It will be a converting of these authorities into Police Agents for the Chinese.
10. It will be a conversion of an office which should protect, into a means of annoyance for the interests of the Chinese alone.

Against all these disadvantages we cannot enumerate any advantages likely to result from H. M. Commissioners' residence in Canton.

About a week ago, at midnight, some thieves tried to set fire to a shop in China Street, by means of lighted matches, powder and other combustibles; before their designs could however be accomplished, one of them was seized, and taken to the Consoo house, where, preparatory to a severer punishment, probably death, the Cangue was put upon him. Incendiarism in China is a crime of frequent occurrence, and is generally committed by thieves, who hope, in the ensuing confusion, to reap a good harvest.

The foreign shipping at Whampoa has of late been made to feel the extreme watchfulness of the local Government to prevent the exportation of Sycee, since the Hong-merchant securing a ship must give his guarantee to the Government that such ship exports no Sycee; and it appears that the Hong-merchants have at first demurred to giving this guarantee, which caused the grand chop or permit for sailing to be retained. The required guarantee has however at length been given.

For the last two days the Hong-merchants have been in Consoo to take into consideration, as we hear, the state of the Hongs which cannot fulfil their engagements, and particularly that of the Hing-tae Hong.

We have taken from the records the following minutes of the proceedings of the Committee of the General Chamber of Commerce after they had been circulated among the members of the Chamber. The resolutions agreed to by the Committee touch upon topics on which there has frequently arisen difference of opinion, and it is desirable that principles should be established by which the conduct of merchants here can be guided. The Committee's labors will, we believe, at some early opportunity be laid before the members of the Chamber at a general meeting, where the principles laid down by the Committee will be discussed, and where, we hope, the points they involve will be definitively agreed on by the mercantile community. We shall endeavour to keep the public acquainted with the proceedings of the Committee, whenever any thing of public interest occurs.

Several changes have taken place in the constitution of the Committee as originally elected, as, some of the members being absent, others have been elected in their stead, viz.

| Members absent, | Elected instead. |
|---|---|
| Framjee Pestonjee Esq. | Nanabhoy Framjee Esq. |
| Thomas Fox Esq. | William Blenkin Esq. |
| Samuel Wetmore Esq. | Warren Delano Esq. |
| William Bell Esq. | A. C. Maclean Esq. |

### THE COMMITTEE'S RESOLUTIONS RESPECTING SETTLEMENT OF DUTIES.

In consequence of numerous complaints lately brought under the notice of the Chamber of Commerce, of the vexatious detention of ships, in not obtaining the "Grand Chop," caused by the non-payment of Duties on goods imported on them, the Committee has resolved earnestly to recommend to the general body of the foreign merchants of Canton, that they should ascertain on, or shortly after the landing of goods to their consignment, the rate of duty that is to be levied thereon;—and for the purpose of preventing, so far as may be practicable, the levying of an excessive or extortionate duty, the Committee would further recommend that an efficient person from each consignee should always be present at the examination and measurement of goods by the mandarins, as well as that the attendance of the Hong-merchant's purser should be procured. And finally, if notwithstanding these precautions, the mandarins should nevertheless persist in demanding an unreasonable rate of duty, the Committee recommend that complaint thereof be forthwith made to them, and they will use their endeavour to obtain redress in such manner as shall appear to them best calculated to obtain that end: it being distinctly understood, that the object sought to be attained by such interference of the Committee between foreign merchants and the Chinese government, is that of preventing, so far as possible, the detention of vessels when ready for sea for want of the grand Chop.

Canton, 4th March 1837.

### DETENTION OF VESSELS AT LINTIN.

The Committee of the Canton General Chamber of Commerce having been applied to for their opinion as to the period for which inward bound vessels may be justified in remaining at Lintin, to transship cargo, in cases where no provision has been made for such an occurrence.—The following is the result of their deliberations.—

1st. That all vessels bound for Whampoa may remain fifteen days outside of the Bocca Tigris for the purpose of receiving or discharging cargo, when there is no stipulation to the contrary, but no delay in proceeding to Whampoa, after that period has expired, should subject the vessel to all penalties, to which she would be liable elsewhere, for undue detention of goods.—

2nd. That vessels bound to Lintin, under agreement to unload there, may be required to retain their cargoes on board, or pay for their being kept in a Lintin receiving vessel, for fifteen days after the Consignees letters reach Canton, at the end of which period it should be incumbent on the Consignees to receive them from on board.

Canton, 18th February, 1837.

A dinner in the English style was given yesterday by How-qua, the Hong-merchant, to twelve of his Mandarin friends at the Hotel of Messrs. Stanford and Marks. We conceive that these sons of Han must have encountered no small difficulty in handling their knives and forks, and hope they may have got through the task without drawing blood, which they stand in no danger of when using the unoffensive chopsticks. There seemed to be much conviviality among the guests, at least if measured by their vociferation; several toasts were given, of what nature we do not know, but after each effort of that kind we heard stunning knockings on the table, and loud " hep, hep, hep, hulah!"

We last week mentioned the loss of the *John Bowman* in the China Sea, and that the Crew, except the chief mate and some Lascars, had reached the Coast of Cochin-China. We have since, per *Ardaseer*, received the *Singapore Chronicle* of 18th February, from an extract of which in our columns, it will be seen that the Captain with the remainder of the Crew had reached Singapore in a Conchin-Chinese vessel. It is gratifying to learn that the King of Conchin-China has on this occasion shewn himself a friend to humanity, by affording every facility to the shipwrecked mariners to reach their homes; nor is this the first time on record several instances of his affording relief to sailors shipwrecked on his coasts. His subjects do not however seem to sympathize with him always; their conduct to the *Alexander's* crew was any thing but evincing hospitable feelings.

# CORRESPONDENCE

TO THE EDITOR OF THE CANTON PRESS,

My dear Mr. Editor,

I observe in your paper of the 18th, a letter which I apprehend all your readers and friends (I may say the foreign community of Canton) were sorry to see in your columns. Your paper has, there can be no question, been conducted on a plan of moderation and correct respect for private feelings; and it is a pity that you broke through your rule to admit the silly effusion of an angry, because disappointed, smuggler.

I believe that, at the present day, most men of sense and education, be their country what it may, are agreed as to the absurdity of fixing nicknames, as marks of scorn, on each other; and it may pretty safely be asserted that, when done by any individual, it is, in itself, a proof of his want of correct feeling, as of common sense—this is only as applies to those who have the courage or manliness to affix their names to their attacks; or who are ready to come forward and defend their conduct. What name must be given to him who makes use of the columns of a newspaper to make an attack meant to be anonymous, thus shielding himself under the wing of another, I leave to all but his fellows to say.

That the object of the party in question was the risking the ship and endangering all belonging to her, to save some paltry amount of duties, is plain. The Chinese have a proverb " burn a house to boil an egg" which your Correspondent seems to admire so much as to act on it, failing his first attempt, by trying to stir up an ill feeling on a large scale to satisfy his revenge.

Your contemporary of the Register has, in his last No, remarked on this with very correct feeling. If your Correspondent should have come forward, do not publish this. If he has not, it will be as well to show him that his paltry malice is regarded with contempt by his own countrymen. I address you in the name of several Englishmen whose opinions as to this are, I believe, those of nearly all the foreigners in the place.

Your's Mr. Editor,
A CONSTANT READER.

Canton, March 23d, 1837.

## CANTON GENERAL CHAMBER OF COMMERCE.

The office and Records of the Chamber are open to the members every day excepting Sundays; and the Secretary will be in attendance from 12 till 3 o' Clock.

By order of the Committee,
WILLIAM SCOTT.
*Secretary.*

Canton General Chamber of Commerce
No. 2 Danish Hong 4th Feby. 1837.

NOTICE.—SAMUEL WETMORE Jr., is this day admitted a partner in our establishment,
WETMORE & Co.
Canton, February 1st 1837.

NOTICE.—The interest of Mr. JOHN TEMPLETON having ceased on the 30th June last in our business, the same will in future be conducted under the Firm of MIDDLETON & Co.

| Sand. Islands .. | | France .... | 2½ | | |

Note. Above rates are from 20th Oct. to 20th April annually: during remaining 6 months the premiums are somewhat higher. Risks on Birds are $ 9 per Cent per annum, $ 4½ for 6 months, $ 2½ for 3 months and $ ¾ per month.
The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874756 of a Tl. per cubit.
2nd " " 1200 do. & under 1600 " 0.7221091 "
3rd " under 1200 do. 0.5662341 "

N.B. The cubit is 14¼ inches, measurement is taken on each outer of the vessel with cargo (except Rice) and is from the Foremost to the Rudder mast or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 4300 to $ 4320; 2d class from $ 3700 to $ 3720; 3rd class from $ 3700 and under. The Comshaw or Present Fee is paid by all vessels 1600 Taels or $ 2223. Linguists fee $ 1734 and Comprador's fees $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Resident ships are charged only about $ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—These share the general dullness of the market.

COTTON YARNS.—There was a little briskness in the demand, but it has subsided now.

WOOLLENS.—One or two sales of middling quality *Spanish stripes* have been reported to us, only realizing our lowest quotation. *Longells* have declined and are without demand.

STRAITS PRODUCE.—TIN is declining, also PEPPER of which the importation has of late been considerable. BETELNUT remains without material alteration.

RICE.—Has improved a little.

LEAD.—Is still declining.

COTTON.—In consequence of the market being almost entirely bare of good quality of the Bengal and Bombay staple, Timewolly has advanced a few mace; in other respects the market remains very depressed, and without we fear any prospect of improvement, as fresh supplies are daily expected, and our stock is already heavy for the season of the year.

OPIUM.—The arrangement which we before alluded to, has been entered into between the Mandarins and smuggling boats—the fee being considerably encreased; there is at present therefore no interruption to the trade, but the demand is very limited, which confirms the report of the markets in the interior being very bad. Malwa, at the reduced price, has been going off a little more readily than the Bengal drug—but holders of either description do not appear very firm, and a further decline may have to be submitted to.

### EXPORTS.

TEAS.—Nothing or little doing in them, the few Shipments now made being chiefly on Chinese account.

# THE CANTON PRESS.

VOL. 2d. No. 30. CANTON, SATURDAY, APRIL, 1st, 1837. No. 82.

## LITERARY,

*( From the Indo Chinese Gleaner )*

Chinese JUSTICE has been a topic of high eulogium; and there is often a reasonable mode of talking, and a plausibility about it, which is now and then very imposing; but the want of truth and reality in these hypocritical and specious pretences, is shockingly great. In confirmation of these remarks, I beg to submit to the GLEANER, the following translation of an original document.

"PEKING GABETTE, AUGUST 9, 1817.

"Chow, the Yü-she (for Censor) of Ho-nan, kneels, to report, with profound respect, in the hearing of His Majesty, the following circumstances, and to pray for his sacred instructions

"The clear and explicit statement of punishment, is a means of instruction to the people; the infliction of punishments, is a case of unwilling necessity. For all courts there are fixed regulations to rule their conduct by, when cases do occur that require punishments to be inflicted in questioning. Magistrates are not, by law, permitted to exercise cruelties at their own discretion.

"But of late, district Magistrates, actuated by a desire to be rewarded for their activity, have felt an ardent enthusiasm to inflict torture. And though it has been repeatedly prohibited by Imperial Edicts, which they profess openly to conform to; yet they really and secretly violate them

"Whenever they apprehended persons of suspicious appearances, or those charged with great crimes, such as murder, or robbery, the Magistrates begin by endeavouring to SEDUCE the prisoners to confess, and by FORCING them to do so. On every occasion they torture by pulling, or twisting round the ears, (the torturer having previously rendered his fingers rough by a powder) and cause them to kneel a long while upon chains. They next employ what they call, the Beauty's Bar*; the Parrot's Beam†; the refining furnace‡, and other implements, expressed by other terms which they make use of. If these do not force confession, they double the cruelties exercised, till the criminal dies, (faints,) and is restored to life again, several times in a day. The prisoner unable to sustain these cruelties, is compelled to write down or sign a confession (of what he is falsely charged with,) and the case any how is made out, placed on record, and with a degree of self glorying, is reported to your Majesty. The Imperial will is obtained, requiring the person to be delivered over to the Board of Punishments, for further trial.

"After repeated examinations and undergoing various tortures, the charges brought against many persons are seen to be entirely unfounded.

"As for example, in the case of the now degraded Taeu-tae, who tried Lew te-woo; and of the Chechow, who tried Pih-keu-king. These Mandarins inflicted the most cruel tortures, in a hundred different forms, and forced a confession. Lew-te-woo, from being a strong robust man, just survived—life was all that was spared. The other, being a weak man, lost his life: he died as soon as he had reached the Board at Peking. The snow-white innocence of these two men was afterwards demonstrated by the Board of Punishments.

"The cruelties exercised by the local Magistrates in examining by torture, throughout every district of Chih-le, cannot be described; and the various Police Runners, seeing the anxiety of their superiors to obtain notice and promotion, begin to lay plans to enrich themselves. In criminal cases, as murder and robbery; in debts and affrays, they endeavour to involve those who apppear to have the slightest connexion. The wind being raised, they blow the spark into a flame, and seize a great many people, that they may obtain bribes from those people, in order to purchase their liberation. Those who have nothing to pay, are unjustly confined, or sometimes tortured, before being carried to a Magistrate. In some instances, after undergoing repeated examinations in presence of the Magistrate, they are committed to the custody of people attached to the Court, where they are fettered in various ways, so that it is impossible to move a single inch; and without paying a large bribe, they cannot obtain bail. Their oppressions are daily accumulated to such a degree and for so long a time, that at last death is the consequence.

"Since there is at this period particular occasion to seize banditti, if there be suspicious appearances, as the age or physiognomy corresponding to some offender described; it is doubtless proper to institute a strict inquiry.

"But it is a common and constant occurrence, that respecting persons not the least implicated, who are known to possess property and to be of a timid disposition, pretences are made by the Police to threaten and alarm them. If it be not affirmed, that they belong to the Pih-leen-keaou, (a proscribed Sect,) it is said, that they are of the remnant of the rebels, and they are forthwith clandestinely seized, fettered, and most liberally ill-used, and insulted. The simple country people become frightened and give up their property to obtain liberation, and think themselves very happy in having escaped so.

"I have heard that in several provinces, Chih-le, Shan-tung, and Ho nan, these practices have been followed ever since the rebellion; and wealth has been acquired in this way by many of the Police Officers. How can it be that the local Magistrates do not know it? or is it that they purposely connive at these tyrannical proceedings?

"I lay this statement with much respect before your Majesty, and pray that measures may be taken to prevent these evils. Whether my obscure notions be right or not, I submit with reverence.

IMPERIAL REPLY,

"It is recorded."

* A torture said to be invented by a Judge's wife, and hence the name. The breast, small of the back, and legs bent up, are fastened to three cross bars, which causes the person to kneel in great pain.

† The prisoner is raised from the ground by strings round the fingers and thumbs, suspended from a supple transverse beam.

‡ Fire is applied to the body.

### A HUNDRED NEGATIVE PRECEPTS.

RESPECTING THE MIND.—Let not corrupt thoughts arise. Be not over anxious and grieved. Envy not those who have, nor despise those who have not. Complain not of heaven, and blame not men. Think not of old evils. Speculate not on distant things.

THE BODY.—Love not beauty without bounds. Be not greatly intoxicated. Stand not in dangerous places. Do not give way to anger. Do not associate with worthless characters. Do not enrage men who love to strike.

HABITUDE.—Do not abuse the good things of providence. Do not love extravagance. Be not over anxious about being completely provided for. Think not of things which are above your station. Do not deteriorate the grain. Do not destroy life.

THINGS IN GENERAL.—Do not neglect the relations and duties of life. Do not practice corrupt things. Do not oppose the commands of your parents or teachers. Do not speak much. Provoke not a guest to anger. Between two parties, do not speak swords here and flatteries there. Do not stir up troubles. Be not the president of a lantern-head society,* (a kind of club.) Do not cut and carve the poor. Do not deceive and oppress the orphan and widow. Do not wrongfully accuse any one. Do not learn unprofitable things. Do not conceal the produce of your field. Be not backward in paying the taxes. Do not receive stolen property.

CHILDREN.—Let them not eat too much. Let them not eat raw, cold, fat, or greasy things. Let them not wear embroidery, gold and gems. Do not let them associate with bad people. Do not suffer them to speak much. Do not let them learn unprofitable and mean things. Do not let them be proud. Suffer them not to visit gambling shops, or brothels. Suffer them not to run into the winds or waves, or dangerous places. Suffer them not to rail at any one. Do not let them be idle. Do not let them beat the slaves.

WEALTH.—Be not ashamed of bad food and coarse clothing. Do not build summer houses. Do not associate with great people. Be not over fond of feasts. Do not learn to imitate the rich and great.

WORDS.—Do not talk of men's domestic affairs. Do not tell secrets. Do not conceal the errors of worthless men. Do not mention men's private name. Do not injure a person's parents. Do not put a stop to any good affair. Do not bring up other men's concerns (in conversation.) Do not laugh at men's appearance. Do not blame a man for the faults of his relatives. Do not be fond of making game of any one. Do not swear. Do not declare a man's errors before his face. Do not blame wickedness too much. Do not plainly call yourself true. Do not make up stories to injure men. Do not be proud of your wealth. Do not complain of your poverty. Do not associate with the rich and great. Do not speak with a fierce aspect. Do not despise men's poverty. Do not interrupt men in conversation. Do not call yourself clever. Do not lie. Do not help and abet others to do iniquity. Do not recite corrupt composition. Do not speak of gambling or whoredom. Do not say any thing, that has a beginning but no end. Do not curse or rail at men. Do not speak of the knavish tricks of men and women. Do not discuss the goodness of food and clothing. Do not bitterly complain of your condition. Do not interrupt men's pleasant chit chat. Do not revile the sages.

ON WRITING.—Do not write one character [or word] that may injure men. Do not write one character to accuse men. Do not write one character to the injury of morals. Do not write one character that deviates from what is right.

BOOKS.—Do not put a needle in a book. Do not take a book for your pillow. Do not give books to women to lay by their needles and thread in. Do not roll up books or turn down the leaves. Do not turn over the leaves in hurry and confusion. Do not throw books in heaps and tear them.

LETTERS.—Do not wipe a table or any thing filthy with paper that has letters on it. Do not stop up windows or walls with paper that has letters on it. Do not cover jars or bottles with paper that has letters on it. Do not fold money, &c. with paper that has letters on it. Do not place such paper in your mouth to chew it. Do not give such paper to women to cut out patterns with.

* These small clubs are sometimes convivial, when the president is to take care that the lamps be light and well trimmed,—and sometimes religious, at the feast of lanterns, on the 15th of the first moon. When a number of persons club together to furnish lamps, to light up on the occasion, the care of the lamps in this case also falls on the president who is the head of the lanterns; hence the term "lantern-head society."

### CHINESE DIVORCES.

It is pretty certain, from observation, that where divorces are easily obtained, the state of moral virtue is very low and the duties and obligations of relative life, but little understood. There may, however, be an extreme in this as well as in other things; it may be made too difficult: and the consequences to virtue and to society, in that case, are very injurious. The law of God is doubtless, in this, as in all other things, the best and least expensive guide. Still, some of our readers may not be displeased to know the Chinese law on this subject. The following causes of divorce are enumerated in the Chinese criminal code.—They are all unfortunately supposed to arise from the woman—A wife may be divorced,

1. For barrenness.
2. For adultery.
3. For refusing to serve her father-in-law and mother-in-law.
4. For much speaking—we suppose evil speaking is meant.
5. For theft.
6. For jealousy.
7. For disease—e. g. some inveterate kind of leprosy, &c.

There are, however, THREE EXCEPTIONS in favor of the wife, admitting even that several of the above can be clearly proved.

These are—1. If she have mourned three years for her father-in-law or mother-in-law. 2. If, when the parties were married, the husband was poor, but has since become rich. 3. If, at the time of their marriage, the woman's parents or relatives were alive, but have since died, so that she has no home left to go to—If any one of these three things can be proved, she cannot be legally put away.—In case of a wife's deserting her husband, the law enjoins that she be beaten one hundred blows, with a rod, and leaves it at the husband's option either to give her away to another man, or to sell her. If a wife elopes from her husband, and marry another man, she is to be put to death by strangling.—From these notes, the reader will perceive that the Chinese law is sufficiently severe in regard to the offending female.—The law gives the wife no power to divorce her husband—a SEPARATION, however, she may claim. The subject of DIVORCE has occupied the attention of many eminent divines, lawyers, and statesmen in different parts of the world. Most views of the question, it appears distinct, are of great importance to the morals and well-being of society. The ease with which divorces can be obtained in some of the Continental nations of Europe, and the difficulty with which they are obtained in Great Britain,—are both considered extremes. At the present time, when the state of public affections, of private life, and of the poor,—a most considerable one in the British Islands, peculiarly this subject also may be discussed. To know the practice of civilized nations in the particular of divorce, is desirable.

## EXTRACTS.

### THE EAST INDIA AND CHINA ASSOCIATION FOR THE PROTECTION OF TRADE TO THE EAST, AND A LONDON CHAMBER OF COMMERCE.

The Commercial world are all aware of the constitution and objects of the East India and China Association. The constitution is narrow and its object exclusive: on a foundation so constructed, no edifice of any valuable or permanent kind can be reared. To a thinking man it presents all the appearance of a party, and in that light all its applications to Government, and all its public movements will be regarded. The protection of Trade and Commerce is a very laudable, necessary and desirable object, but to be of any public weight or any public effect, it should be of the trade and commerce of the Port of London generally. Such an object is elevated, magnanimous and noble, and an association for that purpose would if it were established, combine much talent, energy, support and public effect. Such an association was urged on the attention of the last public meeting of the East India and China Association, but they would not entertain the idea; stating distinctly through the medium of the Chairman, that their Association was *exclusive*. Its exclusiveness will be its nothingness, and, with the exception of its furnishing a good office for a secretary, we do not apprehend that much benefit will flow from its institution. It is not of the character, respectability, and talent of its members that we have any doubt, for these are unquestionable, but it is the exclusiveness of the Association that will negative all its power of doing any public good or of conferring any benefits on those who connect it. It is conceived in the spirit of an age that is gone by—it is an East India Company on a small scale, without a charter—it is a fragment of that Company, taken after death. Make the association general—let it fold in its ample embrace brokers, merchants, shipowners, agents and traders of all descriptions, for the protection of the trade of the port of London generally, and the commercial public will go with it, and it with them; but as it stands now it will be powerless with government—useless to itself—and an object of jealousy to the mercantile public; and if we are not mistaken, its own members, unsupported by any public sympathy and unproductive of any effect on government, will soon become weary of it. When a General Association for the protection of the trade of the port of London was suggested to the meeting, of A LONDON CHAMBER OF COMMERCE, it was objected that there were such a variety of conflicting interests in trade that the formation of such an Association—such a Chamber of Commerce—was impracticable. We should like to know how the Chamber of Commerce at PARIS, HAMBURG, BRUSSELS, CALCUTTA, BRISTOL, &c. &c. reconcile conflicting interests? Chambers of Commerce exist in those places, and conflicting interests are reconciled there, and why not here? M. SMITH, the proprietor of *Prince's Price Current*, united that funds in his hands, to the amount of £300, had now accumulated for the formation of such a Chamber. Here is money to commence with—abundance of materials exist in the City of London for the formation of such a Chamber—when such a Chamber is formed it will do all that the East India and China Association proposes to do, and much more—it is an association in which merchants, brokers, agents, ship-owners and traders of all kinds may join—it will have public sympathy for its companions and public good for its object—it would tell with government very influentially—and would be a source of much good and greatness to the trade and commerce of the port of London in general—all that is wanted is an architect. We have conversed with several merchants on 'Change, who are very cold on the subject of this East India and China Association, but are disposed to form a LONDON CHAMBER OF COMMERCE. All we want is a public meeting to start with; and such a meeting is now in contemplation. *Mercantile Journal.*

### CATCHING TURTLE ON THE ISLAND OF ASHTOLA IN THE PERSIAN GULF.

*Journal of the Geographical Society.*

"A party went on shore one night for the purpose of catching turtle, a description of which may not be uninteresting. We left the ship at sunset, and reached the shore about dark, then hauled the boat upon the beach; and when this was done formed ourselves into two distinct parties, and dispersed to different parts along the beach. Having reached the place where we thought it likely that the turtle would land, we lay down, hauling a cloak over us, and waiting a little while in silence. The moon had risen some time, and was reflecting her silvery rays on those desolate regions; the opposite coast in the distance, which is very mountainous, and the ship riding at anchor, all together a beautiful effect; the sea was perfectly calm, and everything appeared to be sleeping in the stillness of the night, and not a creature being heard among the party, on the part of the shore the reader is aware we were on. The first thing that attracted the notice of the party, was the appearance of the turtle; and its being had just gone on shore, it was immediately made, i. e.—when we saw the first, to our great delight, coming on shore just opposite us. It looked like a black rock moving slowly and steadily out of the water. We did not interrupt its progress until it had got some dozen yards upon the beach, when a rush was made towards it; and it was a matter of some trouble to us to turn it, without giving it time either to defend itself behind its smallness by throwing the sand with its flippers or fins, which they do with much force that it is always dangerous to come near them. It took six stout men then to turn the largest that was caught; and the following incident will further show the immense strength of these animals. One of our men, the gunner, wandered away by himself to the further end of the beach, where he thought he could get off the rock on board, and looking for a moment that he would be able to turn one turtle which he found; but, on the contrary, to his surprise, not being about long before enjoying a happy ride making towards the beach, he allowed it to come up some way, and then ran over to it and attempted to turn it. All his endeavours were however fruitless; and by some means he got his head between the shell and the water, with the turtle fairly departing in its usual manner, and well there on right shoulders he tried to withdraw it. The turtle then began to crawl towards the sea, dragging the man with it; and he was in imminent danger of being carried off, when he began to call for assistance. Our party were at first somewhat alarmed at the cries, thinking that some serious accident had happened, and immediately ran towards the place from which the sound proceeded, when we arrived just in time to save the poor fellow from a watery grave. The turtle was close to the edge of the reef, and was carrying him off as if he were nothing; nay was it without some difficulty that we released him from his perilous situation—dragging the turtle above high-water mark and turning it over. The man got off with only a few bruises, but was much frightened; and we all had a good laugh at him for his adventure."

### CAPT. CHADS.

We insert in a following column, a list of the subscriptions made in Bombay for the purpose of presenting Captain Chads with a piece of plate. The whole amount to 4,700 rupees, which, at the present rate of exchange, will produce no more than £500.—*Bomb. Courier.*

### STATUE OF SIR JOHN MALCOLM.

The statue of Sir John Malcolm, the arrival of which we noticed some time since, has just been placed upon its pedestal in the Town Hall. As far as we can judge, there never was a work of the kind which gave more general satisfaction. As a likeness—in which respect statues are so apt to disappoint—it is most striking. The majestic features of the original have, indeed, been copied with wonderful fidelity; though perhaps, after all, it would have been difficult for the artist to err in this respect. The attitude, too, is appropriate and much admired; and the drapery has been arranged with the best effect. Instead of the toga, which in spite of classical associations, we think objectionable for a modern, owing to the utter impossibility of connecting it in any way with his life and actions, a large military cloak, descending from the shoulders, and falling to the ground, has been used to relieve and support the figure. From beneath this the left hand appears leaning upon a sword, which, though

a handsome one, we regret to say, is an antique, and not in keeping with the rest of the work. The right hand rests upon the hip, and it strikes us insufficiently reposed; though this has been denied. The dress is that of a general officer; and above it is displayed the grand cross and ribbon of the Bath.

It has been objected to the works of Chantrey that, though exquisitely finished, and true to nature, they are mere 'portrait statues.' How far this may be true in general we cannot say. But in this present instance the criticism, it strikes us, is not at all applicable; and we would appeal to the expressions, and above all, to the looks of delight and admiration which the statues produce to prove, that the 'ideal' has in this instance at least, been successfully embodied. No copy, however exact and beautiful, would create such feelings; and the artist himself, we understand, looks upon it as one of his happiest efforts.—*Bombay Courier 27 Dec.*

SUBSCRIPTION

*For the purpose of presenting Captain Chads with some testimonial in acknowledgement of his services to the Mercantile and Shipping interests of Bombay in suppressing piracy in the Straits*

*A future meeting of the subscribers to determine the nature of the testimonial and the mode of presenting it.*

MANILA.

The following proclaim of the Captain General of Manila we translate from O Macaista Imparcial of 20th March. As we hear, an attempt has been made by the Soldiers in Manila to proclaim the constitution of 1812, but without success.

"The anxiety which has been felt during the last few days, obliges me to address you to acquaint you with my intentions, all pretext of uneasiness, that may be removed that confidence may be restored, and that a quiet which the loyal and pacific inhabitants of these isles enjoy, may not be disturbed, and that the union of all, on which the conservation of these dominions essentially depends may be consolidated. It is well known that my conduct has ever been regulated by the principles of justice and order; I therefore expect that no doubt will be entertained of the sincerity of my promises, and that my views will be well received and supported by all who have at heart the glory of the Spanish name, the integrity of the national territory, and the happiness of the beautiful country we inhabit.

The illustrious Government of our August Queen Dona Isabel II, has already made known, that it has not lost sight of the peculiar circumstances of these possessions, and that it is desirous of conferring on them such boons as are compatible with their welfare. Subsequently, as we know from the latest accounts, the Queen Regent, wishing to confirm more and more the national rights, chose such means as to her appeared the best, but at same time gave a clear proof that she was not forgetful of the Philippine Islands, by establishing for them modifications of much importance, adapted to the wants of these countries, and sufficiently justified by the sorrowful experience of the occurrences in other countries formerly belonging to us.

Though no Royal decree has yet been received, nor any official advice, of what nature the royal decisions are with respect to the ultramarine possessions, we have no reason to doubt, that they will be the fittest for her subjects here. Whatever they may be, I am firmly resolved to obey them, and to make them obeyed; my duties, my political opinions and the confidence I owe to the illustrious mother of our innocent Queen, in appointing me to the Office I hold, all do and it shall not break my word; I shall execute, as far as in me lies, the orders I may receive from her Supreme Government, and this as soon as they shall have been put into my hands. I am perfectly convinced that thus the safety of this country and the tranquility of it's inhabitants will be best preserved, since every deviation from it, which might cause disunion among us, would be fatal to all.

I hope that this sincere manifestation of my principles will be well received by every one, and that it will contribute towards dispelling the unfounded suspicions which some of you may have entertained. I expect therefore that we will all unite to preserve the public tranquility, and this precious portion of the Spanish Monarchy; whereby we doubtless do good service to the just cause, which our nation at present sustains at such heavy cost.

The authorities of all kinds, the military officers and all lovers of order, and desirous of the common good, will find me ready to hear what they may consider conducive to gaining these important ends; but every body knows that to attain them would be impossible if discord should arise among us, and mutual distrust; to avoid this misfortune, it will be necessary to listen with much caution to any insinuations tending to sow discord among the Spaniards. If you continue to have, as hitherto you have had, confidence in your Government, we shall continue to enjoy tranquility; of this you are all assured by—The Governor and Captain General,

PEDRO ANTONIO DE SALAZAR.

Manila, 21st February 1837.

# CANTON PRESS,

April 1st 1837.

THE CONSOOND.

We stated last week that the Hong-merchants, had been in Consoo several times, to deliberate on the state of the Hongs, and how best the impending failure of several may be averted, and by what means the money necessary to pay the claims of Foreigers might be raised. The very best way to satisfy Foreigners would be to pay them out of the Consoo-fund, which, had each Hong-merchant as regularly paid his quota to it, as he is in the habit of charging the 3 per Cent Consoo-duty to the Importer, ought to be more than sufficient to pay *from it every claim that may be made on it from insolvency of any of the Hongs for which purpose alone it was instituted.* But very different we fear has been the manner in which this fund has been appropriated, having, it is thought, been chiefly spent in presents to the Imperial and local Governments; and here we may mention that from the Consoo-fund an annual present of 6 lakhs of dollars is made to the Emperor, and any "squeezes" which the local Government may choose to subject the Cohong to must likewise be defrayed from this fund; it's original purpose has thus been altogether perverted, nor does the fund itself, we fear, exist, except by name, since, if our information be correct, the individuals of the Cohong are only called upon to pay such part of it as will suffice for the payment of the different objects as above explained, the remainder of the three per Cent are nominally put to the debit of the Hong-merchant, who however retains the money; thus it happens, that when any of them fail the Consoo fund has large demands against them, and the payment of the debts, if made at all, will be protracted during a number of years, as the funds for that purpose can only be raised from the trade of the succeeding years, thus burdening succeeding traders to China, with the losses their predecessors have or ought to have incurred. This state of things loudly demands to be redressed, the security we have at present in our dealings with Hong-merchants being reduced to very little indeed, and if the same way of conducting business is allowed to continue, the position in which the Importer will find himself, will be worse every year. The Chinese Government, not only for limiting us in our dealings to the small number of Hong-merchants, ought to be answerable for every debt they are unable to pay, but this also because it has not only suffered but even caused, the fund which was specially raised as a guarantee for the solvency of the Hongs to be perverted to other purposes, chiefly to the profit of that very Government. This will be a must important point to settle with the Peking Government whenever we shall have diplomatic relations with it.

We believe that the deliberations of the Hong merchants have not yet been concluded, nor have they, several of the Creditors of the Hongs becoming urgent, and threatening with an appeal to the Vice-roy, yet succeeded to propose a scheme for payment satisfactory to them. They have, we believe, thought of making the proposal to raise a new Consoo fund, for which foreigners are to act as trustees, by recovering from all imports in future to be made, a certain percentage, which it was thought would in about five years be, sufficient, to pay the debts now owing by the insolvent Hongs. This, if acceded to by foreigners here, would certainly be an excellent way for the Co-hong to get over the difficulty; it reminds us of the proposal made by a debtor, retained in Jail by his creditor, for whose maintenance the latter had to pay a daily 3 pence; which was, that the creditor, instead of paying him those three pence and keeping him in Jail, should release him and pay him two pence only per day, another halfpenny should be the creditors profit on the transaction whilst the balance of a daily halfpenny should go to the credit of the debtor until his debt was cleared off.

The Co-hongs proposal would thus subject the foreign trade to come, during five years to a heavy impost for losses sustained before, making Peter pay what Paul owes, and it's members would thus escape, free from responsibility for the improvidence with which they had risked and lost the property of others, only to play the same game over again. We wish that these matters could be arranged without having recourse to the local Government, since it is well known that the punishment of a defaulter among the Hong merchants, is of the severest kind, probably more severe than he deserves, considering the many difficulties he has to encounter, and the many exactions from that same Government he has to meet; but still we fear, that for the safety of the trade in future, the only way of obtaining redress, and of placing the Import trade on a safer footing will after all be an appeal to the local Government, however much we may regret the necessity urging such a step.

The Vice-Roy of Canton has reported at length to the Emperor his proceedings with regard to foreigners and to the Opium trade and exportation of Syce Silver, and copies of these reports have through the Hong merchants been transmitted to the several foreign merchants here. The length of the document prevents us from giving a translation, but being for a great part merely a repetition of the memorials sent to the Emperor about the Opium trade, particularly of that of Heu-kew, and Choo-tsun, it will not be neccessary to give more than a short summary of the contents. The Governor congratulates himself on having been able in most instances to have executed his Majesty's wishes; he takes credit to himself for having prevented the shipping going to Cum-sing-moon; further for having sent away the foreigners that had staid here too long, all of whom had left Canton with the exception of Jardine, Dent, and Turner, but that they likewise would have to leave at the expiration of the second moon for if they still continued to be disobedient, their punishment would be really awful. He further takes credit to himself for having restored the Chinese graves at Macao, which had been disturbed by foreigners making a road over them, and for having prevented them (not Portuguese) from riding in chairs such as are used by Chinese of rank, and by Chinese carried porters; he commends in this particular the conduct of the Portuguese, whose chairs, he says, are of less pretension, and are carried on the shoulders of black slaves.

Thus several of those points being satisfactorily arranged, the Vice-Roy has to lament that all his endeavors to prevent the Opium trade and the exports of Sycee, have hitherto proved unavailing. He has however commanded all the naval and military officers to be doubly vigilant, and he, the Vice-Roy will once more make great efforts towards the suppression of those evils.

If we understand the meaning of our Cotemporary correctly, of which we are not quite sure, he has of late marvellously changed his opinion as to the efficiency of H. M. Commission, and now expects that the unfurling of the British Flag by the Superintendents in Canton will be *"the proud and powerful token of protection to the foreign trade of Canton."* Our Cotemporary of the *Register* assuredly forgets the conditions on which the Superintendents are permitted to visit Canton; he forgets that they are merely to come to Canton "to control and occasionally *to tranquillise* British subjects," he forgets that the Chinese officers are ordered to surround the persons of the Superintendents with spies, to keep the local Government informed about their proceedings, nor does the *Register* keep in mind that if they act at all contrary to the wishes of the local Government if they create disturbances, or combine with traitorous natives, the commissioners are immediately to be driven back to their own country."

In the remarks we are about to make on the Commissioners' coming to Canton, we beg first to premise that we merely speak of their office, and not of them personally, and that we have no object but candidly to lay before the public our opinions on the subject, which, we believe, are held by a great number of Residents here.

We mentioned in our last number, what we feared would be the consequences of the Commission's residence in Canton, the first of which would be that the Chinese had completely gained the point for which Lord Napier struggled to vain, we mean that they have forced British officers acting under the Commission with which Lord Napier came to China, to communicate with the local Government only through the Hong merchants. No people on earth are so vainglorious as the Chinese and not a little will their vanity be tickled by thus having humbled, as they conceive, the British Government in the person of their envoys, who came out with so bold a front and such a show of determination, making demands which, on being disallowed, are quietly abandoned, and every thing is allowed to proceed as the Chinese prescribe. The Chinese well aware how little earnest the British were or appear to have been in this instance, will not hasten to listen to complaints or demands which may in future be made by British officers, and thus their importance in the eyes of the Chinese Government has been reduced to very little.

We have before stated that in cases of difference with the local Government, should f. i. a homicide be committed, or even any case of smuggling be found out, and the guilty person have escaped, the Government will seek redress from him that controls his countrymen, and the Commissioners may thereby be placed in even a more than usually humiliating position, by proving to the Chinese that they cannot exert any authority over their countrymen, and to the world at large how completely they are at the mercy of the local Government of Canton.

Our Cotemporary considers it "a matter of much importance that the British flag should again be seen flying at Canton;" we admit that it would be, were it there as an emblem of the good understanding between the British and Chinese Governments, but this it is not now, and the Superintendents, instead of being able to afford protection to British subjects, now only possess the means of annoying them.

The Register, no doubt with commendable feeling for his own calling goes on to say that "The Superintendents in conjunction with Howqua may put an end to the liberty of the *Press* in Canton, but they will not dare to do so, etc." This implies a strange mistrust in the honesty and fairness of Superintendents; what, a British subject to league with Chinese to prevent even the expression of his countrymen's thoughts! the mere idea is too absurd almost to comment upon, and we shall not therefore expatiate further on the feasibility of such a scheme.

We observe that our Cotemporary has commented upon our remarks, or rather what we called our ten arguments against the coming to Canton of the Superintendents, but that instead of opposing argument to argument, he contents himself with calling ours false, nor will he allow that any of the consequences we predicted, would follow this step of the Superintendents; he shrewdly observes "that we "do not admit the truth of any of the ten *arguments*, "brought forward by our Cotemporary; and it "will be an easy task for us to meet them when the "time calls; that is, when any of the ten effects "follow the ten causes." If we understand this right, our Cotemporary, after any of the ten effects shall have taken place, will undertake to prove their nonexistence. We congratulate him on this task, but fear his eloquence will be thrown away.

Canton has, during the last three days, been visited by very severe thunderstorms, accompanied by very heavy squalls of wind and rain. On Thursday morning two Chinese were struck dead by lightning near the town, but the severest of these storms we experienced on the morning of yesterday.

The squall came on at a little before five, and during about a quarter of an hour it blew a perfect hurricane, doing considerable injury on the river. We hear of six passage boats having been upset, of which two were from Fasan, one from Hong-shan, one from Kun-kiu, and the other two we did not learn wherefrom. How many lives may have been lost in all of them we have no means of ascertaining, but it is probable that a great number of people were drowned, since we hear that in the Boat from Hong-shan there were no less than 120 passengers of which only about fifty survived. These passage boats generally are vessels of considerable size, very high out of the water, containing one large hold or cabin to accommodate her passengers, and to judge from appearances, frequently stow as many as 3 or 400.

The *Union*, one of the finest foreign schooner boats sailing between this and Macao, was during the squall, while at anchor, ran foul of by a large Chop-boat, and sustained considerable injury, by having her side stove in, fortunately sufficiently above the watermark as not to make any water.

Besides the above several chimnies were blown down, and several houses were more or less injured by the violence of the gale.

Ever since the Chinese Government has affected to be very vigilant in preventing the Opium trade, the shew of preventive boats at Lintin has been greater than before, and among these boats has been observed some newly built, which for swiftness surpass the smuggling boats themselves. These are four of them, which are said each to mount seven guns, and in approbending smugglers they might be very useful; but we hear that instead of chasing they levy a kind of black mail upon smugglers, and this we presume fully answers the actual intention of the local Government, whose report to the Emperor, of which the heads are given above, appears to be a document preparatory to the legalization of the trade on some future day.

We hear that by the arrival of the *Manilla* at Manila from the United States, news have been received from Newyork to the 21st November; money was very scarce and the rate of discount 2½ per Cent; provisions were high, flower quoted at 5½ $ per Barrel, and beef 18 @ 19 cents per lb.

From Mazatlan news from the United States to a later date, we hear to the 29th November, have been received, when the commercial distress had not abated. The election for the Presidency of the United States had fallen on Martin van Buren.

We have heard that the Portuguese authorities of Macao have orders from the Court of Lisbon to expel from that settlement the small number of members of the "Society of Jesus" yet remaining in this country. No reason is assigned, but if the report is true, which we hope it may not be, we presume the confiscation of their property will be the real motive. We shall be sorry if this is the case, as the society still labours, though of course comparatively feebly, in the path which led so many of their body in former days to high office and renown, enabling them alone to overcome the jealousy and dislike of the Chinese to foreigners, and repeatedly drawing down upon them warm encomiums from the highest quarters on their industry, zeal, and disinterestedness. What the position of foreigners in China might now have been, had the Jesuits not been interfered with, principally as we believe from motives of jealousy, it is scarcely to imagine, and we hope that the amiable and respected members of the Macao College may be allowed to pursue their self imposed tasks of conversion and education as long at least as the Chinese do not interfere. The Jesuit missions, under their care, distributed through China, number, we understand, still some hundreds of thousands of Christians, who are supplied with instructors, native and foreign, from the body at Macao. We give a proof of the learning of these Gentlemen when we mention, that it reckons as one of it's members the Revd. Mr. Gonsalves, one of the most profound of Chinese scholars, and known as the author of some valuable Works on the language.

*Delay of Post.* Our readers must not be surprised at this heading. The Chinese have not a regular post-establishment, for the convenience of the public; but they have a well-organized establishment for the conveyance of governmental documents, throughout the *empire*; and we have recently observed in the Gazettes, complaints from several quarters, of the illegal period for conveyance of documents from one place to another being exceeded. For this offence, the magistrates in whose districts delay has arisen, are always subjected to a court of inquiry, and the immediate offenders, the couriers, are punished by the bild office.s. Post-stations are in general established at distances of from four to six or eight miles; and are supplied with horses for the use of the couriers, as also of officers of all ranks, who may be travelling on missions of importance, requiring expedition. This secondary use of the post-houses is sometimes taken advantage of by the relatives of subaltern officers, who when the superiors of their official kinsmen are travelling on public business, quarter themselves to their cortege, and thus travel from place to place, with merchandize, not only at a great saving of expense to themselves, but also in some measure free from examination at the custom-houses through which they pass. This has been carried to such an excess, that, according to a statement of one of the censors, the retinue of the late Cochinchinese mission, including the carriage of goods and of baggage, amounted to between 400 and 5000 men. This statement has called forth an edict from the emperor, addressed to the governors and lieut.-governors of all the provinces, to put a stop to this illegal practice. His majesty also directs, that on the next visit of the Cochinchinese mission, which will be in the course of the current year, the number of which their retinue is to consist is to be fixed before their journey from Kwangsi to Peking is commenced.

*The Yellow River.* It appears from numerous cases of officers being rewarded, on several occasions in the course of last year, for their successful exertions, to restrain the Yellow River within its bounds, that the districts watered by it have recently been exposed to very imminent danger of inundation. It has often been remarked that the Yellow River is one of his celestial majesty's most troublesome subjects. And it appears, that the emperor seeks for more than human strength to keep it under control; and many temples to the river gods are endowed by government. A new one has lately been built, and his majesty was applied to for an inscription to place therein; in answer to which application, he promised to write one himself.

*Dismissal.* In a despotic government, the downfall from high favor to unqualified displeasure of their imperial masters is common among ministers. Yang Mingyang, late lieut.-governor of Shensi, is the son of Yang Yuchun, who, in concert with the present premier Changling, acquired a high reputation and great favor from the war in Turkestan, against prince Jehangir, in 1826-28. He has held the government of Shensse since 1831, and has borne a good reputation. He has, however fallen under the imperial displeasure, and is suddenly dismissed from all official employment, on a charge of negligence, and partiality shown in the appointment to office of his fellow-townsmen.

*Chinese Repository for February 1837.*

## BIRTHS,

At Macao on the 17th March the Lady of Cn. Pearson, Esq. of a son, and on the 21st, the Lady of A. F. Boyd, Esq. of a daughter.

NOTICE.—The undersigned have this day commenced business as general Agents and Commission Merchants under the firm of POLLEXFEN, MILNE & Co

JOHN MILNE.
GEORGE POLLEXFEN.
J. M. MACDONALD.

Bombay, 14th October, 1836.

---

NOTICE.—The business hitherto carried on by the undersigned will from this date be conducted by CHARLES MARKWICK,—At No. 3 Imperial Hong.

ROBERT EDWARDS.

Canton, 1st April, 1837.

---

NOTICE.—Referring to the above advertisement I beg leave to solicit from my friends and the Public, a continuance of the Patronage that has heretofore been given to the Auctioneering and Warehouse Keeping, of the late establishment of Mr. ROBERT EDWARDS. No. 3 Imperial Hong.

CHARLES MARKWICK.

Canton, April 1st, 1837.

---

CANTON GENERAL CHAMBER OF COMMERCE

The office and Records of the Chamber are open to the members every day excepting Sundays; and the Secretary will be in attendance from 12 till 3 o' Clock.

By order of the Committee,
WILLIAM SCOTT.
*Secretary.*

Canton General Chamber of Commerce
No. 2 Danish Hong 4th Feby. 1837.

---

NOTICE.—SAMUEL WETMORE Jr., is this day admitted a partner in our establishment,

WETMORE & Co.

Canton, February 1st 1837.

---

NOTICE.—The interest of MR. JOHN TEMPLETON having ceased on the 30th June last in our business, the same will in future be conducted under the Firm of MIDDLETON & Co.

JOHN TEMPLETON & Co.

Canton, 28th January, 1837.

---

NOTICE.—The Copartnership hitherto existing under the firm of Markwick Edwards & Co. ceased this day. All Persons having claims against the said firm are requested to forward them, and all Persons indebted to the same are requested to pay the amount to the undersigned.

ROBT. EDWARDS.

Canton 31st Dec, 1836. No. 3 Imperial Hong.

---

NOTICE.—ROBT. EDWARDS respectfully informs his Friends and the Public that the Business hitherto carried on under the firm of Markwick Edwards & Co. as auctioneers and Commission Warehouse keepers will be continued by him.

Canton, 31st Dec. 1836. No. 3 Imperial Hong.

---

NOTICE.

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

NOTE. Opium can only be delivered at Lintin &c. where also high prices are obtainable for *Camlets, Saltpetre, Ginseng* and other Goods on which the duties at Whampoa are high.— Ships with *Rice, Cotton &c.* sometimes discharge at Macao or translip their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The Expences outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Provisions &c, Confectionary Stationery, Cutlery Crockery ware, &c.*, for foreign consumption, are sold at Auction duty paid.

*Note.* *Alum*, and *Cassia* are procurable cheaper at Lintin, Macao, &c.; and *Raw Silk, Silk* piece goods &c. are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

3rd " " " under 1200 do. 0.5062341 " "

N.B. The cubit in 14½ inches; measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 4360 to $ 4320; 2d class from $ 3700 to $ 3790; 3rd class from $ 3700 and under. The Consuha (or Present Fee is paid by all vessels 1600 Tons or $ 2325. Linguists fee $ 1734 and Comprador's fees $ 50 Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Ricelades ships are charged only about $ 1300 in lieu of measurement &c.'

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—little or nothing is doing in these, the market in general being very inactive.

COTTON YARNS.—In this article we have not to notice any improvement either in demand or price.

WOOLLENS.—are still declining, and sales can not without great difficulty be effected, even at our low quotations.

LEAD.—has given way in price. Other metals continue nominally the same, tho' little or nothing is doing in them.

RICE,—continues as before A great deal of rain has fallen during the week, which is favorable to preparing the ground, previous to planting.

STRAITS PRODUCE,—is without change for BETELNUT and RATTANS. TIN and PEPPER have again declined

COTTON.—Several sales have been effected within the last week at very low rates of the middling and common descriptions, of which the stock of Bengal and Bombay almost entirely consists, at a reduction of 3, and in some cases of 5 mace, per Picul, and purchasers do not come forward even at these rates from the great scarcity of money, and the report of the probable large supplies from all sides of India.

OPIUM.—There has been a decline in all descriptions, particularly in Malwa, which holders appear anxious to realise previous to further supplies, and some has been, we understand, bartered for goods, which the parties are reselling at a heavy sacrifice, in order to raise money. For the Bengal drug there is very little enquiry.

The deliveries to the 22nd. were. Patna *old* 75; *new* 117; Benares, *old* 111; *new* 7; Malwa, *old* 614; *new* 300; Total 1224 Chests.

### EXPORTS.

Both in RAW SILK and TEAS very little or nothing is doing.

### SEVERE PUNISHMENTS.

"The case of Teng-chin and Seuh-she, who beat and disgraced their mother.

The Shang-yu or sacred Edict begins with filial duties, as of the first importance. It has long since been understood, that the people were all acquainted with these principles, and that there was not one who had not been renovated thereby. But now, according to the report of the Viceroy of Hookwang province, there is in the district of Hanyang, in the Heen of Han-chuen, a scholar, named Teng-chin, with his wife Seuh-she, who have beaten and disgraced their mother. I perceive that in instances of unfilial conduct, the five established modes of punishment are not adequate to the offence, and therefore think that the culprits should be flayed alive, as a warning to all. The head of the family and the elders of the village, because they neglected to instruct them, should be punished by strangling; the neighbours to the right and left, because they did inform, must suffer 80 strokes of the bamboo, and be transported 3,000 lee; the instructors or teachers, because they did not proclaim the imperial will, must suffer 60 strokes of the bamboo, kneel in the Ming-lun temple for three months, and afterwards be banished. The scholars of all that district for three years will not be permitted to attend the examinations. The magistrates of the district, because they secretly allowed of and did not punish the offence, must quit the city, be deprived of their office, and transported; and when their time is expired, be for three years degraded to plebeian rank. The mother of Seuh-she, because she could not teach her daughter better, must suffer 80 strokes of the bamboo, be branded with characters descriptive of her offence, and thus made to wander about the city for four years: and after the expiration of that term be banished. The house in which Teng-chin dwelt is to be dug up from the foundations, both bricks and ground, to the depth of three feet. Teng-chin's mother to receive a monthly pension of a bag of rice and a tael of silver, to be paid her by the treasurer. Let this edict be announced to the six Boards, and for ever adhered to. Let Teng-chin and his wife be taken out into the front of the district of Han-chuen, and each receive a hundred slashes with a sword, as a warning to all. According to this, let the Viceroy, and officers issue out proclamations, informing of the edict; and let them be dispersed through the whole Empire, that the people may know it. And if there be any obstinate unfilial children, who do not obey the commands of their parents, and speak to them with a loud voice, beat, or degrade them, they shall be punished in like manner. If indeed your people know the renovating principle, fear and obey the imperial will, do not look upon this as empty declamation. For now according to this affair of Tengchin, wherever there are unfilial and obstinate children, I resolve to condemn them, and from my heart strictly charge you to beware. I shall also instruct the magistrate and mandarins of every province severely to warn the heads of families and elders of the villages; and on the 2d and 16th days of every month to read the "Sacred Edict," the renovating doctrine. In order to shew the importance of the relations of life, that persons may not despise those from whom they sprang: for I intend to render the Empire filial."

### WUJEERUN.

*From the Asiatic Journal for September.*

In that part of the India Company's kingly territory, which borders upon the Punjaub, there dwelt a respectable Mussulman family, one of the members of which was a daughter, about thirteen years of age (which might, in point of womanhood, render her equal to a European maiden of eighteen), and so remarkable beautiful, that all the surrounding country had heard of her, and numerous attempts had been made to obtain possession of her by force or fraud, as well as honourable propositions. To the natural and proverbial credulousness of the Oriental female form, Wujeerun added that intellectual expression of countenance, which constitutes the soul of European beauty. She was surpassingly fair—and among the natives of India that is deemed a constituent part of loveliness—and she had that freshness of complexion which her countrywomen want, but which gave infinite lustre to eyes so naturally sparkling, that their light was rather injured than increased by the application of the *soorma*, which is thought in general so greatly to add to the lustrous appearance of an Indian glance. To this personal superiority, the laughing and artless girl did not add those charms of mind, which precept and education can alone bestow; for, like the rest of her sex, belonging to her condition, she had been kept in ignorance of all that is understood by the word "accomplishment;" the usual duties required in a wife being the only points in which she had received any instruction. She was not, however, secluded from society, for the parents were not wealthy, nor of a station to enable them to dispense with their daughter's services. She had, therefore, the care of the younger children, and was also employed in fetching water from the river, together with the more homely duties of the village, over whom her beauty gave her no sort of pre-eminence either in her own estimation, or in theirs, and the pet name of *Purnee Bibi*, or 'fairy face,' formed the only distinction she was permitted to enjoy. Among the middling classes of the natives of India, household capabilities generally comprise all that a girl is not absolutely deformed, she is certain of being married at an earlier age than that of Wujeerun Lovers, in our sighing and pastoral sense, they have none. Before they can speak, and certainly as soon as they can run about, they are betrothed to a son of some other family, who has not himself had any choice in the arrangement; and marriages so constituted are believed to be as felicitous as the matrimonial contracts in countries where there is often, after all merely the appearance of a more ordinary selection, and where intrigue, and a hundred other feelings and motives, quite distinct from love, are the ultimate causes of more than half the unions. In this manner, Wujeerun had been betrothed to Jumla Khan, a boy about four years older than herself, and the son of a neighbouring Mussulman of her father's sect, but whose absence in the army of one of the Mahratta chiefs had been the means of the long postponement of their nuptials. In this interval, it chanced that an English officer, too impetuous to be restrained, and too heedless to reflect before hand upon the probable results of either a good or evil action, happening to be in the neighbourhood on a shooting excursion, beheld the pretty Wujeerun, as she one evening returned from the river-side with water, and being, as every one must have been, struck with charms which to such an extent were rare in India, he resolved, with (it must be confessed) a very blameable intention, to ascertain her history. This was easily effected, and the admiration, thus suddenly inspired, led to a reckless determination to obtain the object of it. In less than three days, the officer had arranged a plan, in spite of the danger attendant upon so lawless a proceeding, to carry her off by force, and trust to his powers of subsequent pursuasion to render her satisfied with her new condition. By the aid of an old woman, one of those supple and ready instruments which are found in every country, and perhaps more especially in India, De Burgh contrived to lure the unsuspecting and inexperienced girl to a spot near the village, out of sight of her father's dwelling. A strong and trusty servant was in waiting, and it being the middle of the day, in which comparatively few people are abroad, he seized the opportunity to snatch her in his arms, and subduing her cries, carried her swiftly along to a place in which a comrade was in waiting, who relieved him from his burthen, conveying it to a third preconcerted place, where another emissary had been stationed; and in this manner, by easy stages, the poor girl was transported to the tent of De Burgh, who lost no time in returning to cantonments with his beautiful captive.

She was soon missed by her parents, and the circumstance of an European having been seen in the neighbourhood, sufficed to raise a suspicion, which brought the miserable couple to the place where the tent had stood, but finding the place vacant, they determined to proceed directly to the nearest military station. The distance did not exceed six miles, and the old shaikh arrived, not only with all his own family, but at least half the men and women of the village, clamorous for justice on the supposed seducer of their *Purnee Bibi*. In the eyes of the commanding officer, upon whom their complaints were made, and their accusations against De Burgh did not appear to be altogether innocent; for, besides the circumstantial evidence which made so strongly against him, he had got a reputation for wildness and recklessness, and had been engaged in adventures of a similar character before, though of a less desperate and daring description than the present. Being at the same time a great favourite with his old commandant, although Colonel Cromwell would neither have shielded him from the consequences of the discovery of his guilt, nor dismiss the complaint, from an apprehension that it might be proved against him; he refused, as he justly might, to allow the shaikh's party to go at once and search the suspected bungalow, before De Burgh had been made acquainted with the charge of his accusers. A staff-officer was accordingly despatched with this important communication; and, being instructed to inform De Burgh that a search would certainly be permitted, he accompanied the intimation with a significant look, as much as to say, "fore-warned forearmed." The search was, accordingly, instituted, with all the scrupulous jealousy attendant upon the strongest suspicion, so that scarcely a cat-hole in the dwelling remained unexplored; but the prisoners found not the betrayed Wujeerun. Her mother called upon her in the tenderest manner; but, either the girl was not within hearing, or would not, or could not, reply to her intreaties. At length, the party were obliged to quit the premises, but, in retreating, they vowed the darkest vengeance on the dishonourer of their child, the brother apparently being only restrained from inflicting it at once, by the presence of the symbols of *gora* dominion, the police of India, and the quick eye of the watchful De Burgh. Throughout the cantonments, large pecuniary rewards were proclaimed by beat of *tom tom*, to whoever should give such information as might lead to the discovery of the shaikh's daughter. Not a servant belonging to De Burgh could be ignorant of the fact of her being under his protection, and protection it might be called; but they remained faithful to the trust reposed in them, and as through them alone the secret could transpire, their fidelity secured it from being known. Time fluctuated; and the young and giddy girl, seeing herself surrounded with unaccustomed splendour, treated with a fondness and a deference which she had never known before, and, above all, entertaining no sorts of affection for Jumla Khan, speedily became reconciled to her new mode of life. De Burgh easily succeeded in gaining her affections, and, regarding him as the dearest object of existence, nothing short of actual force could have induced her to return to her native village. Meanwhile, the life of her lover remained in constant jeopardy; and so closely and continually was he watched by her own relations, that he never could venture to stir abroad without being well armed himself, and having, at least, one chosen servant in attendance. Often, though, vainly, he now regretted the rashness of the act which had provoked the strong, though just animosity which now daily and hourly imperilled his existence: the deed, however, had been perpetrated, and the consequences must be braved.

It was not from Wujeerun's brothers alone, that apprehensions of a fearful vengeance might be dreaded, although the burials did not direct his attention to any other quarter, and remained in ignorance of the fewness of a more dangerous enemy. In the expectation of finding his betrothed blooming in the height of loveliness, and waiting anxiously for his return, Jumla Khan reached his home in safety, full of hope, and proud of the honour he had gained in the war. The first tidings which greeted his return, told him of the irremediable loss he had sustained in the abduction of his affianced bride. The interest of this tale would probably be heightened in the opinion of many readers, if the historian were to invest the betrothed with all the characteristics of a fond and devoted lover. Such an embellishment, however, would be at variance with the truth, and believing the incidents now related to be fact, the narrator feels desirous to give an accurate view of the native character, even though it may militate against the effect of the story. With respect to women, the *hearts* of both Mussulmans and Hindoos are generally apathetic, few being capable of the pure undeviating attachment to one sole object, which can alone be dignified by the name of love. A fierce jealousy and a savage sense of honour will, in most cases, prevail over affection; the husband's or the lover's tenderness seldom interposes to save the life of his victim, who, without the slightest personal guilt, having incurred what his rigid notions deem disgrace, may be sacrificed upon the most trifling occasion, neither compunction nor remorse following the deed, the perpetrator finding in a w ives and new mistresses, a solace for those whom he has murdered. Jumla Khan, instigated to revenge by a motive as powerful as love, calmly and perseveringly took measures for the furtherance of his object. His honour, the honour of his family and of his caste, had been sullied by an Englishman; and having in the Mahratta camp imbibed the deep hatred which the implacable enemies of our country entertained for the English character, every hour he feeling became sharpened and aggravated. To be disgraced—wronged in the nicest point,—by him we hate, and whom we should have hated, had he never wronged us,—can there be on earth a more powerful or a stronger stimulus to unappeasable revenge? It was thus that Jumla's whole soul was affected; but the strength of the feeling, which stirred his troubled spirit, was similar to that of a broad and deep river, which will bear all before its current, though we can scarcely perceive from its surface a token of its impetuosity. The calm countenance of the dishonoured man gave no indication of the desperate conflict he sustained. He spoke not to mortal of the purpose which he had silently sworn to Allah to accomplish—a purpose which he dared avow to the deity he worshipped; for, in the perverted notions of the divine attributes which the Indian Moslem entertain, they shrink not from offerings stained with human blood.

Having made the arrangement which he deemed to be requisite for the accomplishment of his design, whatever that might have been, Jumla Khan departed from his father's house, unobserved by those who had ceased to regard, and unregretted by those who had begun to despise him, on account of his imagined and undefined resignations. He took the road to De Burgh's quarters, and, on arriving there, learned that the regiment had marched to a distant station, being included in that relief which at periodical intervals governs the movements of the whole army. Three years elapsed before he again appeared as an actor in the scene of which the events have now obtained a record.

Grown more sober-minded, and perhaps taught more by experience, by the disgrace and humiliation which his forcible seizure of Wujeerun had brought upon himself, the character of De Burgh had greatly altered; he no longer desired to pursue the path of riot, and three years after the discreditable exploit which has been narrated, found him the husband of a lovely and amiable woman, and the father of a rosy, smiling, infant girl, and Wujeerun had been transferred to the keeping of another. Thus felicitous in his domestic relations, he was sitting one afternoon, during the festival of the *Mohurrum*, with his wife, who amused herself by toying with her infant in the verandah, and, according to custom in the warm season, without a neck-cloth, and otherwise in deshabille, when a man suddenly entered, and walked up as if to address him. The servants had all gone out to see the procession of the *tazeea*, which spectacle concludes the *Mohurrum*, and the abrupt appearance of a stranger, being thus accounted for, excited no astonishment on the part of De Burgh. The intruder had a *tulwar*, a species of sabre in his belt, and his hand grasped a dagger; but this appearance presented nothing unusual, and he was taken for one of the chowkeydars, or watchmen, coming to make some request, or solicit some favour. He was a tall and muscular, but young man, and his countenance remained unperturbed as he advanced to De Burgh. Seizing his victim by the right arm near the shoulder, with his own left hand, he exclaimed, with a calmness which gave tenfold effect to the announcement: "Infidel! remember Wujeerun!" The act that follo-red did not occupy a moment, though it may not be related so quickly. De Burgh was a brave man, but in circumstances so appalling, the bravest may be for an instant confounded; and only for instant did the young officer remain passive beneath the grasp of his ruthless enemy. Though unarmed, being active and powerful, as well as courageous, he sprang from the chair, and grappled with the murderer, while his hitherto gentle and fragile, wife, hastily placing her infant on the floor, dashed herself with her entire strength, and the desperate devoted courage of a woman who loves, on the neck of the destroyer, as if she hoped to strangle him. But scarcely moved by the efforts of cool bravery on the one part, and of reckless despair upon the other, the determined man shook his weak assailant off, dashing her bleeding and senseless to the ground, with the apparent ease of an eagle striking down a dove, and almost simultaneously passing his arm under that of his victim, so as to grasp him by the back of the neck, in a manner which, beneath such strength as he displayed, rendered it impossible for the struggle to be longer maintained. Again exclaiming, with a look of calm deliberate ferocity, but a choked utterance, "Remember, Wujeerun!" he plunged with inconceivable accuracy of aim and strength of muscle, his sharp double-edged dagger into the centre of the spine of De Burgh, driving the blade up to the hilt in the brain. Shaking him from him, as the dead corpse fell heavily on the ground, and then leisurely departed.

From that moment, the assassin had never been heard of; and when, chance-directed, I came suddenly upon the solitary and haggard Fakeer of the Ghir, and stood before Jumla Khan, I was the first European who, since that bloodstained day—now more than fifty years ago—had ever beheld the stern avenger.

### SANDWICH ISLANDS.

We have before us a list of the Shipping at the Sandwich Islands during the last year, and receipt from our Correspondent of the Sandwich Islands, his remarks on it, which contain a short summary of the list.

"*Arrivals at Oahu.*" We have seen a printed list under the above title exhibiting *statistics* of the shipping which visited Oahu from January 1st, to Dec. 31st 1836. With a few trifling errors, we believe it is be a correct statement, and given, from a rough glance at it the following memoranda, which may be interesting to our readers. The list includes only the foreign arrivals, all coasting vessels being omitted.

In some instances, the same vessels have arrived more than once during the year, but they are of course entitled in such cases to be computed as new arrivals.

The shipping list says, "Fifty-two Whaleships during the last season, having on board 80,600 barrels oil. Forty-eight of the vessels cruised on Japan and took 20,945 barrels; or about 438 barrels to each vessel."

The vessels included in these estimates are vessels of War, Merchant, Whaling, Sealing, Shelling and other vessels, employed in different parts of the Pacific; they visit these islands for the various purposes of commerce; to dispose of their cargoes, to refit, refresh &c. and we venture to say they find dear old Oahu not the worst place in the world to procure the necessary assistance in the prosecution of their voyages.

The total number of tons of the shipping is stated to be about 33,050: of these there were,

| | |
|---|---|
| Schooners, | 10 |
| Brigs, | 17 |
| Barques, | 21 |
| Ships, | 87 |
| Steam Brig, | 1 |
| Vessels of War, | 4 |
| Vessels during the year 1836. | 110 |

The vessels are owned in

| | |
|---|---|
| United States, | 71 |
| Great Britain, | 15 |
| Oahu, | 15 |
| China, | 4 |
| France, | 1 |
| Isle of France, | 1 |
| Mexico, | 1 |
| New Brunswick, | 1 |
| Calcutta, | 1 |

This view of the commerce of the past year is hastily drawn from the statistics obtained by, but we believe it is nearly correct, and that it will be considered a fair reconspect of the Marine intelligence for 1836.

California, both upper and lower, is rapidly rising the novelty and enticements of commercial enterprise. The recent arrivals bring us favorable reports and surmises in abundance relative to the past year's result of the revolutionary movement; we are not prepared to draw inferences, but so far as we can judge, the a pect of affairs is not unfavourable to the future prosperity of California; there is of course much variety of opinion, among the good people upon the Coast in regard to the radical alteration which has deprived the Mexican part of the population of a share in the government; whether internal dissensions will upset the quiet of the country time only can prove. The part that Mexico will play in the drama remains to be found out; that she will unite upon the new order of things is not to be supposed, but as Mexico is busy with Texas it is not easy to conclude that she will at present resort to coercive measures: if she does so in future,—why we shall see the result.

*Mammoth Yam.* We are informed by a gentleman who some time since visited Tongatabu, that he there saw a yam, which from a careful calculation he judged would weigh about a ton! This vegetable monster had been growing twelve years, on a spot of ground "sacred" from the circumstance of a chief of high rank being killed on that spot. The captain of a whaleship obtained permission to take it to his vessel, but being interdicted from landing it up on shore, he was unable to remove it. *Sandwich Island Gazette.*

### CHILE AND PERU.

The *Mary Walker* from Valparaiso, has brought the *Araucano* newspaper to the 13th January, which has been kindly lent to us, and of which we make the following extracts, after a few preliminary observations.

Few of the events which contained in the present hostile demonstrations, are we believe, generally known, and for the better understanding of the following we shall give a short account of them.

When general Sallavery, by means of a revolution, placed himself at the head of affairs in Peru, the Government of Chile recognized him as President, and had several official communications with him, against which the other party headed by General Orbegoso, protested, but without effect. After Sallavery had been defeated, Generals Santa Cruz and Orbegoso were anxious to resent the conduct of the Chilian Government, and tried to embarrass it, by exciting civil commotions in Chile, and by assisting underhand General Freire, who for seditious conduct had been banished from Chile. The consequence was that a Chilian vessel of war was despatched to Callao, where the cut-out three Peruvian vessels, which act of hostility was not at first resented by the Peruvians, and an accommodation between those two states was attempted, but without success.

We shall now first relate the result of Freire's intended invasion of Chile. He had with some of his followers left Peru in the Brig *Orbegoso*, and a ship of war, the *Montezuma* had been chartered for him by his Agents in Callao, to assist him

in this enterprize. The two vessels met at the appointed rendez-vous, where the *Montagudo* received on board arms and other warlike stores, and the vessels were to proceed to Chiloe, were the *Orbegoso*, with Freire on board, soon arrived at the Port San Carlos, which was taken possession of without resistance. Meanwhile the crew of the *Montagudo* finding that they were to be employed against their own Government, took possession of the ship, and brought her back to Callao, for which act of fidelity the two principal actors in this affair were rewarded with a golden medal and five hundred Dollars each. The Chilian Government improved this circumstance by immediately despatching the *Montagudo* to San Carlos, where Freire, not aware of her defection, did not oppose her, and favored by this deception the Chilian Government was soon in possession of the places usurped by Freire, who himself with many of his officers was taken prisoner, and together with his brig *Orbegoso* and another Schooner conveyed to Valparaiso. In Santiago Freire and his accomplices were tried for high treason before a Court Martial, found guilty, and sentenced to 10 and 6 years banishment respectively. This sentence, Prieto, *President* of Chile, has protested against, as contrary to law, and too lenient, and the members of the Court Martial have been arrested, previous to their being tried before the Chambers of Deputies and Senators for dereliction of their duty. Thus Freire's invasion has ended, without a drop of blood having yet been shed.

Congress had authorised the executive to contract for a loan of 200,000 $, in shares of 500 $ at 6 per Cent per annum, which shares were being taken freely; besides we find in many papers presents offered to the Government to assist it's pecuniary means in it's present straits and several employe's of Government tendered part of their salaries to that effect, but without their offers having been accepted.

Another loan of 100,000 $ had been contracted at Valparaiso by Agents of Freire and of the Peruvian Government, with a view of assisting the former. The Contractors of this loan have been tried, for this offence at Santiago, but no evidence having been brought forward of their knowledge of how that money was to be employed, they have only been fined one per Cent of the amounts subscribed to the loan, for irregularity of proceedings, and to defray the expenses of the prosecution.

The *Aquiles*, the Brig of war which cut out the Peruvian vessels in Callao, had arrived, with her prizes, at Valparaiso, where the latter are for the present detained. After her successful exploit had become known to the Peruvian Government, the Chilian Ambassador was ordered to leave Lima immediately, whence he took refuge on board of a French ship, and afterwards embarked in the *Aquiles*.

The North American Charge d'Affaires, and the British Consul General both offered their mediation to the Peruvian Government, to effect a reconciliation with Chili, which offer seems to have been disregarded.

Peru then sent an Envoy Extraordinary to Santiago with a view to demand satisfaction for the outrage committed by the *Aquiles*, but with directions to accommodate matters, without, if possible, coming to an open rupture.

Whilst these negotiations were going on, the Chilian Government, which seems to wish for a war with Peru, sent a squadron of five vessels, with an Envoy Extraordinary and Minister Plenipotentiary to Callao, but on their arrival, the squadron was denied admittance into Port, though the Peruvians were willing to receive the Minister with all due honor. After an interchange of a number of diplomatic notes between this minister and the Government of Lima, the squadron and the minister returned, having declared war to Peru, and on their arrival at Valparaiso, the Bolivian and Peruvian Ministers both received their passports, with orders to quit the country by the first opportunity.

On the 26th December the Chilian Congress ratified the declaration of war against Peru on the following grounds, viz: that Santa Cruz, President of Bolivia, retains unjustly the Government of Peru, thereby threatening the independence of the other South American Republics; that the Peruvian Government, under Santa Cruz, has sanctioned the invasion of Chili by Peruvian Ships of war; that, finally, Santa Cruz has, against the law of nations, insulted the Chilian minister.

On the 28th December the war was publicly proclaimed in Santiago.—When the *Mary Walker* left, no actual hostilities had yet taken place, but a Peruvian Ship, *La Libertad*, had by her Commanders been delivered to the Chilian Government, for which good service they had been rewarded with the sum of 8,000 $.

On the 29th October an earthquake was felt at Valparaiso, which was followed by a violent gale, during which several vessels were driven on shore.

A meeting of British merchants was held at Lima, to consider of the best means of establishing a communication between the different ports on the westcoast, by means of Steam navigation.

## MANILA.

### THE GOVERNOR'S PROCLAMATION.

In my proclamation of the 21st of this month, I expressed my conviction, that the illustrious Government of our exalted Queen Dona Isabel II, would, well aware of the wants of these countries, adopt the measures best adapted to the peace and welfare, which it's pacific and loyal inhabitants now enjoy; I at the same time expressed my firm determination to obey, and make to be obeyed the dispositions of the Supreme Government concerning the ultramarine possessions.

The orders received by the Ship *Nueva Sultra*, which has just arrived from Cadiz, shew how well founded my hopes were that the Queen would not for a moment lose sight of the true interests of these possessions; desirous to procure for them all the advantages their position admits of, she orders the speedy election of deputies to represent them in the Cortes, confiding to their wisdom and experience the discussion and proposal of such measures as they may deem conducive to the improvement and tranquility of the ultramarine dominions; under these circumstances all that remains for us to do is, to await again Her Majesty's orders, persuaded that they will be the most fit, and that the strict observance of them will contribute efficiently to the security of this part of the Monarchy.

For the present it is her Majesty's will that no innovations be made; and this she declares expressly in the Royal Resolution of 23d August last, which is to the following effect.

"Ministry of State.—Excellency: I informed you "in the Royal order of 19th of this month of her "Majesty's reasons for not altering in any way the "present form of Government in the Philippines, "until the Cortes shall have formed the fundamental laws which are to extend over the whole "Monarchy, and H. M. hopes that you will zealously support her royal determination; but wishing at same time that no moment be lost towards the "election of Deputies, and that these may with all "possible despatch come to discharge their important functions, I send to your Excellency H. M's. "decree of 21st of this month, convoking the cortes "on the 24th of next October. May God protect "your Excellency many years. Madrid, 23rd August 1836.—Ramon Gil de la Cadra. To the "Governor Captain General of the Philippine "Islands."

And that this may be known, and carried into execution, I publish this royal order, which proves how kind to us are the intentions of the Government of our innocent Queen, well convinced that it will be duly respected and promptly obeyed.

The Governor and Captain General,

PEDRO ANTONIO SALAZAR.

Manila, 28th February, 1837.

# CANTON PRESS,

April 8th 1837.

Nothing can be more flattering to the self-love of any one, than to see that the opinions which he has for a length of time attempted to spread with but indifferent success, have at last been embraced even by those that opposed them most; of this we experienced the gratifying feeling on the perusal of the Canton Register where our Contemporary at last confesses, that the opinions expressed in the petition signed by a great majority of British residents and addressed to the King in Council, now more than two years ago, might have been formed "on ignorant and presumptuous hopes and under peculiar excitement" but that we may not be accused of wrongly interpreting, we will give our Cotemporary's own words; "Yet we have been gravely told, because we signed a petition in 1834, in "which petition certain prayers were laid before the "king in Council, which were altogether disregarded, that neither the circumstances of this times, "or of an ever varying world, can justify any "deviation from a once pledged opinion even although that opinion might have been formed "on ignorant and presumptuous hopes, and under "peculiar excitement!"—

We certainly agree with the Register that circumstances can arise, which may lead to the change opinions once conceived, but the possibility of this, when we formerly expressed our disapprobation of the objects of the petitioners, ought to have rendered our brother Editor more enduring of other's views than the used to be on such occasions; if we only touched the petition or any part of it with the slightest degree of censure, our neighbour was in arms immediately, accusing us and our friends of coalition with the Chinese, and of being disaffected to the cause of foreigners here. We will however forgot the past in the flattering hope that our arguments may have contributed, in what degree it would be presumptuous in us to surmise, in assimilating the Register's politics in some manner to our own, though we must say that that paper distances us with gigantic strides, in it's deviation from the objects of the petition, and now supports acts in direct opposition to it; we allude to the Register's approval of H. M. Superintendents coming to Canton, though our Cotemporary must be aware, that their arrival here has been in consequence of their application to the Hong-merchants, through whom the permission has been obtained, and through whom, it was formerly thought, no very desirable, no communications from British officials should be made to the Chinese Government.

With all this it may to many appear remarkable, that the "peculiar excitement" under which, according to our Cotemporary, the petition was framed, nearly *six months after the occurrences, to which it alludes, had taken place*, should not have subsided with him until within about the last fortnight, when, after a period of two years and nine months, our Cotemporary's judgment has, as he confesses, returned to it's natural and healthy tone; we sincerely hope that this latter state may last as long as the former excitement.

We stated in our last week's paper that a short, though very severe gale had taken place here on the morning of the 31st of March, causing considerable loss of life on the river in the immediate neighbourhood of Canton. Accounts have since reached us that the gale extended as far as Lintin and Macao, and it blew as violently at the former anchorage that several vessels slipped their cables, and run for places of safety among the Islands. Much lightning accompanied it, and the *Morrison* was struck, sustaining some injury in her masts and rigging. No other accident occurred either at Lintin or Macao, but a large Chop-boat, intended to convey H. M. Superintendents to Canton, was on her way to Macao totally lost near the Nine Islands. We hear that a Chin-chew man, passenger in her as far as Macao, as well as the master of the boat were drowned, and that the property of the former, amounting to about 1000 $, was likewise lost. It was at first stated that the Chopboat had some 600 Chests of Tea on board, which had all been lost, but this we are glad to be able to correct, since no other property was lost in her than that above stated. Another boat, coming from Macao by the inside passage, laden with part of the *Hero's* Cotton from Calcutta, was upset on the river, and part of her cargo damaged.

Another Chopboat for the accomodation of Capt. Elliot and suite was to have left for Macao yesterday.

The weather has been equally and boisterous ever since, and within the last few days a prodigious quantity of rain has fallen, against which the roofs of our houses have in many instances proved but ineffective protection. The river is much swoln in consequence, and during the last few days no flood tide has been perceptible a few miles beyond Canton. If the weather should now clear up, the rice planting, though rather late for the season, will be commenced under very favorable circumstances.

By the *Rasselas* from the Sandwich Islands, we have received papers from Honolulu to the 28th January, of which we give a few extracts in another column. Our readers will find likewise a resume of what we gather from Chilian papers to the 13 January, brought by the *Mary Walker*. We are sorry to see from them that there is every prospect of an active war between Chile and Peru, which may materially retard the progress particularly the former of these Republics was making in wealth and civilization.

The local Government continues to insist on the merchants named in a former Edict, and who have not yet, in obedience to it, left Canton, leaving within a few days, setting a term for their departure, which we believe will expire to morrow or the day after. Whether these Gentlemen will then leave on a visit to Macao or not, we are not informed of with any degree of certainty, but from the earnestness with which the local Government prosecutes this expulsion, we suppose that they will have at length to submit to at least a temporary sojourn at Macao. The reason for their not having paid attention to the Viceregal order before, has been the unsettled and precarious state of several of the Hongs, largely indebted to them, with whom they naturally wished to arrange before they left Canton. If it is intended by the Local Government that they should leave China altogether, or should any obstacles be thrown in the way of their return to Canton after their stay at Macao, which after all may be intended to be only according to old regulations, and their accounts with the different Hongs still remain unsettled, which there is much reason to fear the case will be, then, we would say, that they will be perfectly satisfied in refusing to pay further obedience to the orders of the local Government until their claims against the Hong-merchants shall have been paid.

The Co-hong has been frequently in Consco during the past week, deliberating on the state of the insolvent Hongs, but as yet, as far as we learn, nothing has been decided with regard to them. Many surmises are afloat, *i. i.* that the Co-hong is willing to become security for the Kin-qua and Mow-qua Hongs, but not for the Hing-tae; and it is pretty generally supposed that without recourse being had to the local Government, be without making this latter Hong officially bankrupt, no settlement will be come to. This mutual liability of the Hong-merchants for debts to foreigners is a subject of the most vital importance to our Commerce, and the moment is drawing near when a fixed principle with regard to it must be laid down and acted upon. We think this a fit subject for the deliberations of the Committee of the General Chamber of Commerce, which being composed of most of the leading merchants of our community, will be well prepared with practical experience to meet the question. We some time ago (see Canton Press of 2d, 10th, and 17th December last) collected and republished most of the documents found in the Correspondence between the British Factory and foreign-merchants on one side and the Hong-merchants' letters and Vice-regal edicts on the other, which will serve materially so elucidate that important point, though we defer to others of longer standing and greater experience, in coming to a decided opinion on the subject.

The Hongs of Hing-tae and Gow-qua, are still prevented by the Hoppo from transacting their business; it is said on account of the latter's having taken offence at some disregard of the usual etiquette on their being released from confinement in the City. The Hoppo, we suppose, has been disappointed in the expected present for their deliverance.

## GENERAL CHAMBER OF COMMERCE.

For Mr. H. H. LINDSAY, absent, Mr. Wm. WALLACE has been elected member of the Committee, which now is as follows:—

GENERAL COMMITTEE OF THE CANTON GENERAL CHAMBER OF COMMERCE.

| | | |
|---|---|---|
| JAMES MATHESON, | Esquire, | |
| LANCELOT DENT, | " | |
| RICHARD TURNER, | " | English. |
| WILLIAM BLENKIN, | " | |
| WILLIAM WALLACE, | " | |
| M. J. SEBN VAN BASEL, | " | Dutch. |
| W. DELANO, | " | |
| JOHN C. GREEN, | " | |
| C. W. KING, | " | American. |
| DADABHOY RUSTOMJEE, | " | |
| NAWABHOY FRANJEE, | " | Parsees. |
| A. C. MACLEAN, | " | Any Nation. |

JAMES MATHESON, Esq....Chairman,
JOHN C. GREEN, Esq....Deputy Chairman.

COMMITTEE OF MANAGEMENT,

WILLIAM WALLACE, C. W. KING, WILLIAM BLENKIN, ESQUIRES.

COMMITTEE OF ARBITRATION, APPOINTED 1ST APRIL.

A. C. MACLEAN, L. DENT, R. TURNER,
W. BLENKIN, C. W. KING, Esqs.

We give in our price current of this day a statement of the quantity of Opium delivered at Lintin during the year ending on the 31st of March, from which it will be seen that the total quantity delivered during the year amounted to 31,000 chests, value 16,464,130 Drs., exceeding the quantity delivered at Lintin during the previous year by 6721 chests and in value by $ 3,930,185. In this estimate are not included the chests delivered on the East-coast nor those at Macao; of the former we may be enabled to lay before our readers an estimate on some future day, and as to those sold in Macao and passed through the Custom-house there, we would recommend to our Cotemporary there, the *Macaista Imparcial*, to publish a statement of them in his paper, which would, no doubt, be very acceptable to his readers, in fact fully as much so as his present statements, limited as they are to the deliveries at Lintin only. The returns of the opinion passed through the Macao Custom-house would be obtained at little trouble, and would be a valuable assistance in forming statistics of the whole of the foreign trade to China.

## ANALYSIS OF OPIUM.

*Chinese Repository for March.*

The chemical analysis of opium, after all the trouble that has been bestowed on it, is still in an unsatisfactory state. A perfect analysis, such as we possess of Peruvian bark, and of some other medicinal plants yielding vegetable alkalies, ought to eliminate the whole of the active principles, leaving nothing at its close but an inert mass possessed of no therapeutic power, and the essential principles thus obtained should equal (or, as in the case of quina freed from its bulky fibrous accompaniment, surpass) in activity, a quantity of the original substance equal to that from which it was extracted. But how greatly inferior are the powers over the animal economy, of a grain of morphia, in whatever state of purity or saline combination, to the quantity of opium that is required to furnish that single grain! Yet, for all that we can, chemically, see, we obtain by our analysis the whole of the morphia that is contained in opium. I suspect that the narcotic power is partly lodged in some unknown substance (not narcotic) insoluble in water; for I have, after careful and repeated washing until it ceased to color the water, found the insoluble residuum to act as an opiate with considerable energy. Although morphia, in a state of purity, can, like sulphur, be fused without change; yet, when in combination with the other constituents of opium, it is partly destroyed by a much lower degree of heat, greatly under that of boiling water; for the pharmaceutical and Chinese extracts are found to contain very little morphia; still, the former, as is well known, exerts great medicinal power, out of all proportion to the quantity of morphia, which analysis evolves from them. From all these considerations it would result that the proportion of morphia obtained, by the analysis at present known, cannot be regarded as a true exponent of the total narcotic power of the opium which yields it. An additional source of fallacy in comparing the produce of different countries exists in the varying proportions which they contain of coloring matter, or extractive; a principle for which morphia and narcotine have a strong affinity, forming insoluble compounds* with it; and which, as well as narcotine, is much more abundant in Indian than in Turkey opium. Hence a considerable loss in the purification of morphia from the former, and an apparent, and probably real, inferiority in its quantity; although we know that good India opium is equal to Turkey in narcotic power.

Robiquet's process is the one employed by the opium examiner in Calcutta. The chief precautions necessary to ensure success and uniformity in its results are, not to use too much water at first; to see that the magnesia is brought to a red heat; not to expose any of the subjects of analysis to the sun, or to artificial heat, except in the washing and final solution in alcohol of the morphia; not to use too strong a spirit in washing the morphia and excess of magnesia; and to employ the strongest alcohol for its final solution before crystallization. Gerhartner's process is useful when it is not necessary to obtain the morphia in a separate state; and its practiced hands affords speedy and tolerably accurate information. It is probable that Robiquet's process will in time be superseded by that of the late Dr. Wm. Gregory, Edinburgh, which does not require the expensive use of alcohol, and yields more morphia, by 30 or 40 per cent; affording in fact, the cheapest medicinal preparation known of Turkey opium. It consists in the exhaustion of the opium with water under the temperature of 90°; concentration of the solution at a low temperature; precipitation by slight excess of ammonia; elutriation of the precipitate with cold water; exsiccation of it at a temperature below 212°, and reduction to powder; solution in cold water by muriatic acid, slowly added in slight excess; filtration and concentration to the consistence of syrup; after which, the preparation on cooling, becomes a mass of crystals of muriate of morphia, moistened with a dark-colored solution of uncrystallizable muriate of narcotine and resinous coloring matter. This solution is abstracted from the crystals by strong pressure between folds of bibulous paper; and the solution, crystallization, and expression repeated once or twice; after which the salt is obtained in reddish bunches of snow white silky crystals, containing 72 parts of muriatic acid and 200 of morphia. But for the unfortunate superabundance of narcotine, and comparative paucity of extractable morphia, in Indian opium, the manufacture of the narcotine on a large scale might advantageously be established, at one of the Bengal agencies, for the supply of the Indian medical department with this admirable preparation, the mere (?) of which would be available for the manufacture of *laws*.

* This may partly account for the medical activity of the mass of opium above noticed.

### OFFICIAL NOTICE.

THE Commanders of English Ships requiring hands are requested to apply to the Undersigned. Good and steady Seamen can be recommended, and arrangements will be made for their conveyance to Linton or Whampoa as the case may be, free of expense to the Ships.

EDWARD ELMSLIE,
Secretary and Treasurer
to the Superintendents.

Macao, 4th April, 1837.

N. B. Please to write the words "Application for Seamen" on the envelope.

---

NOTICE.—The undersigned have established themselves in this place, as Merchants and General Agents, in connection with Messrs. JOHN BIBBY & SONS, Liverpool, Messrs. FREDERICK HUTH & Co. London, and Messrs. EDMOND BIBBY & Co. Bombay.

BIBBY, ADAM & Co.

Canton, 5 Danish Hong, 1st April 1837.

---

NOTICE.—The undersigned have this day commenced business as general Agents and Commission Merchants under the firm of POLLEXFEN, MILNE & Co

JOHN MILNE.
GEORGE POLLEXFEN.
J. M. MACDONALD.

Bombay, 14th October, 1836.

---

NOTICE.—The business hitherto carried on by the undersigned will from this date be conducted by CHARLES MARKWICK,—At No. 3 Imperial Hong.

ROBERT EDWARDS.

Canton, 1st April, 1837.

---

NOTICE.—Referring to the above advertisement I beg leave to solicit from my friends and the Public, a continuance of the Patronage that has heretofore been given to the Auctioneering and Warehouse Keeping, of the late establishment of Mr. ROBERT EDWARDS. No. 3 Imperial Hong.

CHARLES MARKWICK.

Canton, April 1st, 1837.

---

CANTON GENERAL CHAMBER OF COMMERCE.

The office and Records of the Chamber are open to the members every day excepting Sundays; and the Secretary will be in attendance from 12 till 3 o' Clock.

By order of the Committee,
WILLIAM SCOTT.
*Secretary.*

Canton General Chamber of Commerce
No. 2 Danish Hong 4th Feby. 1837.

---

NOTICE.—SAMUEL WETMORE Jr., is this day admitted a partner in our establishment,

WETMORE & Co.

Canton, February 1st 1837.

---

NOTICE.—The Copartnership hitherto existing under the firm of Markwick Edwards & Co. ceased this day. All Persons having claims against the said firm are requested to forward them, and all Persons indebted to the same are requested to pay the amount to the undersigned.

ROBT. EDWARDS.
No. 3 Imperial Hong.

Canton 31st Dec, 1836.

---

NOTICE.

THE SECRETARY of the BOOK SOCIETY OF CANTON will be obliged to any person who will give him information concerning the following volumes which belong to the Society.

## *SHIPPING INTELLIGENCE*

ARRIVED.—Amer. *Hope*, Norman, from Manila. *Rasselas*, Carter, from the Sandwich Islands. Brit. *Cornwallis*, Clarke, from Bombay. *Mary Walker*, Pollock, from Valparaiso.

PASSENGER.—*Mary Walker*. Mr. J. Thompson.

SAILED or DESPATCHED. Brit, *Emma Eugenia*, Buchan, for London. Amer. *Emily Taylor*, Hallet, for Boston. Brit. *Amelia Tompson*, Tomlinson, for London Dutch. *Pleiades*, Berg, for Lombock. Brit. *Lady Hayes*, Burnett, for Calcutta. *Ardaseer*, Mac Intire, for Bombay. Amer. *Splendid*, Rogers, for Newyork.

PASSENGERS.—*Pleiades*. Messrs. Dixon and Mills.

The *Emma Eugenia* has, we understand, been delayed several days for her grand chop, which cannot be obtained till some business is arranged between the Hoppo's office and the Hong merchant securing the ship.

The *Motichund Amichund*, is, it is said, to be despatched for Bombay in the course of next week.

There has been much blowing weather lately, and many heavy storms with thunder and lightning, the whole way down the river. We have heard of no damage to shipping except the *Morrison* which had her misen top and top gallant masts shivered a few nights since.

Some of the vessels at Lintin drove, and sometime for safety to other places among the islands.

---

The *Lord Lowther*, *Asia*, *John Fleming* and *David Clark* are loading for Great Britain.

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

Note. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Cambiets, Saltpetre, Ginseng* and other Goods, on which the duties at Whampoa are high.—Ships with *Rice, Cotton &c.* sometimes discharge at Macao or tranship their Cargoes at Lintin &c. to other Vessels bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary, Stationery, Cutlery, Crockery ware, &c.* for foreigners consumption, are sold at Auction duty paid.

*Note. Alum,* and *Cassia* are procurable cheaper at Lintin, Macao, *&c*; and *Raw Silk, Silk* piece goods *&c*, are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

| Lintin &c. | 2½ |

Note. Above rates are from 20th Oct. to 20th April annually; during remaining 6 months the premiums are somewhat higher. Risks on Blocks are $ 9 per Cent per annum, $ 4½ for 6 months, $ 2½ for 3 months and $ 1 per month.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

## WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874764 of a Tl. per cubit.
2nd ,, ,, 1200 do. & under 1600 ,, 0.7221091 ,, ,,
3rd ,, ,, under 1200 do. 0.5062341 ,, ,,

N.B. The cubit is 14 inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above measurement.—The largest class pay from $ 43.0 to $ 4320; 2d class from $ 3700 to $ 3780; 3rd class from $ 3780 and under. The Cumsha or Present Fee is paid but small vessels 1000 Tons or $ 2323. Linguists fee $ 173½ and Comprador's fee $ 50. Also Pilotage $ 30, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Russian ships are charged only about $ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

Cotton Manufactures.—continue without improvement, nor have we any change to notice in

Cotton Yarn, and

Woollens.

Rice.—The weather has been excessively rainy during the last fortnight, so much so as to retard the planting; but if dry weather should soon follow, no bad consequences are apprehended.

Saltpetre.—The prices at Lintin are 8 a 9 $ and quite nominal.

Straits Produce.—Our quotation shews a further decline in

Pepper.—for which the demand now is very dull—the market being fully supplied. Tin remains as before. In the price of Betelnut we have no change to notice.

Cotton:—there is no improvement in demand or price, and the prospects are by no means encouraging with such a heavy stock, being estimated on the 1st at.

| Bombay. | Bengal. | Madras. | Total. |
|---|---|---|---|
| 18,098 | 27,896 | 11,857 | 54,251 |

and the clearances in March were,

| | | | |
|---|---|---|---|
| | 7,266 | 13,364 | 5,339 | 26,709 |

In the above are not included the Cargoes of the *John Fleming* and *Cornwallis* from Bombay, and about 2000 Bales at Lintin and Macao.

Opium.—The deliveries in the month of March were considerable of Malwa, but at a very serious reduction in the price, and holders seem generally to anticipate a decline even on the present low rates of that description, which must tend still further to depress the Bengal drug, for which the demand is not improved. The stock at Lintin, particularly of Malwa is very large for the season of the year.

For deliveries in last month and remaining stock see above.

### EXPORTS.

In Tea and Raw Silk nothing doing.

# THE CANTON PRESS.

## LITERARY.

### REMARKABLE OCCURRENCES DURING THE DYNASTY SHANG.

THE CHINESE SARDANAPALUS.

*(From Doctor Morrison's View of China.)*

Chow, or Chow-sin, the last king of the Dynasty Yin, which is commonly spoken of as the closing period of the Shang Dynasty, was one of those persons who obtain an infamous celebrity by their crimes and follies. He was the youngest of three sons. His mother in the character of the King's Concubine, bore his two elder brothers; after which she became the King's wife and Queen, and had Chow, who, according to the rule of succession in those times, 'If there be a wife's son, a concubine's son cannot inherit,' ascended throne.

Chow is represented as possessing good natural abilities, and great personal strength; but his abilities were employed to fortify himself against the advice of his friends, and to gloss over his crimes. He was proud, extravagant, drunken, debauched and cruel. One instance of his extravagance is more amusing than serious. He introduced Ivory Chop sticks, used in eating. One of his relations, Ke-tsze, sighing said, "Ivory chop-sticks are now made; these must be followed by valuable dishes; and valuable dishes must be filled with rare viands; the king thus gratifying his desires, endangers the safety of the Empire."

Chow in his wars, took a female captive Ta-ke, * whose name is as infamous as his own. They both gave themselves up to the greatest excess of unrestrained sensuality, and to the wildest extravagance. They had immoral songs composed, and introduced a species of posture-making or dancing, in which those who engaged, sought the pleasure of mutual compliance or indulgence. They erected a kind of stage, or terrace, a thousand cubits high, and three li (about one English mile) broad. It required ten years to complete it. They laid out extensive gardens, formed menageries filled with horses, dogs, rare animals, and curious birds; to feed these, and the crowd of idle people around them, large granaries were built. At Sha-kew, now the province of Chih-le, they collected a vast concourse of people devoted to pleasure and dissipation. They there made a lake of wine, and surrounded it with meat suspended on the trees; to this paradise naked men and women resorted, and passed the long nights in drunkenness and debauchery. Profligacy to this extent is more than the common sense of mankind, in the worst of times, can approve. The king and court fell into contempt; which Ta-ke, instead of attributing to the right cause, ascribed to the lightness of the ordinary punishments, and to the easy deaths to which criminals were subjected. She therefore introduced a punishment called Wei-tow, which was an iron vessel, like the Chinese measure called Tow, and which when heated red hot, the criminal was obliged to hold in his hands till they were roasted. She also invented a brass pillar, called Paou-lo, which being greased, or daubed with noctuous matter, and so made slippery, was laid over a fire of coals. Across this fire, the criminal was forced to walk upon the slippery burning rounded brass. The consequence was, that he fell into the fire. It is said, that the ineffectual efforts of the criminals to walk across the burning roller, afforded this cruel Lady much amusement and delight.

Chow in a passion, murdered a nobleman's daughter, because she disliked the debaucheries of the palace. He ripped up the body of a pregnant female, that he might see the foetus in the womb. On seeing some persons fording a brook, in a cold winter's morning, he said they endured the cold in a remarkable manner, and forthwith ordered their legs to be cut off, that he might view the marrow. His relation Ke-tsze, having reproved him, escaped death by affecting madness. Pe-kan acquired immortal fame, by being one of the first martyrs in the generally hopeless cause of reproving bad kings.

Woo-wang, the martial king, thought it right to rid the world of Chow. He made a solemn appeal to heaven; imposed an oath on his nobles, and proceeded to what he conceived was fighting Heaven's battles. Chow sent 700,000 men to oppose him. But they had no will to fight. They were routed. Chow fled to the stage he had erected, clothed himself sumptuously, adorned with pearls and gems, and in that state burnt himself to death. Woo-wang cut down with the sword, the wicked and unhappy Ta-ke.—How often, even in this life, does Divine Providence punish the atrociously profligate!

*(From the Indo Chinese Gleaner.)*

### EXTRACTS FROM THE PEKING GAZETTE, OCT. 1818.

RESTRICTION ON MERCHANT VESSELS REMOVED.—Tung-kwan-tsang, the Viceroy of Fokien, intercedes in behalf of the people of that province, praying that certain restrictions which had been laid on the building of ships for sea, might be removed, and the people left to their own option in constructing vessels; urging that the revenues as well as the trading part of the community would thus be mutually benefited. The Viceroy states, that the merchants of every province have been in general allowed to construct vessels of whatever size and dimensions they wished—and that formerly the trading vessels belonging to Fokien province, were 70 feet in beam, and high and large in proportion, so that they could bear the violence of the winds and waves, and carry a large cargo; the profits of the trade were abundant; merchants became numerous; provisions plentiful; the corn for the troops was regularly transported from Formosa, and the revenue was also proportionably improved. But in the 11th year of Kea-king, a former Pan-yuen, in consequence of troubles occasioned by seapirates, capturing vessels off the coast, obtained an order, that merchants should build vessels only 18 feet in the beam, and not be suffered to exceed this. From that time to the present, merchants have sustained considerable losses, and trading vessels have diminished in number—in various places great houses of business have failed, so that at present the number of vessels does not amount to one half of what it was 10 years ago.

The Viceroy further states, that he had received a petition from the merchants of Hea-mun, complaining of the restrictions abovementioned, and adding, that the people of that part had depended in great measure on commerce for their support, so that they were particularly affected by the limitations imposed; the excise officers also frequently came on board, and under pretence of measuring the vessels, they threaten and extort money. The restrictions were now unnecessary since the depredations of the pirates had ceased, wherefore they prayed, that they might be allowed to follow the customary regulations. In unison with this petition, was the report of the various officers of the province, who were directed by the Viceroy to examine into the affair, from which report it appeared, that the restrictions and limitations were only what the circumstances of that time rendered necessary, but were now a great hindrance to the revenues, and to the trade.

The reasons why the former Foo-yuen imposed these restrictions were, first, lest the pirates who had already become numerous, and had studied various attempts to apprehend them, should, if they captured any large vessels, become still more daring, and defy the utmost efforts of the Government; and secondly, because at that time there were no large ships of war in the Admiral's fleet, and it was feared, that the smaller vessels would not be able to sustain the combat. But now circumstances considerably alter, as there are ships of war 24 feet in beam, and 70 feet from stem to stern, besides which the private vessels on the coast have been nearly all taken, and the few that remain are scarcely large enough to reach to the port holes of our smaller ships; so that as soon as they appear, they are taken.

In the provinces of Keang-nan, Che-keang, and Quang-tung, there are altogether no limitations and restrictions on the building of vessels, or the importation and exportation of rice; in the province of Fokien alone, the old regulations are still retained, which appears partial. The inhabitants of Chang-chow, and Tsuen-chow depend entirely as well for their own provisions, as for military supplies, on merchant vessels proceeding to Formosa, and transporting grain backwards and forwards.

Formerly a good sized merchant vessel would contain upwards of 9,000 pikuls of rice, together with 180 bags of other grain, but the present ships will scarcely hold 1,000 pikuls of rice, and 10 bags of grain. Besides, vessels are daily becoming fewer, and trade more dull—so that the inhabitants of Chang-chow and Tsuen-chow, are constantly apprehensive of a scarcity of provisions. In Formosa, there are upwards of several myriads of pikuls of grain stored up, and the expence of engaging vessels to transport it over is very great; the returns at the various custom houses are also very few. On this account, trade, military supplies, the people's provisions, and the public revenue are all injured. The Viceroy concludes by earnestly recommending the case to his Imperial Majesty's attention, for the reasons assigned above. The Emperor was pleased to signify his pleasure by granting the petition.

* Duhalde ascribes to this Queen the invention of the small feet of the Chinese women, called by Chinese "Golden lilies."

### OPIUM.

*From the Chinese Repository.*

ART. III. *On the preparation of Opium for the Chinese market: written in March 1833, and then communicated to the Benares and Behar Agencies.* By D. Butter, M. D., Surgeon 63d B. N. I., late opium examiner of the Benares Agency. (From the Journal of the Asiatic Society of Bengal. No. 31, March, 1836.)

In committing to paper, for the use of my successor in office, the following observations, I would beg, once for all, to disclaim the idea of their being infallibly correct: for, although they are the result of ten years' attention to their various subjects, I am aware of the disadvantages under which an individual labors, upon whom falls the task of first writing on any subject involving the discussion of obscure questions, and who is thus deprived of the benefit of the judgment of other persons; and am prepared to find my remarks hereafter greatly modified by the progress of discovery.

The great object of the Bengal opium agencies is to furnish an article suitable to the peculiar tastes of the population of China, who value any sample of opium in direct proportion to the quantity of hoodwunu watery extract obtainable from it, and to the purity and strength of the flavor of that extract when dried and smoked through a pipe. The tract when dried and smoked through a pipe. The aim therefore, of the agencies should be to prepare their opium so that it may retain as much as possible its native sensible qualities, and fit it for solution in native sensible qualities, and fit it for solution in hot water. Upon these points depend the virtually higher price that Benares opium brings in the China market, and the lower prices of Behar, Malwa, and Turkey opium. Of the last of these, equal (Chinese) values contain larger quantities of the narcotic principles of opium; but are, from their greater spissitude, and the less careful preparation of the Behar and Malwa, incapable of yielding extract in equal quantity and perfection of flavor with the Benares.

It therefore becomes a question, how the whole process of the production of opium from the sowing of the seed to the packing of the chests for sale, should be conducted so as to preserve with the least injury its native flavor and its solubility.

There can be no doubt that the quantity and richness of the milk obtained from each poppy-head depend greatly upon the geological and other physical conditions of the locality which produces it; especially the soil, sub-soil, manuring, and irrigation; and also upon the seed which is employed. But as these matters are, in the present circumstances of the Bengal agencies, little open to choice or control, the first *practical* inquiries which claim our attention relate to the extraction of the juice and its treatment while in the hands of the *kurris*.

Of the various processes for the preparation of sugar and medicinal extracts from vegetable juices, it is well known that distillation in vacuo is incomparably the most efficient in preserving unaltered the original taste of the sugar, and the taste, solubility, and therapeutic powers of the extracts. It is also known that this process owes its superiority to the exclusion of the chemical as well as the physical agency of the atmosphere, to its rapidity of execution, and to the comparative lowness of temperature at which it is performed. When sugar-cane juice, after even half an hour's exposure to the air, is boiled in a narrow deep vessel, and under the pressure of the atmosphere, vaporisation goes on so slowly that the sugar has time to undergo the vinous and acetous fermentations, whereby a certain portion of it is converted into vinegar, before the heat can be raised high enough to check this change; and the high temperature, to which it is so long exposed during this slow evaporisation chars another portion, and converts it into molasses. Other vegetable juices, under similar circumstances, undergo analogous transformations: much of their substance is converted into vinegar; and the high temperature causes a partial decomposition of the matter, oxygen also is largely absorbed from the atmosphere, and greatly impairs the solubility of the dried extract.

On the principles which flow from these facts, it would be, *chemically* speaking, advisable to prepare opium by distilling in vacuo, large quantities of the milk just as it has oozed from the capsules; and I have no doubt that opium thus prepared would possess in an unprecedented degree the desired qualities of solubility and strength and purity of flavor, as well as narcotic power; and can imagine, that under a system of open trade in opium, this process would be *commercially* profitable. It would, however, be inapplicable under a monopoly constituted as the present system is; and I have mentioned it only with the view of pointing it out as the acme of that perfection in the preparation of vegetable juices to which we can, with our present means, only approximate.

That the approximation may proceed as far as possible, it will be necessary, first, that the poppy juice shall, at the time of collection, contain a minimum of water; so that its reduction to the proposed degree of spissitude may be effected in the shortest time, and be therefore attended with the least exposure to the air at a high temperature, and with the smallest consequent loss of solubility and of specific qualities that may be practicable.

The goodness of the soil, and the management of the irrigation, are circumstances which powerfully affect the strength of the juice at the time of its collection: but a third agent, still less amenable than these to control, now comes into play, the precipitation of *dew* on the surface of the capsule. When a current of wind, or a cloudy sky, prevent the formation of dew, it is found that the scarifications made in the capsule about the middle of the preceding day are sealed up by the slight oozing of juice, which had immediately followed the incisions; and the quantity of opium obtained is small. When, again, the dew is abundant, it washes open the wounds in the capsules and thus facilitates the flow of the milk, which in heavy dews is apt to drop off the capsule entirely, and be wasted. But when the dew is in moderate quantity, it allows the milk to thicken by evaporation, and to collect in irregular tiers, (averaging one grain of solid opium from each quadruple incision,) which on examination will be found to have a greater consistency, and a "rosered" (*Werner*) color towards the external surface, while the interior is semi fluid, and of a "reddish-white" color. This inequality of consistence constitutes the *grain of raw opium*, of which I shall have to speak hereafter.

In the collection of these drops of half dried juice, it is very apt to get mixed with the dew, which, in the earlier hours of collection continues to precipitate in drops, and which here does a double mischief; first, by retarding the inspissation of the general mass of the juice; and secondly, by separating its two most remarkable constituent parts, that which is soluble, and that which is insoluble, in water. So little aware, or so reckless, even under the most favorable construction of their conduct, are the *kurris* of the injury they occasion by the dew, that many of them are in the habit of occasionally wasting their scrapers with water, and of adding the washings to the collection of the morning; in Malwa, oil is used for this purpose, to the irremediable injury of the flavor of the opium. On examining the juice thus mixed with water it will be found that it has separated, as aforesaid, into two portions, a fluid and a more consistent substance; the latter containing the most of the resin, gluten, caoutchouc, and other less soluble constituents of opium, with part of the super-meconiate of morphia; and the former containing the gum, some resin, and much of the supermeconiate of morphia, and much of the coloring principle, which, though pale at first, is rapidly affected by light, and acquires a very pure "reddish or blackish brown" color. Many *kurris* are in the habit of separating off this fluid portion into a separate vessel, and of bringing it under the name of *poorwa* for sale, at half the price of opium, to the Benares agency, where it is used as *ke wa* (paste for the petal envelopes of the cakes). Others, after allowing the soluble principle to become thus changed into an acescent, blackened, sluggish fluid, mix it up with the entire contents of their opium, and bring the whole for sale in this mixed state; the consequence of which is that they are subjected in a penalty, called *baitta upon peerwa*, and regulated by the estimate of the opium examiner of the quantity of *peerwa* contained. This penalty is the only efficient check upon this most pernicious practice of the *kurris*; for on the generality of them the prospect of a fine is sufficient to impress the necessity of their looking after the *kurris* during the collecting season. Were gomashtas in general fit for their offices, the name of *peerwa* might be banished from the Bengal agencies; all that is required for that purpose being that they should instruct all their *mudees* and *kurris*, to exclude dew as much as possible from the opium at collection, and to add water to their opium, then or at any other period, but at the end of their day's collection, to rub it together in a mortar or similar vessel, breaking down the grain of it above-mentioned, so as to reduce the whole to a homogeneous semi-fluid mass, which should be dried as quickly as possible in the shade, in a current of air, free from dust, and spreading it on any clean flat surface, and turning it every tea or twenty minutes with the hand; and one afternoon in the dry collecting season would suffice for bringing to the standards of 70 per cents for collections of each day, which could then be secured, along with the rest of the *kurri* opium, in a vessel of any form, safe from deterioration by internal change. It is a common belief, that all new opium *must* ferment, but that is a fallacy occasioned by the low degree of spissitude at which opium is generally received at the Bengal agencies, and by the consequent fermentation and swelling up which almost constantly occurs, when such opium is allowed to stand for some hours in large vessels.

## EXTRACTS.

MARCH OF INTELLECT.—At a meeting of the Inhabitants of Aberystwith on Friday, to consider the propriety of lighting that town with gas, the question being replied with cries of "No gas! No gas! We will have not no gas!" which completely put an end to all the business. After many vain attempts by the learned men, a "gentleman" got up and put the question in a manner, and in the following words:—"All you what won't have no gas, retire to one side by the door of your right!" In another moment the room was cleared, and appropriate appeal to the enlightened feelings of the meeting was carried by the largest portion of the house present.—*Carnarvon Journal.*—*Eng. Free Press.*

The Committee of the Singapore Chamber of Commerce had its first meeting on Tuesday last, when we are given to understand, many matters connected with the general as well as local interests of the settlement were taken into consideration, and among other things a resolution was passed that a petition should forthwith be addressed to His Majesty in Council relative to the prohibitory regulations on existence at the Dutch exports of the Archipelago on British custom and vessels shipped from that place, as being quite contrary to the provisions and spirit of the Treaty of 1824—a proceeding which we trust will be remedied at no remote period. The 10th art. is also to be addressed to the Committee that means should be taken to regulate the weights and measures in use at the Settlement, so as to prevent the repetition of those frauds which are frequently practised at this Settlement—especially in the use of the Chinese *Dacking*—and it was resolved to address the local authorities on the suggestion on the subject. The Committee were also of opinion that it was advisable that the *tare* on bags and other packages, instead of being nominal as in some cases it was, should be rated at the actual tare on delivery; which of course amounts to no more than leaving parties to regulate the tare for themselves in all cases, instead of establishing a fixed rate as a standard of reference on all occasions. It was moreover recommended by the Committee that Tea and Silk, which is the best cargo for one to buy and sell by the fictitious plan of investment of 90, 92 or 94 catties should be disposed of by the actual picul of 100 catties, by which other goods are bought in the place. We anticipated many advantages from the establishment of a Chamber of Commerce at Singapore, and the commencement of their labours, we are happy to see, augurs well for their being realized.—*Ibid.*

WEAVING IN GLASS.—Signor Oliri, of Venice, has recently succeeded in bringing to perfection a manufacture which may prove of great value, and may be applied to many purposes of usefulness and luxury. It is the art of weaving a tissue from threads made of glass. The process of which the Signor is the inventor differs from all attempts of the same kind which have been previously made in other countries, as it is made to take every degree of shade, from the most perfect transparency to the deepest opaque. The thread is also rendered so perfectly flexible as to allow itself to be tied, or the tissue when manufactured to be folded in a silk. Another great advantage attending it is that it resists the action of fire.—*Athen, Oct. 1836.*—*Ibid.*

### LOSS OF SHIPS.

We do not recollect a season that has proved so disastrous to the shipping of Bombay as the present. In addition to the many fine ships whose loss we have already had to record within the last few months, we have this week to announce the *Jumeejee Jejeebhoy*, *Cressener Victoria*, and *Tiger*.

The *Cressener Jejeebhoy* was a fine ship 300 tons, built at Mazagon in 1833, and bound from Basra to this port, with a cargo of sugar, valued at three lacs of rupees. She was wrecked upon the rocks opposite the Flag Staff of Quilon, on the 3d instant, about 9 o'clock A. M. within two miles of the shore. The loss of another ship is one to alarming every old to save the ship and cargo; but with what prospect of success is not yet known.

The *Princess Victoria*, of 475 tons, built at Gosmeah in 1831, sailed from Bombay on the 15th of August for Calcutta, and is understood to have been burnt at sea. The captain and crew are reported to have arrived safe at Bourbon in the ship's boats.—*Jam. Chronicle.*

*Profitable Juggling.*—Sometime ago a *professor of* legerdemain entertained an audience in a village, which was principally composed of colliers. After "astonishing the natives" with various tricks—metamorphosing wine into water, &c., he asked the loan of a *half-penny from any of his admirers*. A collier, with a little hesitation, handed out the coin, which the juggler speedily exhibited, as he said, transformed into a guinea. "And is that my halfpenny?" exclaimed the collier. "Undoubtedly," answered the juggler. "Let's see't," said the collier; and turning it round and round in examination, with an ecstacy of delight thanked the juggler for his kindness, and, putting it into his pocket, said, "I've wonst, ye'll no turn't into a bawbee again."—*Josephus Minister.*

We learn from *O Macaista Imperial* that the Governor of Macao, on the 6th April, being the birth-day of the Queen of Portugal, gave a splendid fete to the Portuguese and other foreign residents at Macao. We are informed that more than 200 invitations had been issued, and that the party came off with great eclat. The late Governor of Macao was present, as well as Captain and Mrs. Elliot, and the Dutch Consul Mr. van Basel and his lady. Dancing was resumed after a late and splendid supper, and the Company did not break up till near four o'clock in the morning.

*The Proper Question.*—I heard an Indian one day at a tavern keeper for some rum. "Why, Joe Spanker's I reckon you have got too much already." "Too much of any things," said Joe, "is not good but too much rum is just enough."—*American Paper. Literary Gazette.*

*Oxford Wit.*—"A wealthy and well-known London brewer, though not proper to join a pack of fox hounds one day, did on the occasion appeared with mountaineer. He was well mounted, and dressed in a very conspicuous manner. A French nobleman who was present, and was struck by his appearance, asked Lord A., if he was not *un grand milita re.* "No," replied his Lordship, "il n'est qu'un Cuevalier de Malte."—A well-known poet sacrificed too liberally to Bacchus one evening at the Athenæum, and was led home by an acquaintance of his who was in a more sober state. The day had been wet, and the kennels were full of water. The poet fell into one of them, and pulled his companion after him, who exclaimed, in allusion to one of the poet's lines. "It is not *Isis* rolling rapidly, but water."—An old gentleman while handing his snuff-box round a table, boasted much of its antiquity, and said that it had been a hundred years in his family. "Has it?" retorted a wit, "then it is only a *sentry* (century) box after all."—*Jesse's Angler's Rambles.—Ibid*

*Con.*—Why was Alibrand like an unborn donkey? Because he was an *ass-an-ia.*—*Ibid*

*Modest Expectation.*—An Advertisement, of which the following is an extract, appeared in one of the morning papers of the present week. "Wanted by the advertiser, a young man of unquestionable propriety and modest expectation, a living without a master; that is, he wishes to become companion, secretary, or factotum to some gentleman. He can ride, shoot, fish, sing (but never better than his patron, without he is wanted), manage an estate, see that servants fulfill their duties, do many other things equally necessary, and make this whole study to please and be pleased. He has no objection to travel," &c. &c.—*Ibid*

# CORRESPONDENCE

## GENERAL CHAMBER OF COMMERCE.

### TO THE EDITOR OF THE CANTON PRESS.

Dear Mr. Editor,—It is now more than four months since our new Chamber of Commerce was established.

The first clause in its Book of Regulations, sets forth its object to be among other things to protect the general interests of the foreign trade with China; but so far, I see little good that has been done by its Committee, towards the accomplishment of so desirable an end; in fact, the only good it has done, is making a snug provision for a Secretary pro tem, (for I question whether the state of its Finances with all the arbitration fees, and voluntary contributions in embryo will admit of the continuance of the office, under the present salary and emoluments beyond the present year, without a further levy upon our treasuries), and seeing that so little good has yet been derived from its labours, I think it is very doubtful whether many folk will continue their subscription, for the mere purpose of enabling them to have access to the *Archives* of the Secretary's Office.

As a member of the Chamber of Commerce, I have occasionally been curious enough to pop in upon the Secretary with the view to pick up useful information and see what was going on; the statement of *Exports* of Silk and Tea *only* by the different ships have been readily handed to me but no more, and if it be merely his duty to collect these, I should say the Office and Salary might easily be dispensed with; either of the Editors I should think would willingly undertake the collection of such matter with the privilege of sale attached, which they now only occasionally retail through the columns of their papers.

Since your Cotemporary was pleased to notice the meeting at Layton's, three of his *Juveniles* it would appear have been elected Committee men, and as it frequently happens that "old heads are placed upon young shoulders," let us hope that they will put a little more life into the movements of their Senior Brethren, or more old of Canton, whose somnolency upon many abuses that require reform, must have astonished many; one would really suppose that some of them had been over *dragd* of late, but they should not overlook the good cause "the general interests of the community."

The frequent changes in the Committee, and some discussion in the Cabinet, there is reason to believe, have tended in a great measure, to disorganise its functions; but let us see what they really have done.

Firstly. "They have given an opinion as to the time ships arriving, and bound to Whampoa, are justified in remaining without the por, for the purpose of discharging and receiving Cargo, with the penalties they ought to be subjected to for any deviation;" but this opinion is not worth a straw, unless it be backed by the resolution of the community that they will punish any infringement of such regulation by the means within their power, viz. "the withholding of any homeward freight from the offenders; and as there are many here who have suffered from the unwarrantable detention of ships out side the port, there are few I think who would not accede to such resolutions; then why not call a general meeting, and take its sense upon the question at once?

As this appears to be an evil that requires remedy, the sooner it is set about the better; let something be done, some step made towards improvement of our neighbours on t'ther side of the water, will be *dictating* to us with some reason.

Secondly. "It has been recommended that import ers should pay the duties on their respective consignments in order that there may be no obstruction to obtaining the Grand Chop, on the ship's departure.

Now such measure appears to be objectionable on many accounts. First, prior to the opening of the trade there was one absolute precedent for it. that I am aware of with the *British* (in fact, we are led to suppose by the Chinese authorities that foreigners have nothing to do with duties inwards as outwards) and it is only since the difficulties of the Consoo to meet their payments have accumulated, and some parties have found it convenient to make certain arrangements with their linguists, that the question has been mooted; besides the Hong-merchants enjoy many privileges, which amply compensate them for any outlay they may be at for duties. Secondly, paying these duties we plunge ou selves still further in the mire for nine times out of ten the chances are, that you are compelled to take out their amounts as well as that of your commission in Silk and Tea, (lucky too to get them) at "market price" for the benefit of your constituents, (certainly not your own as times go) thereby being driven to become traders against your will, and in course of time your whole capital is likely to be absorbed in benefitting others. Thirdly. No Grand Chop would be withheld one day I think after a proper representation to the Vice-Roy at the city gates, who would order the security merchant of the ship to pay up forthwith, though I doubt whether the security merchant would risk such ordeal. It may be urged that the security merchant's interests ought not to be held in such fearful jeopardy, but as long as the goods which they are called on to pay duties for are in their custody, they hold ample security for their advances; they ought to be made to summit to occasional pecuniary inconvenience in this way for the privilege of place. When goods are deposited elsewhere it is but just that the proprietor should meet all liabilities.

This second product of the combined talent of the Committee of the Chamber of Commerce is, I have no hesitation in saying diametrically at variance with the spirit of its first regulation "to protect the general interests of the foreign trade with China"; it tends rather to improve the hold of the Chinese upon the foreigners coin; I therefore for one as a reformer of abuses, who will endeavour to hold my own, put in my veto against it.

How is it that the "Restrictions on the exportation of Silk" "the extension of accommodation for the residence of foreigners" "and the removal of the filth from in front of the Factories" have not engaged more of the attention of the Committee, as was proposed upon the formation of the Chamber?

It is true that a vain attempt was made to obtain the removal of the first of these grievances, but somehow or other the business was not well managed; this failure ought not however to deter the Committee from trying again; let petition follow petition until some ground be gained in our relative position with the Chinese, too much has already been lost.

Yours,

Canton, 14th April, 1837. O.

# CANTON PRESS,

April 15th 1837.

We perceive by the last No. of the Register that our Cotemporary is not yet tired of his attempts to get out of the dilemma into which he had rushed precipitately, as we thought in the view of opposing us, and in which we and one of his correspondents had fixed him. Instead of meeting his opponents boldly and approving or denying altogether, he takes a medium course, and while indulging in a logico-political dissertation on the state of things in general, he manages to evade the question, and gives us and his subscribers, who may we think now fairly ask it, no conclusive of his creed as to Chinese politics and affairs. This is not at present an easy thing to guess at.

His last Editorial contains a somewhat amusing conglomeration of images, though what they may have to do with the subject under discussion, he may explain, we cannot. We find Hanoverian rats, Scotch Kites, songs of cuckoos, British commerce, entire liberty, double feelings, crimps and recruiting officers, and other strange beasts grouped together as playfully, and with as much discrimination as the former inhabitants of Noah's ark, and a scrap of latin to crown the bewilderment. Our dictionary of latin quotations is as yet unthumbed, but in natural history at least, we hope to prove that our reading is not inferior to that of our brother Editor. In Buffon and other writers we find mention made of a curious creature, which, if it finds itself closely pursued and in danger of seizure, throws out a mass of *ink*, discolouring the water for some distance all round, and attempting it's escape in the confusion it thus creates. Our Cotemporary brings this peculiar quality strongly to our recollection, and in return for his compliments as to rats, suckoos and owls we beg to ask him how he likes the above description of the sepia officinalis or cuttlefish.

The endanger'd cuttle thus evades his fears,
And nature inards of fluid falsity bears.
A pitchy ink peculiar glands supply,
Whose shades the sharpest beam of light defy.
Pursu'd, he bids the sable fountains flow,
And, wrapt in clouds, eludes th' impending foe.
The fish retreats unseen, while self born night,
With pious shade befriends her parent's flight.

However to leave bad-inage which is bad enough for grave Editors to indulge in we will now proceed seriously to the business in hand. If we can discover in our Cotemporary's last no *arguments* to which to reply, the fault, we humbly hope, is not ours. We know not whether we shall be allowed the same when we say that great part of it is incomprehensible to us, and we would willingly offer a reward of a file of the last year's *Canton Register* handsomely bound in silk to any Canton Oedipus who will unravel and explain the two last paragraphs. They are, we candidly confess, a flight beyond us.

The course of the Register if, as it maintains, it has been throughout consistent, was a plain and simple one. He need but have stated what his present opinions on Chinese politics are, and have challenged comparison of them with his former ones. This he does not do. We asserted, as did an original subscriber in his columns, that he was arguing against the doctrines formerly, and even till lately, warmly upheld by him. The petition, which seemed a sort of *nolle me tangere* to him, was defended through thick and thin, and as he rightly enough says, all hands were "bored" with songs of glory about this petition, and its ninety *odd* subscribers, all of whom, merchants clerks, passengers, visitors, masters of ships, mates of all grades, doctors, supercargoes, purasers, midshipmen and volunteers of all sorts, for such an *omnium gatherum* it never was our fate before to see, were all taken under the wing of the Register. Why he all at once cast off his protegee, leaving them at the mercy of a cruel world and the Canton Press, we cannot as yet understand. Our Cotemporary says that "for a man to be always bound to the opinions and hopes which he has once expressed, is a tyranny too unbearable;" in this we agree, but then his friend Horace will inform him, "*est modus in rebus,*" and though to be always impervious to argument and unchangeable is no desirable quality, yet people do expect that when a total change takes place, and a man opposes directly what he before supported, there must be some cause for it. If this cause is frankly stated all should be content, for, if not liking the new politics of their old organ, they can seek a new one whose views approach nearer to their own.

We shall now republish the parts of the petition, most material to the point under discussion, and leave our Cotemporary to explain the same, and square them to his present opinions or not, as he may prefer. They are as follows:

"It would ill become your Majesty's petitioners to point to any individual as more competent than another, to undertake the office of placing on a secure and advantageous footing, our commercial relations with this country; we may however, perhaps, be permitted to suggest the inexpediency of assigning such a task to any person previously known to China, as connected with commerce. A conviction under the trammels and degradations to which it has hitherto been subjected; or to any one, in short, who has had the misfortune, either in a public or private capacity, to endure insult or injury from Chinese authorities.

Equally inexpedient would it be, as appears to your petitioners, to treat with any functionary not specially nominated by the Imperial Cabinet; and not on any account with those of Canton, whose constant offence of corrupt and oppressive conduct, for as a prominent ground of complaint; or to permit any future Commissioner to set his foot on the shores of China, until ample assurance is afforded of a reception and treatment, suitable to the dignity of a minister of your Majesty, and to the honor of an Empire that acknowledges no superior on earth."

We purposely abstain from all comment on the fifth paragraph of our Cotemporary's Editorial, and we think that there must have been, as is says in the case of the petition, some excitement in the writing of it. Such remarks tending to keep alive or produce feelings of animosity in our community we are most sorry to see, and we prefer putting up with our Cotemporary's unseemly ructions to hazarding a discussion which might annoy individuals, but could do good to no one. "Jealousy, private ill will, and hatred" we can conscientiously assert, and appeal to our readers for corroboration of, have formed no part of our stock in trade, nor are we anxious to acquire them.

*Ship John Bannerman.*—The Gunner of this ship, who remained on board when the others left her, has arrived at Macao in a Chinese boat. We hear that he states that, after having been alone on board for some days, the weather moderating, a great number of Chinese boats came off to the wreck, and plundered her of her freight of Specie, which was of considerable amount, and of every other article of value. The Chinese at first threatened the life of the Gunner, but giving them to understand that he would reward them for taking him to Macao, they at last agreed to take him there for $ 20.

H. M. Superintendents arrived here from Macao on Wednesday the 12th instant. The Commission here now consists of the following Gentlemen; Capt. Elliot, R. N. Chief Superintendent, A. R. Johnston Esq. second Superintendent, E. Elmslie Esq. Secretary and treasurer, J. R. Morrison Esq. Chinese Interpreter, and Doctor Anderson.

We stated in our last that the Chinese Government seemed to be in earnest in expelling from Canton such of the foreign merchants as had not yet obeyed the Vice-regal order issued some time ago to nine of them. A representation from these Gentlemen, stating that they could not go before they had recovered from the Hong merchants the sums due to them, which was laid before the Vice-roy by the Hong merchants themselves, elicited from him a reply to the following effect. "That it could not be expected that the foreign merchants should leave without being paid what was owing to them; that he, the Vice-roy, had nothing to do with the accounts pending between them; that to settle them he granted to the foreigners an additional term of twenty days; that at the end of them no further delay will be allowed, and that he will not receive from the Hong merchants any more communications on this subject, except the announcement of the departure of the Foreigners. The Hong merchants, who at this interview with the Vice-roy, seem to have feared his displeasure and to be punished for not having succeeded in expelling the foreigners, are said to have been most agreeably surprised by the affable manner in which they were received. If however, at the end of the new term, the foreigners should not have left Canton, their reception will probably be quite the reverse.

On the second day of the current Chinese moon, 6th inst., the Foo-yuen (Lieuteuant Governor) of the Province, went to the Lung-wang temple (so called after a deified warrior) to present incense and offer prayers for fine weather, the want of which the country has begun to suffer from. The long continuance of the wet would do great harm to the young crops, it is feared. This public act is not usual when obscene rain or drought is apprehended.

Since writing the above, the rain, but little intermission lasted almost three weeks, has last ceased. The river is much swoln in consequence of the rain, and during the last three or four days no floodtide has been perceptible at some distance below Canton.

By the *John Dugdale* from Singapore 13th March, we have received the *Chronicle* of the 4th, and the Free Press of 2d and 9th March, from which a few extracts will be found in another column.

A steam-boat, the *Diana*, had reached Singapore from Calcutta, destined to act against the Pirates, and we find the following description given of her in the *Chronicle*. "The *Diana*, we learn, is 115 feet in length, carries one long brass 12 pounder on the forecastle, two iron 6 pounder carronades on the poop, twelve muskets on along the rail, his two engines of 25 horse powers each, draws eight feet of water, and her best speed is six knots an hour, and from her inability to carry a sufficient quantity of fuel for the passage to Pinang, was towed part of the way by the *Andromache*. Externally the *Diana* exhibits a fine hull, and, we understand, her interior arrangements and accommodations are far from contemptible; and being now under the management of a gentleman, as highly respected throughout the Straits as he is truly conversant with every locality of its innumerable creeks and corners, we feel confident that she will fulfil every object for which she was intended."

The vessel is to be commanded by Capt. Congal. ton, formerly Commander of the Company's Schooner *Zephir*, whose practical knowledge of the locality will probably render his services very useful. The Engines are very weak for a vessel of the *Diana's* size, but the *Free Press* informs us that they are to be exchanged for more powerful ones, as soon as they can be procured. The greatest objection against this steam-boat is that she draws too much water, which will prevent her from going into the numerous creeks and shallows where the Pirates pursued by her will seek and find safety.

In another column will be found the letter of our Correspondent "O", which we received in not late an hour to do full justice to the subject on which it treats, and to which we may probably revert at another time. The writer of the letter in question expresses himself dissatisfied with as little having yet been done by the Committee of the general Chamber of Commerce, and that the objects which, as was professed, were to be their principal care, had not been obtained. Situated as we are here in trying to obtain the grant of any advantage from the Chinese, it is generally necessary to go about it very carefully and with circumspection, and we have no hesitation in saying, that the Committee, however anxious to obtain for foreigners the advantages desired, preferred a cautious policy to one more precipitate, and by which it was by no means sure that the end desired would be gained. Let us for instance suppose, that under present circumstances the Committee had too loudly urged the extension of the space allotted to foreigners, would not a necessary consequence have been, an enquiry as to the names etc, of the occupiers of the different factories? and the local Government, finding that a number of these houses were held by the very parties who have orders to quit the country, would they probably say that it there is not room enough now, there will be as soon as these individuals shall have complied with the Government's orders. As to the filth in front of the Factories, we, from personal observation, find that the nuisance, though not thoroughly abated, is much less than it used to be, and we may hope that the Committee's attention to this point, will have still more satisfactory results. Reiterated representations about the present restrictions to the exportation of rice will, we hope, be at last attended with success; but our Correspondent is, we think, rather precipitate in expecting that all these things can be brought about in so short a space, expect to reap many benefits from it's labours.

As to the expense of which our Correspondent complains, a great part of it is inevitable, and we hope that he is misinformed, in his forming his supposition, that the next year's receipts of the Chamber will not be sufficient to cover the outgoings. We know that the secretary has more to do than to furnish lists of exports of tea and silks to England; we know that he is at present employed in collecting data furnishing returns of the value of *foreign trade* with Canton, which we suppose will soon be laid before the public. The completion of this work alone, which, where there is no Custom-house to which he can refer, is attended with no slight trouble and difficulty, will fully entitle the secretary to his salary, and will moreover be of great utility to all connected with the Chinese trade.

As to the collection of duties, as proposed by the Chamber of Commerce, we do, in a manner, agree with our correspondent. We are afraid that the mode proposed, which is in fact no more than a facility to the Hong-merchants, by making foreigners taxgatherers for the Chinese, will not even always ensure the Grand Chop to the ship, at the same time that we offer a boon to the Hong-merchant to evade the laws of his country by which his conduct ought to be regulated. Were the duty to be paid to the Government direct, and were we allowed to warehouse our goods under our own control, we should have no objection to the present mode of making the payment; but why should we gratuitously abandon an advantage we have hitherto enjoyed, merely because many of the Hong-merchants' means are not adequate to the proper carrying on of their business. To abet them in their irregularities would soon be fatal to our own disadvantage.

NOTICE.—It is hereby given that the undersigned will receive sealed Tenders of Cash for Bills of £ 0 0 (payable at thirty days sight in sets of £200 each) on the Right Honorable the Lords Commissioners of His Majesty's Treasury on or before 12 o'clock the 22nd Instant.

## SHIPPING INTELLIGENCE.

ARRIVED.—Span. *Dos Amigos*, Pardo, from Manila. Amer. *Tartar*, Nickols, from Sourabaya. Brit. *Ternate*, Stewart, from Bombay. *John Dugdale*, Scott, from Singapore, 14th March. *Sulimany*, MacFarlane, from Calcutta, February 15th, and Singapore March 20th.

SAILED or DESPATCHED.—Amer. *Commerce*, Fleming, for Newyork. *Morrison*, Ingersoll, for Batavia.

PASSENGERS.—Per *Commerce* Messrs. Deppe and B. Etting.

The *Emma Eugenia* has sailed for London.

The *Governor Findlay* was by mistake put in our last list as at Whampoa instead of Lintin. The *David Clark* is put up for cargo to the Straits and not for England. The *Ternate* and *Sir Charles Malcolm* to leave immediately for Bombay and the *Dos Amigos*, for Manila. The *Mary Walker* and *Falcon* are, we believe, to load for home.

Considerable inconvenience is at present felt by the want of shipping "outside" to take cargo for Whampoa which we hear is likely to cause much delay in getting rid of the goods now arriving from England, the Straits, etc.

The *Cornwallis* is to remain outside.

We observe that our list of losses of Country ships, sometime since given, is to be encreased by the name of the *Jamsetjee Jeejeebhoy*, lost near Quijon, January 1st.

The *Thames*, we learn, reached Madras from China in the short space of 19 days (at sea). We hear that it is probable that she will be employed for a voyage in carrying troops to and from Penang and Madras.

The *Antonio Pereira*, passed Singapore bound to Bengal (in seven days from China) on the 1st of March.

The *Cowasjee Family*, out from Macao seven days was seen by the *Ternate* on the 29th ult; in Latitude 9° north.

A gunner's mate, one of the crew of the *John Bannerman* has been brought to Macao, by Hainan fishermen. We give the particulars of his escape in this day's paper.

The *Sarah Berry* from London, is daily looked for. It will be seen that we are now five months and a half without intelligence to be depended on, from England. The *Lady Grant* from Bombay, may possibly bring the overland despatch of December 1st.

Owing probably to the strong ebb tides, no boat from Macao has arrived within the last four days, and we are consequently yet without the despatches brought per *Sulimany*.

The *Lord Lowther*, *Ada*, *John Fleming* and others are loading for Great Britain.

LATEST DATES from ENGLAND 31st October P *Morrison*. UNITED STATES 20th Novbr. via Manilla. CALCUTTA, 15th February P *Sulimany*. SINGAPORE, March 20th P *Sulimany*. JAVA, 14th February, P *Aurelius*. MANILA 28th March, P *Nicaise*. BOMBAY, 10th January P *Governor Findlay*.

VESSELS EXPECTED.—From ENGLAND, *Sarah Berry*, Pepoy, *Crocodile*, *Formidable*, *Hibernia*, *Java*, *Countess of Hindi*, *Ann*, SYDNEY, *Lady Kennaway*, *Lady Hayes*, CALCUTTA, *Hercules*, *Sylph*, *Mary Jane*, MANILA, BOMBAY, *Bombay*, *Eleanor*, *Good Success*, *Lady Grant*, MADRAS, *Thames*, Colonels.

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

Note. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Cambaets Camphire, Ginseng* and other Goods on which the duties at Whampoa are high.—Ships with *Rice, Cotton* &c. sometimes discharge at Macao or transhipp their Cargoes at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary Cutlery, Crockery ware, &c.*, for foreigners consumption, are sold at Auction duty paid.

*Note. Alum*, and *Cassia* are procurable cheaper at Lintin, Macao, &c; and *Raw Silk, Silk* piece goods &c, are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

Note. Above rates are from 20th Oct. to 20th April annually; during remaining 6 months the premiums are somewhat higher. Risks on Bullion are $ 2 per Cent per annum, $ 4½ for 6 months, $ 2½ for 3 months and $ ¾ per month.
Two Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874736 of a Tl. per cubit.
2nd " " " 1200 do. & under 1600 " 0.7221081 " "
3rd " " under 1200 do. 0.5062341 " "

N.B. The cubit is 14½ inches: measurement is taken on each quarter of the vessel with cargo (except Rice) and is from the Foremost to the Mizen mast, or other head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 43.0 to $ 4339; 2d class from $ 3780 to $ 3700; 3rd class from $ 3700 and under. The Cumshaw or Present Fee is paid by all vessels 1600 Tsatlee or $ 2225. Linguists fee $ 1734 and Comprador's fees $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riverdun ships are charged only about $ 1300 in lieu of measurement &c.,

## COMMERCIAL REMARKS.

### IMPORTS.

There is great dullness in all articles of European Import.

Cotton Yarn.—very dull, and prices again declining.

Woollens.—Camblets and Longells continue declining, with but languid demand.

Rice.—The late heavy rains, which have ceased since yesterday, are not supposed to have caused any injury to the crop now planting, and the prices of the foreign grain continue without improvement.

Straits Produce.—We again quote a fall in the price of Pawon, and Tin; Betelnut remains the same.

Cotton.—We have no improvement to report in the price of this article, but as the clearances are going on briskly, prices, it is to be hoped, have reached their lowest.

Opium.—The deliveries up to the 6th instant, exhibit a good deal of activity in Malwa, but at very low prices, and it is still declining. In the Bengal drug there is almost nothing doing, and holders are anxiously awaiting intelligence from Calcutta as to whether prices are still supported there, and the exports likely to be delayed. Deliveries to the 9th instant: Patna 468 Chs, new 68, Benares old 60, new 57, Malwa 444. Total 737 Chests.

### EXPORTS.

Of Raw Silk, *Canton* none, and of *Taysaam* and *Tsatlee* none good in the market.

Silk Manufactures.—Prices of ready goods have given way a little, but the scarcity of the raw material prevents contracts at lower prices.

Tea.—we have lowered our quotations for Souchongs, of which low qualities may be had as quoted.

# THE CANTON PRESS.

VOL. 2d. No. 33. CANTON, SATURDAY, APRIL 22ND, 1837. No. 85.

## FROM THE CHINESE REPOSITORY.

### PREPARATION OF OPIUM.

*Continued from our last number.*

So very large was formerly the admixture of *pasewa* in the opium brought to the Benares agency, that it was thought necessary, for the sake of its appearance, to draw off as much as possible of the black fluid, by storing it for weeks, in earthen vessels, perforated with a hole. Of late years, there has been a great amendment in this respect, and the draining system has therefore become unnecessary; an event which ought to be followed by the abolition of the inconvenient receptacles in which it was carried on, and by the general substitution of moveable wooden cases and drawers in their stead.

*Pure sea*, in a pure and concentrated state, is a viscid, dark, reddish-brown fluid, transparent in thin plates. Its homogeneous physical constitution prevents its assuming to the eye that appearance of consistency which is generated by ordinary opium. In the former, all the ingredients are in a state of true chemical combination, with the water contained; while, in the latter, many of the ingredients are only in a state of mechanical mixture, a condition which almost necessarily gives an appearance of solidity beyond all proportion to the actual quantity of solid matter contained. Hence, *pure sea*, and opium containing *pe sees*, are less consistent, and would, to the inexperienced eye, appear to contain much more water than pure opium of the same actual spissitude; a source of much perplexity to any one who tries for the first time to estimate, by the consistence, the real spissitude or dry contents of different samples of opium containing more or less of *pure sea*. A tentative prowess in the only one by which a person can qualify himself to estimate the spissitude with tolerable accuracy. He should, before allowing the *parkhiyas* to state their estimate of the spissitude, form one in his own mind, and make a memorandum of it, noting his reasons for assigning the degree of spissitude on which he fixed. The result of the steam-drying test, to which small samples of all opium are subjected in the Benares agency, will then enable him to judge on which side, whether under or over estimate, he has inclined to err, and to avoid the error in his subsequent operations.

The constituents of *pasewa* are in a state of chemical combination; and the slow addition of water will not subvert that condition. But the sudden effusion of a large quantity of water on concentrated *pure sea*, instantly receives it into two portions, a dark colored fluid containing the gum, coloring matter, and super-meconate and acetate of morphia, and a lighter colored powder, consisting of the resin and some gluten, and a minute portion of caoutchouc. In making *le sea* therefore, from *pure sea*, or from inferior opium, the necessary quantity of water should be slowly added, and thoroughly mixed previously to the addition of more water. Pure opium is liable to the same resolution of its component parts, from the sudden effusion of water: if the latter be slowly added and thoroughly mixed, the gelatinous opium will absorb it, forming a species of hydrate, and will retain its tremulous consistence; but if the water be suddenly added in a considerable quantity an immediate separation of the more and less soluble constituents occurs, and the opium loses its gelatinous and adhesive character. When opium is dried up to a certain point, below the spissitude of 80 per cent., it loses the power of absorbing water without decomposition, and cannot be brought to the gelatinous state. It might be expected, that, by adding 30 parts of water to 70 of dry opium powder, we should produce a combination possessing the consistence and other physical characters of fresh standard † opium; but the compound has little consistence, and will be found to contain insoluble portions, which have lost the power of forming hydrates with water; yet its *spissitude* remains exactly that of standard opium, the precise quantity of dry opium employed in making it being recoverable from it, but in a darkened and deteriorated condition. The above observations have a practical bearing upon the manufacture of *le sea*, as has already been noticed, and upon the degree of spissitude which opium, either in the hands of the *kaeris* or in the agency godowns, should be permitted to acquire: it should be limited to 66 or 67 per cent. for the former, and 70 or 72 for the latter; because, with every additional degree of spissitude above this, the solubility is impaired in an increasing ratio.

Among some thoughts on the subject committed to writing six years ago, I find the following remark and query: "The whole of the original milky juice will pass through a finer filter than that used by the Chinese in making the extract for smoking: is it possible to dry the opium, retaining its property of such minute divisibility and diffusibility; or is it necessary for the complete separation of the water from the resin, gluten, caoutchouc, &c. that some absorption of oxygen should take place, and some consequent diminution of their solubility, or rather miscibility with water?" My reason for noticing this query is the subsequent solution of the proposed problem by M. Prevste of Calcutta, in the highly similar case of animal milk, which he appears to have succeeded in drying to a powder with no perceptible injury to the diffusibility of its curdy and oleaginous principles. This is the very result that should be aimed at in the preparation of opium for the Chinese market.

When the juice of the poppy has been properly dried, that is, rapidly, in a cool shade, and protected from dust, it possesses, at the spissitude of 70 per cent., (that is, containing 30 per cent. of water,) the following properties. It has in the mass a "reddish brown" color (*Werner*), resembling that of copper (the metallic lustre obstructed); and when spread thin on a white plate, shows considerable translucency, with a "gallstone yellow" color, and a *slightly* granular texture. When cut into flakes with a knife, it exhibits sharp edges, without drawing out in threads; and is tremulous, like jelly, or rather strawberry jam to which it has been newly compared. It has considerable adhesiveness, a handful of it not dropping from the hand inverted for some seconds. Its smell is the pure peculiar smell of opium, heavy and not unpleasant. In this condition it is said to be "standard" or "*sarsuf*" opium.

When the juice, again, instead of being thus exposed to the air, has after collection been kept in deep vessels, which prevent evaporation, it presents the following appearances. A specimen of it which has the spissitude of only 60 per cent. has the apparent consistence or substantiality of standard opium of 70 per cent. But on minute examination, it will be found, that this apparent firmness of texture is a deception, resulting from the mechanical constitution of the mass; it being made up with but little alteration of the original *roghun drops* collected from the capsule, not within, and more inspissated without; this outer portion, as long as it remains entire, giving the general character of consistency to the mass, just as the shells of a quantity of eggs would do. For, when the opium is rubbed smartly in a mortar, this fictitious consistence disappears, exactly as that of the eggs, if pounded, would do; and its point of apparent consistence, as well as of real spissitude, it is reduced to the proportion which it properly bears to standard opium. When opium thus retains the original configuration of the irregular drops, it is said to be "*kachu*" or "raw;" when these are broken down into the *minute grain*, mentioned in the description of standard opium, it is said to be "*pakka*" or "matured," whatever may be this actual spissitude of the opium, whether 50 or 70 per cent. An opinion has been entertained, but on what grounds I know not, that the breaking down of this large grain is an injury to the opium; to myself it seems plain, that, as the large grain *always* disappears before the opium attains the spissitude of 70 per cent., and as this vesicular constitution of the raw opium retards the evaporation of its superfluous moisture, the more inspissated shell of each drop, by checking the evaporation from its more fluid interior the object should be to reduce the whole with the least possible delay to a nearly homogeneous mass, in which state the inspissation of opium advances with much greater rapidity.

Connected with this subject, is a question which has been raised, whether the inspissation of opium stored in large quantities in the agency godowns is effected more quickly, by removing, from time to time, into another receptacle, the pellicle of thick opium which forms on the surface of the mass; or by turning over the mass frequently, and thus constantly mingling with it the pellicles successively formed. As agreeable to the general law of chemical affinity, whereby the last portions of any substance held in combination, and in course of gradual expulsion, are retained with increasing obstinacy, the inspissation of this, is, *ceteris paribus*, always more rapid in its progress than that of thick opium; it is clear that the removal of the pellicle, by which opium of minimum spissitude is constantly exposed to the air, must accelerate the inspissation more than the turning over of the whole mass would do; because the latter process exposes to the air opium which is gradually acquiring a greater degree of concentration, and from which the evaporation will gradually be *slower and slower*. As evaporation takes place from the external surface only, it may be proper here to advert to the propriety of making all reservoirs for opium below the standard spissitude as numerous and shallow as may be permitted by the means of storage; every practicable method being at the same time adopted to facilitate ventilation across, and to exclude dust from, the extensive surfaces exposed; and as little light being admitted as may be suitable to the convenience of the people at work.

It might be expected, from the ingenuity of the natives of this country, and from their imperfect notions of fair trade, that they would resort in a great variety of means for increasing, by adulteration, the weight of such an article as opium, in which fraud might be made so difficult of detection. But in fact, it is seldom that they attempt any thing of the kind, beyond keeping their opium at a low spissitude; an act by which, under the present searching system of examination, they cannot profit; and which, from its occasioning a deterioration of their opium through fermentation, entails the leaving of a bitter upon its quality, and therefore, in those cases, an inevitable loss. It is impossible that opium left to itself in the open air, during the parching season of the hot winds, could remain at the low spissitudes of 50 and 60 per cent., at which it is frequently brought to Ghazipur towards the end of that season; and we must therefore conclude, that the artificial means are resorted to, in order to maintain it in that condition; either the frequent addition of water, or the burying it in a damp piece of ground, which is said to be sometimes done for the sake of security. When these malpractices have been carried too far, the gluten undergoes in a greater or less degree the process of putrefaction; the mass of opium first becoming covered with mould, and acquiring an opaque "yellowish grey" color and a pasty consistence, in which every vestige of the translucency and *grain* of the opium is lost; and the smell becoming rennous, sour, and at last abominably fetid; in which condition the deteriorated opium is fit for none of the purposes of the manufacture, and is always destroyed, and its original value forfeited, by the *koe ris*. It is to be hoped that their experience of the unvarying consequences of such folly, and the introduction of a superior class of gomastahs, will in time convince them of the advantage, as well as the facility, of bringing in all their opium at very nearly the standard spissitude.

In some cases it would appear, from the fluid state in which they bring it for sale, as if they expected every drop of water which they add to it, to be assimilated and converted into opium. Occasionally, it would seem that they had admitted some suspicions of its having been watered too much; and their only remedy is to drive on the superfluous water by boiling: an operation which speedily reduces the mixture to a blackened and charred condition, easily recognized.

A more ingenious fraud, but which is seldom practiced, is, that of *washing out* the soluble and most valuable part of the opium, and bringing for sale the residual mass. In the process, the opium loses its translucency, and the color of its colors: it loses its adhesiveness also, not adhering to the hand like opium which has not been robbed of its soluble principle; and by these marks, without going further, the fraud is detected. *Sand* is now and then added, to increase the weight, and is at once detected by its grittiness when rubbed between a plate and a spatula.

*Soft clayey sand* is also, but very rarely, used for the same purpose: it always impairs the color and translucency, and can, as well as sand, be detected, and its quantity accurately ascertained, by washing the opium with a large quantity of water, and collecting the sediment, which is the clayey mud.

*Sugar* and *gur*, or coarse molasses, are sometimes employed to adulterate opium: they invariable ferment and give it a sickly, sweetish, renous, or acescent odor easily known.

*Cow-dung*, the pulp of the dhatura, or thorn-apple, and the gummy resinous juice of the bel, or Bengal quince, are seldom met with as fraudulent ingredients: the first may be detected by drying it to a powder, or by washing it with water, either of which processes brings under the eye the undigested shreds of vegetable matter, constituting the animal's food; but the two last are extremely difficult of detection, if not added in quantity sufficient to affect the color and smell of the opium, which generally happens in the few instances of their occurrence. The seeds of the dhatura are apt to get mixed with the opium, and afford a ready means of detection. A strange, but not uncommon, mode of adulteration is the addition of *pounded poppy seeds*: if reduced to a fine powder, the oleaginous seeds might enter into an imperfect chemical union with the kindred resinoid principle of the opium: but the fraud is never so skilfully effected as to produce this result; and the hard particles of the seeds are perceptible to the touch and sight. Malwa opium, though less now than it was eight years ago, is in general largely contaminated with oil, which is easily separated by dissolving the opium in water; and I have seen, in a few instances, the same fraud attempted within the Benares agency. As the oil is always in a rancid condition, its presence is betrayed by its odor, as well as by the glistening appearance which it communicates to the opium.

By long exposure to the heat of the sun, the texture of opium whatever be its spissitude, undergoes a remarkable change, through the conversion of parts of its gluten into a species of horny fibre, the characteristic property of exhibiting sharp edges, when cut into flakes with a knife, disappears; and it draws out into long threads.

These two varieties of texture may almost always be recognized in cakes of Behar and Benares opium respectively; the former being exposed to the sun, in the process of drying the cakes, and the latter not. This diversity of treatment occasions a difference between the hygrometric properties of the cakes of the two agencies; the Behar caket acquiring a more speedy but less permanent hardness than the Benares: whereby, though firmer in the shell towards the end of the hot winds, they are more liable than the Benares to soften and lose their shape during the rains. The immediate cause of this difference appears on making a close section of the shells with a sharp knife. It will thus be found, that in the Benares shells, the *le sea* remains visibly interstratified with the petals, dark-colored, and tenacious; while in the Behar, it is in a great measure absorbed by the petals, which are apparently in intimate contact with each other, and is not to be distinguished from them; the distribution being more easily effected by hygrometric changes of the atmosphere than the *independent* strata of lost and *le sea* in the Benares cakes.

## PIRACY.

We were not aware that it was part of the system so lately introduced, for the suppression of Piracy on the neighbouring seas, to require that every native vessel, met with at sea by our men-of-war, should be provided with a sailing pass; until we understood that the fleet of 22 prows, brought in by the *Wolf* on Tuesday last, had been stopped at sea from the want of such a document. So far back as in our number of 21st July last year we expressed our opinion that it would be an impolitic proceeding, and we gave at the same time our reasons for thinking so—and our views have not since undergone any change on the subject. But where and how has the Captain of a man-of-war obtained the right to stop native vessels at sea, and bring them into one of our Straits ports from the want of a pass? With respect to such craft, trading to this port, it may be all very well to require them to carry a pass—or when it has been made the subject of Treaty or of some less formal arrangement perhaps, with the native princes, that they should. Or where we know it to be contrary to the regulations of the place from which she has sailed, or of the native port to which she may state herself to be going—that a prow should put to sea on any voyage, without a pass, or some document of recognition from a chief—it may be quite a justifiable proceeding in every point of view to detain her for the want of one. But, where none of those facts could be shewn, would a native vessel thus detained and brought into this port by a man-of-war, have an action for damages against her commander for the detention of his vessel, and loss sustained by the interruption? We suspect he would —and the Captain of the man-of-war's general instructions would not, we apprehend, in such a case avail him much in a Court of Law against a verdict! For other reasons, however, to which we refer our readers to the number above mentioned, we should wish to see the practice discontinued—particularly as piracy in this neighbourhood seems likely to be brought to a close by less questionable means—and which are not likely to be misused, or to have any result prejudicial to the native trade of the Settlements, which can scarcely fail to be sometimes the case under the constant and rigorous exercise of the practice referred to.

While upon any subject connected with piracy, we ought not, we think, omit to mention that the *Tummongung* lately waited on the local authorities here, intimating that the whole remnant of the (*quondam*) piratical community of Galang, now fully persuaded that it was the intention of the English government to put an end to their predatory pursuits, were desirous to establish themselves under British protection on the island of Singapore, and there pursue an honest livelihood for the rest of their days! What the government has resolved on in reply to this intimation we have not yet heard. But if all the piratical communities are like those of Galang, for what loss of life and property is not our government responsible, in having so long delayed the dispersion of hordes so easily daunted and overcome! *Singapore Free Press.*

On Thursday last one of those violent and tumultuary affrays which occasionally disturb the peace of the town, broke out between two different tribes of the Chinese, and terminated in the death of one man, and blows and bruises to several others. The quarrel, as is so often the case, had its origin in a very trivial cause. A servant of the pork-farmer was carrying some pieces of pork in a basket past a house on the river side, at present occupied by people from a China junk now in the roads, when he was jostled by one of the coolies who was at the same time carrying a load of rattans into the house in question, and the pork thrown out of the basket on the ground. High words ensued, and (as he himself at least afterwards swore) the porkcarrier was struck down by a blow from some one of the junk people whom the altercation had collected around. He however got upon his legs again, and hastened to collect his friends, whom, as they were of a race proverbially hostile to the Junk people, he found no difficulty in assembling in considerable number of, and whom he forthwith conducted to the scene of his recent discomfiture. One of the party laid hands upon the junk nakhoda, which appeared at once to be received as the signal of hostilities among his people, who with heavy sticks, brick bats &c. repelled the aggression of the porkcarrier's party—and the affray succeeded which ended in the unhappy consequences we have already mentioned. A Coroner's jury sat the same day over the body—and a verdict of Wilful Murder was returned against the nakhoda and two of the junk's crew, who were committed accordingly. *Ibid.*

## THE PORT OF CALCUTTA.

As much has lately been said in the papers regarding the quantity of shipping now in the port, it may not be uninteresting to present a statement, derived from authentic sources, of the quality, tonnage, &c. of the vessels, showing also the extent of the shipping in former years:—

| | Ships. | Tons. |
|---|---|---|
| In December last, there arrived at Calcutta, .. .... .... .... .... | 61 | 19,000 |
| Departed, .. .... .... .... .... | 28 | 17,000 |
| Exclusive of dhonies or coasting vessels. | | |
| On the 1st January, 1837, remained in the port as follows: | | |
| | Ships. | Tons. |
| Free Traders for Great Britain (including 2 243 tons for China) .. | 20 | 13,010 |
| Country ships for China, .... .... | 6 | 3,900 |
| Ships and vessels employed in the country trade, .... .... .... | 45 | 12,000 |
| American vessels, .... .... .... | 7 | 2,000 |
| French vessels, .... .... .... | 15 | 3,500 |
| Portuguese vessel, .... .... .... | 1 | 600 |
| Arabian ves.s, .... .... .... | 14 | 3,000 |
| Total | 108 | 48,000 |
| Free Traders in the river on the 1st January, 1836, .... .... .... | 10 | 14,488 |
| Ditto ditto, 1st January, 1837, .. | 20 | 13,010 |
| Increase | 10 | 1,761 |
| From the 1st Jany. to the 31st December, 1836, the arrivals were: | | |
| His Majesty's Ships .... .... .... | 9 | |
| Merchant ships and vessels .... .... | 445 | 1,60,160 |
| Dhonies or coasting vessels, .... .... | 216 | |
| | 669 | |

The above is the greatest year on record in the number of vessels arrived.

The years 1815 and 1816, however, nearly equalled 1836, when (in the former years) the imports were:—

| | | |
|---|---|---|
| 1817, Merchant ships and vessels.. | 440 | 1,66,569 |
| ,, Dhonies or coasting vessels, | 163 | |
| | 599 | |
| 1818 Merchant ships and vessels, . | 440 | 1,76,971 |
| ,, Dhonies or coasting vessels.. | 133 | |
| | 573 | |

Departure from Calcutta for China in the following years:

| | | |
|---|---|---|
| 1834 Ships and vessels, .... .... .. | 55 | 25,023 |
| 1835 Ditto ditto, .... .... .... | 54 | 26,807 |
| 1836 Ditto ditto, .... .... .... | 67 | 33,007 |

Shewing that 1835 was the greatest year, and double the average of the five years preceding 1835, which included the Honorable Company's cotton ships from hence.—*Calcutta Englishman, January 20.*—*Singapore Free Press, 16th March.*

## CORRESPONDENCE.

### TO THE EDITOR OF THE CANTON PRESS.

Dear Mr. Editor.—Knowing how lonely many of my countrymen here feel for the honour and dignity of their nation, I avail of your columns to draw their attention to an atrocious stigma upon both, which only requires, I feel sure, to be known, to induce them to call a public meeting and petition the king in council to look more sharply after his honor. I allude to a Treaty, called Capitulations or articles of peace between Great Britain and the Ottoman empire, which may be seen in the appendix to Dr. Walsh's Residence at Constantinople, published last year in London. This Treaty reminds one throughout of a Chinese Edict; but the part which is most odious is that clause in which the Sultan, out of compassion no doubt to the barbarian foreign king, benevolently allows that "two shiploads of figs and raisins may be purchased at Smyrna, or any other Turkish port, in abundant years, on paying a duty of three per cent. for the use of his Britanic majesty's kitchen." Dr. Walsh tells us, in another part of his book; "These figs and currants were the only commodities legally

allowed to be exported from Turkey, and under the shadow of this treaty all England has been since supplied with them."

It was a sorry jest upon the poor brahmin who fancied he had passed his life in abstinence from all food which had even possessed animal existence, to show him by a microscope that he had devoured myriads of creatures on every cabbage leaf which had formed his vegetable meals, and I commit a similar indiscretion, perhaps, in opening the eyes of my countrymen who have a religious veneration for a christmas plum-pudding and its sacred accompaniment of mince-pies, to shew them that when they have indulged in those commestibili they have, to use a Turkish phrase, been "eating dirt," and swallowing mouthsful of indignity. I do not "willingly disparage

"My best and dearest friend plum-porridge" but—two shiploads of figs for the use of his Majesty's kitchen!—Think of that ye 94 who signed the famous Canton Petition to the king in Council of 1834!

Then, Mr. Editor, how tolerate the *arrogant assumption of supremacy over the monarchs and people of other countries* claimed by the Great Turk for himself and his subjects! How submit to the degradation of maintaining a nobleman of Great Britain with an expensive diplomatic corps, to superintend the interests of two shiploads of figs! How permit the *quiet submission to insult and unresisting endurance of contemptuous and wrongful treatment* implied in the duty of three per cent upon raisins for his Britannic Majesty's plum-puddings!—and in abundant seasons only, as if forsooth, the dumplings of our gracious Whig King are to be made dependent on a Turkish crop!

I suggest that a public meeting be convened forthwith to petition His Majesty in council upon the matter of the figs, and to submit that the minister in Constantinople be *instructed to put himself in communication with the Merchants of Canton qualified as they are in a certain degree by their experience and observation*, to guard him from making similar treaties in future. It will be easy to shew that nearly all that has been gained by our successive costly embassies at Constantinople, backed by the fleets of Duckworth and Codrington, is enjoyed by our merchants here, neglected as they are by their own government, whilst we are exempt from much of the misery and contumely implied in the Turkish treaty. Who, for example, apprehends being made a slave of in Canton? Whence the necessity to treat here about an excise on animal food—to say nothing of figs, or making wine or any thing else, if we choose, in our own houses? Who, if not ourselves, prevent the Superintendents to decide all suits between British subjects, without the intervention of Chinese Authorities? Where the fear of a Chinese Cadi giving ear to the calumnies and injuries of Englishmen towards each other? Who thinks it necessary to stipulate against the contingency of an English subject turning Chinese? When did the Chinese ever seize or violently appropriate the property of an English subject either living or dying in China?

The people of Europe, Mr. Editor, have still a great deal to learn from us, notwithstanding the effusion of political knowledge poured upon them by our petition of 1834. We have but to concoct a treaty to shew them that we can either raise the price of cotton twist here, cheapen puddings in England, or dignify the present degraded position of an English Christmas dinner.

C.

---

We have recopied below for the use of our readers, and to render the remarks of our Correspondent more intelligible, the Turkish treaty to which he alludes, and the style in which it is written is certainly very similar to that used in Chinese official documents. In the interesting book from which we have copied it, the similarity of the official acts of the Turkish Government to what they are in China are frequently very striking, but this is perhaps not a matter of much surprize, when it is considered, that however great the distance which now separates these nations, their rulers may be said to be from the same stock, and their Government is alike based upon the Patriarchal rule.

*Capitulations, or Articles of Peace, between Great Britain and the Ottoman Empire, agreed upon and altered at different periods. The Capitulations commence in these words:—*

"Sultan Mahmood—may he live for ever! Let everything be observed in conformity to these capitulations, and contrary thereunto let nothing be done.

"The commands, under the sublime and lofty signet which imparts sublimity to every place, and under the imperial and noble cypher, whose glory is renowned throughout all the world, by the Emperor and Conqueror of the Earth, achieved with the assistance of the Omnipotent, and by the special grace of God, are these—

"We, who, by divine grace, assistance, will, and benevolence of God, now are king of kings of the world, the prince of emperors of every age, the dispenser of crowns to monarchs, and the champion, Sultan Mahmood, son of Sultan Ibrahim Khan, son of Sultan Ahmed Khan, son of Sultan Mahomet Khan, son of Sultan Murad Khan, son of Sultan Selim Khan, son of Sultan Solyman Khan, son of Sultan Selim Khan,—the most glorious among the princes professing the faith of Jesus, and the most conspicuous among the potentates of the nations of the Messiah, and the umpire of public differences that exist between Christian nations, clothed with the mantle of magnificence and majesty, Charles II. king of England, Scotland, France, and Ireland, whose end may it terminate in bliss, having sent an ambassador to the Sublime Porte in the time of our grandfather, Sultan Murad, whose tomb be ever resplendent, of glorious memory, and full of Divine mercy and pity, &c. He representeth, in the reign of our grandfather, Sultan Mahmood Khan, whose tomb be ever resplendent, to our just and overshadowing Porte, his cordial esteem, &c. As such privileges, therefore, had been granted to the kings and sovereigns of France, Venice, and Poland, &c., so was the same true friendship granted to the said king; and it is permitted that his subjects and their interpreters might safely and securely come and trade in these our sacred dominions.

"The capitulations of our sublime dignity and our noble commands having been, through friendship, thus granted to the kings aforesaid, and the queen of the above-mentioned kingdom having heretofore also sent a noble personage with presents to this Victorious Porte, which is the refuge and retreat of the kings of the world, and the asylum of the emperors of the universe, which gifts were graciously accepted; and she having earnestly implored the privilege in question, her entreaties were acceded to."

The capitulations similar to those granted to the French and Venetians were conceded at different times to the English, to Elizabeth, James I., Charles II., by Sir Sackville Crowe and Sir Thomas Bendish; Charles II., by the Earl of Winchelsea, and Sir Heneage Finch, Viscount Maidstone, Baron Fitzherbert, and finally by treaty of peace concluded at the Dardanelles, on the 19th of the Moon Zelkaide (5th Jan.) 1809, by the Hon. Robert Adair.

That the residents in Turkey shall be exempt from all tribute, whether married or single, merchant, or artizan; that if found to have been made slaves by any means, and demanded by the ambassador or consul, they shall be immediately released, and delivered up to them; that they shall not be subject to excise on animal food, nor prohibited from making wine in their own houses for their own use; that two shiploads of figs and raisins may be purchased at Smyrna, or any other Turkish port, in abundant years, on paying a duty of three per cent., for the use of his Britannic Majesty's kitchen.

That the ambassador shall be allowed to choose his own janissaries and dragomans, and that no dragoman shall be responsible for the contents of any letter or memorial with which he may be charged, and shall not be punished for any offence by a Turkish judge, or imprisoned without the knowledge of his ambassador or consul; that the ambassador or consul shall decide all suits between English subjects, without the intervention of Turkish authorities; and if an Englishman be calumniated and charged with injuring another, and false witnesses of the fact be provided before a Turkish cadi, he shall not give ear to them, but refer the matter to the English ambassador; that all suits between an English and Turkish subject, or case of homicide or other crime, shall not be heard before a Turkish tribunal, unless the ambassador, consul, or their dragoman be present; and all suits exceeding the value of four thousand aspers be heard at the Sublime Porte, and nowhere else, and no more than two per cent. charged by the chousah on the money received.

That if an English subject turn Mahomedan, and possess any property of another who is not so, it shall be taken from him, and restored by the ambassador to the owner; and no Englishman, shall be held responsible for the flight or evasion of another, unless he had become surety for him; that the property of English subjects dying in Turkey shall not be seized or violently appropriated by any Turk, but secured and delivered up according to the will of the defunct; and if he die intestate, it shall be delivered up to the ambassador; and if none be resident, received and kept till claimed by the friends of the party; that the same law shall apply to the dragoman, if he be English; or if he be a subject of the Porte, the property shall be distributed among his heirs, without the interference of fiscal officers. *Wheeler's Constantinople.*

---

# CANTON PRESS,

April 22nd 1837.

Whenever our Cotemporary of the Register finds that he has the worst of an argument, he tries to make up by personal abuse for his want of caution, in the vain hope, we suppose, of silencing us by the use of weapons with which we are not acquainted, and which, if we were, he must have perceived from the conduct of this paper ever since it's establishment, were not likely ever to be called into action. These few remarks are called forth by an article in the last Register, where our Cotemporary, on the occasion of a letter signed "O" having appeared in our paper, on the supposition that he knows who the writer of that letter is, directs his coarse and unmannerly attacks against a Gentleman resident here, for no other reason, we suppose, but personal dislike. A similar attack was made some time ago by our Cotemporary, alike unjust and unjustifiable, also on the supposition that a letter which appeared in our columns, had been written by this individual. We then stated in very plain terms that the letter in question was not written by the accused person, and our Cotemporary must then, we feel assured, have felt embarrassed and annoyed at his mistake, and it would be supposed that he would not easily again place himself in a situation where the same unpleasant feelings would await him, only we hope a good deal stronger than before, on the conviction that the repetition of an offence ought to be visited with severer punishment than the first transgression.

The Register says "O" has told two or three direct and positive falsehoods in his letter: e. g. He is *not* a member of the Chamber," and again "for the letter from the great *Irish* O, and the leading Editorial are generally supposed to be the sprightly efforts of the same writer." Whence the Register draws his inferences, it will be difficult for us, or indeed for any one, to say, but that they are perfectly wrong, we know. Though we do not see any thing in the letter alluded to that deserves to be called, "a malicious libel on the first and only institution established here for public purposes," and are obliged to our Correspondent for having sent his communication to us, yet we think it but fair, that whatever blame or credit attaches to it, ought not to be borne by the wrong individual; it is a very good old maxim to "put the saddle on the right horse" and we consequently now make our unreserved declaration, *that we know that the individual taxed by the Register with having written the letter signed O, had not the slightest concern in it, moreover that the letter in question we know to have been written by a member of the Chamber of Commerce.* Now having disproved one of the "two or three positive & malicious falsehoods" with which the Register charges the writer of the letter "O" we suppose that our Cotemporary will not keep the public any longer in suspense as to what the remaining are, since we have read the letter in vain to find them, nor has any one else we believe been more fortunate.

The subject of the letter is the General Chamber of Commerce, and it's management, which being a public institution is exposed to having it's transactions publicly commented on, and the natural channels for such comment are the newspapers, whose managers have an undoubted right to admit contributions of that nature, and it is even their duty, though their correspondents should differ with them in opinion, as we do in several instances differ from what O says. Our endeavors are to make our paper the means of conveying to the public whatever may be of interest to the community, and to canvass dispassionately and free from partyspirit the occurrences of the day, for which purpose we are always glad to receive communications from our readers and friends, of whatever complexion or tendency they may be, provided they confine themselves to objects of public interest and utility, without attacking individuals.

With regard to our last leading article which our Cotemporary fathers upon the same individual that he pretends wrote the letter signed "O," we have only to observe, that he is equally wrong, and that instead of the "Legion" protected under our Editorial "we," the only Editor of this paper is the person well known as such in Canton.

Our Cotemporary continues his strange misconceptions, regretting that we should so far lose sight of the "*bienseances* of life" as to reflect on the station of any individual. We cannot find that we did so in our last Editorial; we certainly mentioned who were the individuals whose names are affixed to the "Petition;" we said that they were merchants, captains, mates, doctors, etc. etc.; but was this not the case? and if so, why should we, by mentioning of what profession they were, thereby throw a slur on their station? Surely our Cotemporary will allow us the privilege shared by any other plain spoken mortal, to call things by their right names, and not compel us to write so obscurely as to render interpreters necessary to make out our meaning. Being on this point of obscurity of language, we may mention that as yet no candidate for the reward we offered in our last, to explain to us some part of the *Register*, has made his appearance, and though our Cotemporary taxes us with stupidity in not understanding him always, it is some consolation to us to be by no means singular in this; the reward we offered was a file of *Canton Registers* bound in silk, tempting enough we presumed, for exertion—had we offered *Canton Presses* the thing would have been different, we not being conceited enough to consider them a tempting prize.

In the beautiful simile of the hedge-hog with which the Register attempts to amuse his readers in revenge for our cattlefish, we are told that the former when pursued rolls itself up into an *opaque* ball! very surprizing indeed! it would be difficult for a hedge-hog so become transparent!

But this is not the only discovery made by our Cotemporary; we are informed "that the advances made by the Emperor and the Governor towards (the Superintendent) an officer of much humbler powers and pretensions (than Lord Napier,) should not be contemptuously slighted;" What the advances made to H. M. Superintendents on the part of the Chinese Government were, we, and no doubt all our neighbours, will be delighted to be informed of; it is really astonishing that so very important a fact should have altogether escaped our vigilance; we in common with others thought that Captain Elliot had, through the Hong-merchants, unsolicited by them and the Viceroy, represented to the latter his wish to ride at Canton; that the Vice-Roy had then despatched several Hong merchants to Macao to examine what were Capt. Elliot's objects in coming to Canton; that the Hong merchant's report with the Governors remarks were sent to the Emperor, and that the latter agreed to the residence of H M's. Superintendent at Canton, provided he only controled his countrymen; but that strict watch was to be kept over him, and if he interfered in any thing else or became troublesome, he was to be sent back to his own country. In all this we cannot see that the Emperor made any advances, but we hope that our Cotemporary will not longer in ignorance of a fact so important, and which cannot fail materially to improve the British political relations with China. We also were not aware that the present Superintendent is "an officer of much humbler powers and pretensions" than Lord Napier was, we mean in his official capacity, since the present chief commissioner acts, as far as we know, under the same powers brought out by Lord Napier, retains the same title, and holds, as far a is generally known, the same official rank which Lord Napier held. The only difference is, we believe the reduction of the emoluments of the office. However we are open to correction, and impartiently await the next *Register* to enlighten us also on this point.

We are asked what Chinese Politics are; we beg to inform our Cotemporary that when we use that word we mean the relation in which foreign Governments and foreigners in general stand towards the Chinese local and Imperial Government, and having answered this question, we again remind him of our question the answer to which he has hitherto evaded, of what his reasons are to declare that the Petition to the King in Council was signed by him "on ignorant and presumptuous hopes and under peculiar excitement."

---

By the *Theodore* we have received the *Javasche Courant* from Batavia to the 15th March, from which we have extracted some shipping intelligence, and a list of vessels that had passed Anjer which will be found in our shipping report.

News from France to the 9th November had reached Batavia. On the 3d November a telegraphic despatch was received in Paris, giving the important intelligence that Louis Napoleon, son of the Ex. King of Holland, had attempted to proclaim himself French Emperor at Strasburg under the name of *Napoleon II.* He seems to have found but very few adherents, and was arrested almost immediately after in the barracks of the 46th regiment, which he had attempted to gain over to his cause. On being taken, the young prince made some resistance, and in the scuffle the epaulettes and orders with which he had decorated himself, were torn off his clothes. He was dressed as Napoleon used to be. Several people have been arrested, among others a Mrs. Gordon, supposed to be an English woman.

This young Bonaparte is the youngest son of the Ex King of Holland the present Count of St. Leu, born in 1808, who, when his brother, 4 years older than himself, died, assumed the name of Napoleon. From all accounts it appears, that the inhabitants of Strasbourg were not at all eager to have again an Emperor of the Bonaparte family.

In Vendome an attempt was made by some of the military to proclaim the republican Government, but the parties active in this scheme, have been arrested.

Paris, 4th November. The Telegraph from Bayonne announces that the Cortes have declared the Queen Christina the only Regent of the Kingdom.

It appears that young Napoleon has been misled by some of his friends in Switzerland, to make the attempt above related. He has, with his associates, been imprisoned in the house of correction, and the Government had not made known, how he was to be proceeded against. By some it was thought that he would be kept a close prisoner somewhere in France, others again thought, that he would, like the Duchess of Berry, be sent out of the Country, the courts of the Empire not being competent to judge him.

Another *machine infernale* is said to have been found in a house in the *rue de Conde* near the *Odeon*. The house was said to belong to an Englishman.

The Carlists were bombarding Bilbao, and from the differences existing between the Garrison and the inhabitants of the City, it was expected that it would soon surrender.

It is said in letters from Constantinople of 15th September, that the Ulemas had expressed much discontent against the Sultan, on account of his many reforms. A new commercial treaty between England and Turkey was spoken of at Constantinople.

(*Signed*) J. TAYLOR.
Bombay 1st February 1837. *Opium Agent.*

---

We are told that an Edict has been issued in the province of Fokien against the receiving or paying Dollars with the "old head" (Carolus IV) at a premium upon Sycee. It is one of the singular circumstances for which it is difficult to account, that the Chinese in the Tea districts, who have, before the South American Republics had their symbols upon dollars, been accustomed to the effigy of H. Catholic Majesty, cannot become used to the new course of things, and that, though the intrinsic silver value is the same, their preference for old King Carolus is so great, that they make a difference of as much as 16 per Cent and more between the monarchical and republican dollars, and pay for the former 5 or 6 per Cent more than for pure silver. They do not hold Fernando VII in equal esteem, but even him they consider to be worth 4 per Cent, or there abouts, more than his democratical successors. However, the old Spanish coin of dollars is becoming more scarce every day, and the time cannot be far distant when those of the South American Republics will be allowed to come in on equal terms with the chopped or defaced Spanish coins which now form the currency of our trade.

---

We are informed that Howqua called upon H. M. Superintendent yesterday.

---

A dinner was given to H. M. Superintendents by the Company's Agents on Monday last, at which a great number of the British residents were present. Other similar parties have since, or are about to be, given, by several of our British merchants.

---

Misled by the weather of the day, we mentioned in our last, that the long continued rain seemed at last to have given way to fair weather; this latter was but of short duration; during the last week the rain has been almost incessant, and there is but little indication (as far as it is possible to judge from the appearance of the sky) of any change for the better; the low land near Canton is inundated, and though this very wet weather may not ultimately have an unfavorable effect upon the quantity of the rice-crop, it will certainly much retard it. We stated some time ago that a fire had consumed a good many houses in Cha-mak-lan. Many of these had been rebuilt, but the incessant rain had so much softened the new walls, that those of four houses fell in yesterday morning, burying and killing beneath them five men, them engaged there at work.

---

We understand that a Chop has been sent through the Hong-merchants to the Vice-Roy, from the general body of Creditors requesting a settlement of the debts of the Hing-tae Hong.

NOTICE—is hereby given that the undersigned will receive sealed Tenders of Cash for Bills of £1,0 0 (payable at thirty days sight in sets of £200 each) on the Right Honorable the Lords Commissioners of His Majesty's Treasury on or before 12 o'clock the 22nd Instant.

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

NOTE. Opium can only be delivered at Lintin &c. where also high prices are obtainable for *Camblets, Saltpetre, Ginseng* and other Goods on which the duties at Whampoa are high.—Ships with *Rice, Cotton &c.* sometimes discharge at Macao or tranship their Cargoes at Lintin &c to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—Send invoices of *Wine, Beer, Pickles &c, Confectionary Stationery, Cutlery Crockery ware, &c.*, for foreigners consumption, are said at Auction duty paid.

*Note. Alum, and Canes* are procurable cheaper at Lintin, Macao, &c; and *Raw Silk, Silk* piece goods &c, are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

VOL. 2d. No. 34. CANTON, SATURDAY, APRIL, 29th. 1837. No. 86.

## SIAM.

By the *Sachem*, from Siam, the 12th ult. we have advices from Bangkok to the 10th ult. The *Emma Mathilde*, and *Mary Sharp*, both from this port had arrived. The market was well supplied with most articles of import, and Cotton Goods and Cotton Twist, in particular, were very dull. *Sugar*, abundant and declining —first quality was quoted at 8 and 2nd and 3rd at 7 a 7¼ ticals, and as no more Junks could leave in consequence of the S. W. monsoon having set in, the price of first sort was expected to go down to 7 ticals, or about Drs. 4 per pecul. *Buffalo Hides*, and *Horns*, were also abundant at 3½ *Deers' Horns*, at 6¼ : *Gambouge* 75; *Sticklac*, 14 a 22; *Cotton*, cleaned, 2½ and uncleaned, 7; *Sapan Wood*, 1¼, and *Cocoanut Oil*, 7 ticals per picul.

The following interesting information regarding Siam has been kindly furnished us from extracts of letters received by the *Sachem*.

"*Chantiboon* is certainly a very desirable and important field for missionary effort. That district probably embraces from 20 to 30,000 inhabitants mostly Chinese —quite a majority of whom, I think, speak the Tiochew dialect, which differs materially from the Hokien more commonly spoken in Singapore. The population to a great extent is congregated in villages the most considerable of which are *Chantiboon* and *Ban ka-chak*. Their aggregate population may be 6,000. The country around these villages in many places is thickly settled, well-watered, beautifully diversified with hills, vallies and wide plains, and the distant mountains impart to the scene a degree of grandeur and sublimity. The climate, I think, must be very healthy. The principal river is bordered by extensive rice fields, which, during a considerable part of the year, appear very beautiful. Bankok is on a dead level—not a hill or mountain can be seen, and the banks of the river are so thickly lined with fruit and other trees as to give the country the appearance of a forest. At *Chantiboon*, one might have many beautiful rides on horseback—but there are no horses. The principal productions are rice, sugar, pepper, tobacco, potatoes, water melons, and I think a considerable variety of garden vegetables. Fowls and fish are procurable here, but few of the articles mentioned are as cheap and abundant as at *Bankok*. At *Chantiboon* the missionary would be allowed to choose his residence and his site for building, without much liability of being driven from his house; but in *Bankok* it has been next to impossible, owing to the jealousy of the government and the fears of the common people to obtain any thing like a comfortable dwelling. Since my arrival in Siam I have moved 16 times. At present, however, circumstances as to a settled residence look rather favorable. There is very frequent communication between *Bankok* and *Chantiboon*, by means of small Chinese junks and Siamese war-boats, so that letters and other things could be often transmitted to and fro. The people of this district are much more civil and respectful than is generally the case in *Bankok*, and for many reasons I am disposed to think they would be much more accessible to religious instruction. Children are numerous and there would be a fine opportunity, I should imagine, for the establishment of several Chinese schools."—

Another letter states :—

"Within a distance of 20 miles in every direction from *Chantiboon*, I should judge there were not less than 40,000 souls. Probably two-thirds are Chinese. Much the greater proportion of these are Teochew Chinese; but a small proportion are Fokien men.

I think the Roman Catholics have a strong hold at *Chantiboon*—it appears to be an old establishment. The Anam, (Cochinchinese) population are chiefly under roman catholic influence. Perhaps one-forth or one-third of the population of the place are Anamese. There are very few, if any, of this class of people in the villages round about *Chantiboon*.

The Chinese men intermarry with the Siamese when they can. I know not whether they get wives from any other source, but this source by no means supplies the wants of all; consequently many of them are obliged to remain single.

Only a small proportion of the Chinese in and around *Chantiboon* can read intelligibly—probably not more than one-fourth or one fifth. From what I discovered I should judge that they would be well pleased to have missionaries among them.

Small junks are almost weekly plying between *Chantiboon* and *Bankok*. I returned to *Bankok* in such a vessel. The accommodations are tolerable. The first son of the Praklang has a brig engaged exclusively in the trade between *Bankok* and *Chantiboon*. She goes and returns as often as once in every four months. She has a very comfortable cabin &c. It is probable that this vessel, or some other as good will be kept constantly plying between the two places. There is a land communication, but I believe the way is difficult. Pirates are but to be feared along the coast to *Chantiboon*. I suppose thieves are numerous, and probably more so than at *Bankok*—but I have not found either the Siamese or Chinese notoriously troublesome on this score.

The water used for culinary purposes at *Chantiboon* as well as at *Bankok* is taken from the river. It is a little turbid, but settles after standing a while. A little alum or sulphuric acid makes it very clear.

There are mountains, and lofty ones, in the region of *Chantiboon*, and of course there must be some spring, but there are no such things about *Bankok*.

The seasons in *Chantiboon* are much the same as in *Bankok*. The wet season commences in April and continues until October. The showers are not very frequent in April, May, and June.—They are more frequent in July, August, and September. The wet seasons are by no means so unpleasant as strangers generally fancy. The dry season commences in November and continues until the last of March, during which there are but 3 or 4 showers, which occur at about the end of February or beginning of March." *Singapore Free Press, 6th April.*

## PIRACY.

The *Corsair* which returned here on Tuesday last from a voyage to Sambas and Pontianak, as also the ports on the East Coast of the Peninsula, fully confirms the report which lately reached this place of the coasts on that side being infested by a numerous fleet of Illanoon Pirates, with whom it appears there is also associated a number of Dayaks. The depredations of these marauders on the coast and among the islands in that direction, had it appears, been of a most fearful description. Defenceless fishermen had been carried off in great numbers—and no less than 40 headless trunks have been washed on shore—proving that the Dayak division of the band had been giving full scope to their diabolical predilection for the possession of human heads. The leading vessel of this piratical fleet is stated to be a barque, having a green painted boat on her quarter, with anchors outside, while the smaller vessels make to the coast to secure their victims. So great were the apprehensions entertained of these marauders at Pahang that the Rajah of that place transmitted a letter by the *Corsair* to the local government here, requesting assistance, while the people of the *campon pakats* who were assembled at the several ports on the Coast, were afraid to put to sea, some of them having shipped tin on freight by the *Corsair* instead of as usual bringing it themselves to this place. The *Wolf* which put to sea when the rumour of these marauders being outside first reached this, will no doubt dispel the alarm which their devastations have occasioned—and, we fervently hope will fall in with the fleet. We regret that on so important an occasion we should be deprived of the invaluable services of the Steamer on such a cruize, in consequence of her now making some addition to her masts and sails which is rendered necessary by the instructions from the Bengal government to husband her steam with the greatest care, and only to use it on occasions of moment,—directions which by the scant dimensions of her original masts, yards, and sails, would have materially detracted from her utility without the alterations she is now undergoing. *Sing. Free Press, 30th March.*

The Singapore *Free Press* of 6th April, which has since come to hand, informs us that the steamboat *Diana* had left Singapore in pursuit of the Pirates, of whose acts several new rumours had reached that port. We hope that the efforts of the *Wolf* and *Diana* may prove successful, and destroy this band of adventurers. If the reports of the bravery of the Illanoons be true, it is probable that the victory over them will not be obtained except after hard fighting, which was not the case with the pirates hitherto destroyed.

We subjoin a statement of Rice Exports from Java, taken from the *Javasche Courant* from which it will be seen, how rapidly that Island is advancing in commercial importance. Of the Rice exported from Java last year, 21,000 Coyangs or very near 600,000 Piculs were for the China market.

TOTAL EXPORT

| | | | | |
|---|---|---|---|---|
| In | 1823 | ... | .... | 4,367 Coyangs. |
| | 1825 | .... | .... | 8.293 ,, |
| | 1827 | .... | .... | 9.971 ,, |
| | 1829 | .... | .... | 15,122 ,, |
| | 1831 | .... | .... | 18,437 ,, |
| | 1833 | .... | .... | 30.344 ,, |
| | 1835 | .... | .... | 25,577 ,, |
| | 1837 | .... | .... | 36,440 ,, |

A Coyang is equal to between 27 @ 30 Picul in weight. so that the total quantity of rice exported from Java during the last year does not fall short of a million of Piculs.

## THE BRIG FAIRY.

Advices from Manila, of the 8th instant, inform us, that of the six mutineers and assassins who landed from the *Fairy*, four have been taken. The fourth was seized on the morning of the 7th of April, as he was landing from a Pontin. He was immediately put under examination, when he confessed himself to be one of the murderers of Captain McKay and three others; his name is Agustin de los Santos.

The confession states that the attack was began by three of the Manila men, with clubs, at 3 in the morning. The chief mate was the first victim, next captain Mackay, who came from his cabin; the third was the 2nd mate, and the fourth the gunner, and one person jumped overboard.

The two men who have confessed (one at Yloeos), both agree that captain Mackay and his officers made a gallant and vigorous defence; but they were beaten down by numbers with clubs.

Santos states that a hole was bored through the brig, near her keel, the night they left her, with sails set, &c., and that she was about a quarter of a mile distant from the shore, where it is probable she sunk.

From the evidence obtained it would appear that not more than $8000 value, in gold and silver, were landed at Manila Santos states decidedly that he left six cases of dollars and one of Sycee onboard, and perhaps more, as also some chests of opium.

We conclude that the legally authenticated confessions of the prisoners will be forwarded to the Agents by the Manila government; and we think it best to wait for these documents, rather than to publish an unofficial detail of the confessions. *Canton Register 25th April.*

Canton, 22d April, 1837.

Captain William Jeffrey,
Brig Lady Grant, Lintin.

Dear Sir,

We have much pleasure in acquainting you, that at a general meeting of the Canton Insurance Office, held in December last, it was resolved to request your acceptance of a piece of Plate of the value of One Hundred Pounds, to commemorate the high sense entertained o your intrepidity, in defending that vessel, with her valuable cargo, from a fleet of Malay Pirates, who attacked, and attempted to carry her by boarding, during a calm, off the Sambilangs in the Straits of Malacca, on the 2d of February 1836.

Our friends in London have accordingly been requested to order and forward to us a suitable piece of plate with the following inscription, which it will be a very pleasing part of our duty to present to you, as soon as received.

Wishing you every possible success in the pursuit of your profession, and that you may long continue to afford an example of that zeal and intrepidity which so well entitle you to its best rewards,

We remain, dear Sir,
Your most obedient Servants,
(Signed) JARDINE, MATHESON & Co.
General Agents,
Canton Insurance Office.

*( Inscription on the piece of plate. )*

PRESENTED
to Captain WILLIAM JEFFREY,
of the Brig LADY GRANT, by the
CANTON INSURANCE OFFICE
to commemorate the high sense entertained of his intrepidity in defending that vessel, with a valuable cargo, from a fleet of Malay Pirates, who attacked and attempted to carry her by boarding, during a calm off the Sambilangs, in the Straits of Malacca, on the 2d February 1836.

(Signed) JARDINE, MATHESON & Co.
General Agents
Canton Insurance Office.

Canton, China 8th Dec. 1836. *Ibid.*

## THE TWO DREAMS.

*(Translated from the Chinese for the Canton Press.)*

Professor Chin Tingpo of Sesouhing was troubled one night with a most extraordinary dream. He dreamt that while walking in the village church, he saw some very ferocious looking beggars sitting round a cauldron engaged in skinning a brown dog, whose body presented such a mangled appearance that he turned away disgusted. He was preparing to leave the church when he met a man coming in who walked up to the beggars and charged them with stealing his dog, threatening them that he would inform against them; they immediately jumped up and falling upon the man they killed him.

The fright, at this, awoke the professor.

Three days afterwards he again dreamt that several persons dressed in black who had the appearance of police officers came to his house and delivered a letter to him. They told him they were sent by the spirit of the owner of the dog who was murdered by the beggars to summon him to attend as witness of the murder at the bar of the Gods where the spirit had accused them. The letter contained an account of the murder, giving the dates and other particulars, and mentioning, his, the professor's, name as only witness.—There he awoke much astonished at these two dreams; but he concealed himself with the reflection, that, even if all he had dreamt were real, he need fear nothing, being only witness of the murder, summoned to give his evidence.

Shortly after this he resigned the professorship and returned to his family. He one day told his cousin Tsing the two dreams, adding "Whenever I die, take a white fowl, upon the back of which my name must be written, to the church and call me several times loudly by name; I shall then regain my life. But take care to bury me before you have been to the church, for my spirit being summoned to give evidence on being called, will return to my body if above ground."

The cousin laughed at his thinking so seriously of the dream but to pacify him, he promised to do as he wished.

Exactly a month after this the Professor suddenly died. The cousin on being told of it, went and bought a white fowl and wrote the professors name on its back. At this time there was a theatre close to the church and the crowds of people assembled to witness the performance prevented the cousin entering. By the time he got into the church it was dark.

The weather was very warm when this happened and the body becoming too offensive to remain above ground, it was buried, unfortunately before Tsing could get into the church.

The consequence was that the spirit could not hear when it was called, and never returned.

# CORRESPONDENCE.

## TO THE EDITOR OF THE CANTON PRESS.

Dear Mr. Editor,—In your comments upon my letter of the 14th inst. the position which you have been pleased to take up, is a conciliatory one; all very commendable on your part, and to which, I should readily become your adherent, could your arguments in favor of the adoption of "a cautious policy," to reform the existing abuses, be borne out, even by those who, possessing a smattering knowledge of the Chinese language, shelter their absurd propositions under the parade and high sounding qualification of local experience. We are told, by a new light, that a Mosquito fleet, with a force of about 3,000 men, would be sufficient to bring the whole *Kingdome* of China (of which we are treated with such a lengthy *discource*, weekly, for our further enlightenment,) to their bearing. Upon the same ratio then, under such a Director, w! at ought not the Commercial emolients of Canton be able to accomplish even with pen &c. against the Hoppo, Hong-merchants, and their draggled tailed phalanx of myrmidons to boot? But this learned writer would perform mighty feats, upon a visionary theory, and the flame he proposes kindling in the minds of the people against the officers of government would, I suspect, soon be extinguished a la Gulliver; what would become of the Lilliputian fleet, Jos only knows!

I will however, from considerate feeling, drop the *Bate*, and return to my subject.

Referring to your Columns, I find it to be four months since the Chamber of Commerce, was in full force: and if it were only three months, or thereabout, as you erroneously state, surely one act per mensem, towards effecting improvement, is not too much for any reasonable member to expect. It is not absolutely necessary, that the Committee should go on cackling, for nine months, before they bring forth a mouse. Why, you, it seems, Mr. Editor have in far less time ferreted forth a rat! and if you really be made a cats paw of as your Cotemporary informs us, let me entreat you not to put cat's paw claws, when you play with him, but pet him kindly, for he is an old pet with many of us. But I am straying from my discourse, and here goes again. Look at our Singapore neighbours for example; they go about their business in right earnest: for no sooner is the formation of their Chamber of Commerce announced, than we see its first act recorded, highly to its credit.

The attempt, to which I have referred, to obtain the removal of the arbitrary restrictions upon the exportation of silk, did not originate with the Chamber of Commerce, (as all events I have not seen it on record) but it ought; it is not however too late, and the Hoppo might be informed that silk, notwithstanding those restrictions, finds its way from this, to the full extent of the demand, encumbered to be sure with some additional expence on the cost to ourselves, but without benefiting the celestially concerned one cash; which I think, would command some consideration, seeing that the charge of double duty can at all times be legitimately evaded, under the law of country ships &c.

I do not suppose with you, that any such question would arise as you imagine, upon the departure of those gentlemen prescribed under the Black act; it is not required that their departure should turn out, or that they should be packed higgledy piggledy with every Johnny Newcome, who for the first time alights in Canton, without *faithful* recollection of the smell of it's mud. It is intended, I am sure, that a sufficient space should be allotted for the accommodation of all foreigners resorting to this port for commercial purposes, and the addenda which have already been made to our community since the opening of the trade, afford reasonable grounds for taking a further grant. Lee Minqua's Hong be the spot aimed at.

Although the clearance of the various nuisances, in the front of the Factories, would be desirable to all, I would rather see the Co-hong finally cleansed of it's impurities; much remains yet to be done by the Committee towards setting our trade upon a surer and firmer basis than has recently existed, and I conceive it to be a duty within its province.

In saying that I *complain* of the expense, (of the Secretary's establishment I as pose you mean) you are quite at fault, I merely expressed a doubt as to the finances now, and in prospect, (unless the members be greatly multiplied) being able to meet those; you may perhaps enlighten me upon other sources, from whence they are likely to spring, than the subscription; the printed list of subscribers is the only data I go upon, taking it as very possible, that the items of arbitration fees, and voluntary contributions, will, upon reference to the records, respond *nihil*.

I am an advocate for a well paid Secretary; "the labourer is worthy of his hire," (mangre this may meet his eye, in fretful mood) and if he has not hitherto had sufficient employment, the fault, I can safely say, rests not with him, but the source from whence his duties should emanate, the Committee, who should "teach the young idea how to shoot."

Now the first thing that a stranger would ask for, upon calling at the Secretarys office, would be, not unlikely, a scale of rates and commissions, by which the Commercial Community are governed. "I wish he may get it." I cannot, nor any body else; he would most probably be referred to that in the Anglo Chinese Calender, page 62 and 63, agreed upon in 1793, and confirmed as we are told in 1831! Oh says he, this is coming Joe Miller over me! for nobody abides by this now a days; this is true enough, for each house adopts its own rates. I have no objection to such practice, yet still I think upon the formation of a Chamber of Commerce, a scale should have been framed upon the principle, that if any charge was brought under the cognizance of the committee of arbitration, it should be a record of reference, to govern it in its decision. Mr. A. for instance, on the committee of arbitration, who charges ½ per cent only on sales, would not willingly award Mr. B. 5 per cent, unless he were borne out in doing so by an act of more recent date than that of 1831; there we are all alike perplexed. One correspondent writes, "your commissions are too high," without at the same time offering to lower his own; another says, "we see some invoices upon which there is no charge at all;" this may be, and is, I know, in peculiar cases, where there are no bounds to liberality and to which I can bear full testimony; but was there ever such a flagrant breach upon the understanding, as to suppose people would exist in Canton, and do business for nothing? it is perhaps imagined by those subsist-

rics, that we revel in celestial beneficence and that the Chinese find us in factories and chow-chow, free of crimpage. One more word, and I will conclude;—a petition was sent in to the Hoppo and Vice-Roy some time ago by one of the most respectable houses, complaining of the taxes, and the manner in which the duties were levied on cotton, and woollen manufactures; the result was that a new classification of qualities of cotton (only) followed to our advantage; this was gaining something, but the petitioners having obtained in part the object sought, did not try the Vice Roy on t'other tack, "the woollen question" which they should have done, whilst he was in the humour for it; for upon the whole, his reply might be considered favorable; no one else took the subject up, and we go on paying various rates of duties upon woollens as heretofore, completely at the mercy of the hong merchants and linguists. Now I consider that it ought to be the unceasing endeavour of the Committee to obtain, by petitioning, an authenticated scale of duties upon every article of import and export, (to be paid by the hong merchants) so that we may have every thing fair and above board, when there will be no more squabbling between the consignees of ships and goods.

Since writing the above, I find that the committees have been more active of late, and I perceive that they have many important questions now under discussion, which there is little doubt they will soon bring to a crisis, satisfactory to their constituents. I wish them every success and am

Dear Mr. Editor,
Your's truly,
English O, and

A MEMBER OF THE CHAMBER OF COMMERCE.

Dear Mr. Editor.—I fully intended that the foregoing letter should have been handed in to you in time for your last paper, but for certain good reasons, it was withheld; since reading your Cotemporary's Editorial of yesterday however, I have altered my purpose, and if you think proper, you may now give it insertion in your next.

*Remember* me in your answer to the Register in the politest possible manner, whose writer sticks so pertinaciously to histext on the "big Irish O," with this assurance, that both *he* and "the many more," have been put on the wrong scent. May they not have been bamboozled by some wag giving out that Mr. Onega was the writer of the letter in dispute? a tongue tipped with a bit of the brogue, would give it a very Irish sound at all events, furnishing at the same time, food for conjecture, whereby they have "placed the saddle on the wrong horse."

Your Brother Editor, I am sure, ought to be infinitely obliged to me, for the pains I have been at in discovering to him the mistake which he has so long laboured under and when he returns his thanks I only hope he will doit handsomely.

Your's truly,
O.

Canton, 26th April, 1837.

## TO THE EDITOR OF THE CANTON PRESS,

Dear Sir,—From a letter signed O, in the Canton Press of 15th Inst. headed "General Chamber of Commerce" I regret to observe that this Correspondent seems to be a little too severe in his remarks, regarding that association. It is no doubt certain, that as yet they have done little good; but as the eyes of the commercial community here, as well as that of India, are upon them, I have no doubt, but the members will exert themselves, to accomplish what they have taken in hand, viz, to protect the general interests of the foreign trade with China.

My object in addressing you at this time, is for the purpose of calling your attention to another subject, said to have been taken up by the Chamber of Commerce early after its formation;—that was, to request permission from the authorities of Canton, to remove the filth and dirt, collected in the square, in front of the Factory; by this means contributing as much as in their power, towards preserving the health of European residents here.—Allow me to ask you, has any motion been made in the Chamber for this purpose, or has any step been taken to get the nuisance removed, if not, it is high time that it be done, and done quickly—I would not be surprised in the event of a flood taking place that some epidemic may breake out in consequence of the filthy state of the square, and then when perhaps too late, the chamber may think of bestirring themselves.

Approach this square from any quarter, and your olfactory nerves must be dormant indeed, if the effect be not instantaneous. The walls on the east and west, smell as if contagion was in every corner; and when your steps are directed towards the little border, even this spot cannot be approached, without wading through a considerable quantity of filth, broken bottles &c., actually laid down in heaps, and even approaching to the very centre of the square, and I notice that an additional number of pig styes, and chow-chow houses are in the course of being erected.—If the Chinese are allowed to go on in this manner, in six months hence I would not be surprised to see a range of pig styes put up in front of the Imperial Hong.

From the disgraceful manner in which Captain Grant was maltreated and robbed a few days ago, while peaceably walking on the other side of the river it is very evident that no "foreigner is safe to go beyond the walls of the Factory," and as this said square is the only spot allowed us, for the purpose of enjoying healthful exercise, in God's name, let it be kept in such a state, as we can resort to it.

If some decided step is not taken for the total removal of the nuisance, before the setting in of the hot weather, I am much afraid that we may all have reason to repent of our negligence.

There is one remedy, that I would suggest, but before doing so, perhaps you will be kind enough to intimate through your paper, whether or not the Chamber of Commerce has done any thing in the matter.

I am Dear Sir,
Your most Obedient Servant,
JOS. SCLATTER.

Canton, 25th April, 1837.

CIRCULAR TO THE RESIDENTS IN CANTON, INVITING DONATIONS TO THE LIBRARY OF THE MORRISON EDUCATION SOCIETY.

About 2000 Volumes of Books are already in the Library of the Morrison Education Society; and, according to the Constitution of the Society, the Trustees wish to make the Library available to the Public, and as extensive as possible.

The object of this Circular is to solicit donations, in books or money, for the increase of the Library; in order to extend its benefits.

A Subscription of $10 by any individual, not a member of the Society, will admit him to the privileges of the Library for the year, or $5 for a half year, or any shorter period, according to the accompanying rules. (*See below.*)

The Library will be opened in about three weeks from this date.

By order of the Trustees
E. C. BRIDGMAN.

Canton, April 24th, 1837.

## REGULATIONS FOR THE LIBRARY OF THE MORRISON EDUCATION SOCIETY. 1837.

1. That all the books, labeled and numbered, be arranged in cases in some convenient room connected with the factories, and entrusted to a Librarian, under the care of the Recording Secretary.

2. That no book be taken from the Library without an order, signed by the person wishing to take it, specifiying the number of the book, and the time of drawing it. N. B. Printed orders will be furnished with the catalogues to all who have access to the Library: an order at any time between 10 A. M. and 5 P. M., may be sent to the librarian, who will immediately deliver the book and retain the order, which order should be given back by the librarian when the book is returned to him.

3. That no single volume be retained more than half a month, nor any book of 2 or more volumes, more than 1 month; but that any book returned at the expiration of the limited period may, if not called for by any other party, be ag in taken out.

4. That any book lost or injured be paid for or replaced by the person by whom it is lost or injured, the value to be determined by the tru-tees.

5. That any person who is not a member of the Society, may be admitted to the privileges of the library, by the payment of $ 10 per annum, or of $ 5 for six months or any shorter period.

6. That all donations of money to the library be applied to its improvement and increase, in the purchase of books, &c.

N. B. The Trustees think it unnecessary, for the present, to multiply the rules of the Library—believing that every individual who has access to it, will desire to increase and preserve it, and render it as serviceable as possible. Many of the works now in the Library are chiefly valuable as books of reference, which it is desirable should not be removed from the Library, except in special cases. The number of books drawn by any one individual at one time, therefore, should always be determined with proper regard to general convenience. In case of new books, it will be desirable that they be speedily returned; and when more than one application for them is made, priority in time of drawing must be determined according to priority in the time of making application. The catalogues may be revised, and the list added to, as often as the receipt of books shall make it desirable.

## THE HING-TAE HONG.

TO HIS EXCELLENCY,

THE GOVERNOR OF THE PROVINCES KWANG-TUNG AND KWANG-SE, &c. &c.

A respectful adress. Having come to Canton for commercial purposes, we found that the Regulations allowed us to transact business with no one but the Hong-merchants.—Hing tae is a member of the Co-hong, and judging him from all appearance to be in secure circumstances, we sold our goods to him—and he is now indebted in the large amount of a million and upwards of Dollars—which he is unable to pay.

It is out of the power of the foreigners to obtain information regarding the internal affairs of this country, and of the proceedings and dealings of the Hong-merchants with their own country-men, but as they are specially appointed by the Government to conduct the foreign trade, we are induced to place every confidence in their stability and honor.

Under these circumstances we have to request that your Excellency will be pleased to order an early payment of our debts of the Co-hong in such manner as your Excellency may deem fit.

We have the honor to be—Your Excellency's, Most Obedient humble Servants.

ANSWER FROM THE GOVERNOR to the address of Messrs Dent and others in regard to the affairs of Hing tae Hong.

Tang, Governor of Kwang-tung and Kwang-se issues this order to the Hong merchants, requiring them to be fully informed thereon.

On the 21st of April I received from the English and other merchants, Dent and others the following address. (*see above*)

This having come before me, the Governor, I have examined the subject, and find, that heretofore Hong merchants have always been forbidden to incur debts to foreigners, and that in repeated instances on record they have been severely punished for so doing. And with regard to Yeu Khechang, of the Hong Hing-tae, he has been in the situation of Hong merchant barely seven years, and has he in so short a time accumulated debts to the large amount of a million and upwards of dollars? What degree of bad management must it have been that could run to this extent! The thing is too absurd—too extravagant!

If this matter be not faithfully and completely settled, where will be our compassion to foreigners, and how shall we prevent similar and even worse conduct in future? I issue, therefore, this order. When it reaches the said senior Hong merchants, let them, in obedience to it, immediately convene a meeting of all the Hong merchants and examine the accounts of Hing-tae, to ascertain clearly what are the real sums owing by that Hong to foreigners; and let them equitably and earnestly apply themselves to make some arrangement for the settlement thereof. Within ten days let them present a joint report on the subject, for my consideration. If they dare to regard this lightly or to delay and overstep the period, I the Governor will maintain the laws firmly as the solid mountains and will assuredly direct the district magistrate to close the Hing-tai Hong and according to the law, apprehend the merchant, that he may be closely examined and punished. At the same time the said Senior merchants, together with all the other Hong merchants, shall alone be held responsible. The property of the foreigners cannot be left without an ultimate guarantee for it's safety.

Let these commands also be enjoined on the foreign merchants, that they, knowing them, may act accordingly. These are the commands.

Taou-kwang, 13th year, 3rd month, 19th day,
(23rd April 1837.)

Translated from the chinese by *J. R. Morrison Esq.*

# CANTON PRESS,

April 29th 1837.

It is unwillingly that we are again drawn out to attend to the lucubrations of our Cotemporary yet more than we have already done. In our last we thought that the wordy war was at an end, but as the Register has, in a somewhat unaccustomed manner, accused us of duplicity, we feel it our duty to explain to our subscribers, not to him.

The fact as to the letter "O" is plainly as we have stated it; the party obnoxious to the Editor of the Register has neither written it in part or wholly, nor dictated it in plain fact as we said he had no concern with it in manuscript or in print, and we believe that the word of the actual writer, a member of the Chamber, is good for more than this.

As to the "cuttlefish" we have enquired, and find that the party attacked wrote to a private friend saying that he had spoken to us in private conversation, of the resemblance which the arguments of the Register bore to the retreat of such a fish, and that we might have from that drawn the simile. This is perfectly true, this was the origin of an idea which was it seems so apposite and irritating, as to rouse our Cotemporary to that last refuge, *personal abuse*, and that too in ignorance of the propriety of his "suspicions."

Of his suspicions as to ourselves we are indifferent. The candidates to the office of Secretary for the Chamber of Commerce were the actual Secretary, the Editor of the Canton Register and ourselves. The votes were, for the party elected, six, for us, five, and for the Editor of the Register none. Does he fancy the "grapes" sour to us from the taste that he had of them?

Our Cotemporary has, we fancy, read or heard of the Machiavelian system in these matters. "Bear in mind that no adversary is proof against abuse or personal attack; as a weapon this is invincible. He may be innocent, virtuous, no matter, what you charge on him, may be your own in conduct or morality; whether a murderer or every thing that is foul yourself, care not, only be you the *first* to attack; let your attack be on his private character, there all men are vulnerable; be constant, firm, and bold, ply your charges, not one in fifty, who hears it will see or care for the defence; hit him he may defend himself, but he is wounded, he may disprove your assertion, but the barb is in his flesh; only do you attack, no matter, how, where, or why, attack but a man's private character and he is your's. Defence is vain, escape impossible. He is your's."

On this supposition alone can we account for our Cotemporary's warding off our charge of apostacy on him, by his attack of a friend of ours, who he allows he is not friendly with, for so we construe our Cotempory's last.

We again repeat that we are the sole Editor, one, responsible no legion but one individual. We are determined to act on the course we have adopted as long at the least as the support, we are proud and grateful to say we have experienced, is extended to us. Fifteen months ago, when we took this paper, it's circulation was not 120 now it is 300. Is this the secret of our Cotemporary's jealousy? It may be so, but we cannot help it. *Sic vesle* we have no guides, no directors, no comors, no proof-sheets to expose, and so long as we are deemed worthy of this confidence by the proprietors of this paper and the public, so long and no longer do we hope to be entrusted with it's management.

If our remarks may appear strong, we beg our readers to remember the provocation, ourselves attacked, others outraged in consequence of a mere chance and private acquaintance with us. We have acted throughout moderately as we believe in our Editorial career, preferring at all times not to hurt private feeling, to the gratification of our own personal pride. To our brother Editor we may say: Go thou and do likewise!

But amidst all the abuse, where is the answer to our plain questions?

We cannot quit this without again apologising to our readers for this which we are aware must be unpleasant to parties uninterested. It is not over-pleasant to ourselves, and we hope that we shall not again be dragged into it as we have been. We shall prefer to leave the thing to be decided by the opinion of the public, according to the character which the two papers have gained. By the publication of vituperation and abuse, we should annoy as we think, if not disgust, the public, render ourselves contemptible in our own eyes and those of our friends, while on the other hand we should only reap the satisfaction perhaps of thinking that we had insulted or annoyed individuals. The Editor of the Register may of course have his creed as to these things; this is ours.

By the *Psyche* from Calcutta 13th March, and Singapore 6th April, we have received some Calcutta papers and the Singapore *Free Press* of the 6th April. From both we give a few short extracts. Opium in Calcutta had fallen to 1550 Rupees per Chest for Patna, and but little inclination to purchase, but we fear that the expected arrival of the *Antonio Pereira* there, will cause prices to rise again much beyond what the present state of the market here justifies.

We hear that owing to some seizure of Cambleas at or near Lintin, the smuggling boats are again inactive, and but few deliveries of Opium have taken place within the last four or five days. It is said that the Hoppo, dissatisfied with his share of the fees on Opium, raises difficulties to the trade.

Some five Chests of Malwa Opium, belonging to a Tea-merchant were seized by some mandarins about a fortnight ago, and the luckless merchant had, beyond the loss of his Opium, to pay about $ 200 for the boat in which it was found, to avoid being brought before the authorities. The Custom house officers thus obtained the value of about $ 3,200 as their own undivided spoil.

*Walking Exercise.*—We are sorry to hear that the only means of pedestrian exercise in Canton likely to be interfered with. One or two late parties out walking on Honan have been maltreated by the Chinese mob, and in one case a watch was stolen. The Chinese not only make use of their vast numbers to oppress by brutal strength, but when investigation takes place (in such Courts as do exist) they produce the most depraved false evidence.

Howqua in Canton countenances and reports a false statement of the affair with the object of rendering it *not* imperative on the local government to give redress.

So situated walks on Honan cease to be a matter of prudence except in large parties which course is recommended.—

We beg to call the attention of our readers to the Circular published in another colum of the Secretary of the Morrison Education Society, to which library is annexed, which now already contains upwards of 2000 volumes, many of them valuable to the scholar, and the student of Asiatic history. We believe that this library contains all the books that could be collected of the Company's library, a great part of which it is to be regretted have been scattered about, by their division among the members of the Factory after that establishment was discontinued. Several of these members have however generously bestowed their shares to this library, and they now form a nucleus for the accumulation of a great literary treasure, and we hope that the call now made upon the Canton community will not be unresponded to. The sum proposed to be subscribed at $10 per annum is very small, we should say inadequate towards the maintenance of this establishment, unless the members of our community come forward with their accustomed liberality to support it. We are aware that two book-clubs exist here, which are well supplied with the newest publications from Europe; could not some arrangements be entered into to render their supplies available to the general library also? We throw out this hint, that our neighbours may take the subject into consideration, and that some plan may be proposed to obtain the object desired. The library is at present in a ground-floor room in No. 2 of the Creek-hong, which has been appropriated to it's reception, and we doubt not that our readers, on inspecting the well filled shelves, will become desirous of supporting as much as in them lays, an institution from which not only much benefit, but also much credit may be derived to the Canton community.

Our readers will find another communication from our correspondent "O" now signing himself, to avoid misapprehension, and to certify his identity, the English O. Many of the points to which he alludes, as far as regards the Committee of the Chamber of Commerce, are now under consideration, and we doubt not that we shall soon be able to lay before the public the results of the Committee's labors. Want of space prevents us taking fuller notice of O's letter, to which we may recur next week, premising that, though we do not agree in toto with our correspondent, we yet thought his communication well worth the publishing, and that we shall be glad to hear from him again.

Our Correspondent "Mr. Jos Sclatter," points out to us the nuisance existing in front of the Factories, from dirt and rubbish of all kinds being accumulated there. We do not remember to have seen on the records of the Chamber of Commere, that any attempts have been made by the Committee to abate this nuisance, though we must confess, that we did not turn over the records to ascertain whether our memory serves us rightly. We regret that our correspondent did not, without waiting another week, make known to us and the world the remedy which he has in store for us to correct the evil.

The *Horatio* from Newyork 23d. December has arrived, but we have not heard that she brings any news of interest, except that the Patent Office in Washinton was totally destroyed by fire.

The *Rose* left the *United States* on the 19th November, took in, or discharged a cargo in Lima, stopped three days at the Sandwich Islands, and has now arrival here, after one of the quickest passages, we believe, ever accomplished.

The weather during the past week has been more favorable, though we have had rain at times. The tides in the early part of the week rose to a great height, and we hear that not far from Whampoa several houses have been swept away by them, by which some lives were lost. The rice-crop will be much retarded by these heavy rains, which have, where the paddy had been already planted, destroyed it, so as to make a second sowing and planting necessary.

We publish in another column the representation to the Viceroy, relating to the Hing-tae Hong, and that officer's answer, in consequence of which the Hong-merchants have required the foreign merchants to give in a statement of their accounts with Hing-tae.

WE beg to announce, that MR. HENRY ALEXANDER DOUGLAS, MR. SAMUEL ANDERSON, and MR. JOHN ANDERSON, composing the Firm of DOUGLAS, ANDERSON & Co. of London, have been partners in our establishment since it's formation in August of last year, and that we have this day admitted MR. HENRY RITCHIE into partnership.

DOUGLAS BROTHERS & Co.

Batavia, 1st March, 1837.

WE beg to announce, that we have admitted MR. WALTER SCOTT LORRAIN, a partner in our establishments, here, Singapore, and Canton, and that the house at Singapore will be conducted by him under the name of DOUGLAS, LORRAIN & Co.

DOUGLAS BROTHERS & Co.

Batavia, 14th March, 1837.

WITH REFERENCE to the above advertisements, our establishment here will be conducted from this date, under the firm of DOUGLAS, RITCHIE & Co.

## *SHIPPING INTELLIGENCE.*

ARRIVED.—American *Horatio*, Howland, from New York December 22d. *Samarang*, Meacom, from Java. Dutch *Omega*, Wallace, from Singapore. Brit. *Lady Nugent*, Fawcett, from Java. *Psyche*, Kennedy, from Calcutta, March 12th *Rose*, ——, from Lima and Sandwich Islands.

PASSENGERS.—*Psyche*, Mr. Jas Tait, *Horatio*, Mr. Fessenden.

SAILED OR DESPATCHED.—Brit *David Clarke*, Hutchinson, for Singapore. *Sulimany*, Mac Farlane, Stewart, and *Sir Charles Malcolm*, Lyon, for Bombay. Amer. *Hope*, Norman, for New york. Brit. *Falcon*, Middlemist, for London. *Asia*, Cole, for Batavia. Port. *Cesar*, Ramos, for Singapore.

PASSENGER.—*Hope*, Mr. C. J. Hunt.

The *Lord Lowther* and *Asia* are under despatch for London on Monday next, the 1st of May.

The *Balcarras, Caledonia, Lowjee Family*, and *Glencig* had arrived at Bombay, the former on the 7th February after a passage of only 32 days.

The *Good Success* was to leave Bombay on about the 5th of March, the *Hannah* by the middle and the *Helen* by the end of that month. A new ship destined for the China trade, the *Shah Alum* had been launched at Cochin.

The *Sylph* from Calcutta only goes to Singapore, where the *Bencoolen* had arrived when the *Psyche* left.

The shipping formerly at Lintin has now moved to Tung-ku bar, not far from Cap-sing-moon. We understand that the Amer. Ship *Horatio*, on her arrival not finding any ships at Lintin, what is unusual to Cum-sing-moon, where she was boarded by a pilot, who stated that he had orders to take out all ships coming to that station. Many war-junks were lying at anchor at Cum-sing-moon, and fortifications were being erected on shore.

The *John Fleming* is loading, and the *Mary Walker*, and *John Dugdale* are also destined for Great Britain.

LATEST DATES from UNITED STATES and Ports per *Horatio*. CALCUTTA, 12th March per *Psyche*. SINGAPORE, April 8th per *Psyche*. JAVA, 16th March, per *Theodore*. MANILA 20th March, per *Nautilus*. BOMBAY, 20th February via Calcutta.

VESSELS EXPECTED.—From BOMBAY, *Sarah Barry, Cressler, Forrelsdale, Hindoo*. JAVA, *Courrier de Manille, Ann, Manilarbo, Mason*. CALCUTTA, *Heroine, Mary Anne, Thames, Bencoolen*. MANILA *Bombay*. BOMBAY, *Eleanor, Good Success, Hannah, Helen*. MADRAS, *Colconda*.

**N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER.**

**BOATHIRE IS PAID BY THE SELLER.**

NOTE. Opium can only be delivered at Lintin &c. where also high prices are obtainable for *Camblets, Saltpetre, Ginseng* and other Goods on which the duties at Whampoa are high.—Ships with *Rice, Cotton &* sometimes discharge at Macao or tranship their Cargoes, at Lintin & to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—See invoices of *Wine, Beer, Pickles &c, Confectionary Stationary, Cutlery, Crockery ware, &c.*, for foreigners consumption, are sold at Auction duty paid.

*Note. Alum*, and *Cassia* are procurable cheaper at Lintin, Macao, &c; as *Raw Silk, Silk* piece goods &c, are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

Note. Above rates are from 20th April to 20th Oct. annually: during remaining 6 months the premiums are somes hat lower. Risks on Blocks are $ 2 per Cent per annum, $ 4½ for 6 months, $ 2½ for 3 months and $ ½ per month.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874756 of a Tl. per cubit.
2nd „ „ „ 1200 do. & under 1600 „ 0.7221091 „ „
3rd „ „ under 1200 do. 0.5063341 „ „

N B. The cubit in 14¼ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products—The largest class pay from $ 43 8 to $ 4320; 2d class from $ 3700 to $ 3720; 3rd class from $ 3700 and under. The Cumshaw or Present Fee is paid by all vessels 16.0 Taels or $ 2223. Linguists fee $ 1734 and Comprador's fees $ 58. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Ricepladen ships are charged only about $ 1300 in lieu of measurement &c.,

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—continue as dull as before, little or nothing doing in them.

COTTON YARN.—without improvement in price or demand, and a large stock.

WOOLLENS.—There is absolutely no sale for either Spanish stripes or Longella, with a heavy stock, and markets in the interior unfavorable.

STRAITS PRODUCE.—TIN and PEPPER continue to decline, as might have been expected under the heavy importations, particularly of the former.

RICE.—The new crop will be considerably retarded by the heavy rain. This renders holders firm, though we cannot report any advance in price as yet.

COTTON.—The advance in the better descriptions of Cotton, which we noticed in our last, has been fully supported, and upwards of 5000 Bales of Tinnevelly have been sold at from 10 a 10.3, and some of superior quality as high we hear as 10.5. a 10.6. Good Surats and Bengals have also improved, the market being so bare of them. The inferior kinds are not in better demand, and holders are anxious to sell before the regular seasons-ships begin to arrive.

OPIUM.—Again, we regret to say, there are reports of the probability of a stoppage of the Opium trade on the river, a smuggling boat with treasure having been seized by some of the petty mandarins, who were parties to the late arrangement. Measures are taking to prevent this business being brought before the higher authorities, but much reliance cannot be placed upon the trade going on uninterruptedly for any length of time together. Under these circumstances our quotations are merely nominal. The clearances in the previous part of the month were good, being up to the 22nd.

Patna, old 825, new, 725; Benares, old, 725, new, 675; Malwa, 1319; Total 1767 Chests, consisting however still principally of Malwa, the Bengal Opium being considered relatively too high.

### EXPORTS.

RAW SILK.—The first crop of Canton Silk is said to have been much injured by the late constant rains.

TEA.—No fine teas of any description are remaining, and our quotations are nearly nominal.

# THE CANTON PRESS.

VOL. 2d. No. 35. CANTON, SATURDAY, MAY, 6th. 1837. No. 87

General Chamber of Commerce
Canton, 1st. May, 1837.

By Order of the Committee
WILLIAM SCOTT.
*Secretary.*

*From the Chinese Repository for April.*

ART VII. *Admonitory pictures, being a series of Chinese paintings representing the rapid career of the opium-smoker, from health and affluence to decrepitude and beggary.* By SUNQUA.

WHILE the preceding article was passing through the press,* our attention was incidentally directed to some paintings by a native artist, in China street, named Sunqua. They are on rice-paper, six in number, forming a series designed to exhibit the progress of the opium-smoker, from health and prosperity to misery and degradation; in fact, they are a counterpart to Hogarth's famous 'Rake's Progress.' So far as we can ascertain, the idea was original with the painter; and regarded as mere works of art, the pictures are by no means unworthy of notice. The figures and attitudes are well conceived and drawn, and the story clearly and strongly carried through. We were surprised to see how exactly some of the pictures "hit off" the character of the opium smoker, as described by the writers in the preceding appendix; and we will not fail to make further inquiries respecting them, and the circumstances which led the painter to form his design. In pursuing their discussion, we wish our Correspondents would endeavor to determine whether *any* use of the drug—except as a medecine—is safe and harmless; and, if it be so, what degrees in the practice of smoking may be taken without doing or suffering wrong; and finally, when it does prove to be injurious, how far the purveyors are responsible. In 1832, seventy-five physicians in Boston, comprising the great body of the profession in that city, signed a declaration, in which they declared it to be their opinion, "that MODERATE HEALTH ARE NEVER *benefitted by the use of ardent spirits, that on the contrary, the use of them is the frequent cause of disease and death.*" Those physicians formed their decision from a great variety of facts and extensive personal observation. So, in the case of opium; evidence is required to show its effects. Whether Sunqua's paintings can be received as evidence, our readers must judge. We thought, at first, of giving a description of each; but, on reflection, we are inclined to think, that his own explanation of them will be more satisfactory than any account of ours.

In addition to these paintings, Sunqua has drawn another series, illustrating "the gambler's career." But though two or three parts, in that series, are well done, the painting, as a whole, is much inferior to the other,—which, taking it all in all, is the most spirited and striking thing we have ever yet seen from the pencil of a Chinese. The following is his own explanation of the six pictures.

ADMONITORY PICTURES.

The son of a gentleman of fortune, his father dying while he was yet but a youth, comes into possession of the whole family estate. The young man having no inclination for either business or books, gives himself up to smoking opium and profligacy. In a little time his whole patrimony is squandered, and he becomes entirely dependent upon the labor of his wife and child for his daily food. Their poverty and misery are extreme.

No. 1. This picture represents the young man at home, richly attired, in perfect health and vigor of youth. An elegant foreign clock stands on a marble table behind him. On his right, is a chest of treasure, gold and silver; and on the left, close by his side, is his personal servant,—and, at a little distance, a man whom he keeps constantly in his employ, preparing the drug for use from the crude articles, purchased and brought to the house.

No. 2. In this, he is reclining on a superb sofa, with a pipe in his mouth, surrounded by courtesans, two of whom are young, in the character of musicians. His money now goes without any regard to its amount.

No. 3. After no very long period of indulgence, his appetite for the drug is insatiable, and his countenance sallow and haggard. Emaciated, shoulders high, teeth naked, face black, dozing from morning to night, he becomes utterly inactive. In this state he sits moping, on a very ordinary couch, with his pipe and other apparatus for smoking, lying by his side. At this moment his wife—or a wife and a concubine—come in; the first, finding the chest emptied of its treasure, stands frowning with astonishment, while the second gazes with wonder at what she sees spread upon the couch.

No. 4. His lands and his houses are now all gone; his couch exchanged for some rough boards, and a ragged matress; his shoes are off his feet; and his face half sorry, as he sits bending forwards, breathing with great difficulty. His wife and child stand before him, poverty stricken, suffering with hunger; the one in anger, having dashed on the floor all his apparatus for smoking, while the little son, unconscious of any harm, is clapping his hands and laughing at the sport! But he heeds not either the one or the other.

No. 5. His poverty and distress are now extreme, though his appetite grows stronger than ever—he is as a dead man. In this plight, he scrapes together a few copper cash, and hurries away to one of the smoking-houses, to buy a little of the scrapings from the pipe of another smoker, to allay his insatiable cravings.

No. 6. Here his character is fixed—a SOT. Seated on a bamboo chair, he is continually swallowing the faces of the drug; so foul that tea is required to wash them down his throat. His wife and child are seated near him, with skains of silk stretched on bamboo reels, from which they are winding it off into balls; thus earning a mere pittance for his and their own support, and dragging out from day to day a miserable existence.

---

### CHINESE LAWS REGARDING THE CHINO—RUSSIAN TRADE AT KIACHTA.

*From Supplement to the 4th, 5th, and 6th, edition of the Encyclopedia Britannica.*

When Lange, who accompanied Ismaeloff, the Russian ambassador, asked permission for his nation to establish factories in all the provinces, the reply of the Emperor was, "I allow you to remain here (Pekin), and other foreigners at Canton, so long as you and they give me no cause of complaint; but if this should ever be the case, I will neither suffer you to remain here, nor them at Canton;"—so very indifferent does the Court affect to be about foreign commerce. In the whole of this extensive empire, there are but two places where the natives have any intercourse with Europeans.—at Canton with the crews of the several maritime powers, and at Kiachta with the Russians; and this intercourse is chiefly confined at the former to a select number of men, appointed or licensed by the government; at the latter it takes place only under special directions of the government itself, through merchants appointed under the seal of the Emperor. Of the instructions given to these merchants, the Russians procured a copy a few years ago, though the punishment for betraying them is condemnation to track the imperial barges for life; and a more singular document was never issued by any government. It confirms all that has been said of the meanness and kindness of this proud and insolent people; and as it has not before now appeared in print, a summary of it may prove amusing and may serve to show, at the same time, the notions entertained by the Chinese with regard to the conduct of foreign commerce.

It sets out by stating that the aim of every nation, trading with other countries is to prevent the advantage being on the side of the foreign nation: to do this the more effectually, and to establish harmony and frankness, "all the letters received by any one of the licensed merchants from the partners, are to be opened in a public assembly, that they may act in concert against the Russians." 2. That as the general principles of commerce require that prices and demands should be foreseen, means must be taken to ascertain what articles the Russians are in want of, and what prices they fetch in Russia: what supplies they may have or expect in the market, and what value they bear in Russian: every one is therefore to strive with all his might to get at this information, and lay it before a general meeting, when the president will give to each merchant a note of the quantities of each article, and of the prices he is to buy at, and of those articles which he is to withhold from the Russians. 3. That the Chinese market is to be kept scantily supplied, and Russian goods not eagerly sought, that the trade may be of importance to them, and the commerce advantageous to China. 4. That care be taken that the quantity of Chinese goods should appear always less than that of the Russians; and that no fresh goods be brought into the market before all the old stock be sold off. 6. That no eagerness be shown in the purchase of Russian goods, how much soever any individual of the merchants may be in want of them, "for the interest of the whole company is not to be sacrificed to that of an individual." 7. That when the Russians have a scanty supply of any article that may be likely to meet with a considerable demand in China, a great eagerness is to be shown to buy up the whole; the Russians are to be told that China is very much in want of the said article, and one merchant is to cut bid the other, and, when bought, they are to divide the quantity among themselves. 8 That the Russians, thus tempted by high prices, and the assurance given them of the great demand, will cause large supplies to be brought to market, when they are to be told that the article is no longer in request in Canton &c. and thus the goods will be obtained at a cheap rate from the foreigners, to the great advantage of the whole nation. 9. Whenever the Russian merchants shall attempt to raise the prices of any commodity in consequence of its scarcity, every obstacle must be thrown in their way for the space of a month, and if they will not lower the prices, the whole trade must be suspended: and if, on complaint of the merchants, the Russian Government should interfere, it will not be attended to, and the matter will be, that the commerce between the two nations shall cease. The 10th article contains an impudent falsehood—it instructs them not only to tell the Russians that the quantities of the several articles on hand are much less than they really are but that "China does not produce silk and cotton." The 11th article directs them to carry on all their intercourse in the Russian language, which every one engaged in the trade must learn in order to prevent the Russians from seeing the necessity of learning the Chinese language, and, by that means, "of discovering the secrets of the trade or those of the government" by overhearing conversations, &c. The 12th directs them to treat the Russian publicly; permits reciprocal visits; but forbids a Chinese to pass a night in a Russian house; directs, that in those visits each should endeavour to learn something about the affairs of the Russian Government, and according to the importance of the information obtained, will be the value of the reward. The 13th directs, that a new merchant arriving at Maimaichin, is not to do any business for a whole year, but merely to look on and learn the nature of the trade, "for fear he should, by some mis-take break the thread of the whole." The 14th and 15th prohibit gold and silver, manufactured copper and iron from being exchanged, and the introduction of all articles of luxury, of goods manufactured in China, and of wine and spirituous liquors. 16th. "The secrets of our trade in the interior as well as of that on the spot, must not be revealed, that this intercourse may not occasion a rise in their prices, and a fall in ours, and thereby it have our empire and the trade of our subjects ruin." The eight remaining articles prescribe the various punishments for disobedience of the foregoing in-unctions, from a reprimand to that of death. The 23d runs thus: "Whosoever betrays to the Russians the secrets of our commerce in the interior, or the demand for these, the quantity he holds himself, or that others hold at Kiachta, or that may be on the road thither, shall be banished from Kiachta for ever, and be sent to the guilty for three years; but who soever betrays to them *these transactions* verbally, or in either, or by deed, shall be sent to the galleys for life." And by the 25th. "Whoever betrays the secrets of the government which are not to be known by the Russians, shall be beheaded, not, however, without the sanction of the Emperor." We know very little of the value of the trade carried on at this place in this extraordinary manner. It consists chiefly in exchange, on the part of Russia, of furs and various pelts, horses, drugs, &c. for tea, silks, cottons, porcelain, lacquered ware, and some small articles similar to those imported by England. (Penny Cyclopedia.)

The Notes here, which have till now probably met the eyes of few of our readers only, are very curious, as showing the instincts and traditionary spirit of the Chinese Government. The document is so evidently Chinese, that we do not for a moment doubt it's authenticity. It is very probable, that our Hong-merchants in Canton are restricted by similar laws; and it is, we think not difficult to trace their effect in many instances of our commercial intercourse with them.

On reading the 7th and 8th articles for instance, we become at once aware that the Chinese merchants here act on them. We shall of many instances of the kind, which our neighbours must be well aware of, the following. In November last we were told that the article of Tea was very much wanted, and there being then, but a small stock, prices rose from 18 a 19 $ to a very short time as high as 23 a 24 $, and at the same price the remaining stock was bought up by the Chinese. The consequence was the large quantities of this metal were immediately imported from Batavia and Singapore, and price fell as suddenly as they had risen before, and they are now just as low as in November last; if the Chinese in this instance acted upon their Emperor's instructions, their artifice has been very successful, they being enabled to buy the tea at prices which entail on the foreign merchant a serious loss.

We see from these laws also that the Chinese err in their intercourse with the Russians, to make use of the Russian language only; in Canton only English is spoken in our dealings with the Chinese, and as if to corroborate that the law to be found above in the 11th article is also binding in the Chinese here, they are always reluctant to reply in their own language, when addressed in it by foreigners, particularly in presence of other Chinese; when they will either pretend not to understand what has been said to them, or answer in English. The 12th article, where politeness and reciprocal visits, though with certain restrictions, are recommended, seems to be acted on by our Hong-merchants, with the exception that they care very little about foreign news or foreign governments, and are not accused of any wish to acquire a knowledge of things beyond the seas.

The 14th and 15th prohibit gold and silver, manufactured copper and iron to be exchanged. This is also the law in Canton, no metals of any kind being allowed to be exported, with the exception of Spanish dollars under certain circumstances.

On the 16th article our Chinese merchants also seem to act, and to this command ought we probably to attribute that, though we have had commercial relations with China during several centuries, very little or nothing is accurately known about the internal resources of the country. This is not from want of enquiry made by foreigners, whose questions on the subject are invariably met with evasion, which has led many to suppose that the Hong merchants were nearly as ignorant of their country as ourselves. This with many may be the case; but others again must be well informed, but the jealousy and avarice of their Government prevent communication.

From these coincidences the laws regulating the trade at Kiachta, and the practice observed in Canton, it appears to be evident, that here as well as in Tartary, the Chinese merchants in their dealings

---

* *On Opium.*

with foreigners are governed by regulations which like all other acts of the Chinese Government betray it's hostility to, and jealousy of, foreign nations.

### WALSH'S CONSTANTINOPLE.

*The Ambassador Lord Strangford's reception at the Sublime Porte.*

Under the tree our names were called, and a second set of pelisses were here distributed to us. Bits of paper stuck on them marked for whom they were intended. Mine was labelled Dosherrvatch, the nearest approximation a Turk could make to my name. There were present, besides the members of the embassy and Levant Company, several English gentlemen on their travels. Those who had seen the Sultan before lent their pelisses to those who had not, as no person could be admitted to the presence without one. In this way eighteen of us were dressed up, and waited under the tree for orders. By-and-by the approach of the Vizir was announced, proceeding from the Divan to the presence, with the Captain Pasha, Reis Effendi, and other officers; a lane of attendants was made for them across the garden, and in their way they passed close by us, but took no more notice of us than if we were jugglers dressed up and waiting to exhibit before their master. In about half an hour it was notified that we should come forward, and we advanced to the gate of the Seraglio, or rather the Harem.

This gate was decorated with the most gorgeous display of Turkish sculpture:—it was covered by a large semicircular projecting canopy, supported on pilars richly carved, gilt and embossed, in a style of architecture perfectly Oriental; round the entrance were several officers in their richest dresses—some in stuffs shot with gold, which, as they moved, were quite dazzling; but those which struck us most were the unfortunate eunuchs. Some of these creatures were boys, or young men from sixteen to twenty. They were tall, bloated, and disproportioned; their countenances were of a sickly, sallow hue, with a delicate, hectic-looking flush, and an expression of extreme anguish and anxiety, as if they suffered pain, and laboured under a deep sense of degradation. One old man was wrinkled and pallid, his face perfectly smooth, and resembling that of an aged woman, except only that it had an expression of strange and unnatural. They were all dressed in green satin robes. Among them were many blacks, who did not look so disfigured as the whites, probably because the change of their features was not so conspicuous.

While I stood gazing on these things in a kind of absorption of mind, I was roused by being suddenly seized by the collar by two men, one at each side of me. I now saw that each of the party was caught in the same manner; and in this way we were hurried, or rather dragged, down a broad descending passage, between rows of guards, to the interior of the harem. Here we found ourselves in a narrow, gloomy court-yard, and suddenly turning to the right, we entered a dark, dismal little chamber, lighted only by one grated window, which opened into the yard. At first I could not clearly discern objects; but in a little time my eyes were accommodated to the dim light. Our party filled one-half of the apartment, the other was occupied by a large throne, exactly resembling in size and shape the gold-fashioned four-post bed without curtains. This was covered with something very like a gay-coloured cotton-quilt, but it was a rich stuff, embroidered with dull gold and pearls. On the side of this, with his feet hanging down, sat the Sultan, exactly in the attitude of a man getting out of bed in the morning. I mention this, because the Turks on state-occasions always sit with their legs hanging, but on others crosslegged. Next to him, standing stiff, with his back to the wall, was the Vizir, and next to him the Capudan Pasha; they both were sycophantic statues, with their eyes riveted on the ground. Our party formed a kind of irregular semicircle across the room, and half round the bed; in our front stood the Ambassador with his Dragoman, and that of the Porte.

The Sultan appeared a tall, ill made, mean-looking man, about forty. His countenance is as dark as mahogany; his beard very full, and as black and glossy as jet—it is said he uses artificial means to colour it. He is remarkable for the smallness of his hands and the length of his body; the latter being that of a man exceeding six feet in stature, though his is not more than five feet seven or eight inches. He looks always to most advantage sitting, and in fact he is seldom seen by strangers in any other position. His dress was a dark, dingy red robe, and we thought there appeared nothing brilliant about him. He never turned his head, which he kept straight forward as immovable as if it was fixed in a vice; but his eye was continually rolling, and the white of it, something like the colour of white glass, gleaming out now and then under his shaggy brow. Sometimes he glanced sideways at us, gave him, I thought, a most demon-like expression, according well with the cruel character I had heard of the man, the melancholy state of the country, and the gloomy cell in which he received us. The speech of the Ambassador, expressing a desire on the part of his Britannic Majesty to continue the ties of amity and good will between the two powers, was translated to the Sultan by his trembling dragoman; and after a short pause he replied, in a low, but firm, haughty tone, addressing himself apparently to the Vizir, who repeated the speech very loudly and hesitatingly to the dragoman, who stammered it out in French to the Ambassador. This unfortunate dragoman's name was Stavrak Oglou, not a Greek of the Fanal, but a native of Caramania. He was a tall, cadaverous-looking person, and could not conceal the extraordinary impression of terror under which he laboured. He stood next me, and trembled so exceeding ly as quite to shake me as well as himself, and his nerves were so agitated that he could scarcely see to read the paper he held, which was blotted with large drops of perspiration dropping from his forehead, and more than once nearly fell from his hand. The man had some reason: his predecessor had just been executed, and he had no hope he should escape the same fate. In a very short time he was deposed and banished to Natolia, and a few days after his arrival was found assassinated at his own door.

Our interview did not take up ten minutes, and the moment the last word was out of his mouth, we were all, without the slightest previous notice, dragged suddenly back by our conductors, whose grip never left our necks a moment. In stumbling backwards, I trod on the tail of my gown, and was well nigh prostrating myself without intending it. The purpose of this ruddeness was, to prevent our turning our backs on the Sultan, as we retired from his presence. When we reached the door of the chamber, however, we were twirled about, hurried up the passage with the same precipitation as we were hurried down, and when arrived at the outside clung off by our conductors, like things by whose touch they felt contaminated. The origin of this practice is a subject of controversy. The French writers assert that an attempt was made on the life of Amurath II. at an audience, by a Croat, in revenge for the death of Mark, the Despot of Servia; and ever since all persons admitted are held fast by the arms while they remain in the presence; and this is the account also of Busbequius, who was himself so treated*. Others deny this origin, and say that it is merely a token of respect shown by a great man, that you are supported in his presence by his attendants. You will form your own conclusion, it is certain no possible disrespect was intended at our interview; but, on the contrary, it was meant to show us every mark of attention and good will, and it was evinced by many little circumstances. The persons who conducted us were men of rank, and dressed in pelisses of honour; yet those who had hold of me and others griped us sometimes very hard, and when we were able to speak, each of us might truly say in the words of Hamlet, "I pray thee take thy fingers from my throat." The janissaries were disposed to be very insolent, thrusting their sticks between the legs of the gentlemen to throw them down, and showing other marks of contempt and ill will. This was far, however, from being generally the case; on the contrary, the naqus "larilesi" seemed to procure for us attention and good will.

We now proceeded to the second gate, where we were obliged to wait till the Vizir and the Pashas passed out; and in the meantime the janissaries were dispersing in groups, every man with a bag of money on his shoulder. At length we were liberated, and, mounting our horses, we arrived at Pera at four o'clock, after thirteen hours' fagging, during a part of which we were perspiring under a burning sun in fur pelisses. We all dined, including his Excellency, with the Consul-General, when the events of the day afforded us much amusement.

I have given you a faithful detail of this interview, even to prolixity, because, though it has been often described by others, it was so novel and curious to myself, and you wish me to omit nothing that strikes me as characteristic of the country. It is one of the many existing proofs which I have mentioned of the stubborn immutability of the people, who have now been for four centuries in Europe, and in constant and immediate contact with its usages, and they have not yet adopted one of them to ameliorate their own. It is not impossible, however, that this, in all its details, will be the last upon record of such an introduction of the representative of one great sovereign to another. Already has European light begun to dawn even on Turkey, and the march of mind to make inroads on the venerable ignorance of this people; the future audiences, therefore, will be more assimilated to those of European nations. Notwithstanding the coarseness, barbarism, brutality, and contemptuous assumption which this displayed, there were many little concessions which marked a degree of favour to the British embassy not generally shown on similar occasions, and which were afterwards talked of as matters of enviable distinction. In fact, it was a kind of epocha that intimated returning tranquility to the capital. As we passed, the windows and doors were crowded with spectators, and all looked upon the pageantic procession as a relief from those incessant scenes of blood and horror that just before had filled the streets.

In the above account of the presentation of the British Ambassador to the Porte, our readers will no doubt find much similarity with that which is given of the attempted introduction of Lord Amherst to the presence of the Emperor of China. Lord Amherst like that Ambassador was seized by several Chinese, and had he not, by his own efforts, succeeded in shaking them off, would like Lord Strangford, have been forced before the Emperor. Perhaps the Chinese did not intend to insult in treating Lord Amherst thus; it may have been that like the Embassy to Turkey, they were treated, as Doctor Walsh tells us, with uncommon distinction, so as to render the reception they met with, envied by the other diplomates; if so, Lord Amherst was wrong not to have allowed himself to be ushered into the presence, having many precedents, by which to be guided, in Turkey. But in Turkey things have now changed, and we are told that matters there are at present conducted in the most approved of European style, a great improvement, and no doubt a source of no little satisfaction to the European Ambassadors resident there. But the Sultan's improvements have not been confined to mere etiquette; this great man's endeavour has been to raise his people in the scale of nations, and Turkish barbarity may probably not much longer continue to be proverbial. May not a similar change take place in China? May not the impulse towards it be given by some clever man, who understanding the relative position of China to the other nations of the Globe, will, like the Turkish Sultan, relinquish the ridiculous pride which held him superior to all the world, and try by real improvement to place himself on a level with those whom he before so wrongly assumed to be his inferiors? Such things may happen in China as elsewhere; the Chinese only want a Peter I. or Sultan Mahmoud, and the impetus once given, we doubt not that in the race of civilization they will distance both Turks and Russians.

* Singuli ut ingressi sumus, ad eum a cubicularibus ejus deducti sumus, brachia nostra tenentibus. Ita quim fert consuetudo ab eo tempore quo Croata quidam, in vindictam domini sui interfecti Marci Despotæ Serviæ, petito colloquio Amuratem occidit.—Busbeq., Epist. i. p. 93.

ACCIDENT AT SEA.—On the 11th ultimo the Ship *Golconda* of 800 tons, Capt. Bell, from Bombay bound to Madras, saw off Point de Galle, the land in sight with a slight breeze from the s. w., a barque laying-to a head. Captain Bell very properly supposing assistance was required, ran up to the barque, which proved to be the *Caledonia* from Bombay bound to Bengal. After exchanging a few words of no importance within hail, it fell calm and the two ships came in contact. The *Caledonia*, being the smaller ship, received considerable damage in her hull about the poop and star-board quarter. By means of a hawser which sprung up, the ships got clear, when Captain Bell sent on board to know if any assistance was required, and having been answered in the negative by the chief mate, the boat returned with Lieutenant and Mrs. Dunbar passengers, who had taken alarm and begged to be received on board the *Golconda*.—*The Bengal Herald Feby. 18th.*

MADRAS.

NOTICE TO NAVIGATORS.—Navigators frequenting the coasts of Coromandel, are aware that there exists at Porto Novo, 10 leagues South of Pondicherry, a smelting furnace, the chimney of which is very lofty and throws out from its summit a light so brilliant as to be taken at times for a lighthouse. They should be cautious of confounding this light with the one at Pondicherry, or by such a mistake they might touch the bank of Coleroon for want of water. At the Northern point of the bank, in four fathoms, the chinney bears W. 30° N. The best way of ascertaining whether they have reached Pondicherry or Porto Novo, is, after they have shaped their course, to stand in boldly to the shore and keep the lead going. To the East and N. E. of the bank, the soundings diminish rapidly, in some places a fathom at a cast. In the neighbourhood of Pondicherry, on the other hand, the soundings diminish gradually and uniformly. The bottom off the Coleroon bank is of sand and good for anchorage, if the sea breeze is not too strong. *Ibid.*

J. TAYLOR, *Opium Agent.*

Bombay, 15th February, 1837.

We hear from Cochin, that, a few days after the launch of the *Shaw Alum*, a large ship intended for the Cotton trade to China, a fire broke out near the ship she had left, which destroyed several smaller vessels on the stocks, and a considerable quantity of naval stores.—*Gazette, February 18th. Calcutta Courier.*

## CORRESPONDENCE.

TO THE EDITOR OF THE CANTON PRESS,

Mr. Editor,—I see the British Flag-staff being erected, and I sincerely hope the person having the right to hoist the Flag thereon, will well consider of his power to obtain respect thereto before he finally takes such a step.

In very few instances has the *native flag* met with dishonor, and the majority of these are confined to China.—It is a venerable and respected rallying point to every truly British heart, and should not be lightly put up unless the Nation is prepared to protect it, and here the ministers of the crown have shewn themselves determined not to do so.

Any one acting as consul for England and doing his duty, will find a better appellation than a flag-hoister.

Your's

1st May, 1837. BRITISH.

THE BRITISH FLAG. *

Again behold, fair floating on the breeze,
Britannia's flag—the sceptre of the seas!
That glorious standard which yet never knew
A stain, from Cressy down to Waterloo,
Under whose shelter wanderers crowd from far;
Freedom's glad beacon, toleration's star,
Shines forth again—proudly my full veins rush
But memory backward points and bids me blush.—
What boots it's place where honor, if disgrace
Yet unatoned hath dyed it in this place?
Who would believe it should historians tell
That tangled in its folds Napoleon fell,
And yet from things that cowards ev'n might scorn
We patiently have ignominy borne—
Not in the battle yielded he his breath
Who rais'd that flag last—honorable death
He did not meet—but goaded, tortur'd, prest,
Smit by disease, his sufferings a jest,
'Twas these he fell, and as death strikes him low,
Behold, who lately trembled, triumph now;
Their savage yells match'd well their disturbed fears
Whose insults rung the last sounds in his ears—
That flag of Britain, lower'd on that day,
Plants, but the shame alas! not wash'd away.

F. S.

Canton, 2nd May, 1837.

## CANTON PRESS,

May 6th 1837.

In consequence of the Governor's reply as to the affairs of the Hing-tae hong, most of the foreign merchants have given in to the Co-hong the details of their claims upon Hing-tae, which altogether are supposed not to fall short of about 26 lacs of dollars. It now remains to be seen, in what manner the Co-hong will propose to pay these debts, or whether they will attempt to deny their responsibility. We have heard it said, but we know not whether on good authority, that the Co-hong contemplate to raise another Consoo-fund by a new tax on the foreign trade, to enable them to pay in annual instalments of 10 per cent. Besides the injustice of thus making the trade for ten years to come, to pay for the losses suffered before, these instalments would be but equal to the intirest of the Capital, which latter would be entirely lost. We hope that our merchants will be able to obtain better terms.

It is reported that two Commissioners are about to be dispatched hither from Peking on momentous but secret, affairs.

The Hoppo of Macao having reduced his fees on Opium from *Fifty* to *Fourteen* dollars per Chest guaranteeing its safety between the Islands, the trade there will doubtless greatly increase, more especially if the dispute now pending with the mandarins here, be not soon settled.

Several robberies were attempted in the Danish hong on the night of tuesday last, by Chinese who had introduced themselves from over the roof the houses. We are sorry to say that in one instance they succeeded in carrying off a watch and some articles of plate, and in another some clothes. In a third house they were detected timely enough to prevent their success.

Our Correspondent "British" notices the British flag having again been hoisted, and wishes that it may not have been put up unless the nation is prepared to protect it. We suppose that the hoisting the Flag was but a necessary consequence of the step H. M. Commissioners have thought proper to take, in coming to Canton under the conditions they have done, a step the wisdom or usefulness of which we cannot discover. A mere British Consul in Canton is all that, under present circumstances, is required, and it must ever remain a matter of regret

* We have given insertion to the above lines sent to us by a correspondent, as commemorating the event of the British Flag being again hoisted in Canton by H. M. Superintendents. All of our readers no doubt are aware of the circumstances under which, now nearly three years back, it was taken down; circumstances have not altered: though former events seem to be forgiven and forgotten.

that the Chinese have so completely got the better of the contest carried on between their own and the British functionaries, about the "*decencies*" of their intercourse with each other.

Capt. Elliot, H. M. Chief Superintendent of trade, left Canton for Macao on the 1st instant.

On Wednesday last was sold by auction a quantity of plate and plated ware, belonging to the former Company's Factory.

Total of Chests of Opium imported since the beginning of this year 11,183½.

It is very remarkable how many misstatements are met with in the writings on China, and their being often found in highly respectable publications, will on that very account be more apt to mislead. Thus we read in the *Companion to the Newspaper* for March 1835, in an article treating of Lord Napier's mission. "As soon as his Lordship's decease was "known, the *Chamber of Commerce named J. F. "Davis*, formerly of the East India Company's "Factory at Canton, to succeed him as chief Superintendent." The writer of that article must suppose the British Chamber vested with extraordinary powers, to appoint any individual to a station conferred by the King himself. The fact of this appointment was, that after Lord Napier's death, Mr. *J. F. Davis*, (not J. T.) the well known Chinese scholar, succeeded to the office of chief Superintendent, being next in rank in the commission to Lord Napier.

In another Number of the same paper, (October 1835) we find a notice of the China trade, and of the encrease of the exports from here under the Free trade, and the writer, to strengthen his argument, publishes the following table of raw silk imported from China into Great Britain.

| | |
|---|---|
| In 1827 .. .. .. .. .. Lbs. | 198,234 |
| 1828 .. .. .. .. .. .. | 212,995 |
| 1829 .. .. .. .. .. .. | 120,970 |
| 1830 .. .. .. .. .. .. | 19,198 |
| 1831 .. .. .. .. .. .. | 5,574 |
| 1832 .. .. .. .. .. .. | 28,105 |
| 1833 .. .. .. .. .. .. | 23,181 |
| and in 1834 .. .. .. .. .. | 562,354 |

Here certainly the first year of the free trade shews a prodigious encrease over the years immediately preceeding, but the statement is very wrong, because, under the Company's monopoly, no ships except their own being allowed to return home from China direct, the quantities of silk stated as imported into England up to the year 1833, are probably those only of the private trade which the Company allowed to the captains and others. Large quantities of silk were during those years shipped from China, but not being able to send them direct they had to be transhipped at Singapore, and are, we suppose entered in the British Custom-house as Singapore silk, and left out in the above statement, where they ought to have been placed. It is very true, that since our trade has been thrown open, the Chinese have brought more silk into the market, and our exports from here are much more considerable now than at any previous time, but the immediate influence of the free-trade has been by no means so great as the *Companion-to-the-News-paper's* statement would lead to believe.

### THE DEMON OF THE TREE.

*Translated for the Canton Press.*

Tsang Hoyuen while at Kwantung saw a man with a light wooden collar round his neck. His curiority being excited, he questioned the man as to his reasons for wearing the collar.

On his repeated solicitations the man related the the following extraordinary circumstance.

"Some years ago my brother and I set out on horseback in search of adventures. At the foot of a high mountain, a little man with a white beard, not more than 3 cubits high and with a turban on his head, came out and stood before us bowing his head to the ground. My brother asked him who he was and what he wanted; but he replied nothing. He now began to breathe on the horses which started back with terror and kept snorting and prancing but would not move from the place. My brother, enraged at this, bent his bow, and shot an arrow at the old man, who immediately fled, pursued by my brother, who not returning for some time I went to search for him. I soon discovered his lifeless body lying under a tree, his neck grown to a gigantic size. Horrified at this dreadful sight, I turned away from the place, but was stopped by the old man who came out of the tree, and began to breathe on me. My neck immediately began to fall to pieces, and I was obliged to clasp it with my hands till I arrived home when I had this collar with iron bands, made which I never can remove last my neck fall to pieces.

I have since discovered that this old man was the demon of the tree whose breath is deadly poison.

## DIED,

At Macao, on 27th December last, after a short illness, aged 34 years, Maria, wife of Captain Thomas Reid, commanding the Ship Lord Amherst.

### OFFICIAL NOTICE.

THE Commanders of British Vessels arriving at Whampoa are requested to call at the Office of the GENERAL CHAMBER OF COMMERCE in Canton for the purpose of filling up a form setting forth the tonnage, number of men, &c. &c. of their respective vessels.

And Commanders of British Vessels arriving at Lintin *and not proposing to proceed to Whampoa* will be pleased to repair on board either of the Ships "JANE" or "HERCULES" for the purpose of filling up the aforesaid forms.

By order of the Superintendents.
EDWARD ELMSLIE.
Secretary and Treasurer.

Canton, 2nd May, 1837.

---

WE beg to announce, that MR. HENRY ALEXANDER DOUGLAS, MR. SAMUEL ANDERSON, and MR. JOHN ANDERSON, composing the Firm of DOUGLAS, ANDERSON & Co. of London, have been partners in our establishment since it's formation in August of last year, and that we have this day admitted MR. HENRY RITCHIE into partnership.

DOUGLAS BROTHERS & Co.

Batavia, 1st March, 1837.

---

WE beg to announce, that we have admitted MR. WALTER SCOTT LORRAIN, a partner in our establishments, here, Singapore, and Canton, and that the house at Singapore will be conducted by him under the name of DOUGLAS, LORRAIN & Co.

DOUGLAS BROTHERS & Co.

Batavia, 14th March, 1837.

---

WITH REFERENCE to the above advertisements, our establishment here will be conducted from this date, under the firm of DOUGLAS, RITCHIE & Co.

DOUGLAS BROTHERS & Co.

Canton, 24th April, 1837.

---

### OFFICIAL NOTICE.

THE Commanders of English Ships requiring hands are requested to apply to the Undersigned. Good and steady Seamen can be recommended, and arrangements will be made for their conveyance to Lintin or Whampoa as the case may be, free of expense to the Ships.

EDWARD ELMSLIE.
Secretary and Treasurer to the Superintendents.

Macao, 4th April, 1837.
N. B. Please to write the words "Application for Seamen" on the envelope.

---

NOTICE.—The undersigned have established themselves in this place, as Merchants and General Agents, in connection with Messrs. JOHN BIBBY & Sons, Liverpool, Messrs. FREDERICK HUTH & Co. London, and Messrs. EDMOND BIBBY & Co. Bombay.

BIBBY, ADAM & Co.

Canton, 5 Danish Hong, 1st April 1837.

---

NOTICE.—The undersigned have this day commenced business as general Agents and Commission Merchants under the firm of POLLEXFEN, MILNE & Co

GEORGE POLLEXFEN.
JOHN MILNE.
J. M. MACDONALD.

Bombay, 14th October, 1836.

---

NOTICE.—The business hitherto carried on by the undersigned will from this date be conducted by CHARLES MARKWICK,—At No. 3 Imperial Hong.

ROBERT EDWARDS.

Canton, 1st April, 1837.

---

NOTICE.—Referring to the above advertisement I beg leave to solicit from my friends and the Public, a continuance of the Patronage that has heretofore been given to the Auctioneering and Warehouse Keeping, of the late establishment of Mr. ROBERT EDWARDS. No. 3 Imperial Hong.

CHARLES MARKWICK.

Canton, April 1st, 1837.

---

### CANTON GENERAL CHAMBER OF COMMERCE.

The office and Records of the Chamber are open to the members every day excepting Sundays; and the Secretary will be in attendance from 12 till 3 o' Clock.

By order of the Committee,
WILLIAM SCOTT.
*Secretary.*

Canton General Chamber of Commerce
No. 2 Danish Hong 4th Febr. 1837.

---

NOTICE.—SAMUEL WETMORE Jr., is this day admitted a partner in our establishment,

WETMORE & Co.

Canton, February 1st 1837.

---

NOTICE.—The Copartnership hitherto existing under the firm of Markwick Edwards & Co. ceased this day. All Persons having claims against the said firm are requested to forward them, and all Persons indebted to the same are requested to pay the amount to the undersigned.

ROBT. EDWARDS.
Canton 31st Dec, 1836. No. 3 Imperial Hong.

---

## *SHIPPING INTELLIGENCE.*

ARRIVED.—American, *Trescott*, Lindsay, from Batavia. *Alasco*, Keating, from Manila. British, *Bencoolen*, Brown, from Calcutta. American, *Mandarin*, ——, from Batavia.

PASSENGER — ₱ *Bencoolen*, Mr. Edward Harding.

SAILED OR DESPATCHED.—British, *Asia*, Pearson, and *Lord Lowther*, Vincent, for London. American, *Horatio*, Howland, for Manila. *Oneida*, Tripp, for New-york.

PASSENGERS.—₱ *Asia*; Mr. and Mrs. A. P. Boyd and family. *Lord Lowther*; Capt. and Mrs. Grant and family. *Oneida*; Mrs. Tripp and Mr. Jos. Coolidge.

The *Lady Grant* is to sail for Bombay direct in a day or two.

---

The shipping formerly at Lintin has now moved to Cap-sing-moon. We understand that the Amer. Ship *Horatio*, on her arrival not finding any ships at Lintin, went as was usual to Cum-sing-moon, where she was boarded by a pilot, who stated that he had orders to take out all ships coming to that station. Many war-junks were lying at anchor at Cum-sing-moon, and fortifications were being erected on shore.

---

The *John Fleming* is loading, and the *Mary Walter*, and *John Dugdale* are also destined for Great Britain.

LATEST DATES from UPPER SEAPORTS Old Dates per *Horatio*. CALCUTTA, 15th March per *Pigotte*. SINGAPORE, April 6th per *Pigotte*. JAVA, 25th March, per *Theodore*. HANNA 22nd April, per *Alasco*. BOMBAY, 1st March, via Calcutta.

---

VESSELS EXPECTED.—From ENGLAND, *Sarah Berry*, *Cressider*, *Perseverance*, *Hindoo*, *Jessy*, *Courrier to Manila*, *Ann*, CALCUTTA, *Hindoo*, *Mary Anne*, THOMAS. MANILA Packets, ENGLAND, *Eleanor*, *Good Success*, *Hannah*, *Helen*, MANILA, *Colonello*.

Note. Above rates are from 20th April to 20th Oct. annually; during remaining 6 months the premiums are somewhat lower. Risks on Bombay are $ 9 per Cent per annum, $ 4½ for 6 months, $ 2½ for 3 months and $ ¾ per month.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874756 of a Tl. per cubit.
2nd " " " 1200 do. & under 1600 " 0.7221091 " "
3rd " " " under 1200 do. 0.5062341 " "

N.B. The cubit in 14½ inches. measurement is taken on each rutey of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across the main mast; these are multiplied together for the above products—The largest class pay from $ 4250 to $ 4320; 2d class from $ 3760 to $ 3780; 3rd class from $ 3700 and under. The Consha; or Present Fee is paid by all vessels 1600 Tsels or $ 2223. Linguhs fee $ 173½ and Compradore's fees $ 50 Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.,

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES,—continue as dull as before, there being no demand for hardly any articles of European manufacture.

COTTON YARN.—continues at our low quotations.

WOOLLENS.—In these we have to record no improvement.

STRAITS PRODUCE.—TIN has again declined, and PEPPER is difficult of sale even at our again reduced prices.

RICE.—Owing to the unsettled state of the weather, is rather more firm than before, though we cannot announce any improvement in price.

EBONY.—Even the best Mauritius is difficult of sale at our quotations.

COTTON.—The low prices which have ruled for some time have caused large clearances since the new year, and our stock if now not very heavy. The deliveries in April were

| Bombay. | Bengal. | Madras, | Total, |
|---|---|---|---|
| 5566 | 13343 | 2175 | 21,084 |

leaving a stock of

| | | | |
|---|---|---|---|
| 13929 | 17554 | 9086 | 40,569 Bales. |

and nearly the whole is in the hands of the Chinese, who are asking advanced rates, speculating on the expected ships from Bombay and Madras keeping out.

OPIUM.—Since our last there has been a total interruption to the Opium trade, and several of the Opium boats have been burnt by the dealers to prevent their falling into the hands of the Mandarins; by some it is however expected that the mutual interest of the parties will lead them to accommodate matters. Meanwhile small sales are being effected at Macao. For the deliveries see our statement above.

### EXPORTS.

TEA.—The manufacture of the new Canton tea has commenced, and we hear that contracts have been entered into at our prices.

## LITERARY.

### THE HISTORY OF MEDICINE IN CHINA.

*( From the Indo Chinese Gleaner. )*

"Gentlemen, the Chinese, whom I venture to pronounce the most unique, and the most original people at this day on the face of the earth, look at medicine in two points of view, a favorable one, and an unfavorable.

1. The sincere, diligent, candid, and benevolent practitioner, who toils for the health of his neighbours, and fellow countrymen, they regard as holding a place equal in importance to that of the virtuous Minister of a powerful Monarch, who is a blessing to the Empire On the other hand, he who has no higher motive than his own emolument, and who from his ignorance, or his soothsayerdoms, as often kills as he cures, they regard with sovereign contempt; and feel ashamed that such men should be called by the same name as the sincere votaries of the healing art, who by a very appropriate and honorable destination, they call Jin-shuh, "the benevolent art." The ideas I have thus put into English, are taken from the preface of a work in 40 volumes, compiled by the united effort of about a hundred persons, connected with the Imperial College of Physicians at Peking; during the reign of the late decided and prosperous Monarch, known by the name or rather title of Keen-lung, which being interpreted means, "celestial glory." This book which is the latest national work in China, on the subject to which this paper has a reference, was published about the year A. D. 1740.

2. There is an individual and private work, in 11 vols. printed not more than 14 years ago, entitled E-shou-hwuy-tsan, "a comparative compendium of medical books:" this is the latest publication which has any pretensions to particular notice, that I have seen. In the year 1819, being desirous of procuring information on the Chinese notions of diseases and their cure, I bought all the books on medicine which were to be found in the populous and opulent city of Canton. They amounted to 892 vols. I need scarcely add, as my other avocations are well known to you, that I have not yet been able to examine the contents of these books, to that extent which I could have wished, or rather, did and still do wish to effect.

3. I shall this day furnish you with a few general notices on the history of Chinese medical practice; and at the same time would observe, that I by no means anticipate very important and useful discoveries from the Chinese in this department of human knowledge; for, since the genius of Bacon threw open the gate of experimental science, the European mind has outstripped all that ever preceded it, in the accuracy, and the extent of its knowledge. However, you are not unacquainted with my maxim, which with reverence I adopt from an inspired and a divine author, viz. that "IT IS MORE BLESSED TO GIVE THAN TO RECEIVE." I know it is a much more ungracious task to teach than to LEARN; for the assumption of superior knowledge, however justly it may be claimed, commonly offends one's pride; whereas, he who becomes a scholar flatters our vanity: this is a difficulty in our way: but I would ask what honorable and benevolent course is not attended with difficulties? Let us therefore resolve to go onward.

4. In the case of man so remotely situated, and of such a different speech, and discordant manners, and habits of thinking, as Englishmen and Chinese, a most discouraging difficulty in LIMINE, is how to understand each other on physical and medical facts and theories, therefore, as I have before hinted to this society, great patience is necessary in our pursuits; and one must learn a great deal of nonsense, in order to be able to refute it.

5. The Imperial work above referred to, is entitled E-tsung-kin-keen, "a GOLDEN MIRROR OF THE MOST APPROVED MEDICAL PRACTICE." All books in China referring to medicine that could be procured by purchase, or by loan, were collected, and traditional popular MSS. were sought by the order of Government. In four years it was completed. In this work, it is maintained that in the remote ages of antiquity, medicine, and affinities and correspondencies in nature, were better understood than at any subsequent period.

Chinese writers attribute the ascertainment of the properties of herbs to Yen-te, the illustrious Monarch, an antidiluvian personage, in their annals placed about 3000 years before our era. This illustrious King Yen-te, is otherwise called Shin-nung, which appellation means, "Divine Husbandman." About the same time lived another king Heen-yuen; and a statesman, named, Ke-pih, who, with the monarch just now named, formed by their personal efforts a sort of Royal Society, for physical and medical research in China: and in allusion to them, medicine is sometimes called "The art of Kebees." To Ke-pih, the origin of Tszechih; i. e. "impuncture," is attributed. There are two fragments yet extant attributed to Ke-pih, and which (according to to the imperial editors, & other writers) are the most ancient notices in China, concerning the cause and cure of diseases.

6. The first of these fragments is called Lingchoo, "the intellectual kings," perhaps meaning, that turning point, that crisis, which determines the connexion, or the final separation of soul and body. The other fragment, is entitled Soo-wan, "plain questions," and refers to, or contains the result of certain consultations between Heen-yuen and Kepih, on splanchnology.

7. Both these medical fragments are given in the work published fourteen years ago, by a private hand, to which I referred in the beginning of this paper. They are considered more ancient than the classical books, collected and edited by Confucius; but how their authenticity and genuineness are traced I know not. The style of these, like that of several other ancient medical writings, is obscure, and abstruse to modern Chinese students. In these fragments, the circulation of the blood is recognised; whether in the form of a note or not, I am not prepared to say: however, there is little doubt, that as early as the days of GALEN, the Chinese believed, and taught, and acted on the belief, that the blood, and a certain animal spirit, or subtile aura, circulated, or went round and round the human body, without intermission day or night, as long as life continued. But, up to the present time, I believe, they are ignorant of the MANNER in which it do s perform its circuit, and of the structure of those canals, the veins and arteries which convey it.*

Just as Choo-foo-tsze (an eminent Chinese philosopher, considered second only to Confucius) taught six hundred years ago, that there belonged to plants the distinction of sex; and any poor Chinese gardener will tell you, that this is a male, plant, because it bears no seed; and that it is a female because it does bear children, (as their root for SEED is; yet neither the philosophers, nor the gardeners of China seem to have followed up these hints, with an experimental scrutiny, to ascertain in what that sexual distinction consisted.

8. So neither their genius, nor their doting, have prompted them to dissect carefully the bodies of the dead, for the benefit of the living: and they remain satisfied with the FACT of the blood's circulation without endeavouring to explain it.

9. Although they teach that the blood goes round as in a circle which has no beginning, nor any end, yet they choose to denominate what they call Tsung-k'ow, the inch mouth; i. e. that part of the wrist where they place the fore-finger in feeling the pulse, the headquarters of the blood, or in their style, that part where the court is held, and a report made by the pulse of all that is going on in the little world, *man*: the most distant region of which microcosm they place in the foot.

10 The Shoo-king, compiled by Confucius, mentions Woo-heen, as skilled in the cure of diseases about 3000 years ago. The next names of eminence in this department, are Tsang-kung, and his pupil, Peen-tsoo, otherwise called (Lao-e) Doctor of Lao, who lived about 2100 years ago. During the civil wars of China, the state of society however afflictive to humanity, was probably favorable to discovery in the art of medicine, and one in which practitioners are of unusual importance, a circumstance that has gained a medical man in China, the appellation of Kwo-show, "the nation's arm," meaning, that by his art he saves persons from death.

11. The middle of the 3rd. century, was in China, a period of civil war, and great slaughter of human beings. It was then the now deified physician Hwa to lived, and to him is attributed great skill in the use of the knife. He is said to have laid bare and scraped the bone of the arm of the deified hero Kwan-foo-tsze, and saved him from the effects of a poisoned arrow which entered his arm. †

12. He removed the eye-ball of a king's child, cut away the diseased part, and replaced the eye-ball. It was Hwa-to who first discovered the present mode of gelding swine and fowls in China. Tsaou-tsaou, who is by some Europeans called the Bonaparte of that age in China, ordered the doctor to be decapitated, (the books say,) because he refused to attend on the general's wife; but popular tradition says, because he proposed to trepan the general's scull, and cure him of some affection of the brain.

13. In consequence of Hwa-to's murder, his wife burnt all his manuscripts; and one that he offered to the jailor called "the green bag recipe, able to bring the dead to life"—containing many important secrets, being, from fear, refused, he burnt it before his death.

14. Shun-yu-e, a Doctor of some note, lived about this time.

15. In the fourth century, Wang-shuh-ho was chiefly famous for his work on the pulse, an epitome of which is given in Du Halde's China.

16. In the sixth century, Chin-kwei lived, who is said to have cut into the abdomen: removed diseased viscera; STITCHED up the part again, and healed the patient in a month's time.

He gave on opiate to the patient, which rendered him insensible before he began the operation; the opiate is called Ma-suh-san, which seems to express that it was in the form of a powder.

17. There was one man of eminence, called Heuyin-sung, who rather undervalued the doctrine of the pulse, and said, he could do without it. It was he who, being advised to write a book, said, "words cannot communicate my art."

18. The above mentioned, are a few of the desultory names of eminence connected with medicine in China. There are four persons still more eminent as writers, and who are well known by the epithet Sze-ta-keu, "the four great masters"—or leaders of separate schools, and authors of distinct systems. From the first of them to the last embraced a period of TWELVE centuries.

19 The first is King-chung-chang. He lived during the How-han, A.D. 220, and was a native of Nan yang.

20. The next is Lew-chow-chia. He lived under the Sung Dynasty, A D. 1200.—

21. The third is Le-tung-hwan, (or) who lived under the first Tartar Dynasty, A.D. 1300; and the last is

22. Choo-tan-ke, a native of Che-keang province, who lived during the late China Dynasty Ming, A.D. 1500.

The first named is considered. "The father of physic;" he left numerous writings which are still much read.

23. In what the theories of these FOUR masters consisted; wherein they agreed, and in what they differed, I shall make the subject of a subsequent paper.

May 18, 1820.

### THE MALAYS AND CHINESE.

The following is taken from the *Chinese Repository* for last month, and the part in inverted commas is an extract it gives us of *Doctor Leyden's* translation of some ancient Malayan annals, recording the intercourse which formerly existed between the Malays and Chinese. Like the writings of all nations, where letters are the privilige of a few only, the Malay author has allowed himself to embellish most of his stories with a dash of the wonderful, and where not this, of the incredible at least; knowing himself certain of not being read by cute-aporacies, or by few only, and hoping that posterity, as not an eye-witness, will take for granted "what is written in a book." It is wonderful how this same disregard for truth and love of embellishment has been the fault of almost all writers of antiquity, leaving to their posterity the task of separating the chaff from the corn. In this Malayan author we find in the extracts given us by the *Repository*, in spite of his many absurdities, many instances proving that he was really acquainted with the Chinese, and that the Chinese Government has not changed much since his days. We find it described as arrogant and faithless as at the present day, and as cunning to evade danger, though the Tartars had not subjugated this country at the time of which our author treats. We find moreover in this extract that the fondness of the Chinese for pork is of great antiquity, as likewise the itch with which even the Emperor was troubled.

#### MALAYS AND CHINESE.

At a time, when rájá Suran reigned in Amdan Nagára, all the countries of the east and west were subject to him, "excepting the land of China." A plan was formed for conquering China, the men assembled, and the march commenced; "the earth shook, the hills moved, and the rocks flew off in shivers. Two months they marched without delay; the darkness of night was illumined by the splendor of their arms, and the roaring thunder could not be heard because of the noise of the warriors, and the cries and tramplings of their horses and elephants. Klings and Siamese joined in the pursuit. Having arrived in the country of Tamsak, the rumor of their approach reached the celestial empire.

"The raja of China was alarmed at hearing this intelligence, and said to his mantrís and chieftains, "If Kling raja approach, the country will be inevitably ruined; what method do you advise to prevent his approach?" "Then, a sagacious mantrí of China said, "Lord of the world, your slave will fall on a device." The raja of China desired him to do so. Then this mantrí ordered a vessel (pilu, i. e the Chinese mode of pronouncing *prow*), to be prepared, filled full of fine needles, but covered with rust; and planted in it trees of the Cassinak and Bidara. (Ber) plants; and he selected a party of old and toothless people, and ordered them on board, and directed them to sail, to Tamsak. The prow set sail, and arrived at Tamsak in the course of a short time. The news was brought to Raja Suran, that a prow had arrived from China, who sent a person to enquire of the mariners how far it was to China. These persons accordingly went, and enquired of the Chinese, who replied, "When we set sail from the land of China, we were all young, about twelve years of age, or so, and we planted the seeds of these trees; but now, we have grown old and lost our teeth, and the seeds that we planted have become trees, which bore fruit before our arrival here." Then they took out some of the rusty needles, and showed them, saying, "When we left the land of China, these bars of iron were thick as your arm; but now they have grown thus small by the corision of rust. We know not the number of years we have been on our journey; but, you may judge of them from the circumstances we mention." When the Klings heard this account, they quickly returned, and informed Raja Suran. "If the account, of the Chinese be true," said Raja Suran, "the land of China must be at an immense distance; when shall we ever arrive at it? If this is the case, we had better return." All the champions assented to his idea." p. 13.

### METEORS IN CHINA.

Throughout Chinese history, the phenomena of nature, such as an eclipse, the appearance of a comet, a vivid meteor, an earthquake, as well as pestilence, excessive rains, drought, locusts, and famine, have been regarded as signifying the displeasure of Heaven; and have induced a real or a feigned desire to repent, and to reform. General pardons have been granted; measures taken to alleviate the distress es of the poor; and Imperial proclamation issued, inviting persons to speak pointedly and freely their opinions of what they deemed amiss in the Sovereign's conduct. Chinese history mentions 101 earthquakes; 98 falling or rushing down of mountains; and 83 floods, occasioned by excessive rains, or irruptions of water from the beneath the surface of the earth. They mention a few times a phenomenon which appeared to them as raining down of blood, and once in which the wind appeared as blood. Storms of rain and hail are mentioned 25 times, and great storms of rain and hail four times. The hail stones are once compared to cocks' and hens for size, and are said to have measured in diameter 9 cubits 5 tenths. On this occasion it is said that they killed the people on whom they fell.

*Doctor Morrison's "View of China.*

### CHINESE EXTRACTS.

MIRACULOUS INTERVENTION OF THE GODS, IN A CASE OF CRUEL OPPRESSION AT POTEEN.

*Translated for the Canton Press.*

Hwang, a native of Poteen in the Fokien province, enjoying purchased rank, was notorious, from his very childhood, for his overbearing, vicious, and grasping disposition.

Adjoining a field on Hwang's estate, was a small house and 5 mow of rice land, the property of a poor old woman named Chang.

This land Hwang greedily desired to possess, and used all his endeavours to prevail upon the old woman to sell it to him. Finding however that she would not listen to his proposals, he forged a title deed of the ground which he got witnessed by some of his unprincipled friends. This deed he took to the Magistrate, accusing the old woman of having forcible possession of the land.

The Magistrate believing the deed to be genuine, and strengthened in the belief by a handsome present of money, ordered the old woman to give up her property to Hwang, which she did, well knowing how unavailing remonstrance would be.

She never saw Hwang on her property, but he began violently to abuse him, calling him robber &c.

One day being more free than usual with her tongue, he ordered his minions to silence her, which they effectually did, by first binding and then stabbing her in several places.

Far from feeling remorse at this cruel deed, his diabolical rage was not yet appeased, and he had the son of the old woman apprehended and accused of murdering his mother. The poor young man, convicted on the evidence of this wretch and his underlings, was sentenced to die by the "ignominious process."

Soo-chang, the Viceroy, an intelligent man, struck by the extraordinary circumstances of the case, was led from motives of pity, to examine more closely into the evidence adduced on the trial. "Is it likely," said he, "that this young man could have the heart to stand over his mother and deliberately murder her? And would he not have accomplished his diabolical purpose in the house, secure from detection, rather than in the open field and in the presence of so many witnesses?"—Under the impression that the young man was wrongfully condemned, he ordered the Fuh, and Tsaou-foo-foo to retry him in the Ching-hwang Temple.

The prisoner was accordingly bound and led into the temple, where he was again tried, but the judge deceived by the evidence against him, fully corroborated in the former verdict and confirmed the sentence.

In utter and reckless despair, the young man upbraided the Gods for their injustice in allowing him to die by the "ignominious process" while the real murderer was free, honored and rich; and he had finished speaking, the roof of the pavilion fell in, with a loud crash.

The listers now stepped forward and seized the prisoner to lead him out to execution, but when they came to the door of the temple, the noble figures stationed there stopped forth and crossing their spears prevented the egress of the prisoner.

The spectators of this miracle fled, and the judges, having recovered from the panic which had seized them, ordered the prisoner to be released, they being now fully convinced of his innocence.

Hwang was immediately apprehended, and he having confessed on the torture, was, with his accomplices, decapitated and his land given to the old woman's son.

### NEW LIGHT IN THE CHANNEL OF CALAIS.

The following notice has just been received from the French Government:—

*Light on Point de Ver, Department of Calvados.*

Navigators are hereby informed, that from the 15th of August next, a light, varied by flashes, will be shown every night from the tower recently erected on Point de Ver, in lat. 49° 30' 35", and long. 0° 34' 6" W. of Greenwich.

The light will appear at an elevation of 180 English feet above the base of the lighthouse, and 37.8 English feet above the level of the high water equinoctial springs.

The flashes will succeed each other every four minutes, and will last from eight to ten seconds.

The least brilliancy of the light, which will be seen in the intervals between the flashes, will be preceded and followed by eclipses. The light may be seen in fine weather at the distance of 24 ten nautical miles.

*Hydrographic Office, Admiralty, 2nd July, 1836.*

*Nautical Magazine for September.*

*Vessels employed in the foreign trade of the United Kingdom.*—An account of the number and tonnage of Vessels, distinguishing the countries to which they belonged, which entered inwards and cleared outwards in the year ended 5th January, 1837, compared with the entries and clearances of the preceding year; stated exclusive of coasters and boats, and of those employed in the trading trade between Great Britain and Ireland:—

May 13th 1837.

## THE CO-HONG SYSTEM.

We have already several times alluded to the very unsatisfactory state of credit to which many of the security-merchants are at present reduced, and have had to record the failure of one Hong which ever since it's establishment in 1830 has transacted a greater share of business than any of it's neighbours, and the debts of which, including those owing to Chinese, are said to amount to upwards of 3 millions of dollars, or at the present rate of exchange to £ 750,000 while the assets to meet them are but small. We believe that the difficulties of this Hong originated, in the first instance, by a fire destroying it's property to the estimated amount of 3 lacs of dollars, and by the subsequent imprisonment of the Hong-merchant for not having prevented the coming to Canton of Lord Napier in a ship for which he had become security; a fault which the local government chose to visit upon him, though the Hong-merchant was perfectly unconscious of Lord Napier's arrangements. He was released after about 6 months, but not without making some very heavy payments for his liberty, besides having lost his time in doing nothing, whilst the expenses of the Hong continued. These calamities had no doubt considerably embarassed his affairs, and in the hope of retrieving them, he entered into very extensive business, which, with reduced means, he could not do without now and then great sacrifices for the command of cash, whenever his creditors became clamorous. Thus one misfortune drew others, after it, till at last his credit failed altogether, and his situation became generally known.

In how far misfortunes, and the merchant himself by erroneous speculations, may have caused his ruin, we have no means of ascertaining, but that it was chiefly brought about by the present Co hong system, or rather the system of extortion by the Government, there can be little doubt, and if this method is continued, many more hongs must fail, nor do we see how any of them can, for any length of time, continue to pay the enormous sums which are annually levied on them. Our following statement will we hope explain this to our readers, premising at same time that we have no exact data from which to obtain our numbers, which are consequently in a great measure conjectural, but we believe that they are near the truth.

| | |
|---|---|
| The whole amount of imports and exports, according to H. B. M. Superintendents' statement of last year, amounted, after deducting about £1,000,000 for Opium imports and Specie exports, to about 30,000,000, but this statement being very incorrect we believe that we are nearer the truth by taking the whole value of the British trade to be | £ 40,000,000 |
| add to this the American trade in American vessels about | „ 13,000,000 |
| and the dutch trade from Java, as well as the Rice trade under several other flags not British or American, say | „ 2,000,000 |
| Total of trade passing through the Cohong | £ 55,000,000 |
| Out of this trade the Hong merchants have to pay, before any profits come to them: | |
| For fees to the different officers of the local government, which we know on good authority amount to about £ 42,000 in the case of one of the poorest and most inactive hongs; others doing much business will probably have to pay much more; we take the average of £ 45,000, which on 13 hongs is | £ 585,000 |
| The expenses of each hong besides may amount to £ 40,000 | „ 520,000 |
| It is supposed that to propitiate the rulers at Peking the Co-hong sends there annually | „ 600,000 |
| We believe that we are much within the mark by estimating the extraordinary fees (squeezes) to which every Hong is now and then *separately* liable for infringing the laws, or, for being accused to have done so, which amounts to the same thing, at | „ 100,000 |
| The Hong merchant on establishing himself must purchase a license from the local government, and we suppose that one new hong is annually established, which would give to them the average existence of 13 years—this license is not less than | „ 35,000 |
| Giving a Total of | £ 1,840,000 |

annually spent by, and extorted from the Co-hong, or about 3½ per cent on the whole of their transactions!

It will be seen from this statement that, unless the business of the Cohong is very profitable, they cannot continue long; and that the security-merchants are obliged to transact a great part of their business for a very small remuneration is well known; when they are needy, which with the greater part is always the case, they sell foreign imports to their countrymen even at a loss upon the prices at which they bought, in order to raise money; as to exports, the Fea-men are too powerful a body to allow the Hong-merchant to take too large a share of the profits they derive from the demand for foreign markets, and the latter must be in most instances content with a small commission.

But it is not the pecuniary exactions alone, which render the Hong-merchants' existence precarious; he is not for a moment personally safe; the trade is restricted and hampered by so many and oppressive laws, that it is almost impossible to carry it on without now and the disregarding some of them, and if the Hong-merchant, when accused, neglects to make powerful friends, he may even be exposed to personal chastisement. Of this we saw a painful instance only a few months ago, when Aming, a Hong-merchant, on the charge of having smuggled Syceesilver, was taken into the city and severely ill-treated by being made to kneel on chains etc.. and by afterwards being exposed for the period of nearly a month at the gate of each of the hongs, wearing a very heavy wooden collar round his neck. The poor man, some say, died in prison in the city, others, that he is still alive.

All circumstances taken together, it is astonishing that men are still to be found desirous to become hong merchants; vanity, to be thought men of note and influence for however short a time, probably is the cause of this folly.

The advantages which the local as well as imperial Government derive from the foreign trade must be very great, independent of that part of the duty which passes into the Government's treasury and is accounted for to Peking, and which we have heard valued at about 3,000,000 dollars. By far the greater part of duties paid on the foreign trade are imposed illegally, sanctioned by the system of extortion which seems to pervade all branches of the administration, and go into the hands of the officers, in part at least, whose salaries are so small that they must find other means of subsistence, so that as well these illegal duties as the extortions from the Hong-merchants may be considered as constituting the salaries of the government's officers, and that the court at Peking winks at these practices in order to save expenditure; the court even derives direct advantage from it, in so far as the high functionaries are said to pay large sums for their offices, and we hear of several instances, where, the term of their services here being at an end, they were obliged on their return to Peking to propitiate the Emperor's favor by presenting him with part of the wealth amassed in Canton. The system of purchasing situations under government obtains through all the grades of the service, and for apparently low situations, for which the actual salary is a small pittance barely sufficient to pay for a man's rice, large sums are given in proportion to the opportunities they present for extortion. Such offices are at times considered so good an investment of money, that a kind of company formed of several individualy who raise between them the amount required, depute one among them to do the duties of the office, and divide the profits according to their shares in the purchase-money. If this latter is a circumstance of frequent occurrence, it cannot fail to strengthen the government in the execution of it's measures, so many persons being concerned to see that the officers be not obstructed in levying money.

Wretched as the whole system is, it is found in most Asiatic states and in a great many in Europe at the present day, and even in England we find not a few remains of it in many branches of the administration. We need not therefore be surprised to see it flourish in a country where the most absolute despotism has been established from time immemorial.

## WALKING on HONAM.

All but our distant readers are aware, that Honam is an island, on the south side of the river, opposite to Canton, where foreigners frequently take short walks into the country,—being one of the very few means possessed of enjoying needful exercise.

These walks, like most other things done by foreigners in China, are however illegal, and occasional disputes with the natives, arising from the insolence of individuals among them, met sometimes by hastiness on the part of foreigners, cause, from time to time, an enforcement of the prohibitions existing against all such walks. Such is at present the case, as may be seen from the subjoined edict lately issued by the Hoppo.

"Wan, Superintendent of Customs, &c. issues this order to the Hong-merchants. On the 3d instant, I received the annexed communication from the Lieut-Governor, as also one of the same tenor from the Governor. On the receipt of these, I have made investigation, and find, that foreigners residing at Canton, have allotted places where they may walk, the limits of which are fixed and certain; and they are not allowed to ramble about at pleasure. The Mayung bridge and the Lung-wei road, on Honam, are not places where they are allowed to stroll about; and the said foreigners, in daringly and foolishly following their own pleasure, and going thither thus causing disturbance,—as well as the Hong-merchants, in not duly restraining them,—have indeed shown a total disregard for the laws."

"Having now received the above communications, I forthwith issue this order. Let the said Hong-merchants, on receiving, pay obedience to it. Hereafter they must at all times strictly restrain the foreigners of every nation, and must not suffer them, in opposition to the prohibitions, to wander about. If they dare to slight this, and suffer them to go out and in, uncontrolled, rambling about and causing disturbance, they, the Hong-merchants, shall be held solely responsible. Let them transmit these orders to the directors of affair of each nation, that they may receive universal obedience. Oppose not. A special edict."

The communication from the Lieut-Governor to the Hoppo in a long document, containing details, greatly falsified, of circumstances which have lately taken place on Honam. We may perhaps give a translation of it in our next number.

We hear that a boat, containing a Company of players, was upset near Macao a few days ago, and that of about 120 people only a few more than 90 were saved. The number of strolling players is very great in China, it being the custom, at certain seasons of the year, for the inhabitants of a district of a town, or of a village, to club together for the expense of having such a company perform during three days, and a bamboo house is built for the occasion, generally capacious enough to admit several thousands of spectators. The Chinese seem to be very fond of this amusement, these temporary theatres, though there may be in Canton for instance, performances in many of them on the same day, being always crowded to excess from morning till night. Most of the players have, we believe, no domicile on terra firma, they live always on board of large boats, which are at the same time their habitations and conveyances, nor are they often, at least in this part of the country, called on to perform long journeys by land to appear before the spectators, the country being every where intersected by navigable rivers, creeks, lakes, and canals.

The Governor went on the 9th of this month to inspect the Forts and their garrison at the bogue, Macao etc. and has on his route also inspected the new fort on the Junk river built near the old fort called Hou-qua's fort, or fully in anglo-chinese. These Vice-regal journeys are generally performed once a year when the Vice-Roy is absent from Canton during a month. It is a journey of general inspection which offers many an opportunity for a "squeeze."

The smugglers and Mandarin at Cap-suy-moon have found no means to accommodate matters, and the last of the smuggling boats, (the others having been burnt) which had taken shelter in the vicinity of one of the English ships there, has now also been broken up by her owners, to prevent her eventually falling into the hands of the Mandarins.

*General Chamber of Commerce.* We do not publish the minutes of the Committee's proceedings, having been informed by the Secretary as well as by a circular that the Committee do not wish them to be for the present circulated beyond the members of the Chamber, for the reason that the whole of their proceedings will be submitted to a general meeting and will then come before the public in a more authentic shape, the Committee's labors having hitherto been limited to preparing matter for deliberation by the whole Chamber. The following are the subjects of much importance on which the Committee is now engaged, viz: The time allowed to consignees of goods for claiming them. The duty on Rice ships. The state of the Hongs Regulations as to the period of the seller's responsibility for Opium-orders, as to the quality of the drug and other dangers to which it may be liable whilst on board ship; and other matters of minor consequence.

We hear it stated from Macao that owing to some seizure made by the Vice-roy's boats of treasure under the Admiral's protection, or perhaps without allowing the latter a share of it, the Admiral armed two fishing boats, and went in person to attack two boats belonging to the Viceroy, taking therefrom a considerable number of chests of Opium. How these dignitaries will manage this matter we know not, but suppose that they will make it up, since their conduct in these affairs is not likely to please the Emperor. We hear that correspondence relating to Opium transactions of a Hong-merchant, has fallen into the Viceroy's hands, in consequence of which security has been given for his personal appearance should the Vice-roy require his presence in the city after his return. A military officer is said to be complicated in this affair.

No progress has yet been made in the settlement of Hing tae's affairs, owing, we believe, to the Vice-roy's absence.

There is again a rumour of the trade in Opium being about to be legalized, though we are unable to trade it to any good source.

Several attempts at robbery have again this week been made in some houses in the French hong, but the thieves have been unsuccessful.

The Peking Gazettes contain statements of disturbances in Shantung, and in Formosa. In each quarter they have been quelled. In Shantung above 150 offenders, and in Formosa more than 360, have been apprehended.

The only arrival of the week has been the *Golconda* from Madras 5th March, and Singapore 15th April, bringing us a *Singapore Chronicle* of 8th April, which contains no news of interest.

We just learn that on the 20th December the prices for silk in London were for good Italian 26 a 27s. and scarce, fair 23 a. common 20 a. Taysaam 16 a 17 a. nominal.

## NEW-SOUTH-WALES.

### STATE OF THE COLONY.

The safest and most convincing proofs of our prosperity, are undoubtedly to be sought in our official *statistics*. Reduced to the form of certified returns, our proceedings will be universally intelligible, and past dispute. During the last session of the local legislature, an Act was passed for procuring another census of the population, the results of which have not yet, however, transpired to the public. This delay is to be regretted the more, as we cannot hold it justified by any particular difficulty in the accomplishment of the undertaking. There has been ample time both for the calling in the returns, even those from the remotest dependencies, and for their publication in a digested form. It is lamentable to see the tardiness with which nearly every department of the public business is carried forward, arising in some measure, no doubt, from the indolence of subordinates, and the blameable connivance of their superior officers; but principally from that mean, plebeian, and utterly mistaken *economy* which has reduced every branch of the civil service to the lowest possible number of hands. To be able to speak and write of such reduction is considered by most men in office a sure way to popularity; and hence the serious mischiefs they cause to the true interests of the public are treated with indifference, and even with contempt.

We have sought for another source of statistical information, formerly opened to the public at stated periods, but of late, we find, unaccountably closed—we alluded to the quarterly Custom-house returns of colonial Imports and Exports. For these, among other useful publications introduced by the present administration, we expressed, in a former article, our grateful sense of Sir Richard Bourke's liberality. Are we to retract our thanks? Or is the blame attributable to some other quarter? We are aware that this department professes, and appears proud of, its independence of the local Government, being technically connected with the Lords of the Treasury. If this independence is mere pretence, it ought to be summarily put down; if really established "by authority," all we can say is, that it is a silly and pernicious trifling with the public service. The Governor is understood to be the representative of His Majesty, and as such is not only the supreme head of the civil and ecclesiastical Government, but is also the Commander-in-Chief of the army, and the Vice-Admiral of the navy. And for what earthly reason can this little segment of the public business—the department o' Customs—be placed upon a different footing, and b-yond His Excellency's control? To us this arrangement—or, to speak more accurately, this derangement—has ever appeared the *ne plus ultra* of official absurdity! But, be the fault whose it may, the withholding of information so useful to the public, and of such special importance to the mercantile classes of the community, as the quarterly abstract of our Imports and Exports, is a grievance against which we cannot too loudly protest.

The only statistics, of date sufficiently recent for our present purpose, to which we at this moment have it in our power to refer, is the abstract of the revenue for the quarter ended the 30th September last. In that document we find abundant confirmation of all we have said in reference to our general prosperity. The Revenue derived, in that quarter, from customs alone, was £1 52?8/, showing an increase on the corresponding quarter of the previous year of 5341/. From licenses to poison the health and morals of H a Majesty's liege, to relax the sinews of industry, and to multiply robberies, murders, and suicides in the land—in other words, to "*retail spirits*"—our exchequer was insulted with the sum of 709?/., being an increase on the quarter's iniquity of 84?/. The Post office, which, under the judicious management of our indefatigable Postmaster, Mr. Raymond, yielded 145?/., being an increase on the quarter of 67?/. This is a rong fact, speaking volumes for our advancement in the intercourse of commercial and social life. While we have progressed voraciously in our thirst for rum, it is not to be wondered at that we should have made some corresponding progress in public crime. This is certified by the Revenue item of "*fines levied by Courts of Justice*," which amounted, in the quarter, to the goodly sum of 860/., being an increase of not less than 6?9/.! But the most striking of all the items, is that showing the proceeds of the sales of "Crown Lands" These, in that quarter, were 32, 884/., being, within about five pounds, an excess over the corresponding quarter of the year 1835, of 13,300/.! And let it be distinctly understood, that these purchases are not, unless to a trivial extent, made by newly arrived emigrants, but by established settlers. They therefore illustrate, not the progress of emigration—which, alas! is not worth the name of progress—but the amazing augmentation of our own internal wealth. These lands, bought of the Crown at so exorbitant a cost, are required for the depasturing of our increasing flocks and herds; for the proportion of town allotments included in the proceeds is so small as scarcely to deserve being taken into the account, and even they are purchased chiefly in reference to the wants and conveniences of our graziers.

The gross Revenue for the last quarter amounted to 90,95?/ 11s. 4½d. being an increase on the corresponding quarter of 1835, of the astounding sum of 22,81?/ 3s. 9½d.!! We shall the better understand this indication of Australian advancement, by looking back to our finances of some few years ago,—say seven. We find that the Revenue of 1829—that is, for the entire year—was 96,63?/., being only 5667/. above that of the last three months! And if, for the sake of comparison, we take the last quarter's Revenue at its yearly rate, we shall have a year's income of 363,81?/., or an increase on that of the year 1829, of no less than 297,195/.!!

After this, we surely need say no more to prove that the bright side of our picture has not been overcharged. Our assertions may be questioned; our nations of our own improvements in regard to buildings, and general luxuries, may be thought tinctured with juvenile vanity; but our public accounts, our official ledger, are beyond suspicion; they will command unresisting belief, and will enable sensible people to judge for themselves how we are getting on in "this great South Land,"—no longer the *terra incognita* of the globe.

How it comes to pass, that with all this seeming flow of unmingled prosperity, we can still complain, we shall endeavour to explain in our ensuing number.—*The Colonist, Dec. 29th 1836.*—*Singapore Chronicle, April 8th, 1837.*

### OFFICIAL NOTICE.

THE Commanders of British Vessels arriving at Whampoa are requested to call at the Office of the GENERAL CHAMBER OF COMMERCE in Canton for the purpose of filling up a form setting forth the tonnage, number of men, &c. &c. of their respective vessels.

And Commanders of British Vessels arriving at Lintin *and not proposing to proceed to Whampoa* will be requested to repair on board either of the Ships "JANE" or "HERCULES" for the purpose of filling up the aforesaid forms.

By order of the Superintendents.
EDWARD ELMSLIE.
Secretary and Treasurer.

Canton, 2nd May, 1837.

### OFFICIAL NOTICE.

THE Commanders of English Ships requiring hands are requested to apply to the Undersigned. Good and steady Seamen can be recommended, and arrangements will be made for their conveyance to Lintin or Whampoa as the case may be, free of expense to the Ships.

EDWARD ELMSLIE.
Secretary and Treasurer
to the Superintendents.

Macao, 4th April, 1837.

N. B. Please to write the words "Application for Seamen" on the envelope.

NOTICE.—The undersigned have established themselves in this place, as Merchants and General Agents, in connection with Messrs. JOHN BIBBY & SONS, Liverpool, Messrs. FREDERICK HUTH & Co. London, and Messrs. EDMOND BIBBY & Co. Bombay.

BIBBY, ADAM & Co.

Canton, 5 Danish Hong, 1st April 1837.

NOTICE.—The undersigned have this day commenced business as general Agents and Commission Merchants under the firm of POLLEXFEN, MILNE & Co

GEORGE POLLEXFEN.
JOHN MILNE.
J. M. MACDONALD.

Bombay, 14th October, 1836.

NOTICE.—The business hitherto carried on by the undersigned will from this date be conducted by CHARLES MARKWICK,—At No. 3 Imperial Hong.

ROBERT EDWARDS.

Canton, 1st April, 1837.

NOTICE.—Referring to the above advertisement I beg leave to solicit from my friends and the Public, a continuance of the Patronage that has heretofore been given to the Auctioneering and Warehouse Keeping, of the late establishment of Mr. ROBERT EDWARDS. No. 3 Imperial Hong.

CHARLES MARKWICK.

Canton, April 1st, 1837.

### CANTON GENERAL CHAMBER OF COMMERCE.

The office and Records of the Chamber are open to the members every day excepting Sundays; and the Secretary will be in attendance from 12 till 3 o' Clock.

By order of the Committee,
WILLIAM SCOTT.
*Secretary.*

Canton General Chamber of Commerce
No. 2 Danish Hong 4th Feby. 1837.

NOTICE.—SAMUEL WETMORE Jr., is this day admitted a partner in our establishment,

WETMORE & Co.

Canton, February 1st 1837.

NOTICE.—The Copartnership hitherto existing under the firm of Markwick Edwards & Co. ceased this day. All Persons having claims against the said firm are requested to forward them, and all Persons indebted to the same are requested to pay the amount to the undersigned.

ROBT. EDWARDS.

Canton 31st Dec, 1836. No. 3 Imperial Hong.

For one year payable in advance..... @ 12
For six Months..... " ..... @ 7
For three " ..... " ..... @ 4

Single numbers of the Canton Press and Price Current may be had at the Office No. 3, British Factory, at 30 cents, and Price Currents at 10 cents each, or at Messrs. Markwick Edwards & Co. in Canton and Macao.

## *SHIPPING INTELLIGENCE.*

ARRIVED.—*Golconda*. Bell, from Madras 5th March, and Singapore 15th April. *Diana*, ——, from Manila.

SAILED or DESPATCHED.—Amer. *Brooklyn*, Richardson, and *Samarang*, Mescom, *Theodore*, Farrington, all for Batavia. (this day) Brit. *Mary Walker*, Pollock, for the Clyde.

PASSENGERS.—*Brooklyn*, Messrs W. A. Sullivan and G. J. Foster.

Omitted in our last: *Oneida*, Mr. Edward Russel. Per *Lord Lowther*, Lieut. Anderson.

PASSENGER arrived omitted in our last: Per *Mandarin*. Revd. Mr. Roberts.

The *Ternate*, left Macao roads for Bombay on the 1st instant and the *Asia* and *Lord Lowther* sailed on the 9th.

The *Omega* is to sail for Batavia shortly, as is the *John Fleming* for England.

The *Griffin* has sailed long since for the Sandwich Islands we are informed, though from ignorance of the fact we kept her on the list.

The *Mary Somerville* had arrived off the Sandheads, when the *Bencoolen* left, which saw the *Spark Rima* off Penang and the *Waterwitch* off Parcelar Hill. Dates not given.

The *Thames* was to leave Madras on the 15th March for China.

The *Golconda* has brought from Singapore, news vid Java from England to the 18th December, but of what nature, we have not yet been able to learn.

The *Rover* and *Gaillardon* had both arrived at Singapore.

The shipping formerly at Lintin, has during the last month moved to Cap-sing-moon. We understand that the American Ship *Horatio*, on her arrival not finding any ships at Lintin, came as was usual to Cum-sing-moon, where she was boarded by a pilot, who stated that he had orders to take out all ships coming to that station. Many were junks lying at anchor at Cum-sing-moon, and fortifications were being erected on shore.

The *John Fleming* and the *John Bagshaw* are loading, for Great Britain.

Latest Dates from ENGLAND, 20th December per via Java. UNITED STATES, 22d November per *Horatio*. CALCUTTA, 13th March per *Palmyra*. SINGAPORE, April 15th per *Golconda*. JAVA, 10th March, per *Theodore*, MANILA 22nd April, per *Atacus*. BOMBAY, 1st March, via Calcutta.

VESSELS EXPECTED.—*From Singapore, Sarah Barry, Cooper, Portsmouth, Rhode Island, Courrier de Manille, Am. Caldwell, Boston, Mary Anne, Stanton, Madras, Bombay, Bengal, Eleanor, Chas Stevens, Norfolk, Rhode Island, United States, via Manilla, Bilbao and Spain.*

## RATES OF INSURANCE AT CANTON.

On first class vessels in the 10th Canton and Union Offices of China, &c arisen Agents of Offices established in Calcutta and Bombay.

| GOODS | TREASURE | GOODS | TREASURE | GOODS | TREASURE |
|---|---|---|---|---|---|
| Bombay | | Singapore | 1½ | Hol. or Hamburg | 3 3 |
| Ceylon | | Manila | 1 | Spain or Portugal | 3 3 |
| Madras | | Malacca | | America U States | 3 |
| Calcutta | 3.. 2½ | Penang | 1½ | Chili or Peru | 4 |
| Rangoon | | Batavia | 1½ | Mexico | 3 |
| Mauritius | | Gt. Britain via Sg | 3½ | E.coast of China | 1 pm |
| Australia | | ,, direct | 3 | Lintin &c. | ½ dc. |
| Sand. Islands | | France | 3 | | |

Note. Above rates are from 20th April to 20th Oct. annually; during remaining 6 months the premiums are somewhat lower. Risks on Boats are $ 3 per Cent per annum, $ 4½ for 6 months, $ 2½ for 3 months and $ 1 per month.
The Local Insurance Offices grant Policies payable in London, Calcutta, and Bombay, or in Canton.

## WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874756 of a Tl. per cubit.
2nd ,, ,, ,, 1200 do. & under 1600 ,, 0.7221091 ,, ,,
3rd ,, ,, under 1200 do. 0.5067341 ,, ,,

N.B. The cubit is 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 4300 to $ 4320; 2d class from $ 3700 to $ 3900; 3rd class from $ 3700 and under. The Comshaw Present Fee is paid by all vessels 1600 Tuns or $ 2223. Linguists fee $ 17½ and Comprador's fees $ 50 Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—There has been a good demand for Long-cloths, both white and unbleached, and at rather an advance on former prices.

COTTON YARN.—we have heard of some sales, but at no better prices than our quotations.

WOOLLENS.—Longells have been more enquired after, and at some little advance in price Spanish stripes continue in demand as before. Camlets are without demand.

COTTON.—Prices continue low, whilst the stock on hand is very large.

RICE.—The weather now is favorable, and prices shew no inclination to advance.

STRAITS PRODUCE.—We have to notice a further decline in TIN and PEPPER.

COTTON.—There has not been so much briskness in either the demand or clearances for the last few days, and the arrival of the *Golconda* from Madras, with the *Thames* to follow immediately will tend to render the market still heavier.

OPIUM.—We have no alteration to advise in the state of Opium, and there is every prospect of the interruption continuing for some time, as all the smuggling boats have been broken up; there are however deliveries to a limited extent at Macao and to Junks outside.
The deliveries to the 8th were, Patna, *old* 22, *new* 53; Benares, *old* 98, *new* 18; Malwa 19½; Total 310½ Chests.

### EXPORTS.

SILK MANUFACTURES.—Ready made goods are in many instances cheaper than our quotations, but prices will mainly depend on the Canton Crop.

RAW SILK;—the market has been cleared of all the Nankin of fair quality; what remains is very inferior. The first crop of Canton is expected to be short, and the quality indifferent, particularly in color.

Advices from Madras to the 4th March state the prospect of the ensuing crop of cotton very indifferent. There will be no cotton at all from the Coimbatoor district, and only about half a crop from Tinnevelly.

## PINANG AND QUEDAH.

*From P. W. Island Gazette, April 7. 1837.*

In our Paper of the 24th Ultimo, we published the Siamese Treaty lately concluded, and we confess, that, entertaining as we do, a high opinion of the talents of the negotiator, it has occasioned us very great disappointment. To instance the four first Articles.—It is surely not necessary to establish by Treaty this self evident axiom that one state shall not "molest, attack, disturb, seize, or take any place, territory of boundary, subject to the other." It it were wished to prevent all future cause of quarrel, the "places, territories or boundaries, subject" to each that the other might think there was a right to interfere with should have been specified and declared by the Treaty. Before the late war, the Burmese laid claim to Bengal. At some future day the Siamese may do the same, without any infraction of this Treaty, to Tenasserim. The manner in which disputes about boundaries are to be settled is liable to the same objection. There is nothing defined in it. The English and Siamese Officers may "write letters to each other, and meet and discuss," as directed by Treaty; but they may find it impossible to agree, and who then is to give way? Surely the course would have been to have appointed immediately Commissioners to mark out the boundaries of the two States wherever they come in contact. Our objections to the 4th Article are the same. Why declare by Treaty that the two nations "must not intende, enter or seize any person from the territories of the other." It is an insult to our national character, to suppose that we should be guilty of such lawless acts ourselves or submit to them from others; and if the Siamese are so ignorant of what is due from one State to another as to attempt such acts, (they have done so once we believe) they should be told first with us they are not permitted—that they would repeat them at their peril—and that they might expect as a consequence, that Bangkok would be blown about their ears. This is the only tone, we are persuaded, (and the experience of India, since the first day of the establishment of our Power confirms the opinion) that is likely to succeed with such Barbarians. It was optional before, as it is now, for one State to give up fugitive subjects of the other, and where then is the use of the 4th Article? We really think that the 5th, 6th, 7th, and 9th, Articles also might be expunged from the Treaty without our interests, or the Siamese, be ing in any way injured. Certainly all the provisions they contain of importance might be comprised in four lines.

But what shall we say to the 13th Article? When the Mission first proceeded, it was rumoured, and we certainly hoped it might prove true, that one object of it was to obtain the restoration of the King of Quedah —a measure to which we stood equally pledged by every consideration of faith and good policy. We afterwards heard that Capt. B. had requested the Rajah of Ligore—the Usurper of Quedah—to accompany him, and that he depended mainly on his influence at the Court of Bangkok, for the favorable termination of his Mission. It was clearly not the Rajah's interest to restore Quedah—it was evident that no cessions to the Siamese in any other quarter would benefit, or reconcile *him* to the arrangement—our hopes therefore vanished, and we reluctantly came to the conclusion that the rumour had no foundation—but we confess that we were not prepared to see ourselves made the Rajah of Ligore's Tools—to be made his instrument for persecuting the unfortunate King. It is, we suppose, known to all our Readers, that this Island was obtained from Quedah on a stipulation that we should defend that State from all enemies. This article it is true was not equally certain, that this stipulation alone induced the King to give it up and that he might and would have obtained those terms from the Dutch or French if we had not forestalled them. It is equally well known, that since the lawless usurpation of his territory by the Ligore Rajah, he has obtained an Asylum on this Island and this Asylum—by the 13th Article of Capt. Burney's Treaty—we pledge ourselves to remove him from. We even engage to prevent his making any attempts to reinstate himself in his dominions—his right to which we cannot question without invalidating our own title to this Island—and for this breach of faith and hospitality what are we to receive? The commercial articles are, we suppose, the best that could be obtained—but unless a British Resident is permitted at Bangkok to receive and enforce the complaints of our Merchants, we fear they will be attended to only as far as suits their own convenience. Were it otherwise our objections would remain in full force—but as it is—it seems to us that we have broken those ties that ought to be most binding on Nations—that we have bartered our National faith and good name for—a Free Trade in Paddy with Quedah, which we ought to, and shall shortly, be independent of —and for some commercial articles, on a piece of parchment with a bit of wax dangling to it—which granted by such a nation—we can look on as little better or more binding than so much waste Paper. How far we have any right to bind the King of Quedah, from attempting the recovery of his Dominions we will not stop to discuss, but we challenge any person to produce from the many cases that abound in Indian History—one which reflects more dishonour on the British name, than our treatment of the King of Quedah, from our first connection with him, when we obtained the Island under false pretences, to its termination by Capt. Burney, when we drive him from a Place given to us by his Father and guarantee the remaining possessions of his Family to their Usurper.

In the Singapore *Free Press* of 20th April, we find the following remarks on the above.

"In the Penang paper above referred to it is also mentioned that rumours had prevailed that a considerable force of Malays had been collecting for some time past at the *Lancavy* Islands with the intention of invading the country of Quedah, and restoring the ex-King to power. This force it appears was variously estimated at from 25 prahus and 500 men to 40 prahus and 2 000 men—who only wait the appearance of the old King from Bruas before they make a descent on the Coast. If this be true, which we think rather improbable, we only feel sorry for the fate of the men about to engage in an undertaking so desperate as it is sure to prove, if our government a second time takes an active part in the contest and assist the Siamese—which it no doubt will, being in the first place bound by the Treaty with Siam so to do, and having moreover always acted towards Quedah with the grossest disregard of justice and sound policy. We may therefore expect that by and bye our ships of war and armed steamers will be blockading the rivers of Quedah, in a league with tyranny and barbarity, instead of scouring the seas for pirates, and rendering service to commerce and civilization. The single fact that the trade of Penang with Quedah before its final conquest by the Siamese amounted annually to about 300,000 Drs while it now seldom exceeds 15,000, sets our policy with regard to the country in its true light, to say nothing of our downright iniquity towards its unfortunate ruler.—*Singapore Free Press April 20th.*

## CHINESE EXTRACTS.

*Translated for the Canton Press.*

Chang, a literary graduate of Tung-chow, was famous for his beauty and his success among the women. Unknown to himself, he was greatly beloved by the daughter of a poor husbandman in the neighbourhood; but she being a virtuous young woman, and knowing from the difference of station that Chang would never marry her, she pined away in secret and died of a broken heart.

On her death-bed, finding her end approaching, she sent for her father and said to him. "My death it attributable to the graduate Chang; My heart is broken for love of him. Tell him that he shall see me after death."

The father distracted with grief sent to Chang, informing him of his daughter's death-bed assertion. Chang immediately came to the old man's house but immediately he entered the room where the young woman was lying, she expired with a deep groan.

After this Chang went on business to Shinwei and to his surprise was followed by the Ghost of the young woman; he then went to Peking, but there also the Ghost accompanied him. Whether he was ting, walking, or sleeping the Ghost never left him. When he returned home, finding he was still accompanied by the Ghost, he prepared a temple offering to appease the manes of the young woman. After which the Ghost never troubled him again.

## SINGAPORE.

The shipping arrivals during the week have brought us little or no news of any importance commercial or politically. By the *Westmoreland* we have received Calcutta and Madras papers, the former of the 22nd and the latter to the 17th ult. Lord ELPHINSTONE had arrived at Madras and assumed charge of the government of that Presidency on the 6th ultimo.

The ships *Carnatic*, *Lord William Bentinck*, and Brig *Cecilia* had arrived in Calcutta on the 20th ult. The price of Opium in Bengal in consequence of the unfavorable accounts from China had fallen considerably, and sales to the 16th ult. had been effected for Patna at Rupees 1,530, a 1,550 per chest, and for Benares, Rupees 1,390 a 1,400 per chest, cash.

The following intelligence of later date we republish from the Pinang Gazette of 15th instant, and until the arrival of *Cowasjee Family* the delusion of Opium having become an article of legalized importation in China will be in full operation, when we may expect to learn the price of the article had again declined with equal rapidity to its present rise founded upon erroneous information.

"We learn from a Calcutta private letter of the 25th March, that since the arrival there of the *Antonio Pereira* Clipper, from China, with accounts dated the 25th February, there had been a great stir in the Opium market; prices which had fallen to Rs. 1530 for Patna advances within forty eight hours to Rs. 1630, and 1470 for Benares. How far these rates would be maintained at the next sale, to take place on the 30th March, was hard to determine; but it was conjectured that if the *Red Rover* arrived in the interim with later advices of a favorable nature from China, it would not be surprising to see an advance on the prices last quoted.—The *Seabrow* which sailed hence on the 26th Feby. at the same time with the *Cecilia* and *Brigand* had arrived at Calcutta on the 25th March, but her letters had not got up when the *Zebra* left."—*Singapore Chronicle 22d April.*

## LATEST EUROPE NEWS.

By the *Tartar*, which came in at a late hour last night from Batavia, we learn that the *Twee Comalisten* had arrived at that port, on the 30th ult. from Cowes the 23rd. Dec., with London papers of 6th, 11th and 18th of that month, as stated in our advices from Batavia, which enable us to lay before our readers the following items of Europe intelligence.

The paper of the 4th Decr. alluded to, notices the death of the Hon. G. A. LAMB—only son of Lord MELBOURNE at the age of 30. Sir FREDERICK LAMB, his Lordship's next brother, is now presumptive heir to the title.

The Money market was improving.

The *Manchester Guardian* says, that a decided improvement had taken place in the demand for goods and yarns—and that business was more brisk than was usual at that period of the year.

A failure of some magnitude had been announced, within a few days, but not being connected with the staple trade of the town, had not produced much sensation.

JOHN LOUDON MCADAM, the road-maker, died at Moffat on the 26th November 81 years of age.

There had been a succession of bad weather and much loss of life at sea with shipping.

Sir ROBERT PEEL had been received at the Mansion House of the Glasgow Universities, and had accepted an invitation of dining there; in a later paper the dinner is styled a "Banquet."

A paper of the 4th December mentioned the interment of CHARLES X. at GORTZ some time in November. The Duke D'ANGOULEME has assumed the title of King of France.

The meeting of Parliament was prorogued from 9th Decr. to the 30th January. The Tories seem to entertain sanguine hopes of some priority holding that Lord MELBOURNE must resign almost immediately.

Petitions for Reform in the House of Lords are being got up in several parts of the country and the Ballot seems to grow more popular.

The Conservatives were active in getting up counter addresses to his Majesty.

Prince de Polignac has been released from confinement and had arrived in London.

*Singapore Free Press 13th April.*

*Important to Mariners.*

The communication of *A Stranger* is so remarkable a production in point of caligraphy and orthography, as well as some trifling peculiarities of style and grammar, that it is rather too rich for insertion, and could scarce obtain this notice did it not supply a valuable hint to some of our navigators who now and then meet with an unforeseen accident at sea. The writer, it appears, has been informed by a native trader that his vessel on its way here from Borneo struck *on Something* which stove in her bottom and compelled all hands to quit her for a canoe they fortunately had in company. Every one on board agreed that it could only be a large fish, as no rock whatever was discoverable! This is a much better way to explain the accident than by "a rock not laid down in any chart," which we think it is high time to lay on the shelf, and we would recommend in substitution thereof "struck upon a large fish" This would be a more plausible tale than most people are aware, as we have the authority of *A Stranger* for stating that a *large reef* was lately seen above water in Torres Straits, which on examination turned out to be a large fish!

*Singapore Free Press.*

The *Champion*, a new English daily paper, calculates that the weight in gold of the national debt is equal to 18,088,473 lb, or to 6029 tons 9 cwts. 3 qrs. and 15 lbs; its weight in silver amounts to 905,666,666 lb, or 119,047 tons 12 cwts. 19 14 lb. To remove this weight in gold would require 12560 one horse wagons carrying 10 cwts. each; these wagons would form a line of 35½ english miles in length. The national debt in sovereigns put flat one on the other would make a rouleau 710 miles in length, and reach from the Lizards, the western and southern-most point of England, to beyond John o Groat's house, the northernmost point of Scotland.

Supposing that the American mines could produce Silver equal to the amount of the debt, it would require a fleet of 476 ships of 250 tons each to transport it to England. *Javasche Courant.*

### ENGLISH MARKETS.

The following commercial information is taken from a London Price Current of the 7th Dec:—

COTTONS, 55*s.* a 60*s.* per cwt. In demand.

GAMBOGE, picked fine, £12 a £15; ord. to good, £5 a £10 per cwt.—fine in demand; stock reduced.

SPICES, *Cassia Lignea*, thin and bright, 57*s.* a 60*s.* per cwt. Demand languid *Cassia Buds* strong flavor, 66*s* a 70*s.* per cwt.

SILK, *Tsatlee*, good to very good (scarce) 26*s.* a 27*s.* fair, about 23*s.* Common and inferior, 20*s.* *Tsussaem*, 16*s.* a 17*s.* per lb. nominal.

TEA.—At the East India Company's Quarterly Sale of Tea, which commenced on the 5th instant, up to the present time very little spirit has been evinced in the biddings generally, and prices have ruled even lower than expected particularly for the Canton Bohea. The following are the particulars of the prices realized.

FIRST DAY.

| | s. | d. | s. | d. | |
|---|---|---|---|---|---|
| Bohea. Wo Ping..... | 1 | 10½ | a 1 | 10½ | Duty paid. |
| good Canton.... | 1 | 11½ | a 2 | 0½ | " chiefly at 2s |
| Pekoe..... | 2 | 7½ | a 2 | 9½ | " |

about 400 chests refused.

| | | | | | |
|---|---|---|---|---|---|
| Congo, fair comn.... | 1 | 1½ | & 1 | 1 | In Bond. |
| strong..... | 1 | 0 | a 1 | 6 | " |
| black-leaf kinds.. | 1 | 7 | a 1 | 9½ | " |

about 1100 chests of Congou refused.

SECOND DAY.

| | s. | d. | s. | d. |
|---|---|---|---|---|
| Congou fair comn.. | 0 | 11½ | a 1 | 0½ |
| superior..... | 1 | 1 | a 1 | 2½ |
| blackish leaf..... | 1 | 0½ | a 1 | 0½ |
| " strong.. | 1 | 10 | a 2 | 3 |
| Pekoe kind..... | 2 | 9 | a 2 | 9½ |

The sale will finish to morrow.

THIRD DAY.

| | s. | d. | s. | d. |
|---|---|---|---|---|
| Congou, fair comn.. | 1 | 0 | a 1 | 1 |
| superior..... | 1 | 1½ | a 1 | 3½ |
| strong..... | 1 | 7½ | | |
| blackish leaf..... | 1 | 11 | a 2 | 0½ |
| Souchong, fair..... | 1 | 8 | a 2 | 4½ |
| Pekoe, very flowery.. | 2 | 1 | a 4 | 3 |
| Twankay, fair comn.. | 1 | 4½ | | |
| good..... | 1 | 4½ | | |

Up to this time about 833,000 lbs. have been refused, viz:

30 000 lbs Bohea.
750 000 lbs. Congou.
20,000 lbs. Souchong.
23,000 lbs. Twankay.

## MEDICAL MISSIONARY SOCIETY.

The consideration of the contemplated Medical Missionary Society in China being deferred until later letters shall be received from friends in England and America, who have been addressed upon the subject, we have much pleasure in acknowledging the liberal subscriptions which have been made to the object. The Ophthalmic Hospital at Canton will in the mean time be supplied with means requisite for carrying it on from this fund.

## WALKING ON HO-NAM.

The following is the principal part of the communication from the Lieut-Governor to the Hoppo's, to which we alluded in our last number.

"Sea Ying-chaou, magistrate of the district Pwan-yu, has made the subjoined report to me, dated the 30th ulto.

"The Hong-merchants, on the 23rd instant, represented to me, that, on the previous day, about 5 in the afternoon, the foreign merchant * * * stated, that, having been walking in company with two other foreign merchants, he was attacked and beaten, at the Mayung bridge, by upwards of ten of the natives there; that he had suffered the loss of a watch and gold chain; and had besides been hurt by the blows he received from sticks and stones. On receiving this representation, I made investigation. Ma-yung bridge, I find, is not a place to which foreigners are permitted to ramble. How came these foreign merchants to go thither unchecked, in opposition to prohibitions, thereby causing disturbance! I immediately sent the police, with a linguist and Hong-merchant, to proceed to the place and examine it; and at the same time directed the police to search for and apprehend the parties guilty of striking and injuring the foreigners, that they might be in custody [illegible]

"'Afterwards, the policeman sent by me brought before me a person whom he had apprehended named Le Apin. This man, being questioned, deposed, that he is 30 years of age, and a native of the district Sanshuy; that he has opened an incense shop of Mayung bridge, under my jurisdiction; that, on the 22nd instant, three drunken foreigners were passing his shop-door, when they fell in with a number of women and girls returning from picking tea; that the foreigners stopped the way with the sticks they held in their hands, and began to sport with the women and girls; that he, seeing this, could not bear it, and went forward to rebuke and prevent it; but was knocked down by the foreigners, who then ran away; and that there had been no foreigner struck, or watch plundered.'

"'When I was on the point of proceeding to make personal investigation, the Hong merchants again represented, that the foreign merchant * * * stated his left and right thighs, and his left fore arm to have been wounded by the blows received from sticks, but that, the wounds being slight, he begged that an examination of them might be dispensed with. * * * *

"'The above report having reached me the Lieut.-Governor, I wrote in answer:"—

"'I find that foreigners residing in Canton have certain appointed limits within which to walk, and are not allowed to ramble about as they please, lest they cause disturbance. Yet have these foreigners dared to act in opposition to the restrictions, and presumed to go to the Maying bridge, strolling about, and audaciously stopping the women whom they met, and sporting with them. Such conduct is in the highest degree destestable Le Apin, the owner of an incense shop on the spot, having chanced to see what took place, did very right in rebuking and preventing it; and the foreigners show themselves still more perverse and unruly in making a complaint to the Hong-merchants, bringing false charges of assault and robbery. * * *

"'To be brief, the Hong-merchants and Linguists are held responsible for restraining the foreigners. If they dare to join with them in illegalities, it will indeed be impossible to grant indulgence towards such an offence. And if their offence be merely want of strictness in their restraints on them, even so they cannot wholly exculpate themselves.'

"'With regard to the representation of the foreigner, that he was assaulted by the people of the place, and deprived of a watch, &c., it is necessary to ascertain truly whether it were so or not, in order to satisfy the men's minds. Let the judicial commissioner, in concert with the commissioner of territory and finance, immediately direct the prefect of the department, that he instantly assemble the Hong-merchants, and closely examine them, why this occasion of disturbance had not been prevented by previous measures on their part, and in what way they have so indulged the foreigners and connived at their conduct; also that he examine the people of the place, as to the fact, whether there was or was not an attack made and robbery committed; and that he speedily report in answer, that severe legal measures of correction may be thereupon adopted.

# CORRESPONDENCE.

## TO THE EDITOR OF THE CANTON PRESS,

### Rewards and Punishments.

Mr. Editor,—These, taken with respect to the welfare of moral government on earth, are of vast consequence, and, like all human institutions, they are much abused.—I wish to draw your attention to the subject of Rewards, reserving to myself, with your leave, an after letter on punishments.

Rewards then—so long as an honor is kept for, and only given to, the really meritorious, *that honor being esteemed by the public a just gift*—places the receiver above his fellows, and is a sure letter of credit for respect through after-life.

Such a reward once given to an unworthy object, or for favor without merit, ruins the whole object of the reward, confuses and mixes up the deserving and non-deserving, and destroys the engine.

So with that brilliant cross of the legion of honor.—In Napoleon's hands, given to merit, it was the stamp of honor on the breast that wore it!—in Louis' (*le desiré's*) hands it was not worth the ribband that suspended it.

The sentiments that flow here were forced on my mind by a letter of thanks sent out to Capt. Blackwood R. N. by the Lords of H. M. Admiralty for his passage of the Boca Tigris with the 'Imogene' and 'Andromache' brigates during Lord Napier's struggle here,—I have the honor of Capt. Blackwoods acquaintance in private life, I have every desire to be respectful to him here, and if I implicate him in my argument, it is as to judgment merely, not as to good intention or as to high courage.

Capt. Blackwood has received the thanks of the Lords of H. M. Admiralty for his passage of the Boca Tigris.—I consider the whole circumstances highly dishonorable to the British Flag—injurious to our country's character in China—and therefore deeply regret such thanks being given, and most sincerely wish, under the difficult circumstances Capt. Blackwood was placed in, that the thanks had been bestowed for not coming *in at all!* or for effectually doing his work when *he did come in.*

Capt. Blackwood did neither of these; his was a weak, futile, half measure, abortive, and most unsuccessful in all it's parts.

Let us examine the affair for which thanks are given:—Capt Blackwood came to support Lord Napier in a matter of policy,—well—the political part was *a most signal failure!* so no thanks are due for that!—next Capt. Blackwood was fired at in coming through the Boca, and H. M's flag flying at the mast-head—did he do his best to resent the insult? he did not!—the forts in front are imposing, dangerous, (in good hands) to the best vessel that ever bore guns—but in the rear they are utterly defenceless, and many officers of these two ships will bear me out in saying that the boats and marines of these two frigates could have taken any one or all of these forts by a *coup de main* with very little expense of human life. Instead of this Capt. Blackwood effects his passage, leaves a most dangerous enemy in his rear; *irritated!* not *destroyed!* and goes up to Whampoa for the ostensible purpose of *protecting* and bringing down the fleet of British merchant-men, and commniciating with, and bringing off, Lord Napier.

Does he communicate with Lord Napier? No! —does he attempt it? No!—he is by a gentleman (now in Canton) informed *Lord Napier was a prisoner!* does he mark the character of the meteor-flag by a try to bring off one old brother officer? Not he indeed—he takes eight days to come from Chuenpe to Whampoa, a passage generally made by merchant vessels in three, *and every day of delay the loss of a point* in position to Lord Napier; and he sail down again *secured by a Chinese letter of license*, through those very batteries he had the power of destroying, and when he returned still formidable.

For these deeds Capt. Blackwood receives a letter of thanks!—I hope on the next occasion of a well fought and successful engagement of a British ship with a foreign adversary of superior force, the Lords of the Admiralty will not insult the brave commander by *their* thanks.

"LEGION OF HONOR."

15th May, 1837.

### LETTERS FOUND.

Dear Mr. Editor,—It is rather singular that in this age of finding *authentic letters*, I dropped on one to Howqua, but being of finer feelings than your Cotemporary, I reserve the signature, and send you a Copy.

A

"Dear Howqua, ‡

"You know I am past the age of making a woman my God—you also know I am a quiet foreign trader confined by law to my own factory, which law, you also know, I most strictly obey!—still, (though I am half a century old) as far as fair sex goes, I have a spice of Adam in me, which only wants excitement.

How is it then you permit 20 to 30 of these girls coming over to pick the fragrant tea, to pass before my window every morning when I am dressing! Fairy, lovely as angels, stag necked, moon-eyed, feet small as a deers', waist like a rainbow;—in the evening again these attractive creatures return, each bathing her beauteous feet and ancles in the flowing stream. You must fancy me wood and mortar to resist!—and proof shews your su position is right.

But beware! men from my country, of age different from mine, sometimes from the loop-holes of my house look out on those charmers; and if you persist, mark my words! Honam will be stormed—your tea-pickers will perform the part of the sabine virgins—virgins no more—and a new race be produced. (————)

18th May, 1837.

## TO THE EDITOR OF THE CANTON PRESS,

### The Post-Office.

Sir,—I am informed that there is a post-office in Canton and Macao, with a branch at Lintin, yet letters are quite irregular in their delivery? The Postmaster has charge of the post-office, but who has charge of the post-master? I received letters only yesterday by a ship that has been in two or three weeks, and if you think that I am alone in my grumbling, you are confoundedly mistaken, for I hear all my neighbours complaining about the same thing.

If you will give this a corner in your esteemed paper, it may bring the point before those who can prevent it, and it will oblige your humble servant,

A CONSTANT READER.

Canton, 19th May, 1837.

### Trade in Canton.

Mr. Editor,—I am one of those who have come to Canton to make a living out of the trade. I cannot find a single article in the list of imports which gives a profit, so I of course hope for better from the exports. I would, that is if I could, but this is worse than the other. Silk and Tea are losing articles. Now I pray you Mr. Editor, point out to me how I am to advise correspondents about Canton. I find all the Hong-merchants who are willing to buy cargo, are not trustworthy. I cannot keep goods on hand, particularly if I am ordered from home to sell. Pray, say what I am to do? I cannot make out if I am safe in selling to a Hong-merchant, and if I am not, who am I to sell to? And I am told that if I go and buy goods, that I shall in future have to pay a Tael or two per Peeul on Tea, and 10 Dollars or more per bale of silk for the benefit of others. Pray what have I got to do with the old debts of others? Let very tub stand on its own bottom say I, and if the old hands ask the new ones to pay for their losses, let the new ones tell them that they will see them in *purgatory* first. 86 says

ONE OF MANY.

Canton, 16th May, 1837.

### The Hong-merchants.

Mr. Editor,—I have, I think, a right to ask you as to the state of the Hong-merchants. I am a subscriber to your paper, and I have some reason to expect that you will give us *all* the information in your power, and I am sorry to say that I see *none*. There can be no fair reason for your secrecy, and it is not doing justice to your subscribers to keep it back. I do not want to hurt any of them, but I think that it is your duty as Editor of a public paper to tell *all* that is of importance. Pray Sir, is not the state of the Hongs an important subject? I think it is, if you do not, and I do not think that you are doing your duty to your subscribers and the public, while you keep back what is of importance to all. Let all know, Sir, what state the Hongs are in. It is what you ought to do. I am,—

Sir,

Your obedient Servant.

A READER.

‡ This letter must have been addressed to Howqua in consequence of his stating that himself as well as some of his Chinese friends believed that the eagerness of foreigners wishing to walk on Ho-nam arose chiefly from the attractions of the Tea-pickers; a supposition however derogatory to the morality of the foreign residents, is still less flattering to their taste, the females in question being any thing but well favored, graceful, or tidy in their persons, but quite the contrary.—Ed. C. P.

### Another note found. *

Names are but nought, to find a note I'll *fudge!*
And thus I'll gratify a private grudge,
To whom I leave the Public world to guess;
Or A—S—K the Editor of the Canton Press.

What care I for the world? I'm Lord and Magister,
And own the glory of the Canton Register!
Subscribers I despise! I'll not depend,
On them! My articles they cannot comprehend

Their poor and narrow intellects I truly pity,
Some extracts and the great "*Provincial City*"
Are all I'll deign to give—For those at home
There's "*a trite historic of this Kingdome.*"

From deep chagrin I own I'm not exempt,
My last attack was treated with contempt,
And now I fear 'is known both wide and far
The Canton Press' Victory in the "wordy war."

In open field, defeat I but sustain;
By under handed means, perchance I gain;
I'll use them then, and will not blush,
So that, thereby the *Canton Press* I crush.

# CANTON PRESS.

May 20th 1837.

Our Cotemporary of the *Register* has thought proper to publish a private note addressed to the Editor of this paper, which the *Register* states to have been found in one of the Hongs and handed to him. We leave it to the public to judge of the propriety of such miserable expedients to which the *Register* has recourse; the note was addressed to us about an extract on the Chinese laws regarding the trade with Kiachta, which extract we published a fortnight ago, and which had nothing whatever to do with any differences we, or any body else, might have with our Cotemporary.

As to the thing having been published, we have no reason to regret it, nor has the friend who addressed that note to us, but what readers it painful to us is, that we have every reason to suspect that the note was not *found* but *stolen* from our dwelling house with the view of making mischief. The scoundrel who committed the theft, has sheltered himself behind the promise of secrecy our brother Editor has as he informs us, given him, and will, we imagine, from time to time *find* other notes to fill the columns of the *Register*.

We have had several arrivals during the week, from Bombay, Madras, the Straits, and Java. Accounts from Europe to the 24th December had reached Batavia, but we are not in possesion of any news of political interest. Dreadful gales, such as in violence have not been equalled in the last 20 years, had done much damage in the Channel. The so long expected *Sarah Barry*, we hear, sailed from London on the 9th December; we hope she may not have been a sufferer.

The *Helen* is the latest arrival from Bombay and Singapore; by her we have received a Singapore Free Press of 27th April, having received the earlier papers by the *Thames* as well as Chronicles to the 23d. We give several extracts rom those papers.

In another place will be found part of the Hoppo's and the Lieut. Governor's edict regarding the late occurrences at Ho-nam to which we have given insertion chiefly to shew the little weight allowed to evidence of foreigners, the circumstances as there detailed having been deposed to by three foreign Gentlemen, whilst their denial is given by only one Chinaman, and this latter is believed by the Lieut. Governor, who calls the foreigner's statement a false accusation of assault and robbery, though he evidently contradicts himself, when saying at the end of his document that these circumstances must be enquired into to satisfy men's minds, thus prejudging the case before examination.

The statement that the foreigner, who was wounded, did not wish to have his wounds examined, is perfectly incorrect. It was demanded by him that such an examination should take place, but the district magistrate asked 200 Taels for such visit, which the bankrupt merchant, by whom the ship in which this gentleman came passenger, was secured, was unable or unwilling to pay. The accusation of the foreigners having been drunk, is equally false, as well as that of their having sported with the tea-picking girls, since we have been assured that not only did they not molest them, but that, on the evening in question, they did not even see one of them.

It is well known that many have been the Edicts issued against foreigners strolling about, but as such laws expose us to great inconvenience, they are continually being broken; if however, in our walks on the other side of the river, we should happen to be ill treated by the mob, it appears to us that an application to Government for redress is not likely to be attended to, they having given frequent warning against our going. We would recommend to any one, meeting with ill-treatment at Ho-nam, to bear it quietly, if he be the weaker party, as an application to the authorities cannot possibly be successful, but will close Ho-nam to us longer than would otherwise be the case.

## BOMBAY.

We have seen a letter from Bombay of 19th March, brought per *Helen*, of which we give the following extract.

"The nominal price of Opium is 1025 a 1030 Rs. per chest, without any sales being made. New Cotton Surat at 162—Dholera and Cutch 140 Rs Mangalore 130 Rs. per Candy. Freight to China 22 a 24 Rs. per Candy. To London £4.10 a 4.15 per ton.

The *Hannah* and *Good Success* are to leave in the early part of April, and have on board upwards of 2500 chests of Opium. The *Scaleby Castle*, commanded by Capt. Morgan, is also to leave in the middle of the same month.

Many of our friends have this week favored us with their correspondence. "Legion of honor" we believe to be correct in his statement as to the tardy manner in which the *Imogene* and *Andromache* proceeded up the river, and we agree with him that the services which these ships rendered under Capt. Blackwood's command were not of importance sufficient to call forth the public approbation and thanks from the home Government. Why that unfortunate and ill judged expedition should thus again be recalled by the authorities to the remembrance of the public, we know not. The letter from our Co-respondent "A" speaks for itself.—the Hong-merchants, responsible for whatever foreigners do, do what they can to restrict their opportunities to get into mischief. We received the communication of "A Reader" at too late a time for us to be prepared to answer his questions; and we think he is mistaken in saying that we have not given to the public as much information about the hongs, as the Public had a right to expect—witness our paper of last week and many former ones. Our correspondent surely does not expect us to give publicity to the names of such of the Hong-merchants as are suspected of being insolvent; this would be attacking individuals, and might be alike hurtful to the parties named and their creditors. We shall next week recur to the Hong-system, and hope to satisfy "A Reader." "One of many" complains of the insecure state of the trade here and of its being unprofitable, both as to Imports and Exports, and that the former can only be disposed of to such Hongs whose credit is not satisfactory, and that the latter are threatened with a new impost in order to pay the debts of bankrupt Hongs. Our answer to this Correspondent's remarks will be contained in the remarks which we intend to make on the subject of the Hongs in our next number.

We disagree *in toto* from our Cotemporary, when, in his last number, he proposes to close the charity now dispensed by means of the Ophthalmic hospital, until forsooth, foreigners shall again be permitted to walk on Ho-nam. Desirable as it no doubt is to have the privilege of rambling about at will, we do not see in what relation a walk at Ho-nam stands to the Ophthalmic Hospital, nor do we believe that, if the Viceroy were made acquainted with the threat of closing it against the afflicted, he would do away with a law which seems to have existed almost ever since Europeans had intercourse with China; such application would have another effect than an order to shut up the Hospital forthwith. Our Cotemporary forgets that the Hospital, however great the good which it dispenses, is only *suffered* by the local Government, and that it probably would cease to exist as soon as it became mixed up with any quarrels foreigners may have with the Canton government. The jealousy of the Chinese is such that officially they only suffer *traders* to come to Canton, and that only for a season; a regulation which, it is true, is not much attended to, but it exists, and may be called into life at any moment. But granting even that the Viceroy appreciates, as he ought to do, the advantages his subjects derive from Doctor Parker's skill and humanity, how would it become the founder of an institution purely benevolent, not looking for reward to wordly things, to ask that, in payment for such benevolence, some advantages be secured to him and other foreigners?

We are certain such a thing would never be thought of, though we are also persuaded that the silent appeal of the Hospital through its works, will in time contribute towards changing the opinion the Chinese have hitherto affected to have of foreigners.

It is so rarely that foreigners have it in their power to break through the thick web of falsehood and deceit with which it is the known policy of the Chinese to surround them in all and every way, that we cannot but look upon it as a fortunate accident, when any disclosure, however small, is arrived at. If all the connexion between us and the Celestials, was, as the sailors say, "plain and above board," the task of correction would not be as now, too difficult almost to hope for success in; but it is mainly our ignorance of these cabals and intrigues of the government officers that places us in their power.

It is customary for the consignee of each ship when ready for despatch, to send in a *pro forma* application to the Hoppo, stating that the ship has completed her export-cargo and that the duties are paid, requesting that orders may be issued as to the "Grand Chop" as the port clearance is called. This is written in English and handed to the ship's linguist. Accident has put a friend of ours into possession of the truth as to this, and we subjoin a translation of the application as metamorphosed by the Linguist or Hong-merchant, before it can meet the eye of the Viceroy or Hoppo.

### "Translation of Foreign Petition. *

"N.. foreign merchant, begs leave to address your Excellency wishing you all happiness and prosperity. The vessel he commands, came to Canton laden with *Rice*, on which account he has to acknowledge the gracious remission of the measurement duties, coupled with the permission to receive on board an export cargo. The goods he has purchased from the several hongs are the following ..... *The accounts have been all cleared, and there are no outstanding debts on either side.* The wind and weather being now favorable, he wishes to set sail and return home. He therefore supplicates your Excellency to grant him a port-clearance, that he may be enabled speedly to return to his country for which he will be profoundly grateful.

Translated by the Linguist ————, this day of

In this it will be seen, that it is taken for granted by the Chinese authorities that foreigners declare that no debts are owing, on either side, when the ship sails, though they well know that the agent means to report and does assert no such thing. This may, in case of a claim for payment of debts by any of the Hong-merchants, be made a fearful weapon in the hands of the Chinese, and it was, in fact, the information that this was to be brought forward in the case of the Hing-tae Hong, by the Governor, that drew our informant's attention to the subject. We shall in our next return to this subject, and hope to arrive at the elucidation of other points of similar nature and importance.

* The above lines, a friend tells us, were picked up by him in one of the Hongs; we hope he came honestly by them.

* This translation refers to an application for a chop for a rice ship; those for other ships are the same with change of course as the cargo may be.

### OFFICIAL NOTICE.

THE Commanders of British Vessels arriving at Whampoa are requested to call at the Office of the GENERAL CHAMBER OF COMMERCE in Canton for the purpose of filling up a form setting forth the tonnage, number of men, &c. &c. of their respective vessels.

And Commanders of British Vessels arriving at Lintin *and not proposing to proceed to Whampoa* will be pleased to repair on board either of the Ships "JANE" or "HERCULES" for the purpose of filling up the aforesaid forms.

## *SHIPPING INTELLIGENCE.*

ARRIVED.—British. *Thames*, Hornblow, from Madras. American *Stag*, Burnham, from Batavia. Swedish *Cecilia* Beckmann, from Sourabaya. British *Helen*, Setford, from Bombay March 20th and Singapore April 27th.

SAILED or DESPATCHED.—American *Niantic*, Doty, for Newyork. *Alasco*, Keating, for Manila. *Osage*, Furber, for Newyork. *Albion*, Putnam, for Newyork. British *Lady Grant*, Jeffrey, for Bombay.

PASSENGERS.—Per *Osage*, Mr. and Mrs. O. H. Gordon, Miss White, Messrs. W. W. Scarborough and W. C. Goodhue.

In our last as passenger per *Lord Lowther* we mistook Mr. Samuel Anderson for Lieut. Anderson, and omitted Captain Wilson late of the *Alexander*.

The *Emily Taylor* we are told, sailed for Boston early in April.

The Passes granted at Bombay for Opium up to the 8th instant, amount to 17,346 chests—imported out of which 16,014—exported 9,651—besides that exported from Damaun. The whole of this year's Malwa is estimated at between 21 a 22,000 chests. It was expected that prices would go still much lower. (They are quoted 1025 a 1030, Rs., nominal). Most European houses had abstained from making advances on the drug.

The *Helen* spoke the Barque *Anna* off Cookin Roads, having on board of her the crew and Passengers of the unfortunate *John Bannerman*. The *Charles Grant* and *Bombay Castle* had not arrived when the *Helen* left, but the former was reported at Bombay to have been seen past Point de Galle on the 21st February.

By the *Amelia*, from Batavia the 10th inst. we received *Java Courants* from the 14th ult. to 9th inst. inclusive, from which, and private advices, we give the following Anjer Shipping Report:—

March 20th Brit. ship *Orwell*, J. R. Lancaster, from China 23rd Febr. for London.
" 24th Am. ship *Horatio*, W. Howland, from New York, for Canton.
April 1st Am. ship *Regulus*, G. Vanner, from Canton, 16th March, for Boston.
" " Brit. brig *Derwent*, C. J. Nash, from Singapore 24th March, for Liverpool.
" " Span ship *Conception*, J. R. Tribiana, from Manila 8th March, for Santander.
" 7th Brit. ship *St. Vincent*, from Sydney 5th Febr. for Batavia.
" " Am. ship *Ellen & Sam*, from New York 9th Decr. for Batavia.
" 8th Dutch ship *Admiral*, from Liverpool 23rd Decr. for Batavia.
" 10th Dutch ship *Johanna*, from Rotterdam 26th Decr. for Batavia.
" " Brit. ship *Hero*, from Liverpool 23rd Decr. for Batavia.
" " Brit. ship *Scotia*, from Sydney 10th Febr. for Batavia.
" " Brit. ship *William Hunt*, from Sydney 13th March to Anjer for orders.
*Singapore Free Press 27th April.*

The *John Fleming* and the *John Dugdale* are loading for Great Britain.

LATEST DATES from ENGLAND, 24th December via Java. UNITED STATES 2nd December per *Horatio*. CALCUTTA, 22th March via Singapore. SINGAPORE, April 27th per *Helen*. JAVA, 31st March, per *Stag*. MANILA 23rd April, per *Alasco*. BOMBAY, 19th March, per *Helen*.

VESSELS EXPECTED.—From ENGLAND, *Sarah Sherry*, Cossler, *Formidable*, Slade. JAVA, *Courrier de Manille*, Am. CALCUTTA, *Antonio Pereira, Mary Anne*. MANILA Bombay, *Rosanna, Eleanor, Good Success, Hannah, Bombay Castle*. UNITED STATES, via Manila, *Rhine* and *Swan*.

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER.

BOATHIRE IS PAID BY THE SELLER

NOTE. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Cambrics Sattpeire, Ginseng* and other Goods on which the duties at Whampoa are high.— Ships with *Rice, Cotton &c.* sometimes discharge at Macao or tranship their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary Stationery, Cutlery, Crockery ware, &c.*, for foreigners consumption, are sold at Auction duty paid.

*Note. Alum*, and *Cassia* are procurable cheaper at Lintin, Macao, &c; and *Raw Silk, Silk* piece goods &c., are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

| Australia ... .. | | ,, direct ..... | 3 2½ | Lintin &c.... ..... | ½ dr |
| Sand. Islands .. | | France ..... | 3 2½ | | |

Note. Above rates are from 20th April to 20th Oct. annually: during remaining 6 months the premiums are somewhat higher. Risks on Blocks are $ 9 per Cent per annum, $ 4½ for 6 months, $ 2¼ for 3 months and $ ¾ per month.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874756 of a Tl. per cubit.
2nd ,, ,, ,, 1200 do. & under 1600 ,, 0.7221091
3rd ,, ,, under 1200 do. 0.5062341 ,, ,,

N.B. The cubit is 14¼ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 4300 to $ 4320; 2d class from $ 3700 to $ 3780; 3rd class from $ 3700 and under. The Comsha or Present Fee is paid by all vessels 1600 Tons or upwards. Linguists fee $ 173½ and Comprador's fees $ 50. Also Pilotage $ 8 per foot upwards and rewards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.,

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—The demand for Longcloths continues lively, but at no sensible advance of price.

COTTON YARN.—with moderate enquiry, continues at the same prices.

WOOLLENS.—Longells are in better demand, and prices have advanced to our quotations.

STRAITS PRODUCE.—Tin continues to decline, and we have again reduced our quotations. BETELNUT also has given way, and 2½ a 3 $ per picul are the highest prices obtainable.

RICE.—The weather, during the past week, has been rather unfavorable, but little or nothing is yet doing in foreign rice, though the stock on hand is very large, holders are firm, and prices continue nominally the same as before. An advance in price is looked for.

COTTON.—As we anticipated, the market has been influenced by the arrivals from Madras, and the *Helen* from Bombay, and there have been very few transactions during the week, the holders being unwilling to submit to any material reduction in price,—but with the arrival of further supplies present quotations cannot, we fear, be supported.

OPIUM.—With the exception of the deliveries to the Junks and at Macao there is no favorable change to report in the Opium market, the stoppage of the trade up the river continuing in full force. Until the arrival of the *Helen* there was rather a brisk demand for *Malwa* at $ 540 @ 545, and as high, we believe, as $ 550, but the accounts of the very heavy supply to come on, and a considerable quantity close at hand, in the *Eleanor, Good Success* and *Hannah* has alarmed the dealers, and sales, it is said, have since been made at $ 540. The new Bengal drug continues almost without enquiry at our low quotations.

The Lintin deliveries to the 15 h were. Patna, *Old*, 24; *New*, 133; Benares, *Old*, 37; *New*, 29; Malwa, 358½; Total 581 Chests.

### EXPORTS.

RAW SILK.—Owing to the unfavorable weather, the quantity yet brought to market is very small, and quality inferior, for which high prices are asked.

TEA.—Letters have been received within the last few days from one part of the black tea-districts, which state that the Pekoe and the first gathering of the Pekoe Kouk Congou from that part of the country were likely to prove short and of indifferent quality. There was also a considerable demand for the Russian market.

# THE CANTON PRESS.

VOL. 2d. No. 38. CANTON, SATURDAY, MAY, 27TH. 1837. No. 90.

## CHINA AND RUSSIA,

*From "Lettres édifiantes et curieuses."*

'Twas about this Time (1689-90) that a report prevailed, that a peace would be concluded between the *Chinese* and the *Muscovites*. We were greatly surprised to hear that this Nation, which is so near to us in *Europe*, should be at war with the *Chinese*. They had found means to make a passage from *Moscow*, within three hundred leagues of *China*; going first through *Siberia*, and over various rivers, as the *Irtisch*, the *Obe*, the *Jenisea*, the *Angara*, which comes from the lake *Baical*, situated in the midst of *Great Tartary*. They afterwards went upon the river *Selenga*, and advanced up to that called by the *Tartars*, *Sanga-kien-sola*, and by the *Chinese*, *Helon-kiam*, or the *River of the Black Dragon*. This great river crosses *Tartary*, and empties itself into the Eastern Sea, to the north of *Japan*.

The *Muscovites*, not being satisfied with making these discoveries, built at certain distances, forts and towns on all these rivers, to secure the possession of them. Those nearest to *China* were *Selenga*, *Nipchew*, and *Yacsa*. The first of these places was built on the river *Selenga*, the second on the *Helon-kiam**, in the 52d degree of north latitude, and almost under the same meridian with *Peking*. The third place stood on the same river, but much more eastward.

The *Eastern Tartars*, subject to the Emperor, who inhabit the vast extent of country which lies between the great wall and the river *Helon-kiam*, were surprized to see the *Muscovites* come and contend with them for the hunting of sables, in a country of which they claimed the possession, and to build forts in order to seize upon them. They therefore thought it incumbent upon them to oppose this attempt, and for that reason took *Yacsa* twice. The *Muscovites* were resolved to be masters of this fort, and accordingly retook it again; so that as new feuds and contests broke out every day, it was thought necessary to put a stop to them; and accordingly proposals were made on each side, to settle the limits of the two Empires. The Czars of *Muscovy* sent their plenipotentiaries to *Nipchew*. The Emperor of *China* sent also his ambassadors thither with father *Thomas Pereyra*, a *Portuguese*, and father *Gerbillon*, to serve as their interpreters. As a testimony of the esteem he had for those fathers, he gave them two of his own dresses, and ordered them to take place with the *Mandarins* of the second class; but as those officers wear, at the neck, a kind of rosary, which is as the badge of their dignity, and as this is thought to be somewhat superstitious; he allowed the Jesuits to wear at their neck, their own chaplet of beads instead of that of the *Mandarins*: they being sufficiently distinguished by the cross and medals, which hung at them.

Sometimes certain important opportunities offer themselves, which prove of service to a missionary who is master of a little address, and of an engaging carriage†. Father *Gerbillon* made a good use of that which presented itself. As he was come from *France*, in which frequent mention is made of the interest of princes; and where the wars that are perpetually carrying on, and the treaties of peace which are concluding, give rise to a thousand reflections, with regard to such particulars as may be of advantage or prejudicial to a nation; he hit upon expedients to reconcile the *Chinese* and *Muscovites*, who could not agree upon one single point, and therefore were going to break off their conferences. The *Muscovites* were proud, and talked in a most haughty style; whilst the *Chinese*, on the other hand, imagined themselves to be superior in force, they being come with a good army, and expecting another from *Eastern Tartary*, which was going up the River *Helon-kiam*. Nevertheless they did not design to engage in a war, for four least the *Eastern Tartars* should join the *Muscovites*; or, that these might succour the *Tartars*, in case any design should be formed against *China*. Hence they wished for peace, but were not able to bring it about. The two Fathers, seeing them thus embarassed; and discoursing with the *Chinese* concerning the difficulties which obstructed the negociation, were told that the Emperor of *China* would consent that the *Muscovites* should come anadally to *Peking* and trade there. *If that be the case*, replied father *Gerbillon*, *he answred, that it will be no very difficult to conclude a peace with the* Muscovites; *and to prevail with them to acquiesce with all your desires.* The *Chinese* plenipotentiaries listened to the father with pleasure, and intreated him to go to the *Muscovite* camp, and tell the parties concerned these several particulars. Accordingly he went thither, and Heaven gave a blessing to his endeavours; for the *Muscovites* being convinced, that the liberty of trading to *Peking* every year was the highest advantage they could expect, which the father proved evidently; they immediately gave up *Yacsa*, and accepted of the limits proposed by the Emperor. This negociation lasted but a few hours; the father returning that night with the instrument of a treaty of peace ready drawn up, which the plenipotentiaries signed two days after; swearing solemnly at the head of their troops to observe it; and calling to witness the God of the *Christians*, the true Lord of Heaven and Earth, that they would inviolably keep all the articles of it.

---

The following beautiful inscription, was in the year 1711, in his own handwriting, presented by the Emperor Kang-he to the Jesuits at Peking, for their new Church at the *Cun-ching-mun* gate. The characters of the first inscription are two and a half, and those of the two last, one cubit in length.

*Inscription on the Front.*

TO THE TRUE PRINCIPLE OF ALL THINGS.

*Inscription on the first Column.*

He is infinitely good, and infinitely just; he enlightens, he supports, he rules all things, with supreme authority, and sovereign justice.

---

* The river on which *Nipchew* stands, is called *Schilka* in *Moll's* Maps.

† Few people doubt the ability of the Jesuits on these occasions, politics are thought to be their grand study, and the centre to which the rest of the sciences which they learn are directed. These fathers consequently could not possibly have found a more favourable opportunity for ingratiating themselves with the court of *China*. We may observe the artful manner in which this letter-writer expresses himself; he does not say that his brother Jesuit (*Gerbillon*) had made politics his study *ex professo*, but only that coming from a country where politics are often the topic of conversation, he, by that means, had some notion of them.

*Inscription on the second Column.*

He never had a beginning, and will never end. All things were created by him from the beginning; they are governed by him, and he is the true Lord of them.

---

## NEWS FROM ENGLAND.

*To the 3rd February.*

The *Hugh Lindsay* steamer arrived at Bombay with the February overland despatches on the 30th March, and our portion of them was brought on by the *Hannah* from Bombay.

The principal political items which we gather from the Bombay papers, are the following.

Parliament was opened on the 31st January, and the King's speech read by the Lord Chancellor.

The administration of Lord Melbourne was apparently well supported.

An order of merit of two classes had been instituted by the Court of Directors; it is to be denominated "The order of British India" and to be conferred on native officers and sipahis.

The project of steam-navigation on the Euphrates has been abandoned.

The Carlists have suffered a complete defeat before Bilboa. The Christinos commanded by General Espartero were assisted by the British men of war under Lord Hay. It seems however that the advantages thus gained over the Carlistas have not been duly followed up, and that they are again collecting large numbers wherewith to continue the war. The Queen's government is without money to give energy to it's measures, and the forced loan was only raised by confiscating the property of the refractory.

The Dutch Government has admitted it's inability to discharge its pecuniary engagements regularly. The difficulty of it's situation, and the existing embarrassment in the money-market generally, are alledged as excuses for the defalcation. It is promised however that arrangements shall be made, satisfactory to the holders of Dutch stock. The obstinacy of the King in refusing an amicable settlement of the Belgian question, is the real cause of the dilemma in Holland.

M. de Chateaubriand has become Governor of the Duc de Bordeaux, with a salary of 100,000 frs.

The Archbishop of Paris has warned his clergy not to say masses for the soul of Charles X.

The British merchant vessel, the *Flora*, laden with merchandize, was seized by the Russian authorities in the bay of Soujakale in the Black Sea, on pretence of her having gunpowder on board, which latter is denied by her owners.

Sir Charles Malcolm has been promoted to Rear-Admiral, and is permitted to retain his appointment as superintendent of the India Navy.

Marshal Clausel's expedition for the taking of Constantine (Africa) has been a complete failure.—Of more than 7000 men with which he set out, only 1200 returned to Bona. This misfortune is chiefly owing to the bad roads and weather which the army had to encounter, most of the soldiers having died of cold and disease.

Another attempt has been made on the life of Louis Philippe. Whilst proceeding in a close carriage, with three of his sons, to open the French Chambers, a ball was fired into the carriage which entered the front window and went out at the back, narrowly missing Louis Philippe. The Duke of Orleans was cut on the cheek by broken glass. The assassin, whose name is Meunier, has been arrested.

The accomplices of Louis Bonaparte in the Strasburg revolt have been acquitted.—Of their guilt nobody had any doubt, and the prisoners themselves avowed it, but the jury refused to convict them, partly because it was known that the Government, from the very commencement of the plot, was aware of it, and ought therefore to have prevented it, and partly because the chief criminal, Louis Bonaparte, had been illegally withdrawn from trial. The latter has been sent to North-America.

The plague was at Constantinople.

The influenza was committing great ravages, and spreading all over England as well as the Continent. In London alone 1000 deaths occurred on one day within the bills of mortality. This illness is said chiefly to attack people in the better conditions of life.—In Paris many of the Deputies were unable to attend the Chamber on it's account, and in Berlin the malady was very destructive.

Such quantity of snow had fallen in and about London in December, that business, during a few days, was almost suspended.

A counter-revolution was attempted to be got up in Lisbon on the 4th and 5th of November, the particulars of which occurence we do not meet with, except that the Queen being considered in danger, a party of marines from the English ships was sent on shore to protect her person, though with strict orders not otherwise to interfere between the contending parties. Don Miguel is again making demonstrations to enter Portugal, and has found means to circulate a proclamation notifying his intended approach as legitimate King of Portugal.

We noticed in our last that a violent gale at the end of November had caused much damage to the shipping in the channel; we regret to find that it has been equally violent and destructive on land over almost the whole of England. Numberless houses have been thrown down and unroofed, chimnies swept down, and many people have lost their lives by the falling of tiles and other brick work. Among others the Chainpier at Brighton has been destroyed.

The moneymarket was in any thing but a satisfactory state, there being much want of money felt among merchants.—For particulars of prices etc. we refer to another column. Several failures had taken place, among which are Messrs. Barber Neste & Co. of London, shipping agents, & Messrs. Coupland and Duncan of Liverpool. The old banking house of Esdaile & Co. had stopped payment, but for a few hours only, having been enabled, by the assistance of the Bank of England and other London bankers to go on again. Messrs. Medley, Scott, & Co., extensive bill brokers, have also stopped payment.

From the prices of stocks, which for 3 per Cent. Consols are quoted at 89¾ a ¼, it would appear that an improvement was soon expected, or that the scarcity of money cannot be very general.

---

## LIVERPOOL PRICES CURRENT, &c. OF EAST INDIA PRODUCE.

FOR THE MONTH ENDING 31*st January* 1837.

Throughout the present month, the transactions in East India Produce, with but few exceptions, have been on a limited scale, and some articles have experienced a serious decline, not arising so much from heavy stocks, but mainly owing to a continued pressure in the money-market, causing buyers to act with great caution, and merely purchasing to supply their immediate wants. The decline in Silk, both Chinea and Bengals, from the highest point in April last year, is fully 8s. per lb.; prices, however, at that period were forced on by speculation, and both manufacturers and dealers have sustained serious losses; it is probable the market will continue in an unsettled state for some months, and if sales are forced at present, prices must give way.

CAMPHOR.—20 cases have been disposed of at £3 5s per cwt.

TEREA JAPONICA continues to decline in price; the sales were 300 baskets, early in the month at 20s, and latterly at 18s per cwt.

TURMERIC.—540 bags at fine quality were disposed of at 19s. 3d. to 20s. 6d. per cwt.

SPICES.—Cassia Lignea—100 boxes were sold at 56s. 6d. per cwt.—Black Pepper.—The sales are trivial, amounting only to 400 bags at 3¾d. to 4¼d. per lb. which is rather lower.—

TEA.—On the 9th instant about 5,000 chests were offered at auction, when only a very small proportion was sold; consisting of 666 chests Fokien Bohea at 2s. 5d. to 2s. 8¾d. per lb., duty paid, (duty 1s. 6d. per lb.) 370 chests Congou at 1s. 11¼d. to 2s. 1¼d. for good middling, and 1s. 3d. to 1s. 3½d. for inferior, 7 chests Imperial at 4s. 1d., and 92 chests Gunpowder at 4s. to 4s. 8d. per lb. There is at present more demand for good and fine Congou, at a slight improvement in price.

TIN.—No sales have occurred in this market; in London considerable parcels have been disposed of at rather improving prices, 76s. having been obtained for Straits, and 87s. 6d. refused for Banca.

SILK.—On the 10th instant there were offered at auction 23 bales Twsiloo China raw Silk; the attendance of buyers was very indifferent, and clayed only 4 bales at 21s., the rest refused. A sale of 300 bales demand and China raw Silk advertised for tomorrow, is withdrawn, in consequence of the present very dull state of the market.

SILK PIECE GOODS.—No transaction have taken place in any description of these articles. 2,000 pcs. Corahs and Chopahs are advertised for sale auction tomorrow. *Singapore Free Press 4th May.*

# CORRESPONDENCE.

## TO THE EDITOR OF THE CANTON PRESS.

Dear Sir,

A Correspondent in the last number of your paper, has pointed out what may be a very important thing. He rightly enough complains of the wretched state of the foreign trade and as "One of many" objects to a tax being put on the *future* trade to pay for *past* debts. Of the impropriety of this expedient I think there can be no question, and I hope that, whatever remarks you may make as you promise, you will keep in mind that the debts now owing are due by Chinese merchants to foreign merchants; and that to ask other foreigners to pay them is absurd, and most unjust. Is there not a Consoo-fund? Some say yes, some say no, but no one says that each of the hongs has not deducted from the imported, and added to the exported goods the full amount allowed. This being the case, it appears to me that foreign merchants, before listening to so unfair a proposal as your correspondent talks of, are bound to use all means to find out what has become of the immense sum levied from them. It is *theirs*, not the property of the Chinese Hong-merchants or Mandarins to make away with as they may please. To talk of payment in 10 years is to a good deal like starving a man to death, but soothing him with the assurance that there shall be no lack of bread, wine, or meat at his funeral.

Give us a good editorial article on this for the benefit of friends at a distance, and you will oblige your own friends, the Public, of which I am but

A PART.

May 10th, 1837.

---

## "THE FINANCE COMMITTEE."

Sir,—"Sufferance is the badge of all our tribe" seems to be the motto of Canton Residents, and conformably with it we endure with the same equanimity the outrages of the Chinese Government and the indifference of our own. But we are exposed to annoyance from another quarter; in that point too which is in all men, but perhaps most of all in commercial men, usually so tender, I mean in our pecuniary interests, and this also we bear, as we do neglect contempt, insults, and stripes. Is this state of things to continue? Must our property be subject to fluctuation, the prices of the commodities in which we deal be unfairly enhanced, and our most carefully conceived operations be rendered disastrous merely for the benefit of the East India Company? Must that body, forbidden to trade and yet continuing to trade, proceed from season to season with their mischievous vagaries, and shall no effort be made by the lately excluded and now injured to direct or to control the absurdity? What will be said at home if we remain thus passive? Should any there raise their voices in our behalf, will they not instantly be answered "You say the Merchants of Canton are aggrieved by the operations of the East India Company, why do they not complain then?" And what, I ask, can be replied to this? It is quite needless to argue a question upon which no difference of opinion exists; all confess and deplore the evil; why then should it be endured with such strange patience? Let some of the most influential members of our community set to work, by public meeting and petition—if these will not do it let *some of the least*, and enough will join them in so good a cause. Successful or not, they will at least have the satisfaction of knowing that they have done what they could for their own and their constituents interests by endeavouring to abate that crowning nuisance—" The Finance Committee." Yours obediently,

T. A. J.

Canton, 23 May, 1837.

---

## A CHINESE JUDICIAL EXAMINATION.

Dear Editor.—Some of your readers on the spot may perchance recollect that, some few months back, a Lascar was kept at the *Cosmo-house*, for a considerable time. He had been sent down here, from somewhere in the neighbourhood of *Pah-shaefoo*, having been there found on shore; and he was here detained for examination. I, with many others, saw the youth; and such a specimen of that odd enough genus *homo*, I never shall see again. He was tall, thin, and muscular; as ugly as any one would, in decency, wish to be; and so black as an ancient gentleman, who is said to possess an exceedingly fine pair of horns, and tail to match; but whose name you will excuse my mentioning. He was dressed in a surprisingly dirty and ragged pair of *so-for-shames*, as the ladies (bless them!) who ought to be the best judges, on these matters, now, I am told, call them. To cut off these, his nether integuments, he had been presented by the Chinese officer, up the country, with an astonishingly fine green silk dress, which may be called, from its shape and appearance, indifferently, a tunic, when worn outside his aforesaid nether mentionables, or when inside, a shirt; or shimmy, as it is, I believe, easiest to call it. There is a proverb, about the first of a family, which may apply here.

So much, Sir, for his person—as much for his dress. Perhaps, you think my description misdated. You are infallible, Sir. So he was, I must urge, that would, in itself, suffice to vindicate my assertion; see from the change, as often here, his nether integuments so to enamoured appear in the eyes of the women! The tongue! A *State organ*, did I call it? Sir, his was all Billingsgate, at once. If any gentle eyes should hastily pass over this, and on the above ungentle allusion, they must understand that we, poor Cantoners, are considered, perforce, and that the music of Woman's voice, lovely as it is, even when unloving, is a luxury which the Canton government officers deny to their foreign fellow-men. For such, as the Persians say, may their Gods confound them! *for, at such a sacrifice*, must fortunes be made (or lost) in Canton!

But to come back. To describe the way, in which he exercised this weapon, is beyond my poor powers. There was some Malay, and some Bengalee; and, perhaps, a sprinkling of Guzeratten, with an undoubtful under-stratum of Cingalese; and, somehow or other, these and more, heaped together, in the cellar of his memory, came out of the tunnel of his mouth, I think, all at once. It was confusion, worse confounded. He must have been the man who went to the feast of languages, and ran away with the scraps. Now, Mr. Editor, just such an article, as I have described, in the Chinese tongue, before the *Kwang-chow-foo*—the *Mandarin of Provinces*,* and some more officers, who will, I have no doubt, not feel indignant at my not putting down here their names, styles and titles; and this the more, as it chances that with them I am unacquainted. Hong merchants too, amiable horse-godmothers as they are to us; and the Linguists, so called from understanding no language on earth but their own; though, some how or other, they manage to speak and read *all*. Some few foreigners, standing at the foot of the hall, where all the *Tungin*† were seated, will make up the picture; if imagination will supply a number of Chinese servants, coolies, chair bearers, lictors, &c. &c., each of them, Sir, a miscrocosm, a whole world in himself, as might be seen, on a close examination; and smelling, Sir, smelling—smelling, I say, Sir, as none but a Chinaman in hot weather, *can* smell.

Now, Sir, if you have seen all this, in your mind's eye, you will please to understand that old *Atom*‡, having the slight misfortune not to know one word of the language for which he was to act as interpreter, had brought with him a compradore who, from supplying the Lascars with their "private trade," had managed to pick up some few words of their lingua franca; the same being, in all probability, just a little more than you or I may know of what is said by the rooks; and which in earlier, if not happier, days, and better countries, we may have heard, gently borne on the breeze, through the silky softness of a summer evening. This being duly premised, we'll begin.

I need not add that much of the conversation is somewhat more the product of imagination than memory; still, of what is put down, especially in the Chinese parts, a considerable portion is tolerably correct. For this I am mainly guilty.

---

* Three Chinese officers of rank who were present.

† Great man—the usual style.

‡ The senior linguist, who is supposed to know all foreign tongues.

ed to the kindness of a friend, versed in the language who was present, and who has allowed me, to "suck his brains" for the occasion. We will suppose the conversation commenced. The words, which are used as foreign words, may mean any thing that you please, except what it was intended they should convey. The forms and ceremonies &c., are correct; so that altogether it is a tolerably correct picture; although severe criticism *might* discover that it was a trifle overcharged, occasionally.

*Magistrate.* "Enquire of the barbarian whence he comes, his name, age, and occupation."

*Ashoe.* (Trunk manufacturer) to the Lascar: "Oh tum look. Kea-wa—Muncter? nay-hi! I'asnee low!"

*Lascar* replies, quite in an unintelligible jargon.

*Ashoe* (to the mandarin, kneeling.) "*Ta-yin!* Immense man! The barbarian's story is rather confused, yet I learn his name is *Ram-foo-zul jee*, his age 30; and, by occupation, he is a "water hand".

*Magistrate* (To old *Atom*) "You said this barbarian was landed on our coast from a foreign ship, laden with rice; ask where she was from."

*Old Tom* (looking very imploringly to a foreigner, standing by, as if anxious for a little assistance) and addresses *Ashoe*, asking him to ask "the water hand" the ship's name.

*Ashoe* (to the Lascar) "Acha. Camphor trunk-muncter? Ek rupee—do, Ham tuno: bot juldee, Writing desk; dressing case?" (pauses for a reply)

*Lascar* (makes many droll faces—looks round at the community, and says to the foreigners, taking no notice of the learned interpreter: "Ham nay Junter sahib." ‖

*Ashoe* (to the mandarin, kneeling.) "*Ta-yin!* The *Hak-kwae*¶ says the ship was from Mang-ga-la." ••

*Mandarin* (to old *Tom*) "Inquire how long the vessel was on her voyage; where she was bound, and what was her cargo."

*Old Tom* (very seriously, talks *at* the Lascar, assisted now and then by his friend *Ashoe*, who thrusts in a word, here and there). "Man-ta-le talkee you ship must have long time come; what thing cargo inside; what time go back? Ah! (*Ashoe* cuts in): "Tum junter my shop No. 9; all thing got inside-you savee barra sahib? Bot hi; come my shop; make look see. Spose no can see, how can sabee? No can! Duffrow?" (satisfied—with himself, looks towards the mandarin, while old *Tom* interprets the Lascar's answer to this speech, to that worthy in the following manner, from his own brain, and out of 10 words manufactures 340) "*Ta-yin!* the barbarian says his ship was on her voyage to Canton, laden with rice, but, on approaching the coast, a great wind arose, and drove the vessel to the east; after contending, many days, with furious seas, and adverse gales, the vessel was compelled to make a harbor, on the coast, to get a supply of water, which the inability of reaching the port of Canton had reduced to a small stock; for this purpose, a boat was sent on shore, from the ship, with four men, to procure a supply; this man was one of the four. Having landed, they proceeded to fill their buckets from a spring; and they had nearly completed their work, when this devil, being overcome with fatigue, flung himself on the grass, beneath a tree, and soon fell fast asleep. How long he slept, he knows not, but that he was suddenly awakened by a party of men, who, he found, were proceeding to tie his hands and feet, in the coolest possible manner; after stripping him, and administering a †† slight flagellation; he was confined, in a close prison for a length of time, till the *Wei-guen*, being about to start for Canton, took him under his charge, and has brought him here."††

*Mandarin* (turning to the *Wei-guen*, who is seated beside him:) "Observe the advantages of being skilled in the foreign tongues! Linguist, your erudition is creditable in the extreme; and your admirable knowledge, of such a barbarous dialect, proves you, at once, a discerning and clever man.—But, of what nation was the vessel?"

*Old Tom* turns to *Ashoe*, (who, thus, to the Lascar)—"Samsee, tum muncter haw hi, ek bottlee-doo rupee. Acha-nay muncter (with emphasis) hither jatter." (Stares hard at Blackee, as if pondering on the advisability of an experiment at jumping down his throat, and then thunders forth an Hindoostanee common enough allusion to one of his female relatives, which, as it is by no means complimentary to the family, I shall not repeat.)

*Lascar* turns up the whites of his eyes, like a clock in thunder, holds up his hands in despair, and proceeds to sit down; jabbling some awful sounds; but sundry Lictors, with rattan hats, by applying various gentle touches of a long whip to his obtuse extremity, once more compel him to the upright position—after firing away in his best Gunzeratee, old *Tom* turns to the Mandarin, and says—"*Ta-yin*, the barbarian's ship belonged to the nation of 'red heads.'" ‡‡

*Mandarin*—"Not surprising! Those people, like rats, ferret out every hole and corner. They come by stealth into our country;—not long since, indeed, they had the astonishing effrontery to attempt the *Min*;§§—and, had not our "thunder-bellowing-dragons," by being placed, in ambush, along the banks of the river,—where they themselves were entirely protected, valiantly opened upon them their earth-shaking volleys of musketry,—which shook the heavens, and caused the five mountains to totter at their base; had it not been for this, I say, they would have proceeded further into our country. But that rebuke cooled their ardor; and, for a while after, I have been told, one or two of the party have had no occasion to resort to cathartics of any sort. Is not this on record?‖‖ Such a cathartic should be administered here—Canton should be purged of all barbarians of whatsoever nation, and the expulsion of a few years would lead them to appreciate the benevolence and, compassion which by our Sovereign's orders, we were constantly extending to them while they resided here.—(turns ot the Linguist)—"Ask him how he was treated since he had the happiness to reach the central flowery land."

*Old Tom* looks at *Ashoe*, who speaks, assisted by him in a lingo, which must be, at least, all those used at Babel mixed together. "Pootha fan qui hi? Loll shrub bhote. Pannee barra krab! Chest of drawers; too muchee. Podee? Hab got. God dam."

*Lascar* makes faces, and looks amazed—some strange sounds heard.

*Old Tom* replies in Chinese "Enormous man! this poor barbarian is so impressed with esteem, gratitude and respect, for the favors showered on him by the bounty of the Celestial Empire, that he is quite at a loss for words, in which to convey his sentiments. Of this all the foreigners here and the others standing near him, are witness' (turns to a foreigner) "my thinkee have show he handsome story, eh?"

*Foreigner.* "Yes, you have humbugged the old gentleman, at no fool of a rate."

*Mandarin* (to Linguist). "Tell him that the inner land, whose glories are resplendent through all the universe, has supported him and preserved him, as it makes a rule of doing to all the nations, so that boundless compassion may be manifested. Let him, when he reaches his own country, instruct thus his nation's King, that his heart may be directed towards civilization; and he may ardently hope for renovation. This will be good!"

*Ashoe* (to the Lascar). "Kanna teir hei—juldee jou. Koop dekh agil. Boat hook, washing tub, gang way boards—ek, doo—small block; admie. No can. Buss!"

*Lascar*, who is now using Malay, looks up—"Ada orang gila—bagie mana? ini rupa apa?"

*Linguist.* "He says that he is profoundly attentive and diligently obedient" (to his foreign friend) "you thinkee my so clever, before? Mandarin all same one fool What you thinkee?"

*Foreigner.* "I'll go your halves."

*Mandarin.* "This is most satisfactory. Kick *Ram-foozuljee* out! Linguist, you are the most eminent of your class! I am sorry I can't reward you as you deserve. All now go home. Lictors make the way clear for me."

Lictors howl like dogs in a fit. Servants scramble about Mandarins stalk out. *Exeunt omnes.*

A "rel bristled" barbarian, innocent of the Chinese language, asks, as he walks out, a companion to translate to him the meaning of some large characters, cut in the granite, over the entrance, and gilt, to make them more apparent. His friend reads: "greatly excelling hall of reason and justice." "I should not have guessed that," says the other. A Hong-merchant remarks, triumphantly, as he passes, "My thinkee you country no got so fashion proper"—to which his foreign friend: "I should not like to make a rash assertion, to so eminent and immense a man; but I am rather under the impression, to speak candidly, that we have not."

The two friends walk home, to their solitary batchelorial† dens, find the thermometer at 350, in the cool; that there is nothing in the house, or to be got, but soft fish and hard beef—they open their letters, where one finds bad accounts of speculations, and the other worse; and they, thereupon, make sundry highly wise, and singularly useful, remarks, on the justice of the British Government, in taking a Tax, of two shillings and two pence per pound, on Tea, for which the owner gets seven pence; and thereupon, a suspicion passes, through the brain of both, that the Chinese rulers are not the only ones who humbug their subjects;—a faint *soupçon* of a cigar or so, is indulged in, and so on; till night, the comforter of the sorrowing, as the hope of the happy, draws in her curtains; and each Cantoner seeks his solitary and virtuous pillow. *Nocles meas sic omnes. Anni recedentes. Tristè! Tristè! Eheu!*

Such being the case, I am, Mr. Editor,
Your most obedient servant, and
WELL WISHER.

Canton, May 22nd 1837.

§ A sailor.

‖ I do not understand, Sir, *(Bengali)*.

¶ Black devil.

•• Bengal.

†† This is the substance of the story made out by the Linguist for the occasion—"it is on record."

‡‡ Englishmen are thus honored; the first Dutchman who came, having the misfortune.

§§ The river to which a private expedition was sent. It was fired at as stated—10 men in a small boat.

‖‖ If this was asked of me, I cannot take on myself to answer it, but think it not unlikely.

# CANTON PRESS.

May 27th 1837.

## THE CO-HONG.

Partly, the wish of some of our correspondents, and partly it's importance to our commercial neighbours, makes us again avert to this subject, the more so as consultations are now frequently being held among the Hong-merchants and the local government on the insolvency of the Hing-tae-hong, and on the mode of providing for the payment of it's debts which to foreigners alone, according to the accounts given in, cannot fall short of $ 2,700,000.

Most of the documents relating to the mutual liability of the Hong-merchants, that have passed between them, the local government, and foreigners, will be found in the *Canton Press* of 10th December, to which we refer our readers, as they will enable them more fully to understand this subject in all it's bearings, and it is feared by some that the government will avail itself of those documents to avoid paying Hong-tae's debts, particularly as it is said that the Governor himself has expressed it as his opinion, that no complaint having been made by the creditors at the close of the last Chinese year, nor their balances against the Hong given in, as the law prescribes, the government cannot take cognizance of any claims that may be made thereafter, and cannot therefore consider the Hing-tae-hong as bankrupt, nor provide for the payment of debts which were not guaranteed. This argument of the Governor, whether his or not, obtains among many of the Chinese, and we cannot conceal from ourselves that it is not altogether without force. To invalidate it, however, much can be said. The most important is precedent; many Hong-merchants have failed and their debts have hitherto been paid after a lapse of time, without it ever being thought of to enquire at what time such debts were contracted, the Government and Hong-merchants thereby tacitly acknowledging that the law in this instance can-

¶¶ Knowing, as I do, the great liberality of the Chinese, in this matter, I suspect the exact correctness of this part of the translation.

• These people are all mad. What is the meaning of all this?

† I know that illnatured people may say that this word is not English. If it has not been so hitherto, the fault is not mine. I beg it will however, in future, consider itself as such.

not be obeyed, and ought therefore to be put aside. The Chinese laws for every thing seem to be made rather with a view of their being offended against, to give a handle for extortion, than that they should only serve to uphold social order; thus it happens that those regulating the commerce between Chinese and foreigners are innumerable, nor can the trade be carried on without the infringement of some; the evading of the laws thus becomes habitual, and we have, as in the instance before us, even them evaded by Hong-merchants and foreigners, and unmasked on by the government itself. Another reason is the total impracticability of the carrying into execution of this particular law; where the trade is, on the side of the Chinese, conducted by a very few individuals, the transactions of each with foreigners are necessarily very large, and frequently complicated, so as to render it difficult for a foreigner to say on any given day how much the Chinese may be indebted to him; nor would either foreigners or Chinese submit to see the state of their accounts, or the nature of their commercial transactions laid before the public. It also is the interest of the Hong-merchants to see this law disregarded, for how can they possibly, with the very small means most of them have at their disposal, pay up their accounts *once in a year?* This would produce a system of trade for cash, which however desirable in many respects, would necessarily, as long as the Co-hong continues to exist, much reduce the quantity of British manufactures now sold.

If therefore it be unadviseable for the Government or the Co-hong to be guided by this law in this instance, the question naturally arises, Who is to pay this sum? and in what manner are the funds for the payment to be raised?

The only means that some project has been entertained of raising an additional Consoo-tax on ex orts, which tax was to be under the management of foreigners, and equal to discharging the capital of Hing-tae's debts within 10 years, thus giving only 10 per cent as part of the capital, whilst the interest which on good security here is at least equal to this is lost, or in other words, during 10 years to come, a fair annual interest is to be paid, at the end of which the capital is to be entirely lost. This mode of a nominal payment would therefore be highly unsatisfactory, by whatever means the funds towards it are collected. But the proposal of making the foreign trade itself pay debts which others have incurred, and to saddle it for ten years to come with a tax for losses the Hong merchants have suffered, is preposterous, nor will, we hope, any foreigners be found to abet the chinese in such a scheme.

We are told by some that the Consoo-fund still exists, and are perfectly aware, as our Correspondent, "A Part" says that in every case it is charged by the Hong merchants. If therefore the Consoo-duty were levied as it ought to be, and applied to what it was really intended for, viz., a security to the foreigners for the solvency of the Hongs, it must be quite sufficient to pay off at a not very distant period, the whole of Hing-tae's debt. We calculated some time ago that the whole amount of trade in Canton, without including Opium or Specie amounted to 55 Millions of dollars—the Consoo-duty at 3 per Cent ought therefore annually to amount to $ 1,650,000 and, independent of the amount that ought to have accumulated, would be sufficient, in the short space of two years to pay off the whole debt. But unfortunately, it is generally understood, that though the Hongs are, by the trustees of the Consoo-fund, annually debited with the whole amount, only part is paid by them, and that part is applied to purposes foreign to it's legitimate use. We think to incumbent on foreigners to insist that the Consoo-fund be applied only to payments of debts owing by the chinese to foreigners, and if this be done, there will soon be a sufficient guarantee for the solvency of Hong merchants.

## FALSIFIED CHOPS.

We were most glad to find that our article of last week, on the subject of the falsification of foreign Chops, by the Chinese authorities, was favorably received. As we then promised, we now resume this theme; and lay before the public two more papers, referring to foreign ships; and which will, we hope, tend to throw light on the system of falsehood, which we were so fortunate as to have pointed out to us.

The first ought to be a mere assertion, by the Agent or Captain of the ship, stating that his vessel has brought no Opium to Whampoa. This is usually called the "Opium bond." Out of this, the Chinese manage to manufacture as follows:

"Bond given by the foreigner A. B. My ship has come to Canton with a cargo of ..... With it, no Opium is brought in the vessel. Should any, at a future day, be discovered, *I will willingly await legal trial and punishment.* As is reasonable, I give this bond, *to be held in testimony* thereof."

(supposed to be signed.) A. B.

In this it will be seen that the commander or Agent, in the Chinese, somewhat *free*, translation, avows his readiness to do, what no one, in his senses, ever yet did, or ever will do, viz: submit himself to the tender mercies of the Chinese; and well do the Chinese know that, notwithstanding the awful threat of "not getting the ship secured," no one would put his hand to such a paper, the least infraction by the meanest man on board rendering all thus responsible, in property and in person. But this may explain, it is possible, as to more than smuggling. It *may* extend to homicides We do not say that *it does*: but that *it may*: for, if one part of the paper is imaginary, why may not the others be misconstrued, as may suit the parties? We throw this out but as a suspicion; though we think it sufficiently strong to be taken into account with other points. Foreigners here allow that they are responsible to Chinese law, and amenable to punishment. What a handle is this!

The Hong merchant's bond "solemnly declares" that he has not joined with the foreigner in concocting a falsehood or, as the phrase is, "formed no nefarious combination with him;" and that "if, hereafter, the foreigner is found to have stated what is false, that he will immediately report against him." And these are the men who, vilifying us, behind our backs, as they hope in ignorance by us, we meet as equals and friends!

The other chop is as to the breaking of bulk, which is not worth noticing, except that it is said to go in, in the name of the foreigner, who never sees or hears of it. It gives the mandarins some fees, and this is all.

We do not subjoin this, as it is unnecessary; but we ask our friends for opinions as to it together with the two others. Let the opinion of others be as it may, on other points, we think there can be no doubt that all will agree that it is right that we should know what we are supposed to say in applications to the local Government; and, if it is proved that falsehoods are palmed upon us, that we should put an end to them, at once. The plan we think, is easy—let the linguist and Hong merchants be informed that the chicane is discovered, and let all applications be made, not in English, but Chinese; and, if a threat, as to future business, were hinted at, *and believed*, the change would be made. If the Mandarins know our meaning, give it at once. Anything is better surely than connivance with a falsehood, degrading and hurtful to ourselves.

*Rice laden Ships*—It has always been a matter of uncertainty and dispute as to whether the ship or the consignee of a cargo of rice is liable for the charge of about $ 300. known to be levied on the rice, over and above the usual $ 900 paid by the ship. The subject has lately been laid before the chamber of commerce, and investigated by a committee, the result of whose deliberations is, that the ships ought to be liable for that extra charge, and not the rice. According to the committee the whole amount chargeable on a rice-ship now is $ 1189,50.

We hear this decision, or rather recommendation, of the chamber of commerce found fault with, countenancing the Chinese in undue exactions, but it will be found on examination that no exertions have hitherto proved successful to avoid payment, and the question therefore is not, whether such an extortion shall be paid, but whether, seeing that we are unable to avoid the payment of it, the rice-holder or the ship shall be the lower.

The orders of the Government are that the charges on a rice-laden ship shall not exceed 620 and odd Taels, but that, if she take out an export-cargo, the usual daily and monthly charges, to which all ships are liable, (and which form no inconsiderable portion of the sums called Comprador's and Linguist's fees) shall be levied from the day that she commences to take in cargo. Thus a portion of the $ 324 "extortion" *is legally* accounted for

Our readers will find in this number a description of a Chinese court of justice. As we have never been in one, we cannot say whether it is correct or not, but we are sure that it is diverting, and that we shall never enter one where a Linguist interprets again, without laughing. If our correspondent can oblige us with any similar reports, we shall be most glad to give them a place at any time in our paper.

*Suicide.* We hear that a young man and young woman poisoned themselves on wednesday last by taking Opium, of which they died soon after, the means employed to prevent the poison taking effect proving of no avail. It is said that some disagreement with the father of one of the parties was the cause of this rash act, though others attribute it to poverty.

*Theatricals* On thursday morning last, the scaffolding, on which a great many people stood to witness a sing-song at Shwuy-Kwan-How, gave way, and many of the spectators under it were crushed to death.

We are informed that the local Chinese government is about again to allow Chinese coolies carrying the chairs of foreigners in Macao.

Two houses were struck by lightning at Macao last week, without however sustaining much injury.

We have this week had arrivals from Bombay, Calcutta and the Straits, and the *Hannah* has put us in possession of the overland despatches up to 3rd February from London. We have extracted such news as we find in the papers, which will be found in another column. From Singapore we have received the *Chronicle* of the 28th April and *Free Press* of 4th May.

DADABHOY RUSTOMJEE Esq. one of the Gentlemen ordered away by the Chinese authorities, has, after some stay at Macao, applied for the customary passport to come again to Canton, and this has been granted. From this it would appear that the Chinese government had the expulsion of these gentlemen not much at heart.

## THE CHAPEL IN CANTON.

A public meeting was convened on the 18th May at the house of the Revd. Mr. Bridgman, to take into consideration the rental, incidental expenses, and purchasing the fixtures of the British Chapel in Canton, with a view to measures for the continuance of Public Worship.—Mr. Dent in the chair

The Revd. Mr. Bridgman laid before the meeting his agreement with J. N. Daniell Esq., under date of the 1st January 1836, by which it appears, that his right of rental would cease, should His Majesty's commission require the same on their arrival in Canton, the said Gentlemen having communicated with Capt. Elliot on the subject, who stated that it was not the intention of H. M. Superintendents, to take the Chapel, it was unanimously resolved,

1st. That a Committee be formed to determine on the best manner of carrying into effect the securing of regular public Worship.

2d. That Messrs Green, Matheson, Dent, Blenkin and the Revd. Mr. Bridgman do form the Committee,

3rd. The question of the mode of assessment for defraying all expenses being submitted to the meeting, it was the general feeling that it should be left to voluntary contributions.

4th. That the meeting entertain the deepest sense of obligation to the Revd. Mr. Bridgman, the Revd. Doctor Parker and their associates for the inappreciable advantages of regular public Worship, which they have so long afforded to the Canton community, and their kindness in offering the continuance of the same.

Messrs. Bridgman and Parker, in acknowledging this notice of their services, with much feeling assured the meeting, that no exertions should be wanting on their part to fulfil the great object they have so earnestly at heart,

## THE GOVERNOR'S EDICT.

Just before going to press, we were favored with the following translation of an Edict from the Governor, ordering the departure from Canton of three gentlemen. It is a rather remarkable feature in this "Chop" that these gentlemen, are not, as before, ordered to leave the country, but merely to go to Macao.

"Reply of Tang, Governor of Kwang-tung and Kwang-se, &c. &c.

"The circumstance of Gordon's return home on board the ship ["Osage"]. Furber, having been reported, the following reply was received—

"I am fully informed on the subject of this report.

"I find it recorded, that I have before reported clearly to the throne the periods named for the return home of the several foreign merchants, to which periods their stay was limited. I find also that I have received a reply in the imperial hand-writing, which I have already communicated (in the proper quarters), that obedience might be paid thereto.

"But the three English merchants, Dent, Jardine, and Turner, have neither been reported to have sailed, nor yet to have gone to Macao. The Hong merchants, some time since, represented on behalf of the foreign merchant Dent, that his commercial operations were not concluded, and that he desired to remain longer in Canton; and I then commanded the Hong merchants to hasten the speedy and urgent conclusion of all his affairs, and his early departure. Since then another month and upwards has elapsed, and he still procrastinates, and delays, looking carelessly around. (If the said foreign merchants act thus unreasonably, and cause such trouble, I the Governor shall be compelled to maintain the laws, and proceed to act with a firm hold thereof. If the said Hong-merchants continue to connive at and suffer such conduct, and even treacherously to prop up and support [the foreigners], it will be impossible, I apprehend, to divest them—having given bonds—of the criminality of their so doing. They must immediately urge the said foreigners, Dent and the others, to act in obedience to commands, and speedily to request pass-ports and start for Macao. Let them not again suffer any delay, lest they bring on themselves grave displeasure. Tremble here at Hasten! hasten.

"Wait until replies have been issued by the Lieut.-Governor and superintendents of customs also."

(No date—received 25 May 1837.
translated from the Chinese,

* These words included in brackets are, in the original, of doubtful signification. Several natives who have been asked to explain their meaning are of opinion that an error has been made by the transcriber.

### OFFICIAL NOTICE.

THE Commanders of British Vessels arriving at Whampoa are requested to call at the Office of the GENERAL CHAMBER OF COMMERCE in Canton for the purpose of filling up a form setting forth the tonnage, number of men, &c. &c. of their respective vessels.

And Commanders of British Vessels arriving at Lintin *and not proposing to proceed to Whampoa* will be pleased to repair on board either of the Ships "JANE" or "HERCULES" for the purpose of filling up the aforesaid forms.

By order of the Superintendents.
EDWARD ELMSLIE.
Secretary and Treasurer.

Canton, 2nd May, 1837.

### OFFICIAL NOTICE.

THE Commanders of English Ships requiring hands are requested to apply to the Undersigned. Good and steady Seamen can be recommended, and arrangements will be made for their conveyance to Lintin or Whampoa as the case may be, free of expense to the Ships.

EDWARD ELMSLIE.
Secretary and Treasurer to the Superintendents.

Macao, 4th April, 1837.

N. B. Please to write the words "Application for Seamen" on the envelope.

NOTICE.—The undersigned beg to intimate that they have received instructions from the *Commercial Insurance Company of Calcutta*, to allow a Brokerage of 5 per Cent on the amount of Premiums on all risks taken by them as Agents for the Office here.

TURNER & Co.
*Agents Commercial Insurance Company.*

Canton, 20th May, 1837.

NOTICE.—The business hitherto carried on by the undersigned will from this date be conducted by CHARLES MARKWICK,—At No. 3 Imperial Hong.

ROBERT EDWARDS.

Canton, 1st April, 1837.

### CANTON GENERAL CHAMBER OF COMMERCE.

The office and Records of the Chamber are open to the members every day excepting Sundays; and the Secretary will be in attendance from 12 till 3 o' Clock.

By order of the Committee,
WILLIAM SCOTT.
*Secretary.*

Canton General Chamber of Commerce
No. 2 Danish Hong 4th Feby. 1837.

NOTICE.—Referring to the above advertisement I beg leave to solicit from my friends and the Public, a continuance of the Patronage that has heretofore been given to the Auctioneering and Warehouse Keeping, of the late establishment of Mr. ROBERT EDWARDS. No. 3 Imperial Hong.

CHARLES MARKWICK.

Canton, April 1st, 1837.

NOTICE.—SAMUEL WETMORE Jr., is this day admitted a partner in our establishment,

WETMORE & Co.

Canton, February 1st 1837.

NOTICE.—The Copartnership hitherto existing under the firm of Markwick Edwards & Co. ceased this day. All Persons having claims against the said firm are requested to forward them, and all Persons indebted to the same are requested to pay the amount to the undersigned.

ROBT. EDWARDS.
Canton 31st Dec, 1836. No. 3 Imperial Hong.

NOTICE.—The undersigned having been appointed Agents in Canton for the PERSIAN INSURANCE SOCIETY OF BOMBAY are prepared to receive application for Insurance of such risks as by the regulations of the office they are authorized to take.

H. & N. CURSETJEE.

Canton, 2d May, 1837.

### NOTICE.

THE interest of SAMUEL RUSSELL and AUGUSTINE HEARD in our house ceased on the 31st December 1836.

RUSSELL & Co.

Canton, January 2nd.

NOTICE.—The interest of WILLIAM H. MORSE, in the business of our House, commences with this date.

OLYPHANT & Co.

Canton, March 1st, 1837.

### NOTICE.

ORDERS for printing will be carefully attended to at the Canton Press Office, at the following charges;

for printing Bills of lading, Bills of exchange, Opium orders and boat notes } $ 100 $ 1.
" Linguist reports, reports of Cargoes &c..... " " " 1. 50.

## SHIPPING INTELLIGENCE.

ARRIVED.—Brit. *Hannah*, Mc. Gregor. from Bombay, April 3rd. *Eleanor*, Lyons, from Bombay, February 3rd. *Good Success*, Durant, from Bombay, April 1st. *Sarah Barry*, Evans, from London, left the land December 24th. *Isabella Robertson*, Hudson, from Bengal, April 10th.

PASSENGERS.—*Eleanor*, Mrs. and two Misses Lyons.

SAILED OR DESPATCHED.—Dutch *Omega*, Wallace, for Batavia, Brit. *Lady Nugent*, Fawcett, for Sourabaya. American. *Mandarin*, Symonds, for Java. *Henry Clay*, Gilman, for South-America.

On Monday the *John Fleming*, Black, for London, and the *John Dugdale*, Scott, for Liverpool a day or two after. On Monday or Tuesday the *Tartar* for Boston.

PASSENGER.—*Henry Clay*, Mr. W. Lyon.

The *Scalcby Castle*, *Earl of Balcarras*, and *Caledonia*, were loading in Bombay for this, at 20 a 24 Rupees per Candy.

The *Futtay Salam*, *Sultana* and *Allaleyee* had gone round to Bengal. Most of the other country-ships may be expected in here, as cotton was so abundant and home market so forbidding.

The *Sylph*, *Mavis*, and *Antonio Pereira* may be daily looked for from Bengal. The Latter has been reported in, we believe prematurely.

The barque *Skimmer* which had left Suez on the 6th February, was entrusted with the overland mail of January, but she was wrecked on the *Mokawadee* reefs near Juddah on the 12th February. Seven post office packets were saved, together with the crew and passengers.

LATEST DATES from ENGLAND, 2nd February via Bombay. UNITED STATES and DENMARK per *Horatio*. CALCUTTA, 10th April per *Amelia Burton*. SINGAPORE, May 6th per *Hannah*. JAVA, 22nd April via Singapore. MANILA 23rd April, per *Alonzo*. SYDNEY, 2nd April per *Alonzo*.

VESSELS EXPECTED.—From ENGLAND, *Cyprus*, *Berwickshire*, *Bhoja*. JAVA, *Gouverneur de Mello*, &c. CALCUTTA, *Andrew Jardine*, *Argyle*, *Manila*. MANILA *Bombay*, *Bombay*, *Bombay Castle*, *Caledonia*, *Lord Amherst*. UNITED STATES, via Manila, *Eliza* and *Susan*.

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER.

BOATHIRE IS PAID BY THE SELLER.

NOTE. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Cambiets, Saltpetre, Ginseng* and other Goods, on which the duties at Whampoa are high.—Ships with *Rice, Cotton &c.* sometimes discharge at Macao or tranship their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa. and thereby avoid Port Charges. The ship rents outside. and River Freights, are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary Stationary, Cutlery, Crockery ware*, &c., for foreigners consumption, are sold at Auction duty paid.

*Note. Alum*, and *Cassia* are procurable cheaper at Lintin, Macao, &c; and *Raw Silk, Silk* piece goods &c, are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

Note. Above rates are from 20th April to 20th Oct. annually: during remaining 6 months the premiums are somewhat lower. Risks on Blocks are $ 9 per Cent per annum, $ 4½ for 6 months, $ 2½ for 3 months and $ ¾ per month.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874756 of a Tl. per cubit.
2nd „ „ „ 1200 do. & under 1600 „ 0.7221091 „ „
3rd „ „ under 1200 do. 0.5062341 „ „

N. B. The cubit is 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 4300 to $ 4350; 2d class from $ 3700 to $ 3780; 3rd class from $ 3700 and under. The Comshaw or Present Fee is paid by all vessels 1500 Taels or $ 2223. Linguists fee $ 173½ and Comprador's fees $ 50 Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Rivulden ships are charged only about $ 1300 in lieu of measurement &c.,

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—Longcloths are enquired for at an advance on previous rates

WOOLLENS.—The stock not being large and all in the hands of the Chinese, the market was supported, but a further importation within these two days has checked the demand. Spanish stripes are quoted still lower, and the reports of the markets in the interior are unfavorable, and the late arrival from England brings an addition to our stock

COTTON YARN.—Good yarn is saleable at $ 38 @ 40, but the inferior qualities are without demand.

STRAITS PRODUCE.—Continues dull at our low quotations.

RICE.—The weather is not very favorable to the expected crop, but no advance in price has yet taken place.

COTTON.—There has been a fall of about 3 mace in most descriptions, particularly Madras, sales of which were effected in the early part of the week at $ 3 for western, and 10 @ 10 2 in, we hear, only offered for Tinnevelly; in Bengals or Surats no transactions have been reported.

OPIUM.—The heavy supplies of Malwa since our last, consisting of nearly 3500 Chests, have caused a further decline and several sales have been made at from 520 a 535, at which prices there has been a fair demand in preparation for the Junks which will leave for the northward about a month hence. In Patna and Benares nothing is doing, except in small sales at Macao, and with the large quantity that must shortly come on to add to our stock, the prospects are very discouraging, as nothing further has transpired about the legalization of Opium. We think however that the present difficulties between the Mandarins and smugglers will shortly be arranged. The only arrival from Bengal is the *Isabella Robertson* with about 300 Chests. Her bill sale seems to have been supported by the reports carried on by the *Antonio Pereira*, the Patna averaging 1623, and the Benares 1665 Rupees.

The Lintin deliveries were, Patna, *Old*, 24, *New*, 140; Benares, *Old*, 41, *new*, 50; Malwa, 302; Total 775 Chests.

### EXPORTS.

The reports on the home markets for both Tea and Silk *are* discouraging, that there is now no demand for either.

## A TARTAR HUNTING PARTY. *

*From "Lettres édifiantes et curieuses."*

The Emperor made choice of three thousand of his Life-Guards, who were armed with darts and javelins These he dispersed in such a manner, that they quite surrounded a very large extent of ground on the mountains. The Life-Guards thus posted, formed a kind of circle, the diameter of which was three thousand paces, at least. Marching afterwards nearer to one another with an equal pace; taking care not to quit their ranks, what obstacles s ever they might meet with, (the Emperor having mixed among them captains, and even several great men of the court, to keep them in order) the circle in question was thereby reduced to a much smaller one, the diameter thereof not being above three hundred paces. Thus the several beasts which had been comprized in the first circle, were taken by this second, as in a net; for now the Life-Guards alighting from their horses, kept so very close one to another, that not the smallest outlet was left for any wild beast to escape. They then hunted them so very close within these narrow bounds, that the poor creatures being quite spent, came and fell down at the feet of the hunters, and thus were taken with all imaginable ease. I myself saw two or three hundred hares taken in this manner, in less than a day; besides a vast number of wolves and f s. I often was present at the like sport, in that part of *Tartary* beyond the province of *Leaoutong*, where I remember to have seen, among other animals, above a thousand stags taken in this sort of nets. These beasts finding no ways to escape, came and surrendered themselves to the hunters. They likewise killed bears, wild-boars, and above three o tigers; but these are taken after another manner, and different weapons are employed.

The Emperor obliged me to share in these various chaces; and desired his father-in-law, in a most obliging manner, to take the utmost care of me; and not let me be exposed to the least danger. In the hunting of tigers and other wild beasts. Os these occasions I was the only *Mandarin* who had no arms, and was always pretty near the Emperor. Though I had looked myself very much to fatigued, since our being out upon this journey, I yet was so exceedingly tired every evening, when returning to my tent, that I was scarce able to support myself; and therefore would often have gladly been excused following the Emperor, if my friends had not advised the contrary; not to mention that I myself was afraid the monarch would have been displeased, had he perceived any thing of this kind.

After having travelled about four hundred miles, (hunting continually in this manner) we at last arrived at *Chingyen*, capital of the province; and stayed there four days. Hither the inhabitants of the place came, and presented to the Emperor a wolf which they had taken. The Emperor had it shewn to me; and asked whether any mention was made of this fish in our *European* books. I told him there was a book in our library at *Peking*, wherein its nature was explained, and that a draught of it was also given. Being very desirous of seeing it, he instantly dispatched to our fathers in *Peking*, a courier, who brought it in a few days. The Emperor was delighted to find the several particulars related concerning this fish, agreed with what he saw. He afterwards ordered it to be carried to *Peking*, to be there preserved with great care.

During our stay in this city, the Emperor, with the queens, went and visited the sepulchres of his ancestors, which are not very far from it; he thence sent them to *Chingyen*, in order that he himself might proceed in his journey towards *Eastern Tartary*.

After travelling and hunting several days, he arrived at *Kirin*, four hundred miles from *Chingyen*. This city stands on the great river *Sangaro*, whose head is in the mountain called *Changpe*, four hundred miles from hence, southward. This mountain, so famous in the east, for having been the ancient residence of our *Tartars*, is perpetually covered with snow, whence its name was borrowed; *Changpe*, signifying the white mountain.

The Emperor, the moment he perceived it, alighted from his horse, fell upon his knees on the shore, and bowed thrice towards the earth, in order to salute it. He afterwards was carried on a throne s'ining with gold, and thus made his entry into the city. All the inhabitants came out in crouds so see him; discovering by their tears, the joy they felt at his presence. The monarch was highly pleased with these testimonies of their affection; and as a proof of his regard, was pleased to shew himself to all the spectators; strictly forbidding his guards to prevent the people from approaching him, as is the custom in *Peking*.

In this city, barks are made after a peculiar manner. The inhabitants always keep a great number of these ready to repulse the *Muscovites*, who frequently come upon this river, and there contend for the pearl-fishery. The emperor reposed himself here two days; after which he went down the river with some noblemen, attended by above an hundred boats, as far as the city of *Ula*, the finest in all this country, and formerly the seat of the *Tartarian* empire.

A little below this city, which is above thirty two miles from *Kirin*, the river is full of a certain fish very much resembling our *European* plaice; and 'twas chiefly for taking the diversion of fishing, that the emperor went to *Ula*; but the rains falling on a sudden, swelled the rivers to such a degree that all the nets were broke and carried away by the floods. Nevertheless the Emperor staid five or six days in *Ula*; but as the rains continued, he was obliged to return to *Kirin*, without taking the diversion of fishing. As we were returning back upon the river, the bark on board which I was, with the emperor's father-in law, was so greatly shattered by the violence of the waves that we were obliged to go ashore, and get into a cart drawn by an ox, by which means we did not arrive in *Kirin* till very late, the rain not once ceasing all the way.

In the evening, as this accident was told the Emperor, he smiled and said, *The fish have made fools of us.* In fine, after staying two days in *Kirin*, the rains became far less violent, and we set out back for *Leaoutung*. Words could never express the fatigues we underwent during this whole journey; the roads being made so very bad by the waters, that they were scarce passable. We now were travelling perpetually over mountains or thro' vallies; and 'twas with the utmost danger we crossed the rivers, &c. which were vastly swelled by the floods that ran into them on every side. The bridges were now either carried away by the rapidity of the streams, or quite laid under water In many places vast p ols of water were gathered, and these were filled with so thick a mud, that it was scarce possible for the travellers to get clear of it. The camels, the horses, and other beasts of burthen carrying the baggage, could not advance; and then either stuck in the mud, or died in the road, through mere fatigue. The men suffered as much; in short, both the men and the cattle were vastly weakened, for want of refreshment necessary for so long a journey. A great number of those persons who rode, were either forced to drag their tired horses after them; or to stop in the middle of the fields, to give them an opportunity of taking a little breath. Though the quarter-masters and harbingers spared neither the labourers nor the timber, which was cut down on all sides, to fill the several holes with facin s; nevertheless, after that the horses and carts, which always set out first very early in the morning, were passed, 'twas impossible to travel after them; in so much that the Emperor himself, with his son, and all the great lords of the country, were more than once obliged to cross, on foot, the marshes and quagmires, for fear of exposing themselves to still greater dangers, should they attempt to go through them on horseback.

Whenever they came to a bridge, or this kind of defile, the whole army used to halt; when the monarch the Emperor, with some of the most distinguished persons were gon over, the rest of the multitude crouded after; on which occasions, as all were for getting over first, many fell into the water. Others, striking into round-about-ways still more dangerous, fell into b gs and quagmires, and could not get out of them. In a word the fatigues were so violent in all these roads of *Eastern Tartary*, that the old officers, who had attended the court above thirty years, declared they had never suffered so much before in any journey.

'Twas on these occasions that the Emperor was p'eased to order me, more than once, with peculiar marks of kindness.

The first day that we set out upon our return, we were stopt, in the evening, by so wide and rapid a flood, that it was impossible for us to ford it.

The Emperor meeting, by chance, with a little boat, which could not hold above four persons at most, crossed over in it, with his son, first; and some of the chief kings afterwards. During this, all the other princes, lords and *Mandarins*, with the rest of the army, were waiting impatiently on the bank for the return of the boat; in order to get as soon as possible on the other side of the flood, as night was drawing on, and the tents were gone over a long time before. But the Emperor returning in a boat exactly like the first, asked aloud where I was; when being presented to him by his father-in-law: *Bid him come in* (added the Emperor) *he shall cross with us.* Thus we were the only persons that went over with the Emperor, the rest being obliged to pass the remainder of the night in the open air, on the shore. Almost the same thing happened the next day. The emperor came about noon to the banks of a torrent, no less swelled and rapid than the former. He then gave orders, that the boats should be employed, till evening, in carrying over the tents, the bales, and the rest of the baggage; and afterwards would force me to cross, with only himself and a few of his attendants; he having left all the great lords on the other side, so that they were obliged to pass the night there. Nay, the Emperor's father-in-law asking whether he might not go over with me, as I lodged in his tent and eat at his table, the prince bid him stay; saying, he himself would order me all a treasure.

Being crossed, the Emperor sat down by the water-side, and made me sit by him, with the two sons of the petty western kings, and the chief *Calao* of *Tartary*, whom he distinguished on all occasions.

* The above relation is given by Father Verbiest, he having accompanied the Emperor Kang-he to Tartary in the year 1682.

## CHINESE EXTRACTS.

*Translated for the Canton Press.*

### THE OBVIOUS DREAM.

Kwan-hing being now old enough to commence his studies his father Tsou Keun-shan, an officer of high rank engaged a tutor named Tsew-wanho to direct them and assist him with his valuable instructions.

The old gentleman had some difficulty in securing Tsew-wanho owing to a dream the latter had the preceding night and which, he persuaded himself, foreboded great evil. The substance of his dream was as follows. He thought that a large serpent crawled into the room, and after writhing its disgusting body, in seeming agony, vomited a blood-red ball of subtle poison which it commanded him, the tutor, to eat The immediate consequences of his obedience were, his being seized with violent spasms in his bowels, during which he awoke. So great were the effects of this dream, which he persisted had some relation to his engagement with Tsew Keun-shan, on his mind, that nothing but urgent necessity could have compelled him to accept the latter's offer, liberal as it was.

Kwan-hing's disposition was so violent and untractable and he paid so little attention to his tutor's instruction, that he was severely punished every day. As he grew older he felt this punishment the more, and, instigated by revenge and prompted by his wicked servant, he determined to kill the tutor. For this purpose he purchased some rat poison which he mixed with his tutor's food.—Thus was the dream accomplished.

After the teacher's death, Kwan-hing reformed, and made great progress in his studies, but, altho' his father held such high rank, he never rose higher than a Ganlin. This was doubtless as a punishment for his crime, but he daringly attributed it to the Emperor whom he presumptuously accused of not appreciating his talents and merits. Not content with this, he openly upbraided him, for which he was apprehended and delivered over to the Board of Punishments who, after lengthy deliberations, decided that the enormity of the crime merited instant death; even his father's influence could not save him from the bowstring.

---

Notice on Sir G. Staunton's Pamphlet "Remarks on the British relations with China," translated from the *Journal Asiatique* of July 1836.

"The strange doctrines of the English in Canton upon the necessity of making war with the Chinese to induce them to facilitate their relations with foreigners, and above all a pamphlet published with this view by *Captain* Lindsay, have provoked refutation by Sir G. Staunton, well worthy of fixing the attention of those who interest themselves in the actual state of the east. The author exposes with great imparitiality the events which marked the short and unfortuna e negotiation of Lord Napier at Canton, and renders full justice to the conduct of the Chinese government in that affair. w ich has excited such violent protests or rather declamations against the Chinese, on the part of the English merchants of Canton. Sir George opposes also the barbarous style which the English of Canton have adopted in their transactions of public affairs by the Chinese authorities, and which is only intended to throw into ridicule every thing which comes from the Chinese government. ‡

This little work has had very great success in England and has powerfully contributed to calm public opinion upon the transactions of Canton, and to maintain the English government in a moderate and pacific line of conduct."

## EAST INDIA AND CHINA TRADE

*(Atlas, 1 anuary 7th.)*

A number of merchants and others connected with the trade to the East, and who had formed an association for the protection of that trade, met on Tuesday at the Jerusalem Coffee House, to receive the report of their Committee; G. G de H. Larpent, Esq in the chair. The attempts to obtain an alteration in the duty on Bohea tea and the successful efforts for the equalization of the duty on sugar, the endeavour to place each of the Indian presidencies on an equality in this respect, the altered duty on paper, and the stamp law, were all discussed in the report. To establish a consul at Canton with considerable powers, and to withdraw from that quarter all the resident servants of the India Company, to procure leave for the families of merchants to domicile at Canton, permission to establish depots, to trade with the Chinese generally, as well as with the authorities, the privilege of trading with Amoy and Ningpo, and the possession of an Island on the Eastern coast of China, free from the operation of its laws, were stated as the heads of a memorial submitted to the Secretary of State for Foreign affairs. Two duties levied at Batavia and Singapore, and the efforts made to relieve trade in those quarters were alluded to. On the subject of steam vessels, the Committee reported their opinion that the associations of Glasgow and Liverpool for the co-operation, to several members of the Cabinet for their support, and to the President of the board of trade, the Chancellor of Exchequer, and the Secretary for Foreign affairs, for the attention paid to the Committee and its requests. The receipts of the association since its formation were stated at 1,658l, the expenditure at 554l. The report was received and ordered to be circulated. Thanks were voted to the members of the committee and to the chairman. Some resolutions, modifying the minor arrangements of the institute, were agreed to, and the members who had vacated their seats he lot were re-elected to the Committee. Adjourned.—*Englishman 11th April.*

## DEATH OF GENERAL MINA.

*(Times, Feb. 3.)*

Extract of a letter dated Barcelona, Dec. 30, 1836; —" Before this reaches you, you will probably have heard of the death of General Mina, which took place on the 25th inst. As soon as this melancholy event became known it cast a gloom over all. Half-hour guns were fired by a Spanish corvette lying here until the interment. The body was laid in state at the palace. The crowd to see it was immense, but every thing was conducted in the best possible order. The funeral procession passed through a line of soldiers drawn up on either side of all the principal streets; the British flags of war, Rodney and Childers, fired minute guns from the time the cor se left the palace until all was over, which lasted nearly four hours. It was a very cold day, but, thanks to the church uns, I had to carry a wax flambeau, which, with those before me, kept me from freezing. (The snow is now on the ground with lots of ice.) The funeral was attended by all our naval officers that could be spared, in full dress; also the officers of the French and American ships of war. Captain Parker was one of the pall-bearers."—*Sing Free Press 11th May.*

## SLAVING REPRESSED.

The following is the account of the number of slaves captured by the *Buzzard*, Lieut Campbell, from 17th Dec. 1834, to July, 1836:—

| | | |
|---|---|---|
| Formidable | Of Old Calabar | 702 slaves |
| Iberia | Bonny | 813 |
| Benvenida | Lat 14 N., Long. 1 W. | 433 |
| Semiramida | Bonny | 418 |
| Norna | Bonny | 236 |
| Lucira | Non | 190 |
| Medallo | Cameroons | 268 |
| Felicia | Bonny | 401 |
| Famosa Bemera | Bimbia | cargo |
| Joven Carolina | Old Calabar | 431-3,460 |

The whole were under Spanish colours, with the exception of the Medallo and Joven Carolina. The amount of prize money is no considerable as to afford the sum of £300 to the common seamen belonging to the brigantine.—*Bombay Courier, March.—Ibid.*

## AVA.

Letters received from Rangoon, communicate the intelligence of the death of his golden-footed Majesty, the King of Ava. The event is said to have been followed by civil commotions, and the country is represented to be in a most disturbed state. Trade was stopped, and all communication between the Capital and Rangoon was entirely suspended. The British and Foreign merchants were seized with consternation and dismay at the imminent danger which threatened as immediate alienation of their property. "Were it not for the powerful influence of the British Resident," says one of the letters, "we should have been by this time deprived of all that we earned during so many years of toil and trouble. Colonel Burney's name is a sufficient passport for protection both of life and property in these eventful days of anarchy and confusion." Timber, it is fou nd, will not be allowed to be exported for a time, in consequence of the state of disturbance.—*Ibid*

‡ On this subject Chinese classics differ. Many and those well informed, pretend that the translations, to be true, cannot be given in any other style.

## CORRESPONDENCE.

TO THE EDITOR OF THE CANTON PRESS.

### WHIG MOCK ECONOMY.

Mr. Editor,

It is current in Canton that our stock-broking government in England has made some "alterations" in the members of the commission in this country—doubtless for the power that it will give them to parade in the Houses of Commons their pretences of economy. They have cut off as I believe about £ 1800—at as one item. They do not touch the Senior Superintendent's, nor the Public's, nor the second interpreter's, I was going to say the most useless, but I soon among the least useful of the lot—what the two last named may have done for their money has never reached my ears; unless —but I abstain!

The chief interpreter, the most useful of all, and him on whom must rest *all real business* with the chinese, is reduced £ 3 0. The senior surgeon, a most estimable individual, and whose labors are ending as duty good with the chinese, as out doors; and the second surgeon, a no less worthy man, who's services have been available to all, foreigners and chinese, and who is *indispensable* here, is struck off. that these were the most useful of the list no one will dispute.

As to the second superintendent and secretary, had they been *struck off*, there would, I fancy, have been no cause for great grief, for their "utility" might be amply made up by one good clerk.

The whole is on a bad sample of Whig "economy"—making the useful suffer, that the useless may revel.

I am

Canton 31st May. Sir,

Your obedient Servant,

A LOOKER ON.

---

Sir,—I am not sure if the following can merit your acceptance; but, if you think so, please take them. I am inclined to think that you may have more of the same kind by and bye.

Your's very truly,

Canton, May 27th 1837. CAN DO!

### Instructions Imperial.

To the presidents, sons, the Governors of the two wide provinces, and his colleagues. we now address this. Let them diligently observe and respectfully obey!

We have received an order to inquire diligently into the great affair which flustered the inner land. —The celestial messengers, whose vessels are at Bin, have decreed that the barbarian forbands then the yellow river shall overflow its banks during the next year; and we order that the *Hwan-pe* consider how this great expense can be met. This is to be roused!

This is sent to the Tsung-tuh—the *Foo-yuen*, and the *Hoppo*,—so that this may be overlooked.

(Order.)

I have heard that this year the Treasury will be but short, and I have received an order that this must be made up, at once, from the trade of the foreign barbarians at Canton? What an unreasonable ask this?

The yellow river having to break through its banks, there can be no doubt of the justice of foreigners paying it, as before If what calls for justice as that the foreign trade shall be made to pay for all extra expenses, as has for many years been the case?

I order that the *Foo-chang-yuen* do report to the Board as to this and exercise his best intelligence in his reply. No shall be merit reward? In not this on record? Tremble intensely! Intensely! Learn are the orders!

(No 2.) *Foo chin-yuen* in answer.

Reverently looking up, I attempt to obey the orders, but I have no money; for the Hong merchants have dared to say that they are all poor, and nor I, nor the Consoo-fund, have a thousand Dollars.

Still I reflect deeply on what I have had leave to me! The money must be found! Though the foreigners object, their objects is to defraud me, and the supreme powers of as much as possible; yet I think that I may be able to conquer them— I shall consult with the Hong merchants, as to this, and then report again. There can be no doubt that they are used to foreigners, and can exercise the superior cunning when they please.—A respectful declaration &c. &c.

(No. 3.) Ditto.

Again looking up I venture to implore a glance on this. The plan is as follows:

The Treasury has been emptied by drafts from the high Officers of the Province and the one say that I can see to meet the demand in this?

Let the order go out to *Hin-nee-lane*, or some other, that he make a representation advising the admission of Opium, and, after some months, by an order came out against it, so that all may know it. Thus we may sell "so much," and great profits be made. This will be proper. Never but two foreign devons will lose, and we shall gain enough to pay for the yellow river! I look up and reverently hope for the answer

Is not this proper? Attentively do I wait for the answer? This is important!

Looking up I present this!

Signed &c., as usual.

Answer to above.—This is seen. It is approved. Let orders be issued!

To *Hong lo-mow*, whose virtue is transcendant, and whose talents are illustrious, living at *Tingshan* n the *Foo-ke-shan*.

Benevolent elder brother!

*Chang-se-ma*, your stupid younger brother, looks up, with respect, and sends this, by a "fire express," in the sincere hope that it may cheer up the cockles of your heart as it has of mine.

I have heard that this day (the 9 Genii be praised) the "red-headed barbarians," infesting the suburbs of this city, received information by ocean letters that the good and eminent friends of the Celestial Empire, the *Com-pa-ni*, are to advance again, on Tea and Silk, I know not how many tens of lakhs of "great round money." My last letter to my virtuous elder brother recommended him that, as the barbarian markets are as bad as possible, he should not buy Teas, except very cheap. Oh how stupid was I! But now, again, I look up, and venture to recommend that you, superior man, get hold of as much Tea as possible, at any price. Last year, the *Compani* be thanked! we made the barbarians pay 25 per cent more for Teas, than the year before, though they were worse in quality. If the *Com-pa-ni* did not make advances this next season, prices would have been low indeed; but now, oh joy and good luck! we may, as before, have any price we please to ask.

I have raised a tablet in my hall to this *Com-pa-ni*, and burn incense and knock head, before it, morning and night. So shall my gratitude be made manifest! This is all.

Looking up &c. &c.

From *Chang-se-ma*, born in the evening, who bows his head to the ground, and worships.

4th Moon. 26th day.

## DRAGON BOAT FESTIVAL.

Dear Mr. Editor,—Festivals are constantly being celebrated by the Chinese, and we wonder now and then at an odd procession, a Sing-song, or racing of dragon boats on the river, some of which are constantly passing before our eyes, and on asking the Chinese of the meaning of this or that ceremony, we scarce get any answer, further, than that it is "Joss-pigeon," tho' some of the more intelligent ones among them display a little more knowledge of the foreign tongue, by giving us the important information that such and such a thing "hab old story" or "long time before sky pigeon," and with this we remain satisfied. The festival of the dragonboats is as ancient as almost any observed by the Chinese. It's origin was in the third century before Christ, and is founded upon rather a melancholy incident of that period; few would imagine that it had its origin in an antidote for the blue devils. History gives the following as the origin of the festival observed throughout China on the 5th day of the 5th moon by upwards of 300 millions of people, the remaining 600 millions of human beings who inhabit the earth being almost utterly ignorant of such an event. In the middle of the third century b. C. in the state Tsoo there dwelt an officer of the Government, named Keuk-yuen-ping, a man of superior talents, yet unfortunately afflicted with that most dreadful malady called the blue devils. History states he detested his own life, gave way to the most melancholy forebodings, and finally came to the resolution of putting a full stop to his mortal career. On coming to this most praiseworthy conclusion, he composed some farewell verses, which having completed, he "embraced a stone" threw himself into the Meih-lo stream and was drowned. At each anniversary of his death it became customary for the people of the neighbourhood to repair to the spot in boats brilliantly illuminated by lanthorns, and rowing over the spot where the event took place, in soothing accents, call upon the spirit of the defunct. The custom gradually became universal throughout the Empire, and all it's rivers on the 5th day of the 5th moon are now covered with these snake like boats, plying to and fro, gaudily ornamented with flags and banners of various colored silk, and filled with quantities of men who propel them, with short paddles, regulated by the beat of an immense drum and gong in the centre and bow of the boat. On the river which runs by the City of Hang-chow-foo and in the vicinity of the city Soo-chow-foo, this festival is said to be observed with immense splendor.

P.

## TO THE EDITOR OF THE CANTON PRESS.

### BRITISH COMMISSION IN CHINA.

Sir,—After the merry game of change seats, "the King's coming" having been played here in His Majesty's commission, for three years, no further manoeuvres of the foreign Office in China will create surprise however they may afford a fair subject for amusement.—The matter is short!—The want of knowledge of China on the part of the foreign Office has sent an expensive commission out here, utterly useless, until it is, by a demonstration of power, put into communication with the Government of the country, not with Hong-merchants or Linguists.

The foreign minister probably now sees his blunder, but is too conceited to acknowledge it, so keeps chopping and changing and nibbling at the salaries of the officers of the commission, with a view to pacify the *Joe, Humes* of the Commons, when the plain and manly plan is clear to withdraw the commission entirely, *or* to put it in a position to do good.

I see the East India and China Association ask a set of measures for China, many of them good measures, but they might just as well ask Lord Palmerston to order his chief commissioner here to send home a piece of the moon in a basket, as to accomplish one of those beneficial measures. Are the E. I. Association up to this hour really so blind as not to know that H. M. Commision here, with the Chinese are utterly powerless. If they do not know this, they must have very *in*-sincere correspondents, or be very dull in the *up take!*

The only branch arising out of the commission really useful, I may say nearly indispensible, is the medical one, and that is, as usual with the Foreign Office, *the one most hit at*, when absolute sinecurists are left untouched!—Is this to be tolerated? Why, if the British residents in China had been allowed a voice in laying out their *own* money, the medical officers would have been doubled in number, should such appropriation have cut down the Chief to a half, and not left a church open.

It is known to you, Mr. Editor, and should be so to Lord Palmerston, that by the absurd laws of China all wives and children of foreigners must stay down at Macao, above 80 miles of a difficult passage from Canton. To the mother and her children, most men will, without hesitation, give up their right to medical skill; here therefore, from circumstances, one medical gentleman must reside. —*From* June until *March* at Whampoa about and above 1000 British seamen sojourn in a reach proverbial for some of the most dangerous and sudden hot-country attacks. Whampoa is only approachable by river with the tide, and it is 15 miles from Canton: therefore no daily help can be looked to from there.

At Lintin constantly 15. 20, to 30 vessels lay, some all the year, some for months.

These are becoming fields for the practice of three hard working medical men, not sinecurists, and had lord Palmerston a heart in his breast, he would listen to such claims. We, in Canton, may amount to about 100 British, yet, shut up in our houses, no amusement, no change, we have diseases, or what is worse, fancied diseases, sufficient for 500 in happier circumstances; is it unfair to ask a resident medical attendant of the crown, in preference to wasting our own money on a Commission which circumstances beyond its controul render useless.

Canton, 31st May, 1837.

A.

My dear Mr. Editor,

I send you an Extract, in the Calcutta "Englishman" of April 12th from the London "Atlas" of January 8th,

In it you will see the best plan that the E. I. and China Association of London, the very body who should know most of the interests of this trade, as its self constituted guardians, devise in their wisdom, and ask of the British Government; and, as they are on the spot, strong, and likely to be persevering, I know of no people to whose exertions success is so probable.

Now what is proposed as the best that can be hoped or asked for? Simply, the worst thing that could happen to us—the very thing that will bring on us a repetition of the danger, the misery, the loss, the disgrace, caused by the deplorable folly of the senders out of Lord Napier. To ask the Chinese, at Canton, for things as impossible for them to grant, as it would be unpalateable to them to do so—to ask of these, the very men who profit by the continuance of this present system, and whom a change would destroy, to ask, I say, that *they* should break through the Emperor's orders, while destroying themselves! To ask the Governor of Canton, who would not allow Lord Napier to remain, in any thing of a dignified or independent situation; who has only allowed Capt. Elliott to beg himself up to Canton, on terms of good behaviour—to ask him to allow a Consul, with full powers—for us, free trade—free residence—free intercourse—free appeal to the laws—to have depots —to trade with whom and how we may please; to trade even with the E. Coast—to possess islands! Oh, Mr. Editor, what a proof is this to us of how little our situation is understood, when this body, well intentioned as I cannot but think, and well informed as they ought to be, ask what our bitterest opponents must wish, or our most foolish masters, the Government, could, in their ignorance, devise. "Put not thy trust in Princes," says the holy author; —put it not in E. I. and China Associations, says this paper—put it not in the home government' says experience—put it in yourselves, say I; and you may carry your point; or, if an Embassy is asked for, let it be to head quarters, to Peking direct; and let government settle it with government; and not endanger life, and injure property, by any silly visits here, where merchants may be oppressed, in consequence; or their trade squeezed, to pay for the folly of their governments and their acts.

How long will it be, Mr. Editor, think you, before the British government pays British merchants (and others) for their losses occasioned by the business of Lord Napier? When, I suppose, the Chinese pay back the enormous amounts plundered from the foreign trade, through their obliging Agents the Hong-merchants, since that business, to pay for repairing forts—building forts—casting cannon—building war boats and keeping the Canton army in a state of readiness, to repel the next barbarian attack.

"Save me from my friends," says the Spaniard and well might he! Save us from the E. I. and China Association, say I, if this second quixotry to Canton is what they propose. Save us from such friends!

I am, Mr. Editor,
Your's truly
ONE HERE IN 1834.

Canton, May 30th, 1837.

Dear Mr. Editor,—The state of the Hongs and the probability of payment of the debts of the Hing-tae Hong seem to divide public attention with the late pleasant news from England. One cannot be helped and must be borne. With the other I have my doubts if either is the case.

*Aide toile ciel t'aidera* is a true saying, and, like the waggoner and Hercules, no one is justified in calling on others to help him, till he has done all that he can to help himself. What is the objection to an address from the foreign merchants of Canton to the Co-Hong, asking them for information as to the exact condition of the Consoo-fund, and what it's past receipts have been, and where they are, and protesting against the misdirection of these funds, (ordered by the Emperor in 1787 to secure foreign merchants) to other purposes, and demanding that the past debts be made up out of the sums collected since the failure of *Chun-qua* in 1829. This for a beginning.

Your's truly,
Canton, 31st May. 1837. Y.

## OBITUARY EXTRAORDINARY.

FROM A CORRESPONDENT. Died a few days since, somewhere between Peking and Canton, *Chun-apeen Yap-how*, the infant son of *Heu-nae-tsze*, of the age of about twelve months, of a gradual decline; to the deep regret of many Chinese and foreigners, his warm friends and sincere well wishers.

His complaint was, as we have said, a slow and gradual decay, not a little aggravated by an attack of *Choo-tsun*, and another of *Heu-kew*, from which he suffered much, when but a few weeks old; though his original constitution was by no means strong; which had led many to think that his career would be but short, as has unfortunately now proved.

To show the high destinies to which he might have aspired, and the hopes formed of and through him, it will be sufficient to mention that the Governor of the "two broad provinces," and the other government officers, stood sponsors for him, as soon as it was found in what high esteem he was held at Court.

The schemes, hopes, plans and speculations to which his limited existence gave rise, were, we are told, boundless; and we have small doubt but that the regret, expressed at his untimely end, is far more severe and sincere than is generally recorded in verse or epitaph. Nor is it likely that this will be confined to China. In all probability, many in Behar, Benares, Malwa, and even Turkey, who have learnt his existence, and rejoiced in his promise, will now have to mourn our and their bereavement. Some of his warmest friends, even now, we hear, cling to hopes that he is still in existence; or that he may be resuscitated; should either prove the case, we shall gladly publish it to the world.

*Sic transit gloria mundi.*

# CANTON PRESS.

June 3rd 1837.

We are much obliged to our correspondent "Can do" for his *intercepted letters*, and shall be still more so if he continues to supply us with others. The Poo-ching-sze's correspondence about supplies to Government bears every mark of authenticity, it being the custom, whenever government is obliged to go to some extraordinary expense, to squeeze the foreign trade through the Hong merchants.

We regret with our "*Correspondent*" the infant death of *chun-apeen-yap-how*, the chinese characters of whose name a friend has translated to us, as "legalization of the opium trade."

We agree with our correspondent Y., as to the propriety of insisting on an explanation from the Hong merchants as to how the Consoo-fund is applied.

The remarks of "one here in 1834" appear to us to be perfectly correct. We are well aware that every one of the objects, the East India and China Association in London wish to obtain, are highly desirable, but to attempt to obtain them through the commission now here would be highly impolitic. A direct and scornful refusal is certain to be given to any application made at Canton, particularly as hitherto the Chinese, without making the slightest concession, have gained from the Superintendents the only point that was seriously contested.

We are in part of our correspondent A's opinion as to the injudicious way in which the British commission has lately been reduced. We certainly would prefer to see several surgeons officially appointed, instead of there being only one at Macao as in future will be the case, to seeing some salaries continued for no service at all. As far as we can learn the salaries will in future be: Chief Superintendent (we do not know whether that title continues as before) £ 3000 per annum, and £ 2500—for contingencies, such as rent of office, clerk's salaries etc., etc. instead of £ 5000 as before. Second Superintendent (to act only in case of accident or other inability of the chief) £ 1500—instead of £ 2000.—Secretary £ 800—instead of £ 1300.—First interpreter £ 1000—instead of £ 1500.—Second interpreter £ 800—as before. Surgeon £ 1900—instead of about £ 1300. Office of second surgeon at £800 discontinued. Chaplain £1200—as before. The whole reduction will therefore be seen to amount (including the before abolished salary of the former chief of £ 6000) to £ 11,100—or about one half of it's former expense. Laudable as it no doubt is in Ministers, to be as economical as can be, yet we, with our correspondent, must regret the discontinuance of the second surgeon, a gentleman, whose professional knowledge has gained the confidence of our community, and whose services, as being resident in Canton were always available. We likewise regret to see the salary of the first interpreter reduced by £ 500.—The often arduous duties of that office, and the many years of preparation necessary for it, require to be well recompenced, particularly also as the office is one of great responsibility, whenever any official transactions with the chinese take place. We confess that it appears to us that the salary of the vice-superintendent would be well employed in paying a surgeon and continuing the salary of the interpreter as before, and to give any surplus there may be as encouragement to young Englishmen for acquiring the Chinese language. Beyond the translation of documents required for the superintendents, the present interpreter kindly translates all such correspondence as passes between the foreigners and hong merchants.

We believe that of late a great many reductions have been made in the salaries of consuls etc. in foreign countries, but with all the above mentioned reductions the commission in China continues still to be by far better paid than any other consulate.

## COMPANY'S FINANCE COMMITEE.

We, as well as all our neighbours, had hoped that the last season was the last in which the Company would interfere in the China free-trade, but we are sorry to see that our hopes were deceitful, as we learn from Calcutta, that during the next season 50 lakhs of rupees are again to be remitted to England by way of Canton. We shall therefore soon see the Company's treasure open, and the agents putting a term as to the time till when advances on shipments to England are to be made, will again enable the Chinese, as they did last season, to hold back their produce to the very last, to extort enormous prices. It is, we believe, not overrated when we state the advance in prices occasioned by Company's advances at 25 per cent (In this we are supported by the writer of Chang-se-ma's letter) The money paid out of the Company's treasury may have been $ 2,400,000, being two thirds of the value of the shipments, whose whole amount would be $3,600,000, out of which the Chinese obtained beyond the fair value of their produce, $ 720,000 by way of a cumshaw or present made to them by their old friends the Company, at the cost of the British consumer. We do, and frequently justly, complain of the arbitrary acts of the Chinese government, but the unjust and despotic manner in which the British government, at the instigation of the Company, has interfered with the Free trade ever since it's existence, is without precedent even among the Chinese governmental acts towards foreigners.

The very first season of the free-trade's commencement, instead of allowing it to take it's natural course, in steps the Company, desirous to retain part of the profits which had so long been exclusively theirs, and throws into the market an immense extra-capital, by which, whilst prices of all exports rose, the exportation was fomented beyond the capability of the home markets, and Chinese commodities soon fell so as no longer to be remunerating to the importer. The company's dealings in China, though contrary to their charter, are connived at by the Government at home, which seeing, that by the aid of this trusty ally, more tea was being imported than had been the case at any previous period, now suddenly changes the duty on low teas, of which a great part of the imports consisted, from 1s. 6d. to 2s. 1d. per lb, for which, on specious pretences, it obtains the sanction of government, and contrives, by this financial *tour de force*, to shew a gratifying increase in the receipt of customs, totally disregarding the ruin of the China trade and of those interested in it. The consequence has been, that, instead of the expected increase of consumption, this has been almost stationary by the immense duty of about 250 per cent on costprice, and the warehouses are now filled with free-trade teas for which there is no customer, whilst the Company is selling off without limits it's old stock, thus preventing any spirit of speculation in China produce to arise, which might be beneficial to the consumer. Why does not the East India and China Association, instead of indulging in chimerical dreams, lay the grievances under which the China-trade suffers, before the government, and convince them of their perfidious and tyrannical conduct towards it. This would be doing every one connected with China real good service.

A meeting of the Hong-merchants etc., was held at the Consoo house a few days since to receive the Hoppo and, we believe, the *Poo-ching-sze* (treasurer) and other mandarins. The subject to be discussed was the payment of a sum of 30,000 Taels which the Canton government levied last year on the Co-hong for the erection of the new forts at Hom-qua's Folly, the Cum-sing-moon and other places; the salt merchants were assessed also, and with the government paid the remainder, about 90,000. The Co-hong then pleading poverty and inability to pay at once, the *Poo-ching-sze* advanced the amount, which, not being yet repaid, he called on them for. Payment was ordered and agreed on.

The *Antonio Pereira* and *Sylph* from Calcutta and the Straits have arrived during the week with advices from the former to the 16th April, and from the latter to the 13th May, and bringing us the *Singapore Chronicle* of 6th, and *Free Press* of 4th and 11th May, from the latter of which some extracts will be found in another column. The Opium-market in Calcutta continued inactive, owing to the advices received from here. Both the Clippers have not brought more than 450 chests between them, which is a sufficient proof of mistrust of our market. The Government had declared the epidemic at *Pallee* to be the real eastern plage, and much anxiety prevailed as to it's passing into the Company's territory. A cordon sanitaire was about to be drawn to prevent all intercourse with the infected country.

Great mortality also prevailed in Ceylon from the measles.

We hear from one of the gentlemen of the proscribed nine, that he has been requested by the Hong-merchants to go down to Macao, and thence to apply for a passport to come up again, which he has been promised, will be immediately granted.

The government continue to vex the Opium trade wherever they can, and we have now to report the loss of a junk with about a hundred chests, and a crew of forty men. The junk, we hear, had just left Cap-shuy-moon and steering seaward, when she was attacked by a government cruiser, when a hot combat ensued; but one of the cruiser's shot striking the junk's hull below water-mark, she soon filled, and went down, neither any lives nor property being saved. We fear that this occurrence will again put a temporary stop to the trade.

The tides in our river rise now daily to a great hight, having for the last four or five days flooded many of the lower streets in the suburbs, as likewise the space in front of the factories, and the passages of the hongs, though the spring-tides have not yet begun, the highest of which will only be to morrow. It is said that the rains and the high tides together have rendered the prospects for the ensuing rice-crops in the lowlands very unpromising, though in the higher lands, not subject to inundation, the crops look well. The present swelling of the river is caused by the snow having melted in the mountains, of Yunnan and their waters being carried away by the river.

## NOTICE.

### LIGHT AT FALSE POINT—BAY OF BENGAL NOTICE.

REFERRING to the Notice published from this Office under date 19th July last, Notice is given that on the 1st day of March next a Light will be exhibited at False Point on a Tripod, in Latitude 20° 19' 25" N. and Longitude 86° 48' 8" E.

The Light will be exhibited from an elevation of about 63 feet above high water mark, and be visible in clear weather at a distance of about 13 miles from an elevation of 15 feet above the surface of the Sea.

The Light will be enotinued at this height until the end of November, after which it will be discontinued, in order to the removal of the Lantern to the top of the permanent Building. It will subsequently, viz., on and after the 1st March, 1838, be again exhibited at an elevation of 120 feet above high water mark, and be then visible from 18 to 20 miles in clear weather, from the height of 15 feet from the surface of the Sea.

The Pilots' Station will be continued as heretofore, off Point Palmyras, during the S W Monsoon, that is from the 15th March to the 15th September, during which period the Pilot Vessels cruize during the day off the Point, anchoring during the night in a line East and West, in Latitude 20° 42' to 20° 48' N. with the Point bearing West to W. by S.; the Vessel, on board of which the next turn Pilot may be, will burn a Blue Light and fire a Maroon alternately every half hour, commencing with the former at eight o'clock and continuing till day light.

Commanders, on making the Light on False Point, are recommended after bringing it to bear West in from 13 to 14 fathoms, to steer to the N. E. keeping in from 13 to 18 fathoms, as the wind may hang to the Westward or Eastward, on no account coming under the former depth. In this track the Blue Light and Maroon abovementioned will be seen long before the Light on False Point is lost sight of. If, however, about the beginning of September, the wind comes from the Eastward or the weather assumes a threatening appearance, the Pilot Vessels necessarily haul off to the Eastward, and will then be found in a line between Point Palmyras and the Floating Light at the entrance of the Eastern Channel. Vessels therefore about that period, if the wind hangs to the Eastward or has a threatening appearance, are recommended after leaving False Point on no account to approach Point Palmyras, but rather to endeavour to make for the Floating Light at the entrance of the Eastern Channel, and it is further notified that from the 15th September no Pilot Vessel will be found to the Westward of the Western Sea Reef.

From the 15th September to the 15th March the Pilot Vessels cruize during the day between Saugor Sand and the Western Sea Reef, anchoring in the night East and West of each other, in Latitude 21° to 21° 10' North.

Vessels approaching either Station during the day, are requested to make for that Vessel on board of which they will see a large red Flag flying at the Main whenever they can do so without great inconvenience or delay. In the night during the N. E. Monsoon, that is from 15th September to 15th March, at the Floating Light Station at the entrance of the Eastern Channel, the Vessel having the next turn Pilot on board will burn a Maroon every hour, and in thick weather every half hour, and as before stated, at the Point Palmyras Station, during the S. W. Monsoon, or between 15th March and 15 September, such Vessel will alternately burn a Blue Light and Maroon every half hour. Commanders are in like manner requested during the night to seek their Pilot from such Vessel, it being however understood that any Pilot Vessel which may be first seen is bound immediately to use every exertion to put a Pilot on board, night or day, without reference to turn or rotation, and that this latter is only allowed when no delay is occasioned thereby.

By Order of the Marine Board.

C. B. GREENLAW, *Secretary.*

*Fort William, the 23rd January*, 1837.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measng. 1600 cubits & upwards pay 0.782 1/4 of a T. per cubit
2nd „ „ „ 1200 do. & under 1600 „ 0.72 2/10 „ „
3rd „ „ under 1200 do. 0 506 2/5 „ „

N B. The cubit is 14¼ inches; measurem^t is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Main mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products—T^e largest class pay from $ 43.0 to $ 43.20; 2d class from $ 37.60 to $ 37.80; 3d class from $ 32.00 and under. The Canton per Present Pee is paid by all vessels 6 0 Tuns or $ 2233. Linguists fee $ 123½ and Comprador's fee $ 50 Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—White and unbleached Longcloths continue to be in fair demand at our quotations.

COTTON YARN.—continues much depressed, some sales of indifferent quality having been made as low as $ 33 for the lower numbers.

WOOLLENS.—There has been some demand for *Longells*, which have slightly improved in price.

LEAD.—there has been inquiry for it at our price.

TINPLATES.—have again receded a little

COCHINEAL.—The stock continues very heavy, and prices low.

RICE.—Our quotations continue unaltered. though we are not aware of any transactions having taken place.

STRAITS PRODUCE.—continues as depressed as before, whilst new importations are daily arriving.

COTTON.—The lower descriptions have experienced a furth^r decline, but for good quality there is more enquiry—the market being nearly bare of it, and while sales of Western and Nellore cotton have been made at 7 8 @ 8 Taels, and of low Bombays and Bengals at about the same price, Timevelly would fetch 10.3, and for some middling Bandas, 10.5, has been offered. Of good Surats we believe there is none in the market. The first arrivals with good cotton would cause a decline on these rates.

OPIUM.—There has been considerable activity in Malwa during the past week, but we are almost at a loss for quotations, sales being reported to us about the same time at 520 and 540 Cash, and at two and three months time at 560. A good deal has been no doubt purchased for the Junks to sail during the present month to the northward, but many of the transactions are we think entered into on speculation, and with the view of influencing the market. In the Bengal drug there is almost nothing doing, and it would be impossible to force sales of new Patna at present to any extent, at even 700 @ 710, there being no demand. In our last we expressed a belief that matters would probably be soon accommodated between the mandarins and smugglers. The attack however, within these last few days, by mandarin boats of a Junk with, it is said, 180 chests on board, in which the Junk was sunk, must further delay any arrangement.

### EXPORTS.

RAW SILK.—The Chinese state that the 6 st crop of Canton Silk has been much injured by wet, and prices continue high for the little of No. 3 that has come into market.

TEA.—Nothing doing. The reports of the first gathering of black tea being short, are confirmed from other parts of the districts, and the deficiency is attributed to unfavorable weather. the plants having been injured by the quantity gathered last season. High prices have been paid for Pekoes and Pahoe Kook-Congous. The new Orange Pekoe is beginning to arrive, but in small quantities, which will be chiefly required for native consumption, and which is selling at higher prices than the late advices from home would warrant for export.

## EXTRACTS.

*From the Chinese Repository.*

ART. V. *Ophthalmic Hospital at Canton: the sixth quarterly report for the term ending on the 4th of May, 1837.* By the Rev. Peter Parker, M. D.

SIX hundred and fifty patients have been received during the last three months, making the whole number, since the opening of the hospital, 3350. The interest in the institution continues to increase, and the eagerness to enjoy its benefits has never been greater than at present. The crowd of patients, on the day of receiving them, now limited to once in two weeks, has been very great. Sometimes not less than 200 or 300, and on one occasion about 600, including their friends, have been present during a single day. The most numerous classes of disease during the last term, have been acute and chronic ophthalmia, cataracts, entropia, pterygia, nebulæ, lippitudo, and granulations of the lids, as may be seen from the following table, which exhibits 31st diseases of the eyes, and 2nd miscellaneous diseases.

| | | |
|---|---|---|
| 1st | Amaurosis | 22 |
| | Acute ophthalmia | 49 |
| | Chronic ophthalmia | 74 |
| | Purulent ophthalmia | 14 |
| | Ophthalmitis | 6 |
| | Conjunctivitis | 4 |
| | Hordeolum | 4 |
| | Cataract | 61 |
| | Entropia | 78 |
| | Ectropia | 3 |
| | Trichiasis | 10 |
| | Pterygia | 35 |
| | Opacity and vascularity of the cornea | 28 |
| | Ulceration of the cornea | 10 |
| | Nebulæ | 59 |
| | Albugo | 4 |
| | Leucoma | 7 |
| | Staphyloma | 22 |
| | Staphyloma sclerotica | 2 |
| | Onyx | 4 |
| | Iritis | 4 |
| | Linpitudo | 38 |
| | Night blindness | 1 |
| | Day blindness | 1 |
| | Near sightedness | 1 |
| | Synechia anterior | 11 |
| | Synechia posterior | 3 |
| | Mydsis | 5 |
| | Closed pupil with deposition of coagulable lymph | 5 |
| | Precedentia iridis | 6 |
| | Glaucoma | 9 |
| | Choroiditis | 4 |
| | Euphora | 6 |
| | Granulation of the lids | 50 |
| | Complete loss of one eye | 49 |
| | Loss of both eyes | 51 |
| | Muscæ | 6 |
| | Muscæ volitantes | 3 |
| | Tumor of the lids | 2 |
| | Imperfect cornea at birth the sclerotica extending into its place | 1 |
| | Adhesion of the conjunctiva to the cornea | 2 |
| | Injuries of the eye | 2 |
| | Cancer of the eye | 1 |
| | Disease of the caruncula lachrymalis | 2 |
| 21 | Otorrhœa | 2 |
| | Deficiency of cerumen | 1 |
| | Deafness | 3 |
| | Disease of the lower jaw | 1 |
| | Dropsy | 2 |
| | Ovarian dropsy | 1 |
| | Cancer of the breast | 1 |
| | Goitre | 4 |
| | Sarcomatous tumors | 2 |
| | Encysted tumors | 4 |
| | Hernia umbilical | 1 |
| | Hydrops articuli | 1 |

### HARBOR REGULATIONS.

*Port of Honolulu, Oahu,*

*SANDWICH ISLANDS.*

[ Abridged from the printed laws. ]

*article 5.*

Ships entering the harbor for the purpose of refreshing or refitting only, are to pay the following rates:—

For the outer harbor, 6 cents per ton.
" " inner harbor, 10 cents per ton.
" " buoys, 2 dollars.

But if a vessel has goods on board selling at regular sale the same rates shall be paid as for trading ships.

*article 6.*

Ships entering the harbor for the purpose of trading, are to pay the following rates:—

For the outer harbor, 50 cents per ton.
" " inner harbor, 60 cents per ton.
" " buoys, 2 dollars.

*article 9.*

The Pilotage shall be at the following rate:—
For taking a vessel in $ 1 per foot.
For taking a vessel out $ 1 per foot.

Oahu Sandwich Islands October 14th, 1834.

(Signed,) KAUIKEAOULI.

It is a curious or whimsical way in which Chinese, addressing a superior in writing, express their sense of their inferiority. This is by writing the the characters of their language much smaller than usual; thus we see mentioned in the "Lettres edifiantes and curieuses," partly written by Jesuit missionaries in China, that they, on addressing the Emperor Kang-he on one occasion, made use of the most minute characters they could write, in due observance of the above custom, which, as these say, though highly complimentary to the Emperor, exposes him to some inconvenience, from the difficulty of reading such small writing.

(France.) The minister of Commerce and public works has directed M. Stanislas Julien to translate from the Chinese, *a treatise on the rearing of silk-worms*, being part of an Encyclopedia on agriculture, of the name of Cheou-shi-thoung-khao.

There is at present in Paris an account given by a Chinese priest, of the name of Hing-tsang, who during 17 years travelled in India (from 629 to 645) and who there visited no less than 138 kingdoms with a view to procure Buddhist books and to study the languages in which they were written. The work which on his return he published by order of the Emperor, is stiled Ta-thang-si-iu-ke. It is comprised of 12 books, of which two are entirely devoted to the history of Mighada. These twelve books occupy 568 pages, large 8°, and consequently 482 pages more than the Fo-koue-ki of Fa-hien, who only visited 30 Kingdom in India.

---

The following we have extracted from an account which appeared in the *Chinese Repository* for last month on Embassies to China, this being the second of a series of papers to be published in succession, illustrative of the Political relations Europeans have hitherto had with the Peking court by means of Embassies. This second paper reviews Lord Macartney's mission, and if the remainder be written with the same research and clearness, which distinguish the two first, the public will be much indebted to their author for putting them in possession of much interesting and new information.

"It will seem strange that, though the British connections had then existed near a century, no Englishman could be found, conversant with the Chinese language; and that Paris, Rome, and Naples, must be ransacked to find a man, able to act in the capacity of interpreter. This man, known by the name of "Mr. Plum," was a native of China, who had learned Latin and Italian at the "Chinese college" at Naples.* Forty five years after sir George Staunton's voyage of discovery to find him, to the shame of England be it spoken, there is still no public endowment, or professorship; no inducement held out to the study of the Chinese language—a language which it is more our interest, than that of all other nations besides, to acquire and keep up a correct knowledge of. France has long had professorships—what is her interest in Chinese matters? Germany can also boast of her scholars. How is it that Britain is, of all, the last, though so deeply interested? How is it that, of the few of her citizens who have acquired this language, there should not be one on whom the sun of public patronage should have shone? Not one who has met with an honorable award, such as his labors entitled him to, at the hands of his country? While Remusat shed honor on the literature of France from his professor's chair, now filled and worthily by Stanislas Julien, why should the distinction have been withheld from our Morrison? Strangely, that this name should be better known, and his works more appreciated, in foreign countries, than in his own? Strange, that, in our universities, some moderate sum could not be spared to endow a professorial chair, even though it had to be taken from some of those, more laborious than useful persons, who yearly enlighten the public with dissertations on the particles of dead, and, all but in books, forgotten language!"

---

## CORRESPONDENCE.

### TO THE EDITOR OF THE CANTON PRESS,

Dear Mr. Editor,

A few days since, while walking through a portion of the suburbs of the city, little frequented by foreigners, I cast my eyes up to notice the name of a street, which I was about passing, and the glaring gilt characters, cut in marble, over the gate, informed me that it was the street "Redolent of virtue. Overflowing with delights." Not willing to allow so tempting a spot to escape me, I turned into it, but had not advanced far, before I came to the conclusion, that if I remained there long, I should unquestionably be suffocated with the horrible odours, that arose from piles of filth, heaped up at every corner, accordingly retracing my steps, I had nearly gained the gate of this delightful spot, when I descried something, in the shape of a letter, lying on the ground. I took it up. It appeared to have been recently folded, and bore no address, moreover finding it had not been pasted together at the end, I ventured to open it—my curiosity increased as I read it—in finding that it contained some slightly exaggerated notices on that portion of the community of Canton, politely termed "Foreign Devils"—by the natives. I send a translation, which you can publish if you like.—

Yours truly

P.

---

* Two of these Chinese, so qualified, were found and attached to the embassy—one of them took his departure, when the ships arrived off the Ladrone islands, being afraid of the risk he ran. Had "Mr. Plum" done being afraid of the risk he ran. Had "Mr. Plum" done the same, and it astonishes us that he did not, the embassy would have found itself, in China, without an interpreter; or, had the Chinese seized him, as "holding traitorous intercourse with foreign barbarians," what a dilemma would they not have been in! "Mr. Plum" was well known to be a Chinese; and it is strange that he was not seized, and punished, if not executed.

### ( LETTER. )

"Oh Choo! benevolent elder brother, born before sunrise! What countless ages have passed, during which the "Four precious gems" have lain idle? what myriads of cycles have elapsed, since your unworthy younger brother beheld the brilliancy of that countenance, which ever surpassed the dazzling splendour of the noon day sun? In good truth does the She-king say, "separation of a "single day to friends, is like the absence for a "season, of summers refreshing rains, and the suns "genial warmth, to beds of flowers." Yet scarcely should I grieve; the interval to yourself has been one of mighty import, in as much as you have been engaged in the duties of that high office to which the favor of Imperial kindness and consideration permoted you;—receive then my congratulations on the occasion, while an intimacy which has grown up from our childhood, will pardon my calling to your remembrance, that string of rubies and pearls, which was uttered by the immortal Tsze, to the king of Foo. "When down, "look up, when up, look down. He who stands up "high, must be careful lest he fall down low."

My last letter dated the 14th year, 5th moon, 10th day, of "Taou-Kwang," and written in the city of Kwang-Tung, gave you some details of a ghostly looking tribe of devils, who by the immense bounty and compassion of the ever to be adored "Son of Heaven" and "Brother of the Yellow Dragon" are permitted to reside on the banks of the "pearly stream," in a small filthy spot, to which they are restricted by the local authorities, from a fear that, should they be allowed to wander, their turbulent and unruly dispositions would create troubles with the "black haired race"[1] which would require force to subdue, but this the wisdom of our governor "Ting-Tung-Tang," on many petty occasions, has hesitated to use, well knowing that if the "tigers of war" were once let loose, these barbarians would be turned into granite, by a single glance from their eagles eyes—for of all these vaunting demons, few possess that emblem of courage, a "capacious paunch"[2] indeed among all who come under my observation, few are of "unbounded stomachs."[3] In fact on all occasions where they have commenced an argument, or presented expostulations, in their usual blustering tones, it has been found that silent contempt, on the part of our august Governor, and a little derision from the truth, by recommendation, by the members of the Co-hong, has had the effect to worry and to subdue them incontinently. Yet Choo! could you be present, and with me observe the manners of these strange creatures, indeed would you say, with the illustrious Ming "Happy is the wearer of a Queue." To describe to you some of the customs of these rude barbarians would, I am fearful, lead you to imagine, that I had been culling the "Tsze-Put-Yu"[4] for your edification, yet, however unlikely the descriptions may appear, I can vouch for their accuracy, and well do they deserve a place in that celebated collection of monstrosities. Time however will not permit me now to dwell long on the subject, but, having had occasion lately to be present at a feast in the house of one of these Fan Kwaes, I must communicate a little of what I saw. I could not but be struck with the little progress they have made, in that most adorable of all arts, the art gastronomic, which seems, with them, to be yet in its infancy. "Shades of Low-Man-Ke"[5] well art thou deserving of the innumerable red lob-choks daily burnt before the altars dedicated to thy memory! How thankful should we feel to that distinguished "Fan Head"[6] who in addition to the practice of his profession, through a long life, bequeathed to posterity his "Hints on Cookery" in 990 volumes. In our younger days, you will recollect, oh Choo! the eagerness, with which we pored over its pages, and the avidity with which we devoured some favorite dish, made from its directions. But alas! as a gentleman, sitting by me at the feast in question, quaintly remarked. "Sir, throats are not a mile long, neither do numberless palates succeed each other, at intervals of an inch"—He deserves to have been born within the influence of the Celestial country! You may judge however what feelings people possess, who sit down to table, and after having swallowed rivers of a fluid, in their barbarous dialect called "Sou-pe" have the hardihood to devour the flesh of fish, which is served up in a manner as near as may be to resemble life itself. Mountains of meat, sawed from the animals, from which they are taken, and half raw, are then placed at various angles of the table, these swim in lakes of blood, and from their sides, chunks are chopped off with swordlike instruments and served round to the guests on points of pitch forks—And really it was not till I beheld sights like these that I became convinced of what I had been often told, that the ferocious dispositions of these devils, in fact their propensity to eat one other, arises from their indulgence in such gross food How lamentable their condition! pray for their conversion. Our dishes they pretend to despise!—Think how case hardened must be the wretch, for whom Sharks fins, have no charms and what pity does he deserve, who is yet unconscious of the virtues of Deers sinews; who looks with affected contempt, upon a harriece of newly fledged puppies and sneers at a rat pie!! deluded creature! in the delights of Elephants hoofs served up in the style of Low-man-ke, peace to his ashes! they find no gratification, while for the melting richness of the adorable Rhinoceros horn they have no taste.—But let me proceed with these wonderful beings. The huge pyramids of meat being devoured, and the bones thrown to the multitudes of wolfish looking dogs, that are allowed to sit beside them, or under the table, where they keep up an incessant growling and fighting, at each others throats in obtaining the largest morsels, there followed varietie of a composition of flour resembling leather in consistency, after which succeeded a substance, the smell of which, my olfactories, endeavored in vain to escape. This, is a compound I am told of sour buffaloe's milk, baked in the sun, under whose influence it is allowed to remain, till it becomes filled with insects, yet the greener and more lively it is with the more gout is it eaten; in their dialect, this odd thing is called Che-sse, and is always accompanied by the drinking of a red muddy fluid, which foams up over the tops of the drinking cups, soils one's trowsers, and is named Pe-urh—think of this!!"

But no more, when will these unfortunate men, become versed in the precepts of the gastronome, who I have already quoted, and make offerings of red candles and gilt paper, on altars raised to his memory? When capable of enjoying that incomparable dish, of which you and I have so often gorged—and at the mention of whose name, pronounced softly, I see tears gush in streams from your eyes? listen—" stewed kittens." Hold—I have ventured too far—thoughts of this latter delicacy are overpowering—they create a tremor throughout my frame, and in concluding me, that my own dinner hour approaches, recall that short but important sentence in the 65th volume of Low-man—which says:" stewed kittens with garlands of mice should be applied hot."

Farewell then for the present, and should you desire it, I may give you some further sketches of this remarkable tribe.

Virtuous Elder Brother—whose glance is as forked lightning—deign to cast a flash across this page.

Your stupid younger brother,
Lo-Yung, born in the evening knocks
hisheed against the ground, scattering
fragments of it, to the four winds,
and worships.

To Choo—dwelling at Peking, happiness & peace.
Taou-Kwang, 17th year, 6th moon, 3rd day.

---

### CHINESE TRANSLATIONS.

Dear Mr. Editor,—I was not a little surprised to see, in your last, a translation, which you were at the trouble of making from the *Lessons Addressing* Sir G Staunton's heavy pamphlet, as well as his plans for translations from the Chinese. I suppose you only took this to fill up your columns, and that you did not read it when in type; for a more injudicious extract you could scarce have made.

In the first place, it presumes to reflect disoredit, indirectly, on our interpreters in China; and, in the next, it would lead to convince the British ministry and people that we are civilly treated by the Chinese, in their edicts. That such is not the case, you must know; or, if you do not, it is time you did. You say, in your note, that, "on this, Chinese scholars differ." There is no one "differs" but Sir G. Staunton; and he for reasons known only to himself. You say that many and those well informed *pretend* that translations must be as given. There is no pretence in the business.

Ask of Messrs Morrison, Gonsalvez, Gutzlaff, Bridgman, Hunter, or Thom, our best Chinese scholars, now in China and see what all will tell you. If you wish to get a soothing, flattering account, to save your pride from an insult, Sir G. Staunton's is the plan, no doubt—if you want *the truth*, Mr. Morrison's is the one. Choose between!

If *fan kwei* is to be translated, one would put it as "foreign devil;" a term of contempt and reproach, as which it is meant. Sir George, arguing upon its universal use, thinks "European gentleman" the preferable translation; and blames his brother scholar for "calling a spade a spade." So "a barbarian" offends Sir George; and he thinks "foreigner" would read better; and so of all the rest.

I know that he is not the only apologist for the Chinese; but all who do follow him are wrong informed, or wrong informing persons, who do not know what they talk about; or, who wilfully blind the truth. I beg of you to give this a place; and, if, at the same time, you take the trouble to enquire as to this point—no unimportant one, by the bye—I think it will be as well.

Your's Mr. Editor,
A READER.

---

Dear Sir,—Here are one or two more letters of the authenticity of which you and your readers may judge.

Your's
June 3th, 1837. CAN DO!

"To *Poan ze-ming* illustrious by his virtues at *Fa-ming foo* in *Fo-kien*.

Your younger brother bows head and worships.

It has been represented officially to me, great man, that the Hong-merchants have an intimation, that the King of the barbarian tributary nation called *Ying-ke-le*, alias "red bristled," has dared to change the duty in his wretched islands on the kind of tea known here as *tsi-cha*, and barbarously there called "Bohea tea." Now this most nefarious change it is requisite that I acquaint you with, that you may act as may seem advisable.

Looking up &c.
Canton, 13th year 10th moon 10th day.

---

1 Writing materials, ink stone, pencil, paper and ink, so called by the Chinese.

2 An appellative of the Chinese.

3 The Chinese sometimes, instead of saying, such a man is a Hero or a courageous man style him as above

4 Name of a work, filled with all sorts of horrible stories.

5 Most likely some Chinese "Ude."

6 Literal translation of "Cook."

It may be as well to mention, that the writer does not deviate from the truth, in the enumeration of the animals which he mentions—all are considered tit bits by a Chinese bon-vivant.

No. 2

The above is on record, and as it is a matter of no small importance, affecting the rice of some hundred of thousands of poor subjects of this central flowery land, I, as in duty bound, reported this new audacity to the northern court. Verily this obstinacy of the foreign barbarians is remarkable! oh how different from what we knew in the time of the *Com-pa ny!* What true friends of ours they were! What cause we have to regret them!

Now then, I, having sent this to be honored by the dragon's glance, have received as follows.

"It is ordered that no trees dare henceforth to grow *tai cha* (Bohea tea): this is the order."

Now I the *tea country commissioner*, as in duty bound, proceeded forthwith to read this order, enjoining on the merchants that they should not presume to sell Bohea tea; but I was fearful as to the trees, when behold I have now a report from the Inspectors, that all the *tai cha* on the plants was in one night transformed into Hyson skin. Let the government officers of Canton thus inform the several barbarians. Is not this surprising? Let their hearts be changed, and let them more and more wonder at the glories of this inner land.

EMBASSIES TO CHINA.

Dear Sir,—As attention has been lately drawn to foreign Embassies, I hand you a translation from no less an authority than M. von Klaproth; this may assist in leading to correct opinions on an important point.

Your humble Servant,

A SUBSCRIBER.

*Introduction to a*

***Description of Russia translated from the Chinese (from the French of Julius von Klaproth.)***

After reading the treaty, concluded, in 1728, between China and Russia, which contains nothing humiliating for the latter, we should be deceived if we supposed that this power is looked on by the first as its equal. In the instrument itself one finds nothing to lead to the presumption that China arrogates supremacy over Russia; but, if we now read the description of that empire from the official geography of the Mantchous, it will be seen that the monarchy of the Czars is looked on as a state in submission to the Prince who governs "the middle empire." The very path by which the Russian Embassadors and tribute must be received, *is* there marked out by Chinese regulations.

Diplomatists may perhaps answer that, inasmuch as China has never received the slightest mark of submission from Russia, we may treat the ridiculous vanity of the former with the contempt, which all groundless pretensions deserve. Such diplomatists will be wrong, in the eyes of the Chinese, as well as in the eyes of such Europeans as are competent to form a judgment on the subject.

According to the received ideas in China *every foreign power which sends an Embassy thither, acknowledges itself, by the very deed, submissive to the Emperor.*

In Chinese this act of submission is expressed by the words *Lae chaou*, "to come to bear homage." This expression it is customary to apply but to the first embassy from a nation—for the following they use the words *Lae-hang* "to come to bring tribute." Let us open the Chinese annals, and we shall see that in 166 of our era the Roman Emperor Antoninus sent an embassy which offered *tribute* to *Hwan-te* of the *Han* dynasty; that in 284 another brought it to the *Tsin*; that the same things occurred in 637 and 719. We shall find that Spain has submitted since 1576. Holland since 1653; and the Pope since 1725.

In the explanation to a map of the world published in 1794 at Peking we read:—"In the 57th year of *Keen-lung*, (1793) the English, who are placed at the extreme N. W. of the world, and who, during the ancient times, had never penetrated into China, crossed the two oceans, to come to bear homage to the Emperor." The second English legation will be treated, in the annals of the empire, as having "brought tribute."*

We see then that the sending of an embassy is a sign of submission; and that the presents, which it brings, are looked on as a thing due to the Emperor. They are therefore called *Kung—ectigalia, tributa. Aung* is, in general, whatever an inferior offers to his natural superior.

I well know that many persons have considered that, for the sake of political or commercial interests, one might easily shut one's eyes to the arrogant vanity of the Chinese; provided the embassy obtained the proposed end. We might be induced to range ourselves under this opinion, were it not for the notorious fact that never has an embassy to China been able to accomplish it's purpose. The Chinese, far from negociating with the *envoys* of foreign powers, look on them but as people come on behalf of their masters to present his respects, and the tribute due to his superiors.

The fixed and immutable manner of treating with the Chinese government is that of causing to be sent, in writing, the demands to be made, to the governor of the province, at which one arrives. He sends to Peking to the *Le-fan-yuen* (College for foreign affairs) which never fails to give an answer. But there is no instance in which the Chinese have treated with an Embassador, unless when coming at the head of an army. The Mantchous have made some concessions to Russia, from fearing her at the time, and because they foresaw that the trade on the frontiers of Siberia, and of the Russian caravans which would come to Peking, would do good to the *Kalka* mongols, ruined as they were by the long wars with the *Koldon* of the *Eleuths*. Under other circumstances, or at another time, the court of Peking might perhaps not have shown itself so tractable.

The most useless thing then that can be done is to send embassies to China; since they can never attain their end, and can only serve to place European governments in a humiliating position. Whether Embassadors do or do not perform the ceremonies prescribed by the laws of the celestial empire, is a thing of no importance. The evil, which it may be sought to avoid, by refusing to submit to the nine genuflections, before the Emperor, or before his throne, has been already effected by the very arrival of the mission.

My dear Mr Editor,—It is Horn Took I believe who says in his "Diversions of Purley"—that he can construct on English sentence in which seven *thats* shall be placed contiguously. We all know the story of the Frenchman who asked a lady playing at cards how many she counted.—"We are two to two" she replied.—He then asked her antagonist how many she was, and she answered—"we are two to two too."—"Vy Madame, says mounseer," by gar I suppose you tink I have one fool madame—you speak to me too-too-too-too by gar like one trumpet madame." Funny as this may appear it is nothing to the Chinese. A Seen-sang or school master this morning wrote the following sentence—"Tsze-tsaetsae—tsze-szetsze tsze-sze—Seu tsze ketsaetsze sze tsze ke tsze—Sze-yay." — Which means —" Now—from this time—this man's (scholar's) irregular conduct must injure his descendants—the schoolmaster has reported that his (good) qualities are corrupted." Were a Chinese to say this to our funny French friend—mounseer would probably remark.—"Vy sir, you hiss hiss hiss me like one dog, by gar."

Your's

DELTA.

* Klaproth's prophecy is true enough—too true!

# CANTON PRESS.

June 10th 1837.

CHARGES ON RICE-LADEN SHIPS.

The question—what is the real amount of charges on Rice-laden Ships—has been so often agitated, that we are well pleased to lay before our readers a full statement of it merits, which has been handed to us by a correspondent. We will refrain from adding any remarks of our own at present. The following is our correspondent's statement.

"Rice is, I believe, the only mercantile commodity to which in China a bounty is attached. To this bounty the necessities of the people of this province have given rise, the capabilities of the soil —in most part mountainous and unfitted for the cultivation of rice—not keeping pace with the increase of population. In the reigns of Keenlung and Keaking, including a period of about 85 years, the bounty on importation of rice consisted simply in the remission of the duties, or rather in the entire exclusion of rice from the tariff of duties. In the 4th year of the present reign, 1824, the Governor and Hoppo, considering it desireable to hold out further inducement to the importers of foreign rice, obtained the remission of the measurement charge on vessels laden with rice alone, accompanied however with the prohibition of their taking on board any export cargoes,—an useless and impolitic prohibition, which was in the following year rescinded. The law has since then remained unaltered: It remits the whole of the measurement charge, varying from about $ 850 to nearly $ 3000, according to the size of the vessel, and also that portion of the 'cumsha' which bears the name of *enter-port-fee*, amounting to Taels 865 413, or $ 1207.96,—

"Early in the year 1833, apprehensions being entertained that the supply of rice that year would be inadequate, the government of Canton issued a proclamation, repeating the law on this subject, and lest extortion of sums beyond the legal fees and charges should under any pretext, be had recourse to, a statement was given of the sums of money legally payable *to government*, namely, for the port-clearance taels 519 858, as fee to the head of the commissariat taels 116.424,—total 629.872, or $ 850.10. Beyond this amount, it was stated, no fees are payable in any way to the government.*

"Notwithstanding the cautious wording of this document, which says only that no other fees were payable in any way *to the government*, foreigners nevertheless regard the sum of 629 Taels, therein mentioned, as covering all port charges whatsoever upon Rice-laden Ships. And when they found linguists and compradors applying for their usual fees, they immediately remonstrated; and, considering these demands to be contrary to the proclamation of the government, they made loud complaints, which in several instances were carried before the authorities. These complaints were not however directed against the compradors and linguists, but against the officers at Whampoa, among whom the fees to the compradors and linguists are ultimately divided. These officers being accused of extortion, the Governor immediately, and without enquiry, denounced their conduct, and declared that no fees were in any way payable to them. On further investigation, he found that he had acted incautiously, but unwilling to retract, he endeavoured to effect a compromise,—recommending the officers at Whampoa to remit a portion of their fees, and the security merchants and linguists to divide between them the balance of what had still to be paid to those officers. Such at least was the common report at the time. The security merchants and linguists would not of course submit quietly to a loss that they could in any way remove from themselves. An understanding was immediately come to among the Hong-merchants, that any of them purchasing imported rice should give only such a price as would leave him the ability, without loss, to pay over to the security merchant of the rice-importing vessel, the whole of the sum paid by him to the Whampoa officers, or, to speak more correctly, to the linguists and compradors, as their fees. Thus the extortion (if it is right so to call it) was removed from the ship—confessedly liable to *some* charges, to the rice—which for a century before had been free from all charges whatsoever.

"Under these circumstances, if the ship and the rice were to the same consignment, no difficulties arose: the smaller amount of charges was paid upon the ship, and the proprietor of the rice had his property sold at a somewhat lower rate than otherwise would have been the case. But where the rice was consigned by one party and the ship to another, the justice of this mode of proceeding was disputed, and at length, in one instance, successfully on the part of the rice holder.

"The question seems to turn solely upon the nature of the comprador's and linguist's fees.—Are they legal or illegal fees,—are they recognised port charges or the contrary? To this it must be answered, they certainly are not recognised by the Chinese government as *compradors and linguists fees*; yet *in part* they are not only legal, but are in fact paid into the treasury of the government itself. In the regulations of the Canton customhouse, published under the imperial sanction, there is a list of fees chargeable on the granting of licenses for purveyors, painters, carpenters, &c.; and also of daily and monthly charges upon ships during the time of their stay at Whampoa† As these charges vary—as many of them indeed do not necessarily arise on *every* occasion of a vessel entering the port, they could not be given by the Governor in his statement of fixed charges, while at the same time they continued to be legally leviable. Foreigners generally are ignorant of the details of these charges, because it has long been the established custom to enable the compradors and the linguists severally to meet these, as well as various other charges, by the payment to them of fees on the departure of the vessel. If these fees are unrecognized and illegal charges upon rice-importing ships, so also are they upon *all other ships*. If they are paid, without dispute, *as port charges*, in the case of a ship laden with Cotton or any other commodity besides rice, they are equally port-charges upon the rice-laden vessel. Doubtless it would be well if they could be got rid of altogether. But seeing that they *must* be paid, in one way or another, either by the importer of the rice or by the ship, it is difficult to see how the former can, in justice, be saddled with them seeing that they are customary port-charges, paid by all ships importing any other commodity than rice."

C.

* Vide Canton Register, 17th June, 1833.

† Vide Canton Register, 26th December, 1833; also 3d August, 1830.

MACAO. Much excitement has prevailed in Macao during the last month and the beginning of the present, among the Portuguese population, owing to some intended alterations in the Municipal Chamber. It is, we believe, a law sanctioned by the Portuguese Constitution of 1822, that a town of less than 1,000 hearths or families (*fogos*) is to have a municipal chamber composed of three members only, while if the number of fireplaces is greater, five members are to be elected. Under the former Governor five members (exclusive of the Governor who ex-officio is president) composed the municipal chamber, assuming the population at more than 1,000 hearths: lately however a census was made, and by it the hearths fell short of that number, and accordingly the number of members was reduced to three, besides the Governor, the "Procurador" or Secretary for Chinese affairs, and the judge, the latter taking his seat and voting in the chamber by order of the Governor. It was further pretended that the three regular members should together only have one vote, thus giving three votes of four to the executive, a measure which from the beginning caused much discontent, and several of the residents of Macao refused to accept of their election under these conditions. Another cause for discontent was that, as the judge does, one individual should hold offices incompatible by their nature with their due discharge, and that the judge should only act in a judicial capacity and give up his lucrative appointment as administrator of the Customhouse, vacate his seat in the municipal chamber, and deliver up the management of the orphan fund.

At a meeting held in Macao weeks a few ago of the principal inhabitants of the place, at which the Governor presided, these grievances were loudly complained of. The Governor defended his measures, and the discussion growing warm, one individual made use of expressions for which, by the Governor's orders, he was arrested and confined in the fortress on the Monte. This step irritated the popular party, and demonstrations were made on the following day that might have led to violence, had not the Governor, finding the garrison also inclined to side against him, released the prisoner.

The Governor, finding himself opposed in the execution of his measures, offered to resign his office, and that another should be elected in his stead. This his opponents would not do, and consequently on the first of this month a general council, convoked by the Governor, was held to deliberate on a petition signed by a great number of inhabitants, praying for redress of the above mentioned grievances, and it was then decided that, the office of Administrator of Customs should be discontinued, that the judge should in future only act in a judicial capacity, and that he should give up his seat in the chamber, as well as the management of the orphan fund; and that this chamber should, for the present, continue composed of the Governor and three members, until a new census shall have been made to determine whether their number should be greater. All these alterations to be subject to the approval of the Queen's government.

At the end of the council a general reconciliation took place, the before contending parties embraced, and accompanied by the band of the regiment, the members of the council left the town hall rejoicing in their success.

The above is what we have been able to gather of these proceedings, and is, we believe, true in the main. We being in no ways interested in the quarrel, have attempted to give as impartial an account as possible, but it may nevertheless possibly in some slight manner be incorrect, which cannot always be avoided when party feeling runs so high, as it is said to have done in Macao on this occasion, and when necessarility every recital must be more or less colored with it.

## SPANISH BRIG LA FAMA.

We have again to record mutiny and murder by part of the crew of a Spanish vessel *La Fama* from Singapore to Manila. So numerous have been the proofs of the treacherous dispositions of the Manila sailors, that it is a matter of surprise to us that Captains of Ships will still continue to ship them. In Manila vessels, as in this instance, it is, we presume, an irremediable evil, but why do other ships take them, endangering the lives of the crews and the property. It is said by many that the Manila sailors are more useful than other natives, and that if well treated, they are a gentle race, and that whenever they have risen upon their officers, they have been provoked to it by ill or inconsiderate treatment. Nothing they resent more than a blow, and they never, if opportunity presents itself, forgo revenge. People of such dispositions, however useful they may be, must ever be dangerous on board ships, for the mildest of men, seeing, in a moment of danger to his ship, his orders disregarded, *may* deal out blows to enforce them, and others not mild or gentle, *will* do it, without in such a moment thinking of the consequences, and no ship can therefore ever be safe if the crew be composed of Manila Indians. We would therefore recommend that the Insurance Offices insert a clause in their policies, invalidating them, in case the crew, whole or in part, consist of Manila men. This would prevent much loss of life and property. The following is an extract from a letter dated Manila, 20th May, relating to the murders on board the Fama.

"The Spanish brig *la Fama* arrived here to day from Singapore in charge of the steward. It seems that when near this place, three of the crew, who constituted the watch on deck at the time, and who had been punished the day before, rose upon the mate, and after killing him and the boatswain, went to the cabin and stabbed the Captain who, in the attempt to make his way on deck, was also murdered. The rest of the crew appear to have been held in fear by the mutineers, but were finally persuaded by the steward, when the murderers were intoxicated, to attempt to secure them, and succeeded with two, the third was drowned, in jumping over board. The brig, we are told, has a valuable cargo on board, which has not been injured with the exception of a few packages, all papers, letters, and documents of every description were thrown overboard

The two prisoners brought in are in the hands of Government, and will, we presume, be executed shortly.

If the statements made to us as above, prove, on further examination, to be correct, it seems to us that the underwriters on cargo and block, will be inclined to reward the steward for his conduct in the matter."

We have to thank "A Subscriber" for the translation he has sent us from M. Klaproth's work. His opinion of the inutility of Embassies has been borne out by subsequent events.

"A reader" finds fault with us for having published in our last an extract from the Journal Asiatique, remarking on the manner in which Chinese documents are translated. We have obtained as much information on the subject as we could, and it is the opinion of all the sinologues here, that, to be true, the offensive appellations given to foreigners in Chinese official documents, cannot be otherwise translated than as they have been given; the majority is, in this matter against Sir Geo. Staunton's remarks, and Chinese official insolence will continue to be exposed, and not softened down by palliating translations.

We are obliged to "Delta" for his amusing anecdote, and should like to see "P" oftener adorn our pages with his humorous and correct sketches of Chinese character and manners, for which he is assured of our sincere thanks. "Can do"'s "intercepted letters" are very welcome, and whether or not translated from the Chinese, it is certain that these latter are overjoyed at the prospect of seeing the Company's treasury opened again, and at again raising the prices of their produce.

We hear that the Vice-roy's answer about Hingtae's affairs is out, complaining of differences existing between the Hong-merchants and foreigners statements, and that, before these are settled, he cannot come to any conclusion on the subject.

We noticed some time before that the Republic of Chile had declared war against Peru and Bolivia. The arrival of the *Porcia* from Lima, 23d March, and the politeness of a passenger by her, has put us in possession of the following interesting details, from which it will be seen that England is at present engaged in hostilities with the republic of New Grenada.

"When I left Lima (the eve of March 23d), the war between the two powers Peru and Chile was still carried on with what vigour each could prosecute its measures:—those of Chile being offensive through the superiority of her navy, it only remained for the government of Santa Cruz to await her expeditions and defend the confederated states;—the escape of the three vessels (which remained to Peru of the fleet)—which had been blockaded near Guayaquil by a superior force of Chile, and their arrival at Callao, induced the government, however, to assume offensive operations by endeavouring to create a diversion in the southern part of Chile—(for which service another vessel was purchased, and the former were being fitted out) to prevent the Chile squadron from coming down in full force to make a descent upon their coasts, it being understood that so soon as the fleet could be got ready, an expedition to consist of all the naval force with 3000 troops, including the exiled Peruvians in Chile, would leave for that purpose.

In order that this measure might not be frustrated by the Chile government being apprised of the intention, and to make the diversion more complete by an unlooked for stroke of boldness, an embargo was laid upon the Port of Callao on the 21st of March for the term of 20 days—so far as related to merchant vessels bound for Chile, and satisfactory bonds of $ 10,000 required for merchant vessels sailing to other parts—that they would not touch in any of the ports of that republic.

Meanwhile general Santa Cruz was absent, having gone up to Arica in the French frigate Flora, whence he was to proceed to Bolivia, and intending to make some new political diversions previous to returning.

The difficulties between new Grenada and Great Britain—originating in the maltreatment of the Consul at Panama, &c., threatened a war between the two powers:—it was rumoured that the British had taken Carthagena and had then a force of 4000 negroes from Jamaica, beside their fleet of ships:—orders had reached Lord Edward Russell of the "Acteon" at Lima, to proceed immediately to Panama, and the same awaited Commodore Mason, who was then in the "Blonde" at some of the Intermedios, preparing to return home; and it was supposed that the isthmus would soon be in possession of the British power."

## NOTICE.

LIGHT AT FALSE POINT—BAY OF BENGAL

## NOTICE.

REFERRING to the Notice published from this Office under date 19th July last, Notice is given that on the 1st day of March next a Light will be exhibited at False Point on a Tripod, in Latitude 20° 19' 25" N. and Longitude 86° 48' 8" E.

The Light will be exhibited from an elevation of about 65 feet above high water mark, and be visible in clear weather at a distance of about 13 miles from an elevation of 15 feet above the surface of the Sea.

The Light will be enctinued at this height until the end of November, after which it will be discontinued, in order to the removal of the Lantern to the top of the permanent Building. It will subsequently, viz., on and after the 1st March, 1838, be again exhibited at an elevation of 120 feet above high water mark, and be then visible from 18 to 20 miles in clear weather, from the height of 15 feet from the surface of the Sea.

The Pilots' Station will be continued as heretofore, off Point Palmyras, during the S W Monsoon, that is from the 15th March to the 15th September, during which period the Pilot Vessels cruize during the day off the Point, anchoring during the night in a line East and West, in Latitude 20° 42' to 20° 48' N with the Point bearing West to W. by S.; the Vessel on board of which the next turn Pilot may be, will burn a Blue Light and fire a Maroon alternately every half hour, commencing with the former at eight o'clock and continuing till day light.

Commanders, on making the Light on False Point, are recommended after bringing it to bear West in from 13 to 14 fathoms, to steer to the N. E keeping in from 13 to 18 fathoms as the wind may hang to the Westward or Eastward, on no account coming under the former depth. In this track the Blue Light and Maroon abovementioned will be seen long before the Light on False Point is lost sight of. If, however about the beginning of September, the wind comes from the Eastward or the weather assumes a threatening appearance, the Pilot Vessels necessarily haul off to the Eastward, and will then be found in a line between Point Palmyras and the Floating Light at the entrance of the Eastern Channel. Vessels therefore about that period, if the wind hangs to the Eastward or has a threatening appearance, are recommended after leaving False Point on no account to approach Point Palmyras, but rather to endeavour to make for the Floating Light at the entrance of the Eastern Channel, and it is further notified that from the 15th September no Pilot Vessel will be found to the Westward of the Western Sea Reef.

From the 15th September to the 15th March the Pilot Vessels cruize during the day between Saugor Sand and the Western Sea Reef, anchoring in the night East and West of each other, in Latitude 21° to 21° 10' North.

Vessels approaching either Station during the day, are requested to make for that Vessel on board of which they will see a large red Flag flying at the Main whenever they can do so without great inconvenience or delay. In the night during the N. E. Monsoon, that is from 15th September to 15th March, at the Floating Light Station at the entrance of the Eastern Channel, the Vessel having the next turn Pilot on board will burn a Maroon every hour, and in thick weather every half hour, and as before stated, at the Point Palmyras Station, during the S. W. Monsoon, or between 15th March and 15 September, such Vessel will alternately burn a Blue Light and Maroon every half hour. Commanders are in like manner requested during the night to seek their Pilot from such Vessel, it being however understood that any Pilot Vessel which may be first seen is bound immediately to use every exertion to put a Pilot on board, night or day, without reference to turn or rotation, and that this latter is only allowed when no delay is occasioned thereby.

By Order of the Marine Board.

C. B. GREENLAW, *Secretary.*

*Fort William, the 23rd January.* 1837.

## LETTERS BY SUEZ TO BRITAIN.

THE undersigned will make up a Packet by every Ship for Bombay or Calcutta to "Tho. Waghorn Esq. Suez"—For Postage and other particulars reference is requested to Mr Waghorn's prospectus as it appears in the Canton Register of 30th May last.

JA. INNES.

Canton, 2nd June, 1837.

## CANTON GENERAL CHAMBER OF COMMERCE

The office and Records of the Chamber are open to the members every day excepting Sundays; and the Secretary will be in attendance from 12 till 3 o' Clock.

By order of the Committee,
WILLIAM SCOTT.
*Secretary.*

Canton General Chamber of Commerce
No. 2 Danish Hong 4th Feby. 1837.

NOTICE.—Referring to the above advertisement I beg leave to solicit from my friends and the Public, a continuance of the Patronage that has heretofore been given to the Auctioneering and Warehouse Keeping, of the late establishment of Mr. ROBERT EDWARDS, No. 3 Imperial Hong.

CHARLES MARKWICK.

Canton, April 1st, 1837.

NOTICE.—The business hitherto carried on by the undersigned will from this date be conducted by CHARLES MARKWICK,—At No. 3 Imperial Hong.

ROBERT EDWARDS.

Canton, 1st April, 1837.

NOTICE.—SAMUEL WETMORE JR., is this day admitted a partner in our establishment,

WETMORE & Co.

Canton, February 1st 1837.

NOTICE.—The Copartnership hitherto existing under the firm of Markwick Edwards & Co. ceased this day. All Persons having claims against the said firm are requested to forward them, and all Persons indebted to the same are requested to pay the amount to the undersigned.

ROBT. EDWARDS.
Canton 31st Dec, 1836. No. 3 Imperial Hong.

NOTICE—The undersigned having been appointed Agents in Canton for the PERSIAN INSURANCE SOCIETY OF BOMBAY are prepared to receive application for In-surance of such risks as by the regulations of the office they are authorized to take.

H. & N. CURSETJEE.

Canton, 2d May, 1837.

## NOTICE.

THE interest of SAMUEL RUSSELL and AUGUSTINE HEARD in our house ceased on the 31st December 1836. RUSSELL & Co.

Canton, January 2nd.

NOTICE.—The interest of WILLIAM H MORSE, in the business of our House, commences with this date.

OLYPHANT & Co.

Canton, March 1st, 1837.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

## WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874756 of a Tl. per cubit.
2nd „ „ „ 1200 do. & under 1600 „ 0.7421091 „ „
3rd „ „ under 1200 do. „ 0.6.6.341 „ „

N B. The cubit is 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products—The largest class pay from $ 13 0 to $ 4320; 2d class from $ 370 to $ 3700; 3rd class from $ 3700 and under. The Cumshaw or Present Fee is paid by all vessels 1600 Taels or $ 2223. Linguists fee $ 17.3½ and Compradore's fees $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.,

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—Longcloths are in fair demand at our quotations.

COTTON YARN,—continues nearly as before, several large parcels of No. 36 and upwards, have been lately shipped off to India, which will tend to relieve the market.

WOOLLENS.—Longells continue firm, with some advance. In Spanish stripes there is no demand and the quotation may be taken at 5 cents under last week's.

RICE,—the demand for the foreign grain continues very languid, and prices rather lower than before

STRAITS PRODUCE.—We have to notice a slight improvement in the price of Betelnut and pepper. Tin is as depressed as before.

COTTON.—There have been several sales within the week, but principally confined to the Madras kinds. Timewelly selling from 9 8 @ 10.5 according to quality, and in demand from the want of fine cotton. Western and Nellore a 7.7 @ 7.9; the latter description proves in many instances inferior to the Western. In Bengals and Surats, there is little doing. what is in the market consists ing of the inferior kinds. The clearances in the month of May are reported at.

| Bombay, | Bengal, | Madras, | Total, |
|---|---|---|---|
| 8571 | 56 4 | 7604 | 21,829 Bales. |

leaving a stock on the 1st instant of.

| | | |
|---|---|---|
| 8430 | 13.811 | 13.334 35 595 Bales. |

which does not. we understend, include about 4000 Bombay and 7000 Madras from the vessels now discharging.

OPIUM.—The transactions in Malwa continue brisk, but without an improvement in prices—which are 525 @ 535 and at 560 at 3 months time. Per the Bengal drug there is however no demand even at $ 700 The restrictions against the river smuggling being strictly enforced, the deliveries are entirely to the Junks outside and at Macao. For the deliveries of last month see above.

### EXPORTS.

RAW SILK.—The little that is in the market of Tastlee and Tayasam is of inferior quality, for which lower prices than before are being asked.

TEA.—We have no transactions to notice in this article.

# THE CANTON PRESS.

VOL. 2d No. 41. CANTON, SATURDAY, JUNE, 17th, 1837. No. 93.

*From Lettres édifiantes et curieuses.*

**Letter from Father Jantoux to Fatherde Fontaney, dated Peking August 20. 1704.**

The Emperor has lately indulged us a favour, which reflects great honour on our Religion. An inundation having occasioned a general famine in the Province of *Quantum**, his Majesty taxed his courtiers, and sent great succours to it, which were to be distributed by certain rich *Mandarins*, deputed expressly for that charitable work: But notwithstanding this, a great number of the unhappy people in question came to the capital of the Empire, in hopes of meeting with a subsistance.

His Majesty having entertained some suspicion of the *Mandarins*, sent for four of our fathers. He then observed, that as we were prompted to visit *China*, merely from a charitable motive, it was particularly incumbent upon us to assist the poor to the utmost of our power; this being one of the most essential duties of our religion: That, for this purpose, he had commanded two thousand *Taels* † to be given us, for purchasing rice, which we should deliver out in our burying-ground; and that he likewise hoped, we would exert ourselves to the utmost, for the comfort and relief of such numbers of unfortunate people. The Missionaries received this order with the deepest sense of gratitude; and were of opinion that it would be necessary for them, tho' so much straitened in their circumstances, to raise five hundred *Taels*, and employ them in charitable uses.

Fathers *Suarez* and *Perennin*, who were appointed to distribute this charity, ordered large stoves and kettles to be got ready. They then bought rice; with large neat porcelaine dishes, with salted roots and herbs, to correct the flatness of the rice.

At the sight of a signal which was raised for that purpose, the poor entered without confusion, and met all together in a place appointed, the men standing on one side, and the women on the other. They afterwards were made to go back thro' a narrow passage, where every person received his portion of rice and herbage, which he carried to a place where they all met; and in this manner till the several *China* dishes were emptied. The dishes were then got together, and washed, after which the rest of the poor had their meals, in the same order with the first.

The most considerable *Christians* of the city came likewise, in their turns, to serve the poor, which they did in the most pious manner. They got together the dishes; kept a good order and decorum; and spoke words of comfort to all. The court *Mandarins* and eunuchs, who were come out of curiosity to view this sight were overjoyed to see so excellent an order preserved, without the assistance of soldiers; to find such plenty; and above all, to perceive such cleanliness, of which the Chinese are so vastly fond every where. They were surprized to find persons, of distinguished birth and riches, mingling indiscriminately with the crowd, so far as even to furnish them with the little sticks for eating; and afterwards waiting upon them, with all imaginable politeness, as tho' these poor people had been their guests. ‡ How excellent (cried they) must the Religion be, which inspires such modest charity! The very *Bonzes* became our panegyrists, near an hundred of them being fed every day with the other poor. In this manner we supported, during four months, above a thousand persons daily.

*( From the Indo Chinese Gleaner. )*

A SPEECH ADDRESSED BY AN EMPEROR TO HIS MINISTERS.

The Tartar family now on the throne of China, is not satisfied with the dignity of Sovereigns, but lays claim also to the character of Sages. There is a work, called Ta-hing-heuu, i. e. The sacred instructions, or more strictly, the holy admonitions of the Great T'shing Dynasty; containing what they deem valuable, of the verbal and written advices of their several Emperors. The following, which appears immediately after a very pompous preface, is the first in the book, and was uttered by Kaou-tsoo, in Manchow Tartary, before the conquest of China. Entitled "on venerating heaven:"

His Majesty addressed all the nobles and ministers of state in these words, "A sovereign of men, is heaven's son; nobles and statesmen, are the sovereign's children; and the people are the children of the nobles and statesmen. The sovereign should serve heaven as a father; never forgetting to cherish reverential thoughts, but exerting himself to illustrate his virtue, and looking upwards, receive from heaven the vast patrimony which it confers; thus, the Emperor will daily increase in felicity and glory.

Nobles and ministers of state, should serve their sovereign as a father; never forgetting to cherish reverential thoughts; nor harbouring covetous sordid desires; not engaging in wicked and clandestine plots, but faithfully and justly exert themselves; thus their noble rank will ever be preserved.

"The people, should never forget to cherish reverential thoughts towards the nobles, and the ministers of state; to obey and keep the laws; not to excite secret or open sedition; not to engage in insurrection of rebellion,—then no great calamity will befal their persons.

"If the Prince, receiving the aid of Heaven, reckons that he has no concern with Heaven, and says, 'This is what my own talents and strength have acquired;'—next becomes remiss in the cultivation of right principles, and his arrangements lose what it is suitable and proper for them to possess; then should Heaven reprove him, remove his country and happiness from him, will he himself be able notwithstanding to retain the celestial throne!

"If nobles and statesmen who receive the favours of the sovereign, reckon they have no concern with the sovereign, and say, 'This is what my own talents and strength acquired,' and so cherish wicked and clandestine plots; engaged in irregular, covetous, and sordid proceedings; should the prince reprove them, and remove their noble rank from them, will they be able notwithstanding to secure their persons and families!

"As to the people, if they disobey the restriction of the nobles and ministers of state, and proceed in secret or open sedition, to insurrection or rebellion, it will inevitably involve them in guilt, and bring great and immediate calamities upon them."

The above explains what officers of government often say, viz. "the Emperor is my heaven," which has the same force in Chinese, that it has in English, to say, "The Emperor is my god." It is no difficult matter to see to what a low standard of principles and morals, this separating the people from an immediate accountableness to God, must lead. Sovereigns and magistrates are doubtless the ministers of God; but not so as to render them any less immediately responsible to their maker.

## EXTRACTS.

### THE ALCHEMY OF CREDIT.

Many have expressed surprise at observing the number of small houses of business which have sprung up since the breaking down of the leviathan concerns which formerly monopolized this branch of commercial industry, and have requested to be enlightened with regard to the system by means of which pains-taking clerks from London, Liverpool, or Glasgow have on a sudden become metamorphosed into imposing Co's in Calcutta, carrying on a thriving trade to the tune of money in both pockets, getting called on the Grand Jury, and into society, which they formerly counted on, while retaining no bills of parcels, or drawing out accounts made up two pair of stairs back, in Mincing Lane or the Tron-Gate. Now it is not to gratify any improper feeling, but simply for the purpose of rendering the uninitiated a little better informed on this point, that it may be allowable to exhibit the manner in which these lucky and (it may be added) industrious fellows have emerged from comparative obscurity, and placed themselves by their own exertions, in the high road to competence. Many of these have been pursers, officers of Indiamen or free traders, and clerks connected with shipping houses in the English ports; and it is much to their credit, that they have been enabled to turn to so profitable account, the experience gained by many a tedious voyage to every part of the globe. It will be at once seen how differently constituted the modern houses of agency are from those which preceded them. The latter consisted of persons drawn from the covenanted services, who knew little of trade, and it is only surprising, considering their want of information regarding the profession into which they had exchanged—frequently late in life —that the crash or crash was staved off so long as it was. Now all this is altered, few persons place money in the agency houses, but make the banks the medium of deposit for their surplus funds; or they are invested in Company's paper. Either way the money does not remain idle, the paper being frequently pledged with the bank on loan account, and employed in speculations by a numerous body of private individuals who trade on their own capital.

Suppose some shrewd and observant individual who is determined to enter into the number of mercantile houses in the presidency, and who cannot find an opening, on account of having no connexion in the place, and being totally unknown on Change. Well, he goes to London, recommends himself to some respectable firm who wish to extend their foreign connexions, and is by them sent out to Singapore, China, Bombay or some out station where by degrees a consistituency is got together; and the house still on a small scale, gets a name in the market. As soon as this has been satisfactorily accomplished, a successor is sent out to take charge of the minor establishment, and the principal now arrived at the second step of the ladder, makes his appearance at the presidency with letters of recommendation to the chief merchants, and a few days after, a notice appears in the public prints, and advising that Messrs. Gotrell and Hobbit have entered into business as merchants and agency and commission correspondence with Messrs. Tie-em tight, Bundwell & Co. of London, and Messrs. Longheads of Canton. The clerk of the crown then enters the names of Messrs. G and H. in his red-book—a house of business is taken somewhere near the river side—the Chamber of Commerce inscribes the new comers on its list, and the preliminaries are completed.

The next step is to get a babou, or to speak more consequentially, a dewan, who for sundry considerations —not forgetting the ever recurring double sided donation—agrees to support the house with the circulating medium requisite to carry on its business. At first this is transacted within moderate limits, but in process of time this increasing, the credit of the house obtains extension, till it comes to the grand climax of issuing its own paper; this is discounted at the bank, and by this means, funds to an unobservable extent are raised, which are generally devoted to remmants of produce to England against bills at long dates. The practice too, of the Company and private individuals making advances on goods so transmitted, to an amount equal to two-thirds of their value, gives an additional spur to speculation, which by this means is always turning capital hand over head in and with common prudence, a new house in a few years can scarcely fail of success.

Such is the secret by which the modern alchymy of turning rags into sterling gold is effected by the magic wand of credit. A bit of paper not worth the lowest copper coin in the bazar, is transformed into an instrument which gives the ten knot speed to the clipper, and turns the paddle shaft at sixty revolutions per minute; that rears bended Ware-houses, and that one day will lay down rail roads throughout India, and throw a suspension bridge of one arch across the Hoogly. There are schools to inculcate literature, and dancing academies to teach little masters and misses how to turn out their toes, and to make a bow gracefully; but where is to be found an institution for imparting to grown up children a knowledge of the value of that wisdom, the possession of which enables the owner to take life easily, and to be clothed in purple and fine linen; while his equally deserving but less knowing fellow creature toils on from day to day for a pittance, in utter ignorance of the means by which to rise? Let such learn; for what one man can do, another can so easily accomplish—the philosophy is, to ascertain the how, the when, and the where of the thing; the rest is plain sailing.—*Scott's Compendium, April 4.—Englishman, April 6.—Singapore Free Press. 25 May.*

### AUTOMATON VIOLINIST.

After the extraordinary performance of Paganini and Ole Bull, our readers will not be surprised at any new development of the powers of this instrument however great; but there are few in the world who will hear without wonder and admiration of the unequal of performance of Monsieur Maerzepf's automaton violin player, which was recently exhibited before the Royal Conservatory at Paris. Our informant, M Bruyere, who was present, thus describes this wonderful piece of mechanism:—"On entering the saloon, I saw a well dressed handsome figure of a man, apparently between 40 and 50, standing with a violin in his hand, as if contemplating a piece of music which lay on a desk before him; and had I not come to see an automaton, I should have believed the object before me to have been endowed with life and reason, so perfectly natural and easy were the attitudes and expression of countenance of the figure. I had but little time for observation, before the orchestra was filled by musicians and on the leader taking his seat, the figure instantly raised itself erect, bowed with much elegance two or three times, and then turning to the leader nodded, as if to say, he was ready, and placed his violin to his shoulder. At the given signal, he raised his bow and applying it to the instrument, produced a la Paganini, one of the most thrilling and extraordinary flourishes I ever heard, in which no note was omitted within the compass of the instrument, and which was executed with a degree of rapidity and cleanness perfectly astonishing. The orchestra then played a short symphony, in which the automaton occasionally joined in beautiful styles; he then played a most brilliant fantasia in E natural with accompaniments, including a movement allegro molto on the fourth string solo which was perfectly indescribable. The tones produced were like any thing but a violin; the expression was beyond conception. I felt as if lifted from my seat, and in fact into a trance, in which predicament I observed most other persons in the room. Suddenly he struck into a cadenza in which the harmonics double and single, stopping on the four strings, and sallies for which Paganini was so justly celebrated, were introduced with the greatest effect; and after a close shake of eight bars duration, comes next the coda, a prestissimo which he played in three parts, in which he out. This part of the performance was perfectly magical. I have heard the great Italian, I have heard the still greater Norwegian, I have heard the best of music, but I never heard such sounds as then saluted my ear. It commenced p p p, rising by a gradual crescendo to a pitch beyond belief; and then by a gradual diminendo and rallentando of away, it died on the audience in absolute enchantment. Monsieur Maerzepf, who is a player of no mean order, then came forward amidst the most deafening acclamations, and stated that emulated by the example of Vaucanson's flute player, he had conceived the project of constructing the figure, which had cost him many years of study and labour before he could bring it to completion. He then showed to the company the interior of the figure, which was completely filled with small cranks, by which the motions are given to the several parts of the automaton at the will of the conductor, who has the whole machine so perfectly under control, that Mons. Maerzepf proposes that the automaton shall perform any piece of music which may be laid before him within a fortnight. He also showed that to a certain extent the figure was self acting, as on reading a spring, several of the most beautiful airs were played, among which were 'Nel corpien,' 'Partant pour la Syrie,' 'Weber's last Waltz,' and 'La cadarem la mano,' all with brilliant embellishments. But the chef d'œuvre is the manner in which the figure is made to obey the direction of the conductor, whereby it is endowed with a sort of semi reason. Such then is the import we have received of this accomplished forte, which has completely set the whole musical world in motion. By our next publication we hope to have farther particulars.—*Galignani's Messenger.*

### SUCCESSION TO THE CROWN OF HANOVER.

*( From the Atlas, January 8. )*

The King of England has lately signed an important paper on the subject of the family law of Brunswick Lunebourg, as it affects the succession to the throne of Hanover, of which the following paragraph is the most interesting to English readers. "To remove every doubt respecting the order of succession to the throne among the members of the collective houses of Brunswick and Lunebourg now living, and in conformity with the regulations contained in this and the preceding chapter, we further expressly decree that in case of the death of us, the reigning King, without male issue, we succeed to the throne of Hanover, and that our first in our brother the Prince Ernest Augustus, Duke of Cumberland, and his male line; if that should become extinct, in our brother the Royal Prince Augustus Frederick Duke of Sussex, for his person, and eventually his male descendants, from a duly assorted marriage, conformable to the family law, which he may in future contract; and if this male branch should become extinct, in our brother the Royal Prince Adolphus Frederick, Duke of Cambridge, and his male descendants; and lastly, if this too should become extinct, the crown shall go to his Serene Highness the reigning Duke William of Brunswick.

### AMERICA.

The following, as learnt from the United States, we have recopied from the *Singapore Free Press*. The very important question of sub-slavery has at length been fearlessly brought before Congress, and we look forward to it's decision with much interest, though it will hardly be set at rest without much stormy debate, if not other demonstrations of hostility, not probably before during a number of reasons the question shall have been brought before the house. The addition of slavery has a zealous advocate in Mr. Adams, and we heartily wish him success.

THE ABOLITION WAR DURING 3—UNCLE EXETER 1-7.

*(From the Gibraltar Chronicle, February 14.)*

Washington, Jan. 6.—Monday, as you will remember, is generally known in Congress; or in the house of representatives, as petition day. The process of receiving petitions is to begin with Maine and proceed through the several states of the Union. Maine and New Hampshire were passed to-day, when Mr. Adams was seen to take the floor, as the first member for the state of Massachusetts. The countenance of the ex President indicated his spirit, and all present were prepared for a storm. It soon came and was visible to all, as Mr. Adams announced, so audibly and so distinctly as to be heard in every part of the house, that he held in his hand a petition praying for the abolition of Slavery in the District of Columbia. This, however, was but the smallest cloud compared with the tornado of lowering sky that soon spread itself over the house. Mr. Adams was by no means satisfied with the mere presentation of the petition, but immediately proposed, that the petition be read. It needed but such proposition, or one like it to open the eyes, ears and mouths of all present. Soon was the praise of the stern old man heard, for his hour raged furiously among the members of the house, who were not content with the speaker of the house who was as much excited as he, Adams was called to order first, by one member, Adams-like he bedded not the call, though it came in a loud voice and clothed with authority, no more than he would heed the croaking of a frog. He was proceeding with his remarks, evidently designed to be saucy and to offend, when a second call was made, and with the same result. Four and two calls to order, the cry became general. The house was a scene of uninterrupted turmoil. "Order, order, order," was demanded by one part of the house, and cries of silence, "silence," echoed back by the other side. The confusion was general, and reminded one of the same scene growing out of the same subject at the last session. Mr. Adams's first demanded order, and the friends of Mr. Adams were no less loud in making the same demand. The members of the house all were aware, were engaged in the very pretty farce of calling each other to order, and each party laboured to excel the other in the din and strength of its lungs. The cries of order came from one only to be immediately echoed back by another. The more vociferous the demand for order, the greater was the disorder which followed.

In the mean time, Mr. Adams was as angry as a chained bear. Speak he would, and speak he did first, by proclaiming, in a voice louder than the stentorian lungs around him, that the petition was worthy to be read; that it constituted the sentiments of liberty, and came from freemen; and that to oppose it and his was an attack upon the liberty of speech. "I will read it myself," said he, and continuing as the petition did, but two or three lines which expressed a continued determination on the part of the petitioners to send petitions to Congress year after year—"I read it aloud, and so it was heard distinctly in the galleries above the screams and yells of the multitude below.

The speaker in the mean time was in trouble, hallooing, bawling, scolding, coaxing and threatening, and rapping his heavy hammer upon his desk. All for a time was to no purpose. The previous question, however in the course of an hour, was put to the house and sustained.

"Shall the petition be received?" was the question now before the house, and, pent up, one of the most important questions now before Congress. The eyes and ears were determined, on the petition was received. Ayes 132—noes 74; being the largest vote of the session. The petition by aye and noe was then laid upon the table. Mr. Adams, however, nothing daunted, followed with a second petition; and soon after with a third. The whole question is therefore before the house. Underwood of Ky. Reed of Mass., and Byrne of North Carolina have spoken upon the question.—*New York Daily Express.*

### NEW INDIA BANK.

A "Review of a Pamphlet published" Against the Establishment of a new Bank in India" by "an India Merchant" dated Glasgow, 2nd October has been put into our hands, in which several strong arguments are brought forward against the establishment. We have on a former occasion given the prospectus of this bank, of which the greatest part of the capital was to be subscribed in England, where also the chief Directors are to reside, having boards of Directors under it's due

rroul in the different Presidencies. The business of this bank, as projected, is, to supersede that of the Bengal Bank, to issue notes, as well as the purchase and sale of Bills of Exchange, and the granting of drafts and credits, by the establishment in London, on the several establishments in India, and vice versa. The capital to be £5,000,000,—in £100 shares of which 15,000 are to be distributed in India and 35,000 in England.

The "India Merchant" very justly objects to this scheme, as setting up a new monopoly, whose control over money affairs and consequent influence is likely to be most oppressive, and whose immediate consequence will be to deprive individuals of part of the advantages they have hitherto gained in the Indian trade. It will besides invest the bank and their Agents with dangerous political influence on which our reviewer remarks the following:

"The moral influence of Institutions of this kind is good or bad, according as their principles and administration are sound or corrupt; and in this instance the natives of India would only be presented with another example of that pernicious system of our Colonial policy which they have found so withering to their prosperity, and have paid such a large sum to get rid of, but which it would still appear to be their destiny to have inflicted upon them. They would see in it only another great exclusive and oppressive jobbing monopoly, absorbing or ruining the business of their private Merchants and Bankers, a scheme to extort another million yearly from them in the shape of Bank Dividends—in fine, another instance of our grasping cupidity. The other two points, viz. its political influence, and pecuniary defence to the ruling power, are for the consideration of the Court of Directors—the former result is certain, the latter advantage very doubtful. The Local Government has hitherto depended on the public of India for pecuniary supplies, and were never yet disappointed, even in time of the greatest political exigency.

The natives look to the Government as the guarantee of security in pecuniary matters, and hence the latter is able to contract loans at four per cent. interest against private competition at seven per cent. hitherto there has been no Banking Institution, or Corporate body, of any kind in India powerful enough to step in betwixt the monied natives and the Government, and by its competition, to enhance the rate of the State Loans. It was the absence of all such competition which enabled the Local Government latterly to renew former contracts on more favourable terms.

"The Court of Directors will have no difficulty in forming their estimate of the political influence which the Bank is likely to exert, from the documentary evidence in their possession, relating to the transactions and eventual suppression of the Banking House of Wm. Palmer & Co. at Hydrabad, and they may possibly obtain some useful information on this point from other sources, such as the United States Bank, &c. The Governors of the various branch establishments at Delhi, and other important stations throughout India, acting in the double capacity of Bankers and Revenue Collectors, will undoubtedly possess considerable influence with the native Princes and Zemindars; and it is not at all unlikely that the Company's political residents at the native Courts may again, as in the instance alluded to, find their influence neutralized by a Banker.

"It is not difficult to foresee that a Bank so organised as to bring the revenues of India, and the sources of war and commerce, within its grasp, which is to possess the credit and influence of the Local Government, and yet to be virtually independent of that body, must become a very formidable Institution, and that the Directing Board in London are likely to be nearly of as much importance as the Court of Directors in Leadenhall Street."

Our limits do not permit us to enter more at length on this subject; we only wish to call public attention to it as, in all probability, if the Bank is established, it's Agents will here supersede the Finance Committee, and control the money market and exchanges even more effectually than the Company's agents now do.

The Company's treasury is open again for the receipt of cash for bills on Bengal at 218 Co. Rs. per 100.

BOMBAY April 8th.

COTTON.—Transactions have been nearly suspended since the arrival of the Hugh Lindsay on the 31st ultimo, purchasers holding off in reference to the discouraging advices both from England and China until a fall in prices here takes place.—Some small purchases of new Broach and Anjar have been made we understand within these few days, and offers have been made for new Oomrawuttey at Rs. 126 p Candy but has been refused by the dealers.

OPIUM.—The arrival on the 3rd Instant of intelligence from China up to the 20th February last via Calcutta has produced a re-action here in prices, the Market previously having been exceedingly dull. Purchases have since been made at Rs. 1150 p Chest for Cash and the Market has consequently become more animated, but until advices of a more decided character as to the resumption of the trade at Lintin, or the admission of the drug on payment of a duty, no activity to be long depended upon can be expected. Pages have been purchased for 18,338 Chests, 16,602 Bogie arrived and 11,6924 Chests have been exported. The third Calcutta Govt. sale was to take place on the 30th ultimo.

# CORRESPONDENCE.

TO THE EDITOR OF THE CANTON PRESS,

Dear Mr. Editor,—Having had occasion, a few days since, to look over a collection of scraps and odds and ends of stories whose subjects were principally of this celestial country, in a corner of which we are allowed to dwell, I chanced upon the following bit, which you can publish if you please.

P.

The natives of that part of China, north of the Yang-tsze-Keang, and those of the southern part, have the reputation of being influenced by two opposite traits of character, often under parallel circumstances, and a story is told to illustrate the two; that of the northerners being activity, of the southerners, slowness.

"A mandarin of high rank had an only child, a daughter, to whom he was much attached, and desirous that every precaution should be taken to preserve it's health, he entrusted it daily to the care of an old and faithful servant, who accompanied it in it's walks and during it's hours of recreation and amusement. The servant was a native of Canton. The mandarin's dwelling was in the province of Keang-se, on the borders of a beautiful river, whose still and limpid stream passed near his door, and here, retired from the turmoil of a city, he passed his days, when not engaged in official duties, in literary and philosophical pursuits. One afternoon, as usual, the servant approached him, leading the child, and beneath a light and pretty pavillion, under whose projecting roof he was reposing, he drew it near him patted it's little head, and urged the attendant to be careful of his trust, then bade it go play. He cautioned a return before the evening meal.

The hours flew swiftly by, and the father closing a volume of the San-Kyo-Che from whose delightful pages, he had long deriving instruction and amusement, returned to his house. The dinner hour had arrived, but his daughter, who had always been the first to greet him at his entrance, was yet absent. Presently the evening closed, and, still not returning, he determined to go in pursuit of his lost child. Long he wandered and on every side, but in vain; the object of his search was nowhere to be found; his repeated cries and shouts were unanswered save by the plaintive and in a dejected mood, he returned almost disconsolate to his dwelling, while his servants, who followed, evinced, by their downcast looks, their sympathy for his distress.

Exhausted and in despair, he betook himself to his couch and was soon lost in a troubled sleep, from which he would occasionally start as the image of his child passed before his imagination. Suddenly in a paroxysm of grief, he sprang to his feet, and beside him, kneeling, to his astonishment he beheld the old and faithful servant, overwhelmed with sorrow, and sobbing bitterly. The first feeling of the mandarin was that of rage; unsheathing his sword he would have smote the unhappy valet, had not his mournful appearance, his age, and a conviction of long tried confidence and fidelity, caused him to pause; dropping his weapon he enquired, almost fearful for the answer," where is Mei-Mei?—"Alas!" answered the domestic "Ere now, I fear, Mei Mei is wandering among the immortals." She has fallen into the well; I had clasped her firmly in my arms while passing near it, but her attention became attracted to an object in the water, when, with a sudden bound, she sprang into it.—On returning to the house to inform my master of the accident, I found him asleep, and here have I waited till he awoke, to communicate the unpleasant news."—The mandarin, with several servants, on the instant repaired to the spot, but were too late; the spirit of Mei Mei "had taken it's flight for the abode of the Genii," while appearances convinced him, that her life would have been saved, had immediate aid been rendered."

Thus much for the slowness of the southerns;—a specimen of activity is related as follows.

"A military officer received a despatch from the board of war ordering him to set out with "fire speed" to a distant garrison where troubles were anticipated, and there hold himself in readiness for immediate operations with his corps. The officer, unwilling to lose time, forthwith equipped himself, and, following up a single action last, a north country-man, set out on foot for the place named in the despatch, leaving orders for his suite and horses to follow without delay. They had travelled some time, when they reached the banks of a river, not very deep nor broad, but without any conveniences for crossing. The servant immediately placed himself near his master and stooping, volunteered to carry him over on his back. The offer was accepted; and the officer mounted on the shoulders of the man, who stepped into the stream. He had reached the middle of the river, which was discovered to be running with some fury, when a doubt arose in the mind of the officer of the capability of his servant to accomplish his undertaking and he said to him "Naug-mung" (Lemon)—thou art a brave "fellow; a little farther, and we are all safe; carry "me across dry-shod, and I shall use my influence "to procure for you a situation in the army." This was an unfortunate speech, for Nang-mung, instantly dropping his master from his back, knelt to perform the Kow-tow for the friendly offer, and arose but to behold the officer almost buried beneath the stream, and quite beyond all chance of recovery.

TO THE EDITOR OF THE CANTON PRESS,

Sir,—You published last week an article concerning the disturbances that have lately taken place at Macao, which, not being perfectly correct, I propose to offer you the following lines to be inserted in this week's paper, in full persuasion that when you wish to give an information to the public, you would like it to be as near to the truth as possible.

The origin of the popular discontent that agitated the inhabitants of Macao for these three months past, is owing to the discontinuation of certain laws of the new Legislature of the Portuguese constitution adopted in that place since 1834 and supported with the utmost quietness, and general satisfaction; by substituting some others, that embraced the character of both the new and old laws at the same time.

The facts which recently occurred in that place are notorious. On the 30th march last, in a meeting attended by the Governor, Judge, and Municipal chamber, it was declared that the chamber then existing was unlawful, on a mere supposition that the country did not contain one thousand families, contemning the assertions of those who said the contrary; in consequence of these proceedings a new chamber was elected; this orders immediately an examination to ascertain the actual number of Families in the place (which had never been done before) through able persons, whose result being presented to the chamber on the 15th April, gives the number of 1020 Families, exclusive of the few, that escaped the diligence of the examiners; at the sight of it the chamber acknowledges itself null, proposing to recall the former chamber, or a new election to take place; the Governor objects to those measures; this behaviour naturally begins to displease the citizens; it increases by observing the Judge composing a part of the senate and thus administering every public transaction, whose question he is to decide himself afterwards; the same commanding the Custom House infringing directly on the sacred laws of the Constitution; on the other hand the chamber is deprived of her lawful privileges, as the office of the Procurador entrusted to a strange individual that is not a member; the votes of all the members of the Chamber are reduced to but one, instead of being as many as the number of her members; all such innovations proceeded further, notwithstanding the general complaint and the several protests of the chamber. It was in this crisis that people knew the necessity of stopping soon that rapid progress of evil so detrimental to their interests as indecorous to the home government. The exasperation became so sanguine as to oblige the people to resort to arms at last, to solicit the attention of the Governor to their rights, apprizing him through a petition their just will of putting the new laws in execution, and advising him at the same time to convene a general meeting of the citizens as a medium more apt to terminate any doubt that may exist. The meeting took place on the 1st and 3d inst at which, after many debates, it was agreed, that every thing should be put in the old career as previous to the 30th of March, with exception that the Judge will continue in the administration of the Custom house, not ex-officio, but for a toleration in compliance to the requests of the Governor, who would resign on that occasion, unless it was fully demonstrated that he had no authority to use such proceedings. As soon as the business became settled on these terms, a new excitement began to fill the hearts of all the citizens, who congratulating mutually, had the pleasure of following the Governor to the presidency, where he was left, after embracing every one that accompanied him, and being assured of their affection and respect for his having acted so prudently and settled the difference in so satisfactory a manner.

Macao is now perfectly tranquil, its inhabitants enjoy with pleasure the beneficial fruits of a liberal constitution under protection of their Queen, to whom the causes above mentioned are left for final decision and approbation.

THE PORTUGUESE CITIZEN.

Canton, 14th June, 1837.

Sir,—Till I read your last *Press* I was at a loss to account for the total falling off in the supply of Bohea Tea of which for many years from 7 to 10,000,000 of pounds have been exported. Last season none was offered in the market. I wish however that as the *Tea country commissioner's* hand is in, he would order the Congo to grow of a little better quality than last year.

Pray represent this, if you have any influence in that quarter; and you will oblige

NOT A FEW.

# CANTON PRESS.

June 17th 1837.

We find that the account which "a Portuguese Citizen" gives of the occurences at Macao does not differ very materially from that we gave last week, with the exception that we stated that the Judge was no longer Administrator of the Custom-house. It appears that this functionary continues to hold the title of that office, but that it's emoluments are at present deposited in the public treasury, until the pleasure of the Queen on the continuance or non-continuance of this office be known.

Nothing has, we believe, transpired as to Hingtae's affairs; nor is it certain that such a communication as we mentioned in our last, has been received from the Vice-roy on the subject; the Hong-merchants not having made any official communication but it to the foreigners, as it would have been their duty to do, had the Vice-roy addressed them.

On Tuesday the 13th we experienced here a strong gale, which from it's blowing successively from all points of the compass resembled very much a Typhoong, though not so strong. This gale was likewise felt in Macao, and several of the ships lying in the roads there, dragged a good deal, particularly one under spanish colors. No damage has however been done to the shipping there, nor on land. We have not yet heard whether the shipping at Cap-shuy-moon has suffered or not. In Canton we are told, that a high house in the suburbs, near the city wall, in a street called *hae-tenga*, was blown down, crushing 5 smaller houses in its fall; no lives were lost.

H. M. Sloop *Raleigh* Captain Quin, arrived here a few days ago, and we are told that it is the intention of the home-government to keep one British man of war continually at this station. We are glad of this measure, since it will convince the Chinese that British interests here are not so entirely forgotten by the British Government, as they must have been led to suppose ever since Lord Napier's affair. A British ship of war besides, in a country like this, will always prove an effectual protection in case of serious differences arising with the Chinese; these have not happened since the establishment of the Free-trade, but it would be presumptuous to foretell that circumstances may not, at one time or another, lead to a rupture, however remote the causes for it now may appear. The Chinese are well aware that the foreign trade is to them of immense importance, particularly to some of the southern provinces, and the people will therefore protect it as much as lays in their timid natures, nor, do we think, will the Government easily take any rash steps against foreigners, even where the former may consider the demands of the latter as incompatible with it's own views, or where foreigners to do not yield obediently to the commands of the local mandarins, or to the edicts from the court.

The Governor of Canton is said to have incurred the Emperor's displeasure, and that he has for a time been deprived of his button. It is said that avarice has been the cause of this disgrace, he having "squeezed" the inferior Mandarins too much, who complained of it to the court.

Imperial commissioners have again arrived here. Their arrival seems greatly to have excited the attention of the chinese, though the object of their mission does not yet appear to have transpired.

Our Correspondent "Mei a Tea" draws our attention to a subject of considerable importance, and which must frequently have suggested to our neighbours, as it has to ourselves, the question, what has become of the Bohea Teas? Have the Chinese found another market for them, since the duty in England has become prohibitory? or do they, since they find no market for them in Canton, allow the leaves to wither on the trees, without any longer manufacturing them? We venture to assert that far from not manufacturing the leaves which formerly made Bohea tea, and far from not selling them as before in Canton for consumption in foreign countries, the chinese now contrive to make the better into low Congous, and the lower sorts into Hyson-skin, the latter with the help of a little *Prussian blue* and gypsum, which must, whilst it changes black teas into green, deteriorate its quality not a little. Yet so absurd has been the duty on teas in England, that the chinese are forced to poison them in order to deceive the consumer into the use of a formerly wholesome article. As the duties at present are in England, every one wishes to import the very best article only, yet it is well known that in proportion but a small quantity of really superior teas is produced; whence then are the Chinese to supply the demand for the British market if they resort not to fraud? We wonder not therefore if nearly the same quantity of the proscribed Boheas as before, now finds it's way to England, with that difference only that they are disguised into other sorts, for which purpose deleterious substances may frequently be used, and that they are so, for making green teas, every body here must be aware of. It is an erroneous opinion to suppose that there are two different kinds of tea, the one green and the other black. Both kinds come from the very same plant, and in most instances the difference in color is produced only by different treatment when drying them. The soil in some parts of the country favors the manufacturing of tea-leaves into green tea, and of such ten the superior qualities consist, but, we believe, that by far the greater part of green teas exported to America and Europe are dyed with gypsum and Prussian blue, and every green-tea-drinker has the satisfaction of sipping with his tea a quantity of chalk, iron, and prussiacid.

We have again to thank our correspondent P. for his interesting communication. We hope he will meet with many more scraps to send us, for which we shall always find room in our columns.

It is now some time since nothing has been heard of that part of the crew of the Patty, which, by the mutineers, were left on the East-coast. Some three or four months ago, a linguist was despatched from here to Fuh-chow-foo to interpret for those men, but no tidings have since be received. It is strange that the Government should retain those men thus long, since, if they want any information from them, they are most likely to get it in Canton, and certainly not through a linguist who, besides his bad English, is generally not guilty of possessing any other foreign tongue.

We have by the Scaleby Castle received the *Singapore Free Press* to the 25th May and the *Chronicle* to the 13th. From the former we publish several extracts, as likewise from the Bombay Price current. The *Mavis* had passed Singapore, but we have not yet heard of her arrival here.

In Bombay, in consequence of reports received by way of Calcutta, Opium had risen in price, and the drug was firmer in Calcutta when the Mavis left than it had been before. Very little however was doing in it in the latter place.

*Statistics of the Civil War in Spain.*—According to the official statements published in the "Gazette," the number of Carlists killed in the field of battle, are—

| | |
|---|---|
| To the 1st April, 1836,..... | 200,535 |
| From the 1st April to 8th October,.. | 33,927 |
| Carlist prisoners to 1st April, ..... | 56,283 |
| Ditto to 8th October,..... | 11,100 |
| Total of Carlists killed and prisoners.... | 300,715 |

Muskets taken during the above periods, 113,281; battles gained, 597, which must be divided into 227 partial affairs, and 370 total routs. Looking to the other side of the question, we find that the Carlists have issued 159 bulletins, according to which the number of the Queen's forces killed in the field of battle amounts to—

| | |
|---|---|
| Since September, 1833,..... | 199,680 |
| Prisoners, ..... | 48,811 |
| Deserters from the Queen's army,.... | 42,946 |
| Total of killed, prisoners, and deserters, | 276,435 |

The Carlists, by the same accounts, have gained 95 battles, of which 87 were complete and decisive, and had taken 107 pieces of artillery of different calibres. After these statements it will, we fancy, be confessed, that the Spaniards occasionally deal in the figure hyperbole.

It appears from a return which has been just prepared, that from the 1st of January to the 5th of July, 1836, 96,065 persons have emigrated from Liverpool, 7,518 in the first three months of that period; and 16,547 in the last three months. Of the latter number 3,823 proceeded to the British colonies in North America, 12,414 to the United States, 18 to the Cape of Good Hope, 27 to Calcutta, 76 to Australia, 129 to the West Indies, 8 to Bombay, and, 49 to South America. In the year 1835, the total number of emigrants was 18,648; in 1834, 20,845; and in 1833, 15,290, making a grand total of persons who quitted Great Britain in the last eleven years and a half 169,820. In the present quarter ending 5th July, the number of emigrants was 16,547, in the corresponding quarter of last year the number was 8,993, which gives an increase on the present quarter of 5,554.

The Royal Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubic & upwards pay 0.7874756 of a Tl. per cubic.
2nd „ „ „ 1200 do. & under 1600 „ 0.7221691 „ „
3rd „ „ „ under 1200 „ 0.5662341 „ „

N. B. The cubic in 14½ inches. Measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products—The largest class pay from $ 4300 to $ 4320; 2d class from $ 3200 to $ 3700; 3d class from $ 3700 and under. The Comshaw or Present Fee is paid by all vessels 1600 Taels or $ 2225. Linguists fee $ 173½ and Comprador's fees $ 50. Also Pilotage $ 50, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

Cotton Manufactures.—Have not experienced so good a demand as during the past month—quotations remain nominally the same.

Cotton Yarn.—There has been more enquiry for this article during the week, but no transactions having come to our notice.

Woollens.—For Longells well assorted colors and of good quality there is a fair demand at our quotations. The stock of scarlets is large, and lower prices are offered for them. Spanish stripes without improvement in price or demand.

Cochineal.—Stock very heavy, and sales not practicable at even our low quotations.

Rice.—Although the crop in this vicinity is likely to prove under an average one the price continues low—large quantities of the old stock, both chinese and foreign, being forced on the market, and the crop in the adjoining provinces being reported to be favorable.

Straits Produce.—Continues at the same prices. Pepper firm at our quotations, and Tin as far from improvement as before.

Cotton.—The clearances have continued large since the beginning of this month, and, the only arrival being the *Stanley*, the market is firmer with an advance of even 1 @ 2 mace per pecul on most descriptions.

Opium.—We have little to add to our last week's report. The demand for Malwa continues, but without any improvement in price, either for cash or on time, and the heavy time bargains now about falling due, must still further tend to check any advance. The Bengal drug remains without enquiry, and we hear chinese brokers have been selling Patna at $ 680. The smuggling establishments are again reported to be in treaty, but the heavy fees the latter are holding out for, will defeat any advantage to the trade from the arrangement. The Lintin deliveries to the 15th were,

Patna, *Old* 36, *New*, 128; Benares, *Old*, 28, *new*, 127; Malwa, 610; Total 931 Chests.

### EXPORTS.

Silk Piece Goods.—There is some demand for ready made articles, which can be procured at rather lower prices than quotations, but very little is doing.

Raw Silk.—Musters of the 3rd sort of the 2nd crop have come down; the color and quality are good, and the crop said to be an average one.

# THE CANTON PRESS.

VOL. 2d No. 42. CANTON, SATURDAY, JUNE, 24th, 1837. No. 94.

## FIRE AT SURAT.

We have been kindly favored with the following letter dated at Surat, 28th ulto. for publication. The accounts it conveys are awful. Three fourths of Surat at least are said to have been destroyed; and the subjoined letter on the same subject addressed to this paper we also throw in our leading space, that the extent of the loss of property and life may be the better seen.

We trust the Government will come forward with liberal relief to the sufferers. Private individuals will also have an opportunity of aiding in relieving distress by contribution of a portion however small of their means; but let not the Government reckon on such assistance as an excuse for withholding what it is their duty to give. The present is a case where the Government ought to lead the way.

"I am sure that your previous residence at Surat will occasion the late disaster that has befallen this wretched City to have an increased interest on your mind, and for this reason I am led to attempt giving you some sketch of the past events and its present condition. On Monday afternoon about 3, a Parsee set his house on fire; some say by building pitch, or flammable which ignited — But, however it may have occured, it appears to have been at first neglected — the neighbours refusing to allow water from their wells. A moderate or rather fresh northerly breeze was blowing, and the fire now spread rapidly, and soon after sunset exhibited a fearful extent and strength of fire. The wind in the evening decreased, but the fire was augmented and the vast volume of dense smoke which rose in enormous masses was brilliant with the intensely fierce flame which threw a strong glare over the whole sky. The fire soon spread through the best part of Surat. In some of the narrow streets crowded with fine spacious houses of 3 and 4 stories high, the fire acquired an intenseness which no man could stand, and cannot well be described. So fierce was the fire—so intense the heat—and so vast was the volume of flame that every thing was burned, root and branch. On ordinary occasions the large beams of a house will commonly escape. But here every atom of timber was destroyed. The flame licked up, as it were, every thing in its progress—the walls rapidly fell—and where the fire was thus fierce the walls were scarcely left a foot high, but everything levelled to the ground. The City being under the jurisdiction of the Judge, Mr. M. and his assistant hastened to the spot, but late in the evening Mr M. was disabled by being thrown in the confusion and his left shoulder joint dislocated. Major F. also was extremely energetic. The Officers and the whole of the regiment were in the town all night. The Officers were obliged to drag many persons from their houses, who having lost their property resolved to remain and die. The heat and dryness of the season aided the combustion, and the conflagration was soon beyond the power of man to control. It rapidly advanced, devouring every thing in its awful progress. Many of the natives—especially the Brahmins used every effort to prevent water being taken from their wells. The conflagration although was tremendously fierce and awful—the fire raging over a more area and shifting its course as the wind varied. After an interval of calm, just at day light on Tuesday, a breeze suddenly sprung up from south or about s. s. w. and directed the fire upon a new column of buildings. In the same awful manner as before it raged throughout the whole Tuesday. Many of the poor inhabitants who had removed their property to distant places of imaginary safety, from which the fire had passed away, were surprised by a return of the conflagration and lost their all. About 2 p. m. on Tuesday it was tremendously severe. It then reached one of the City gates which was destroyed, and the timber burned beneath the road which overlaid the timber, and the bridge fell in. The fire now spread to the Borah's quarters and swept everything before it, unchecked uncontrolled by human agency. it raged onwards till the middle of Tuesday night when it burnt itself out and left Surat one vast extended heap of ruins. The lowest computations by the Official people gives a destruction of from 5000 to 6000 houses, the rich and the poor have suffered alike, but the rich perhaps the most as the fire ravaged the best parts of the City. The loss of life has been immense. At first it appeared small. But this morning 480 are reported to have been ascertained to have lost their lives. Great numbers too of cattle have been burnt and the whole scene is one of wide spread ruin and desolation. The poor houseless inhabitants are in great misery, and neither from the principles of their false religion nor from their countrymen can they derive or expect comfort or consolation. I cannot imagine that Surat, declining as it has been for years, and now nearly bereft of commerce, can ever recover this overwhelming calamity. Surely it must be a death blow to this ancient city. Few conflagrations can have equalled this. — Major F. says it suggested to him the burning of Moscow. Tho' the fire was never within two miles of our house it nevertheless roared during Monday night like the surf on a distant beach.

The loss of property has been immense. Many too who rescued their goods from the fire were robbed of them by coolies who engaged to carry them to places to which they were directed, but went off with the property after having received enormous hires, 10 rupees for a cart to be paid down before a box was put into it, and 5 rupees for a coolie. Thus the wretchedness of man seizes the moment of his fellow's calamity to encrease his affliction and misery.

May the wide spread wretchedness around us excite us to a grateful sense and active improvement of our many mercies!

I am sure this hasty sketch will interest you."

*Bombay Gazette 3rd May.*

## *From Dr. Morrison's "View of China."*

In the Chinese Government, there appears great regularity and system. Every district has its appropriate officer; every street its constable, and every ten houses a tything man. They have all the requisite means of ascertaining the population with considerable accuracy.

Every family is required to have a board, always hanging up in the house, and ready for the inspection of authorised officers, on which the name of all persons, men, women, and children, in the house are inscribed. This board is called a Mun-pae, 'Door-tablet,' because, where there are women and children within, the officers are expected to take the account from the board, at the door. Were all the inmates of a family faithfully inserted, the amount of the population would of course be ascertained with great accuracy. But it is said, this is not the case. Names are often omitted, and the officers pass it over either from neglect, or from some consideration given them by the head of the family, who, according to his situation in the community, has various reasons to represent his family fewer than it is. One reason evid to operate sometimes is, that in urgent cases a conscription of every third male, able to bear arms, has been made by the government. That, however, was an ancient regulation, and is not applicable to the present Dynasty, which keeps up a constant standing army. Every Tartar is a soldier. Others say, that amongst the poor, who constitute the mass of the population in every country, the Mun-pae, or account of persons given in, is generally correct. To be the reverse, exposes them to informations and to much trouble. This seems the more probable statement.

However, amongst Chinese, as amongst every other People, there is, either more or less, a difference between what their institutions, opinions, and professions would lead one to suppose was their character and practice; and what is really their character and practice. Those who do not attend to this distinction, err egregiously in their conceptions respecting whatever concerns the Chinese.

---

Since the above was in type, the *Madras Concernative* Extra of the 21st instant has come in. We subjoin it:—

We are most happy to be able to state, on brief but authentic information, that according to the latest accounts received from Mangalore, Major Dowker had succeeded in repelling the attack made upon him, *with trifling loss.*

Our information states that on the 5th April at about 10 o'clock A. M. Mangalore was attacked by two large bodies of Coorgs from the north, east and southed. The small number of men at his disposal prevent Major Dowker from doing otherwise than acting on the defensive; and he was unable to prevent the prisoners in the town being liberated and many of the houses from being burnt. A party was in the first instance sent of repel the Coorgs lining the north parade road, and succeeded in driving them back. The attack made shortly afterwards from the southward was likewise repulsed and the Coorgs pursued to their boats where a considerable number were killed, wounded, drowned and taken prisoners. Amongst the latter was one of their leaders who, we believe, is since dead.

By the loss thus inflicted on the enemy they were completely driven back for the time—but the Mopleand other disaffected persons in the town took every occasion to plunder and maltreat the sepoys. The reinforcement from Cannanore was anxiously expected. The loss in killed and missing was 35, and 9 wounded. The treasure has been saved.

No mention is made of the civilians, but of course they are safe.—*Englishman 13th April.*

## PARAPATTAN ORPHAN ASYLUM.

NEAR BATAVIA.

We have much pleasure in laying before our readers the following account of the receipts and disbursements of this institution, as taken from the Fourth Annual Report of it's committee of management, which has been handed to us by the Revd. Mr. Bridgman, Agent for the Institution here, and who, as the Report informs us, will forward to Batavia any subscription or donation our neighbours will make in its favor. As the name implies, the institution is designed for the protection of orphan children, or such children of christian parents as are in destitute. There are now 35 children being received at the institution, namely 19 boys and 16 girls, being within five of the number to which the reception of children is now limited. Several masters are employed in teaching reading, spelling, grammar, writing, arithmetic, the Dutch language, and letter-writing. The report informs us that during the past year the expenditure has been much beyond it's usual amount, on account of the Society having purchased a piece of ground, and building the Asylum thereon; but at same time the support the institution has met with from the public, has been much greater than before, so as nearly to meet the extraordinary expences.

# CORRESPONDENCE.

TO THE EDITOR OF THE CANTON PRESS.

*Sir,*—From the number of letters, said to have been found, which have appeared lately in the Canton Papers, I am almost afraid to offer you the enclosed lest you doubt its authenticity. Publish it, or not, as you please; it was obtained honestly by

Q.

* * * * * * *

I have still another instance to give you, which entirely disproves the idea, that the Canton government, multiply their decrees in their reports of them to the throne; nothing we overcome to add of them and you may confidently assure our mutual friends, on my authority, that the most diabolical crimes, unknown even by name in this virtuous country, are practised in open day by these outside reptiles.

Pitying their destitute condition I omitted daily to be robbed in purse and contaminated in mind by the poor devils; verily I am disinterested. They know me not by my poor name but call me——qua.

On the 2d day of the 7th moon I, your younger brother, indited a letter for your dwelling glasses, containing a poor account of a *horrorible* barge which I condescended, after much worthy entreaty, to honor with my presence. This letter being inscribed on variegated paper, I gave to a faithful courier, to present, benevolent elder brother, before your exalted board.

About the middle of the second watch the courier returned, and with tears in his eyes gave me the horrifying intelligence that he had been attacked and robbed of the letter by a barbarian, while walking in "Redolent of virtue overflowing with delights" Street, which runs, as you know, at the back of my poor hut. He added that being double the stature of the barbarian, he forbore to punish, lest he might kill him; and not wishing to be seen wrangling with the puny wretch, he prudently left him, running as fast as he could to inform me, your younger brother of this outrage.

I, knowing the ferocious dispositions and thievish propensities of barbarians, generously resolved not to make any fuss about the matter; particularly as the courier informed me, the offender was inebriated.

Now you must know, benevolent elder brother, I have a servant in my employ, who having visited the village of Lan-tun (the capital of Ying-ke-lo the nation of the *red bristled dragons*) has acquired a knowledge both of their barbarous dialect and brain-confounding characters. It is really edifying to hear him read and converse, and I am told that few of the barbarians can surpass him in literary acquirements.

He assures me that the whole of Ying-ke-lo does not occupy half the space of this province and is situated several tens of thousands of *Le* from the *central flowery kingdom*. How is it possible, I ask, that such remote and uncivilized regions, can enjoy any of heaven's blessings? Their head man, whom they have the audacity to style *King* (*chunloi*) squeezes the wretched inhabitants, who subsist upon the refuse of our happy land, to such a degree that many thousands of them annually flee to *Ma-la-he** or the nation of the *variegated banner*. The more overlooms and grasping clandestinely crawl into the inner kingdom, where they keep together many thousands of the *great rascals* concealed by cheating and exceedingly devised contrivances from the vexatious and confining eye of the dignified Han.

The head men of their nation, knowing how brutal and rabbit like it is their custom to behave to people of other countries, and fearing the ame-inspiring wrath of the omnipotent son of heaven, has sent an officer, who daringly prostrates to still himself of the 4th rank, to controul their vicious hearts and to break head to on the Hong-merchants.

My servant, as I said before, being well skilled in the language of the *red bristled*, translates to me Malo's news paper, which is published here once in every seven days and is a very poor imitation of our Gazettes. Judge of my horror the other day when he translated to me my own letter word for word!!!

He tells me chaste barbarian named *Jin* (P.) (which in their language either only goes of a character, and signifies nothing, yet in the flowery tongue means *Man*) wrote another letter to Malo stating that he found mine enclosed in that beautiful street, "Redolent of virtue overflowing with delights," the frequent odours of which by lonely instances are far from acceptable to barbarian olfactories. But considering the name, I pity his taste.

Wonder, my ancient friend, at his lying audacity! What money does the wretch deserve? I could have pardoned him had he withheld my name, but now my whole heart yearns for revenge. I will petition the Hoppo to punish him by placing an extra duty on Long Cloths.

How he learnt the language of the inner land, I cannot imagine, but my servant tells me he has discovered a gross error in his translation of my letter. (It is said the barbarians allow nothing to be fictitious.) In that part relating to the disgusting pyramids of raw buffaloes flesh, which they so voraciously devour, he uses the word *chunloi* instead of *Hunk*. Can this man, I say, be a Chinese subject?

This is not all, magnificent men. Justly outraged at the audacity of the barbarian, I resent the paper from the hands of my domestic and was going to scatter its fragments to the winds, when he stopped me, with the assurance that there was something even more disgusting. Not imagining the extent of Malo's presumptuous daring I ordered the man to send to me the part referred to.

Tremble great men, when I whisper in your ear, that the Emperor's mandate to the Board, true to sense governing, was actually printed in the language of the red bristled. Is not this surprising? Verily the wretch *Can do*, ought to be strangled and the lying demon *Wan* impeached.

[Here the original is so much torn and injured by being trodden upon that the characters are quite illegible.]

Q.

---

Sir,—In the Asiatic Journal for December last, there is an article upon the late Caffre war in southern Africa which, I strongly recommend to the careful perusal of all who feel any interest in it.

It is founded upon papers laid before the British Parliament during the last session, which include the despatches of the Governor Sir Benjamin D'Urban's despatch to the Colonial Secretary, and the replies of Lord Glenelg to them.

The dispatches contain the Governor's narrative of his reasons for waging war upon certain tribes of Caffres who inhabited the country beyond the river Keikkamma, the eastern boundary of the British colony in southern Africa, and the operations of the campaign. The war appears to have been very popular with a certain class of the border settlers, if not with the whole of them, and it was particularly urged by a Mr. Shrewsbury, and other Wesleyan missionaries. The Governor stated in one of his first dispatches, that he was then proceeding with the organization of a force, "at an immense expense" to advance into Caffreland, and the object of the war is shown in the dispatch of Lieut. Cotterell to the governor, who says, "the day of just although awful retribution, I trust, is at hand, when these murderous, relentless, and remorseless savages will be taught the power of the British nation and the determination of your Excellency, to avenge the murders &c. &c."

An address presented to the governor subsequent to the war by the whole body of the wesleyan mission, seven in number, which declares: that the Caffre war, in far as the Colonial government is concerned, was conducted in accordance with the principles of justice and of mercy; that the Caffres were the aggressors, and that "when a considerable portion of the public revenue is drawn from fermented liquors, when intemperance is encouraged, and when multitudes among the people greedily avail themselves of that encouragement, to indulge without restraint a thirst for ardent spirits, in places where poison is legally sold, it cannot be considered unjust in the Almighty to waste such a revenue in an expensive war, or to cause such a people, in various ways, to the miseries resulting from the irruption of hostile tribes on their border."

Lord Glenelg adverting to the terms to which the governor declares the character of the Caffres, the object of which, he says, is to show that their total and irremediable depravity is such as to place them beyond the range of those principles which regulate the hostilities of more enlightened nations; quoting liberties, the expressions which the governor adopts from the missionaries (though the noble Secretary, either through inadvertence or irony, suppose the expressions to come from Hottentots and Fingoes), that the Caffres may be compared to wolves, which may be apparently tamed when young, but relapse into their native ferocity when tempted by blood; he observes:

"It would be difficult for me to describe the pain with which I have read and have had before his majesty's confounding paragraphs. Then after a comparison of the governor's well known humanity he proceeds. "You will, I am sure, concur with me carefully in repudiating the practical consequences which, in so many regions of the globe, have been enforced and palliated, if not directly justified, by similar reproaches, cast indiscriminately on the

* America. † Dollars.

uncivilized men with whom the natives of Europe or their descendants, have been brought into contact."

Having cleared their fellow countrymen among the wild beasts of the forest, these gentlemen to the exclusive title of human beings, kept to their own satisfaction, whatever massacres were necessary for the subjugation or destruction of the common enemy. Whether or not such conduct is from your own temper and character, I must express my regret that you should, even through inadvertence, have given any countenance to it by the employment of phrases alluded to; terms not used in any careless discourse, or hasty writing, but in a dispatch addressed to his majesty's government for their guidance on a practical question of the utmost importance and difficulty."

In this passage, says the article in the Journal from which I quote, his Lordship has revealed the true origin of the collision between our settlers and the tribes with whom they come into contact, throughout the world, and which threatens to *depopulate*, where it is our duty to *civilize*.

Lord Glenelg proceeds to examine the grounds of the war and having relieved the Chiefs from the responsibility of the hostilities, he confesses that the result is very far from favorable to the character of British policy. "In considering the manner how it was carried on, he quotes the language of the dispatches, which speak of the slaughter among the undisciplined hordes, with "*no reference to the capture of any prisoners*," of the hundreds of huts burnt; of the scene in every direction destroyed for the cattle carried off. His Lordship expresses himself thus;

"Reading these statements, at this distance from the scene of action, I must own that I am affected by them in a manner the most remote from that which the writer contemplated. In the civilized warfare of Europe, the devastation of an enemy's country, not in aid of any military operations, but for the security of the invading force, but simply and confessedly as an act of vengeance, has rarely occurred and the occurrence of it has been invariably followed by universal reprobation. I doubt even whether the history of modern Europe affords an example of even a single case in which, without some better or at least more meritorious, any invaded people were ever subjected to the calamities which Colonel Smith here describes; the loss of their food, the spoiling of their cattle, the burning of their dwellings, the expulsion of their wives and families from their houses, the confiscation of their property, and the forfeiture of their native country.

"I am, of course, aware that the laws of civilized nations cannot be applied in our contests with barbarous men; for those laws presuppose a reciprocity which cannot subsist between parties of whom the one is ignorant of the usages, maxims, and religion of the other. But the great principles of morality are of immutable and universal obligation, and from them are deduced the laws of war. Of those laws the first and cardinal rule relating to a state of hostility is, that the belligerent must inflict no injury on his enemy which is not indispensably requisite to ensure the safety of him by whom it is inflicted, or to promote the obtainment of the legitimate ends of the warfare. Whether we contend with a civilized a barbarous enemy, the gratuitous aggravation of the horrors of war, on the plea of vengeance or retribution, or on any similar grounds, is alike indefensible. With respect to the sentiments of the missionaries, Lord Glenelg opposes to their opinion that there is no other remedy but the sword, that of the London and Glasgow Societies who "instead of regarding the invasion as a wanton and unprovoked act, considered it as a natural reaction, on the part of the Caffres, against a series of extreme and intolerable oppressions; so far are they from thinking the sword the only remedy, that on the contrary, they insist, even with importunity, on the certain efficacy of other methods, of which kindness, consideration, and justice should form the basis."— Of the address of the wesleyan missionaries, he says, whatever might be his opinion of it's tone and character," and of the topics selected for reading the recommendation of Mr. Shrewsbury, his Lordship observes he cannot attach the slightest value to that gentleman's judgment on the present occasion; and he hopes that the opinions he has recorded and the counsels he has given, will be promptly disavowed by the society, and on mature reflection retracted by their author."

It only remains to state that, as soon as the committee of the wesleyan missionary society were apprised of the contents of the paper sent by Mr. Shrewsbury to Colonel Smith, they unanimously resolved "after receiving a paper of explanations from Mr. Shrewsbury) to record "their most entire and unqualified disapprobation of the step unhappily taken by him;" that the advice given by him, if understood in its obvious and literal meaning (which Mr. Shrewsbury endeavours to modify) was, in various particulars, "most unwarrantable and revolting to principles and feelings of humanity and religion;" that if it was possible to suppose that any circumstances could have justified such recommendations, "it was still highly unbecoming the station and character of a minister of the Gospel of Peace, and contrary to the standing instructions which this Society gives to all it missionaries, that he should interfere at all, even though requested by the military authorities, in the discussion of questions of this nature."

There is an episode in the account of the war connected with the death of Hintza the most powerful of the Caffre chiefs, which calls forth Lord Glenelg's animadversion, and his remarks upon it deserve attentive perusal. The whole of his Lordships remarks upon the war, and the principles they involve are an honor to him as a man and statesman. They are the more worthy of remark here, because we have been accustomed to see his name associated with very different sentiments upon the subject of the British relations with China.

## PASSAGE BOATS.

We give below two Edicts which have appeared during the week against passage boats in the river of the foreign Passage boats, as the suspicion that these boats are at times employed in smuggling. It is very much to be regretted that these boats have drawn on themselves the notice of the government, their being suffered to come to Canton with letter and passengers having been a great advantage we are sorry likely to lose; by the words of the Edict only pass boats being allowed to come up. Capt Elliot has on this subject addressed a note to the Comptroller of Customs, pointing out the necessity there is, for the convenience of the public generally, that the Passage-boats should not be concerned in smuggling. We hope that the present check will induce the boat owners not again to render themselves suspicious to the Custom-house, and that after a time the boats will again be suffered as before. At present no deck is ready, with the exception, we believe, of the Superintendent's cutter, are allowed to come to Canton, but can only proceed to Whampo, where they have not yet been disturbed. Our communications with Macao and Lintin or Lemoon are therefore rendered much more difficult than before

After writing the above we have heard that an edict is to appear to morrow against the boats being at Whampoa. We also hear a rumour of two boats coming from the moon having been seized by the Chinese authorities.

## EDICT

AGAINST PASSAGE-BOATS.

Wang, by Imperial a pointment, commissioner of maritime customs at the Port of Canton promoted twice, again elevated two steps and recorded sixteen times, proclaims to the Hong-merchants for their full information.

It is authenticated that the ancient laws, respecting the transmission of cargo to and from the vessels of the several foreign nations, are both fixed and severe and should be respectfully obeyed by all. When goods are required to be brought up from or sent down to a vessel, the Hong merchants and Linguists report the name and request passes; which, after the goods are examined and the duties levied, are granted. In this way smuggling and fraud are prevented.

Now it has been reported to me, that latterly, a set of lawless villains leagued with the masters of boats and some unprincipled shop keepers have been in the habit of smuggling goods chargeable with high duties in the holds of the large passage boats and also in hired Chinese boats, which, taking advantage of the ebb and flood tides and the dark nights, clandestinely carry into execution their contraband and fraudful schemes. These men have no fear of the laws and if stern and severe measures, be not instantly employed against them, how is the revenue of the country to be protected, and ignorant and stupid people prevented from following in their steps! It is proper that strict and exact enquiries be set on foot, and that a warning edict be issued for general information.

Let the Hong-merchants immediately on receipt of this proclamation, in obedience thereto, proceed to examine the passage and smuggling boats and as certain their number; and also discover the haunts of those vile leaguer together and engage in such vile practices and report the same that I may award instant and severe punishment to such offenders.

Let copies of this edict be also forwarded to each foreign head of business that he may respectfully obey the laws and send away from the river in front of the Factories all the large passage boats with holds for they are not permitted to anchor there. Let not the Hong-merchants connive together to deprive me for assuredly I will show them no favor, but punish them with equal severity (as the smugglers)

Let trembling obedience be accorded hereto! Haste! Haste! A special edict.

Taou Kwang 17th year, 5th moon, 10th day. Canton, 19th June 1837.

"An edict from Tang, president of the Board of War and governor of Kwang-tung and Kwang se, to the senior hong merchants.

On the 15th instant (June 19th) I received a communication from Wan, the commissioner of maritime customs. It contained the following statement.

"Wang Shing, one of the police-men connected with the custom-house, has presented a report, made in obedience to commands to inquire whether the large passage-boats are engaged in smuggling, that thereby evidence might be procured for an investigation of the subject; it is as follows;

"Having received your excellency's commands, I went at mid night, on the 14th instant, in a boat to make secret inquiry on the river near the thirteen factories. I saw there three large boats, having decks and two masts, and three small ones, with decks and one mast, anchored in the middle of the stream; but saw no goods taken from or put into them. I continued the watch until 4 o'clock the next morning. On returning home, passing near the west side of the Dutch Folly, I saw another large boat, with two masts and a deck, anchored close by the rocks. I then returned to the rear (i. e. front) of the factories, and sent for the linguist Atom, and asked him, whence and wherefore those seven boats had come to the city, and to which of the devil-factories they belonged, making all the inquiries requisite for thorough investigation. It is my opinion, that hitherto, according to the established regulations, the large boats, with two masts and decks, have been interdicted; and that only the small ones, with but a single mast and no decks, have been permitted to go up and down the river. Moreover, repeated orders have been given to the hong merchants and linguists, not to permit those large boats to come to the city and they ought to require obedience. As the language of those barbarians is different from ours, I was afraid to go on board the boats to examine them; I have, therefore, only to request your excellency to transmit to all the hong merchants and linguists explicit instructions, that they may know what they are to do. Though I cannot presume to set according to my pleasure, yet is it my duty, having found out these circumstances, as I was directed do, to lay the same, fully arrested, before your excellency for a thorough investigation. Postscript. The following are the boats in the river; one with two masts and a deck belongs to the barbarian Edwards, residing in the Imperial devil-factory; a second, of the same kind, belongs to the barbarian Marks, residing in the English devil-factory; another belongs to the barbarian Jardine, residing in the Creek devil-factory; a fourth belongs to the barbarian Just, * residing in the French devil-factory; two others, having decks and a single mast, belong to the same person; and another having a single mast and a deck belongs to the barbarian Charles (Markwick), residing in the Imperial devil-factory"

"This coming before me, I find on examination, that the large boats, with decks, have long been forbidden; that repeated orders have been issued from the custom-house requiring examination and seizures; and that prohibitory edicts have been proclaimed; moreover, that injunctions have been given to the said merchants and linguists, to maintain a strict watch and expel the boats, and likewise to transmit injunction to the barbarian merchants requiring their obedience to the existing laws. These particulars are all on record. They are attested by the statement of Wang Shing. Besides again giving orders to the said hong merchants and linguists, to transmit immediately to all the barbarian merchant requiring their obedience, and without the smallest degree of evasion, to drive away all the boats, if they attempt to anchor in the river; I likewise submit this document for your excellency's inspection, to take such measures thereon as are right,"

Having received the above, I find that, of all the foreigners trading at Canton, only those of the English Company have been allowed to send boats, with flags hoisted, up and down the river; on the dissolution of the Company it was right to discontinue those boats. The other foreigners who come in ships to Whampoa, when at Canton or Macao and wishing to send letters backward & forward, are only allowed to use small open boats; which when passing the custom-house stations are required to stop and be examined; and if they have on board any contraband goods or weapons they must be immediately expelled. The late governor Lin, having sent up a memorial to the emperor, received his majesty's pleasure, for establishing these regulations, and requiring obedience thereto. This is on record. But now, Edwards and others have dared to employ boats having decks, some with two masts and others with one. As the said hong merchants and linguists have not driven them away, and have failed to report concerning them, it is impossible to warrant that they have not been concerned in clandestine transactions. It is most absolutely necessary clearly to investigate the statements received, as given above; it is my duty also to send this edict to Hongkong, Mowqua, and Pwankequa. On its receipt, let the boats be immediately expelled. And let inquiry be made for the reason why these boats have come to the city, and whether any clandestine transactions have been carried on between the owners and the hong merchants. Let a report be immediately made, that the subject may be investigated. Let there be no opposition, which will subject the parties to trial. If proper exertion is not made, and the boats driven away, censurable both those who have the management of affairs in the said hongs and the linguists shall be brought in chains to my office, and subjected to trial. There shall be no leniency. Hastes, hasten obedience.

Taou-kwang, 17th year, 5th month, 17th day.

(June 19th, 1837.)

## HING-TAE'S AFFAIRS.

The following correspondence has passed between the foreign merchants and the local government about Hing-tae's affairs.

### TO HIS EXCELLENCY THE GOVERNOR OF THE TWO KWANG PROVINCES

&c &c. &c.

A respectful address.—A petition was laid before Your Excellency on 21st April respecting the claims of foreigners on the Hing tae Hong, to which Your Excellency returned a gracious reply ordering the Senior Hong-merchants immediately to convene a meeting and endeavour to form some arrangement for the speedy settlement of our heavy claims and to report on same within ten days. Your Excellency was also graciously pleased to add that our property could not be left without any ultimate guarantee for its safety.

In obedience to your Excy's, commands conveyed in the above reply we sent in to the Senior Hong-merchants full and clear statements of our claims; but up to this hour, altho' nearly two months have elapsed, they have made us no proposition for the equitable settlement of our accounts; and to the most earnest enquiries we can only get the reply "that Hing-tae has not furnished his accounts and that he objects to the sums claimed by foreigners."

These delays are so directly at variance with Your Excellency's commands that we are astonished they are ventured upon; and that too, so far as your petitioners can judge, without the Co-hong taking any steps to obtain a correct knowledge of the accounts.

Looking with confidence to your Excellency's insisting on the previous orders being at once complied with. We are etc. *Signed by Hing-tae's foreign creditors.*

* We are requested to state that only one of the boats above mentioned, belongs to Mr. Just.

*Reply of*

Tang, President of the Board of War, and Governor of the two Kwang Provinces (to the Petition sent in by the Canton merchants).

"Let Yen Kecheng of the Hing-tae hong be most closely examined as to what extent his debts have accumulated; and let it be ascertained, if the claims sent in by the barbarian traders exceed the true amounts. Thus, when the tide ebbs, the rock appear (i. e. truth will be discovered). That while both parties craftily endeavor to work their own advantage, they only protract the just settlement, and do not help to bring the matter to a conclusion.

The petition presented, the other day, by Yen-Kecheng evidently diverged from and glossed over the truth. In my reply to him I reprimanded him severely and ordered him within a limited period to produce his accounts for my inspection.—This is on record.

Now, with reference to the present petition, I have ordered Howqua, Mowqua, and Pwankequa, to examine well, and act in obedience to the former reply: Let them cause Yen Kecheng within the therein mentioned limit, to make out a clear and true statement of all the debts owing by the Hong; and report to me of the same that I may act accordingly. Let them not permit any delay; and let this reply be explained to the barbarians for their information and obedience. Do not oppose.

5th moon, 20th day.—June 23d 1837.

### OPHTHALMIC HOSPITAL

This institution continues to afford much relief to the Chinese, and the confidence evinced by them in the Revd. Dr Parker is best shewn by the increased number of applicants, and the cheerfulness with which many of the patients submit to painful and dangerous operations. Last thursday a friend of ours visited the Hospital and has given us the following account of three of the more interesting of the operations he witnessed.

"The first was that on a young woman from Fa-yune, 22 years old, who for six years had been affected with a cumbersome tumor from her chin; the attachment beneath the chin was 5 inches; it's circumference centrally was 9 feet 8 inches, and vertically it measured 3 feet and 3 inches. The tumor was removed in 12 seconds, and the patient dressed and in bed in 7½ minutes. Two arteries of considerable size required a ligature; the veins were very large, exceeding the natural size of the jugulars; the whole weighed 11 catties and 1 tael, or about 14 lbs, allowing for the blood.

The second was the case of a woman 41 years old from Whampoa afflicted with scirrhus breast. Nothing particularly deserving of notice, except that it was a favorable case, the disease being confined to the mammary gland, and the integument above that was removed. The operation was performed in the presence of her husband and son, who commanded their feelings remarkably well. The adhesion of the gland to the skin rendered the operation somewhat protracted, which the patient endured with fortitude characteristic of her sex.

The third and last of particular interest, was a young woman 20 years old, four years affected with goitre. In the course of several gushes, 10 gallons of fluid were drawn off, amounting, by curities, equal to 80 lbs avoirdupois. She appeared in perfect health, independent of this immense reservoir of fluid. She experienced no inconvenience at the time of its removal, nor since. The wound with scirrhus had some general febrile symptoms during the day, which subsided in the evening and all seems favorable for a speedy recovery. Seldom have I seen less suffering from a serious operation than the young woman has experienced from the removal of the tumor, which she seems to have forgotten in the prospect of becoming, in a few months, a parent for the first time."

The only arrival of interest during the week has been that of the *Monsoonsoodee* from Bombay and Singapore 11 May, and 8th June; her general letters not having yet arrived, though notice of her arrival was received on Monday last, we were only able to glean a few particulars of the news she may bring. On the 25th April notice was given by the Bengal Government that the Opium sale which was to have taken place on the 26th April was postponed to the 9th June, unless in the interim favorable intelligence were received from China.

By the *Monsoonsoodee* from Calcutta and Singapore, we have received the *Chronicle* of 27th April; 30 chests of Patna were sold by the Government in Calcutta at 1385 a 1399 Rs., and 5 chests Benares at 1425 Rs.

We are obliged to our Correspondents, C. and E. for their communications. X's remarks on Lord Glenelg's censure of the Caffre war are well worth attention, and will convince any one, anxious to arrange in blind the ridiculous public documents of the Chinese, how little support such project is likely to meet with the home-government. We are very glad that the different letters and pamphlets published with a view of beating the Chinese into friendship with, and better manners towards, us, have met with a cold reception from the public, and that no one, we believe, at the present day, entertains any serious notion that such an armament ought to be fitted out to frighten the Chinese into making amends for what has hitherto occurred.

We learn that permission has been granted this day for the establishment of a new Hong, one of the members of which is the son of a respectable Canton merchant. Another hong is spoken of as about to be established. We must either admire the courage of these indolent Hong-merchants, under present circumstances, or pity the vanity which induces them to run the risk, for a few years, of being looked upon by their countrymen, as great and influential personages.

We have to notice the arrival of the Schooner "*Alpha*" at Macao 17th instant, from Samarang, 1st instant, where she was built, intended for a Pungchoot to run between this and Manila. She measures 90 tons, is 66 feet long, and has 15½ feet beam, accommodation for ten passengers, and draws only 5 feet water. We are informed that she has proved herself an excellent sea-boat in a northerly gale she experienced on the 12th, 13th, and 14th in the Chinese sea.

## SHIPPING INTELLIGENCE.

ARRIVED.—The British, *Mavis*, Robertson, from Calcutta and Singapore. American, *Morrison*, Ingersoll, from Batavia. British, *William Hutt*, Flemming, from Samarang Dutch, Schooner, *Alpha*, 1st June from Samarang. British *MaAmmoodee*, Wilson, from Bombay 11th May, Singapore 8th June. Dutch, *Hermana*, Limon, from Sourabaya

SAILED or DESPATCHED.—American, *Eliza and Susan*, (this day) Webber. *Stag*, Burnham, and British *Enfield*, Thomas, for Manila.

The *Mermaid*, has arrived in Calcutta. We find in the *Singapore Chronicle* of 27th May, that the *Brig* and bound for Singapore, and the *Mary Somerville* for Liverpool had both put back, the latter with loss of her fore top mast.

The *Antonio Pereira*, got on the rocks outside the Cap-shuy-moon, but was soon got off again by the aid of the boats of the fleet there without damage.

There was a report at Macao of a large ship having capsized outside, and a Junk lost. The ship is thought to be the Ricafort, for Manila, as she was very light. The *San Francisco de Paula*, had arrived at Macao, from Java.

---

LATEST DATES from ENGLAND, 3rd February via Bombay. UNITED STATES, 9th January via Gibraltar. CALCUTTA, 26th April via Bombay. SINGAPORE, June 8th by *Mahomedee*. JAVA, 1st June by *Harrison*. MANILA, 29th May via Macao. BOMBAY, 11th April by *Mahomedee*.

| Australia ..... | „ direct ... | 3 | 3½ Lintin &c..... ½ dr |
| Sand. Islands .. | France ... | 3 | 3½ |

Note. Allowances are from 20th April to 20th Oct: annually; during remaining 6 months the premiums are somewhat lower. Risks on Blocks are @ 9 per Cent per annum, @ 4½ for 6 months, @ 2½ for 3 months and @ ¾ per month.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874756 of a T. per cubit
2nd „ „ 1200 do. & under 1600 „ 0.7221091 „ „
3rd „ „ under 1200 do, 0.5062341 „ „

N.B. The cubit is 14¼ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from @ 4300 to @ 4320; 2d class from @ 3700 to @ 3780; 3rd class from @ 3700 and under. The Consha or Present Fee is paid by all vessels 1600 Tsels or @ 2223. Linguists fee @ 173½ the Comprador's fees @ 50. Also Pilotage @ 60, in wards and outwards the same. On French and other Foreign vessels they are slightly varied. Rice laden ships are charged only about @ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—The demand for Longcloths continues lively, though prices are not yet remunerating.

COTTON YARN.—is not improving in price.

WOOLLENS.—There has been some demand for *Longells*, and prices continue firm.

LEAD.—Some demand for this article has caused a slight improvement in price

SANDALWOOD.—it will be observed has further improved in price the supply being moderate.

RICE.—has again declined. The stock of foreign rice as well as from the neighbouring provinces continues to be very heavy.

STRAITS PRODUCE.—Tutenag maintains its price. An advance of ½ to ¾ is demanded, we hear, by the principal holder of Banca tin, but there are no purchasers.

COTTON.—There has been less doing in Cotton during the week, and the clearances have not been so brisk. Purchasers appear holding back for the expected arrivals from Bombay.

OPIUM.—There has been little change in the drug-market during the past week. The demand for Malwa has been a little checked by the arrival of the *Mahomedee*, and the price has rather declined. In the Bengal Opium nothing has been done, except one or two small sales of new Benares, of which there has been little in the market. The arrangement alluded to a our last has, we believe, been completed between the smugglers and mandarins, who have commenced rebuilding their boats. The fees, it is said, amount to 10 @ 75 $, and there are some restrictions as to the smuggling boats delivering in the stores as yet, if even the mandarins can be trusted, little good, we fear, can be expected.

### EXPORTS.

SILK PIECE GOODS.—Some contracts, but not to any considerable amount, have been made, we hear, during the last week

TEA.—We have reduced our quotations for the dearer Congous, not because they have fallen thus much in price, but because none of the quality formerly quoted high, is now in the market

RAW SILK.—Canton Raw Silk Nos, 2 and 3 continue dear, and their quality is said to be inferior.

# GENERAL CHAMBER OF COMMERCE.

GENERAL CHAMBER OF COMMERCE

CANTON, 23rd October, 1837.

"By order of the Committee"

(*Signed*) WILLIAM SCOTT.—*Secretary.*

*Note.*—The Values of the different articles must be considered as only a rough approximation to the probable average of the season; it being impossible to attain greater accuracy, owing to the Chamber having been formed at so late a period of the year, that before commencing to collect the materials from which the foregoing statement is compiled most of the vessels had taken their departure.

# GENERAL CHAMBER OF COMMERCE.

VOL. 2d. No. 43. CANTON, SATURDAY, JULY, 1st, 1837. No. 95.

## THE PALLE PLAGUE.

We understand that official accounts received yesterday from Agra were of a nature to abate the alarm which the progress of the Palee disorder has created. The *Dethi Gwsette* of the 24th April, just received, contains the following leading article on the subject:

"Accounts from Rajpootana give but too much reason to fear that ere long Nuseerabad will be visited by the Palee plague, which, we understand, is making slow, but certain, progress towards the Station. Every precaution is taken, and the Brigadier has caused Picquets to be thrown out, which arrest all travellers from the south and south-west, who are not permitted to enter the limits of Cantonments, until examined by a Medical Officer, one of whom visits the Picquets morning and evening. Several premature alarms of infection have already happened, indicating the anxiety with which the neighbourhood of death and his pale horse is regarded. Captain Dixon writes that no is appreiensive his utmost exertions will not prevent the pestilence reaching Bower, on two sides of which the villages are already suffering severely. This is but thirty-five miles from Nusseerabad, whose only hope of exemption from the scourge lies in its open airy site, well adapted to further the additional means taken to repel the plague, and in the expectation that the poison in the atmosphere, which probably causes the sickness, may be destroyed by the hot winds, or neutralized in our settlements by superior cleanliness and medical skill and attendance."

We have been watching the progress of this dreadful malady, and the measures of government regarding it, with silent interest, unwilling to spread needless alarm. But the latest and best medical reports, particularly that of Dr. Irvine, speak so decidedly of the malignant and infectious character of the disease, representing it be a real Plague, that we must subscribe to the expediency of effective measures to break off communication with infected places; and too much praise cannot be bestowed upon the Lieutenant Governor for the prompt attention he has given to this important subject, and the lucid manner in which he has explained the nature of the measures of precaution in detail which he deems it proper to adopt. It seems to us however, that in requiring that all persons attacked with the disease in the respective towns and villages, shall be separated from their families and removed to hospitals provided for the purpose, there is danger of more widely spreading instead of checking the infection. The patient should rather be left where he is, for his house must be supposed to be infected already, and all communication with other houses should, if possible, be cut off. This appears to be the principle adopted in the Mediterranean, according to Dr. Hennin, the converse of that which Sir Charles Metcalfe's rules prescribe, in which the Deputy Governor seems to have adopted the Ceylon plan applicable to cases of small-pox. The members of the family or servants not having the disease upon them, should have the option of remaining in a state of quarantine, or of removal to depots for cases of slight suspicion. We much apprehend, however, that no precautions will suffice to prevent intercourse between the sick and the healthy in a native town of any magnitude; so much does their efficiency depend upon the moral assistance of the inhabitants themselves,—upon their forbearance and discretion and presence of mind. But the disorder may perhaps be confined in its localities by sanitary restrictions.

The *Harkara* goes so far as to recommend the examination and fumigation of Cotton arriving in Calcutta from Gulpee. Cotton is certainly an article supposed to be very liable to carry infection. But before our contemporary suggests restrictions of such a nature as would stop all traffic in this important article, he should well consider the utility of them. For

afflictions! Choo! always absent, yet ever present, never was impression more indelible to the eye, than that of thy divine form, which has fixed itself upon my imagination! I beheld you though you are far off; I conversed with you, and the ecstacy imparted throughout my frame, by the reception of a * "cluster of Pearls" from thee, surpasses the delights of either of the nine celestial dwelling places. In each character I trace the beauties of your stomach, the ardour of your friendship, the sincerity and goodness of your bowels is visible in every line. Truly, the formation of thy Brain-Bag, which resembles the mountain's lofty height, proves the capacity of your belly to be inferior to that of Tsze. Friend of my Lungs, your flowery epistle has reached me, and the arrival of a near relation from a far distant country, never yielded the delight that did it's reception! You have the consideration to speak in approving terms of the unworthy account I sent you some time since in one of my letters, of those outlandish barbarians, who yet continue to crowd in droves to the middle nation, who despise pig-tail dogs, and wear tight trousers. You sympathize with me on their condition, and hope that the correct principles and upright conduct, evinced by the Black Haired Race, will succeed in taming their fierceness, pacifying their ferocious dispositions, and instilling into their stomachs humility and reason. But Choo, start not at what I am now about to relate, occurrences of the kind happen daily, while none ever offer to exhibit the character of these people in a favorable light. As I wrote in my last, the approach of summer induced me to quit my abode in the street "Redolent of virtue, overflowing with delights," and to repair with my family to our country house on the banks of the stream of "Returning thought" situated, as you know, nearly opposite the Mandarin station, in the Macao passage. A few evenings ago, the sun nearly down, and the breeze laded with a variety of perfumes, some almost overpowering, blowing gently from the south, I seated myself with a friend on the banks of the river, to enjoy the coolness of the air, and observe the passing scene. Now were we delighted with the approach of a Wang-Low filled with "Golden Lilies" singing to the Kin or Pe-Pa, some of those ravishing airs composed by the far famed Pe-Ih, and secure had their excruciating notes died away in the distance, when a Hwa-Tung, resplendent with gold and silver, passed slowly by, the joyful sounds issuing from within, warning us of the hilarity of it's inmates. Indeed were my senses bewildered with a thousand delights; enchantment seemed almost to have thrown it's charm over the spot; but soon, alas, were we to be hold it dispelled. Presently I discovered approaching us two foreign boats, which quickly reached the land, and several of the Red Haired Race sprang on shore; they seemed excited by strong drink and though, in their outward appearance, they bore no marks of being common sailors, yet they pulled their own boats, which were of a strange construction. Not wishing to be near them on their stepping on shore, I retired to a convenient distance where I could distinctly observe all that passed, and at the same time manifest that dignity and contempt necessary in their presence. Would you believe it, these men had the presumption to take possession of a spot of the Yellow Dragon's land, for upwards of ten minutes, chatting in their wild and incoherent tones, accompanying each word with vehement gestures, and a flourish of their fellow other's heads of clubs and sticks; even vociferating to each other in a harsh voice, seemingly on the point of beating out each others brains with their bludgeons, a reconciliation appeared to take place, they lowered their weapons, and stepped into their boats to depart, and now, oh Choo! blind not your ears nor turn a deaf eye to my relation. It happened as they were pushing off, that a little boy of the village, in flinging a pebble into the stream, had the misfortune to strike one of the barbarians on the head; no sooner was this done, than a shout and cry arose from their boats, equal only to the shrieks of the victims in the hell of the Boiling Cauldron, and calling other boats of their country to their aid, they returned to the shore, landed in a flock of 20 or 30, all armed with divers frightful weapons, and commenced a pursuit of this unoffending child. They could not however succeed in catching him, but on reaching the river, a scene took place which brought assuredly to my mind the sacking of the town of Yang-Ching of old. The inhabitants, crowding out at the noise, were received by blows from clubs, whilst some were thrust at with long poles whose ends were pointed with iron; the positions of several old women were reversed in the melee, and decrepid old men were hurled into the stream. Our villagers, notoriously brave and valiant, yet forbore to hurt a hair of their heads; they very discreetly made up, in various abuses, their deficiency in blows. You are aware the laws of the Celestial Empire command compassion and kindness to these foreigners; Choo, thus in it appreciated! In a few minutes were to be seen the villagers flying from the scene of tumult, and the wrath of the demons. All became confusion and uproar; the voices of the Kwaes, equalled only by peals of thunder, rent the air. After committing various outrages in spite of the members by whom they were surrounded, pounded, and abused, yet had these people the strange effrontery to walk deliberately back to their boats, coolly enter them, and push off from the shore. But now was it that acting on the principle of prudence, taught by that shining star of war Kung-ming, did I head a determined party, and marched down to the banks of the stream, with a plentiful supply of stones and missiles, we opened upon them such vollies, accompanied by the most terrific abuse as battleground never witnessed, and though every precaution had been taken to secure a safe retreat, should they again venture to land; yet did they dastardly fly from us, taking no notice whatever of our shouts, but leaving us masters of the field.

Choo, this it is that has disturbed my peace; let your tears flow at my unparralleled miseries. To have been witness of such scenes would have destroyed the nerves of the most hardened, but having returned to the street "Redolent of virtue, overflowing with delights," I seek some alleviation from my anguish, in inditing this. —No more.—

To Choo — Your unworthy junior Lo-yung
Ever eminent — barries his head beneath the ground
Life for ever! — and worships.

* a Letter.

## TO THE EDITOR OF THE CANTON PRESS.

Ship Horatio Macao Roads.

June 24th, 1837.

Sir,—The compulsory deviation from the prescribed voyage of the Barque *Lady Nugent* must be already known at Canton, but it is due to the mutual concerns of Underwriters and Ship owners, to offer some explanation and commentary on this untoward event, fraught as it is with very serious consequences to the shipping interests of Great Britain. This subject materially involves those questions which for a length of time I have agitated with zeal and perseverance, and with abundant matters of fact in proof of my arguments and assertions, but, as yet, with little success in the attainment of amendment or redress. Nevertheless, my humble efforts for the welfare and preservation of the Merchant Service shall never be wanting, and I hope with confidence, that a due sense of impending evils which plainly indicate the degradation and decline of England's mercantile marine, will cause a general feeling in behalf of that influential branch of our national independence, and excite that spirit of unanimity which shall at length arouse from their slumbers the legislative councils of our common country, and thereby claim what has been too long neglected and despired, viz. an impartial investigation of misrule and mismanagement, a revision of laws which are obsolete or imbecile, and the enactment of such a code of maritime laws that shall uphold lawful authority and enforce obedience, shall give security and confidence to merchants and ship owners, and at the same time protect the seamen from all wrong and oppression, by a clear and distinct definition of those principles that will mark the line of duty, the term of servitude, the rate of wages, the scale of provisions, the pains and penalties for every species of offence and crime, and the guarantee that misplaced power and authority shall invoke corresponding condemnation, the quality of discipline, like that of mercy, should not be strained. It should be adjusted to suit the variations of times, men, and circumstances. Mark Mr. Editor the causes and effects which justify the grievances I allege, and threaten the consequences which may result therefrom.

Ships have been totally lost, others have been disabled, blood has stained the decks of ships, and reproached the tribunal of justice and hoped for redress, voyages have been deviated from or protracted to the serious loss of property and commercial enterprize, while pirates, assault, revolt and open mutiny have too often furnished the reputation of our seamen, and by their baneful influence and example and off'me escapes with impunity, prove beyond doubt the inadequacy of existing laws to meet such cases, and carry conviction to every unbiassed mind that a code of laws is absolutely required, and that the legal recognition of efficient rules and regulations would render all parties more contented and respectable

The case of the *Lady Nugent* is a follows. Whilst in China last month, Captain Fawcett her Commander, being apprehensive that a spirit of disaffection and discontent pervaded the ablest portion of his crew, caused by some vague idea that the destination of their vessel from China to Sourabaya annulled their contract and entitled them to their discharge, proceeded forthwith to Canton, showed the ship's articles to his Agent and the highest authority there, whose opinions coincided with his own viz: that the articles of agreement bound every man from China to port or ports east of the Cape, in fact, the contract is expressly guarded and worded for such a voyage as that in contemplation. He returned on board his ship then at Lintin, the hands were turned out, "up anchor," when the refractory seamen, eight in number, refused to do any more duty and declared they would neither lay in to the capstern bars nor would they touch a rope. Not conceiving it possible that men calling themselves British seamen could or would persist in so gross a dereliction of duty when their vessel was fairly out of harbour, Captain Fawcett obtained the assistance of two Chinese boat's crews, weighed anchor and stood to sea, however the conduct of those men was soon put to the test; the *Lady Nugent* on a lee shore encountered some severe squalls, top gallant sheets were let fly, topsails, clewed down, and these scoundrels still refused to do their duty, and openly declared that even in the extreme of danger or difficulty, *they would not*. Captain Fawcett himself was compelled to go aloft and assist in reefing topsails and with his scanty means (the remnant of the crew being chiefly ordinary seamen and boys) he decided on the necessity of bearing up for Manila where the *Lady Nugent* arrived on the 4th instant, every one who had done his duty being almost worn out with fatigue, whilst the only punishment the mutineers had then endured, was being put on allowance of bread and water from the moment they refused to assist in reducing sail &c., which by the way had no apparent bodily effect upon them, for I never saw stouter or more healthy looking men in my life. Captain Fawcett landed immediately and waited upon the Governor, the conduct of his crew was represented and prompt and vigorous measures were urged; these were promised, but on a reference being made to the law officers many doubts and difficulties were started and not until the 4th day were the delinquents brought on shore for examination; their depositions were to be taken individually and not in the presence of the Captain: this enquiry had commenced, but before it was gone through, the whole of these men were at full liberty to range where they pleased. Matters now assumed such an uncertain and unsatisfactory state with every prospect of serious detention, that Captain Fawcett with the advice of his agents determined to forego all further proceedings, paid the Governor another visit, obtained his sanction, and prepared for sea. In lieu of the eight disorderly seamen the best substitutes which could be procured were one American, one European, an American black, and six Manila men, and as the Spanish authorities would not imprison the *Nugent's* men, they were sent back to their Ship, in this plight without redress, and with a mixed crew on whose efficiency no confidence could be placed and with eight turbulent men at large amongst them, the *Lady Nugent* sailed from Manila on the 11th instant. In such a miserable state and condition and having to encounter an anxious and intricate navigation with unsettled weather which require the utmost vigilance and caution both night and day, Captain Fawcett's situation is one which calls for more than ordinary fortitude and resignation.

The consequences of this very lamentable and disgraceful affair are already too evident; detention, and expences have been incurred and why? Because the existing laws for the Government of the merchant Service are inefficient because they have not been framed under the guidance and superintendence of practical or professional men, and because they have a tendency to excite a laxity of discipline, through the total absence of any clauses thereby enacted which shall deter the mutineer, punish with exemplary effect such offences as it is well known are habitual amongst seamen, and provide for the safety, security and comfort of all who embark on one bottom, and under one command. All prospective modes of punishment in cases which affect the discipline of a Ship's crew are fallacious; the *Lady Nugent's* men, under their ringleader, who was at the commencement of the voyage boat swain and is a regular sea lawyer, are buoyed up with the hope of getting their wages for the entire voyage and a remuneration for the stoppage of their provisions &c., they are actuated by an infamous spirit of disaffection, skulking defiance and revenge, and surely, to protect the shipping interests of the British Empire such dastardly conduct should be guarded against by vigorous laws and summary means of carrying them into execution! —

Further negligence and the want of unanimity on this all important subject, may, and will most likely lead to serious and fatal consequences. But if all parties thoroughly comprehend the nature of those corresponding claims upon their notice and support, if they exert their every energy and influence, then even the faulty system of the past may be healed, while the manifold securities and comforts for the future will tend with every benefit to invigorate the ties of good and essential discipline insure a safeguard to commerce, and promote the reputation and prosperity of England's commercial Navy. I cannot close this letter, dated as it is, without offering my humble tribute of praise and admiration on the system of good order, efficiency, zeal and comfort which pervade throughout this fine and well conducted merchant man, the whole bearing of duty corresponds with the most ardent wishes of a true lover of his profession; harmony, good will and complete subordination prevail on board the American Ship Horatio.

I have the honor to be
Sir,
Your most obedient Servant
CHR BIDEN.

## CIRCULAR NOTE FROM THE HONG-MERCHANTS TO THE CREDITORS OF HING-TAE.

A respectful communication. We send copy of statement from Hing-tae of the account of the debt upon his commercial transactions with you, and we beg your careful calculation thereof.

With regard to your suggestion made to us, the other day, to request a Committee of two or three impartial persons to examine the accounts,—it appears to us, after careful consideration, that the examination of accounts is a thing totally different from arbitration or question of principle; and that it is requisite for the examination of accounts that the parties through whose hands the commercial transactions have been conducted should be present, as being alone able to know the truth of the accounts in any matters of detail. We would therefore entreat you to call immediately on *Yen Kechang* to find his brother *Yen Ketseong*, that the accounts may be examined at a personal interview. Then they may be clearly settled, and all obstinate disputes respecting them may be prevented.

To make this request it is that we trouble you, and with compliments, we are &c.

(Signed by 12 Hong-merchants).

5th moon, 25th day.—(June 27th 1837).

To Mr. ——

# CANTON PRESS,

July 1st 1837.

## HISTORY OF THE HONGS AND THEIR DIFFICULTIES.

The subject of the Hongs, the medium through which the greatest part of the trade with China is conducted, is a matter of so much importance, that any information on the subject, will we doubt not, be acceptable to our readers, and though we have already frequently partially filled our paper with remarks on the Co-hong system, we hope that the space we shall devote to them in our present number, will exhibit the system such as it works, under a new point of view, by going back as far as about 37 years to it's history, and to the difficulties which the individual Hong-merchants and in consequence the Company's Factory, were from time to time suffering under. These difficulties if not augmented at the present day, have not decreased, and we fear that at present they will not so easily be settled seeing that instead of one body like the Company, which acted with unity of purpose, the Hong-merchants and the Local-government will probably now more easily carry their point, as since the establishment of the Free-trade that unity will no longer be preserved, unless indeed, which is much to be hoped, our commercial neighbours set aside for a time the expectation of private advantage, to follow up the general good

The Hong-merchants, in spite of the favorable position in which they seemingly are by enjoying the Monopoly of the foreign trade, have nevertheless from time to time been subject to not only great pecuniary embarrassments, but to losses and expenses exceeding their profits, so as frequently to have failed. We must seek for the causes of this in the despotic and grasping spirit of the Mandarins, which prevented men of respectability and property from entering the Co-hong, and in the inordinate spirit of speculation so easily created in men, who, having nothing to lose, can only be gainers, however their enterprises may turn out.

The first great embarrassment of many of the Hongs occurred some years previous to 1780, when foreigners, unable to obtain payment from the hongs, carried on long and tedious negotiations with the authorities, which for a time were unavailing. These debts in 1779 to 1780 were.

| Mounqua | ,, | 161,113 |
| Conqua | ,, | 91,966 |
| | Total $ | 3,272,587 |

Besides the above hong debts, sundry outside merchants (chinese) owed ,, 891,666

Suenqua's debt seems to have been contracted by his father prior to 1774, and the father had died after that year. There were at that time apparently only 8 hongs, which by the failures in 1780 were diminished to five effective ones, of which four depended upon the 6th, which was Pwankeiqua the head-merchant.

It is probable that efforts had been made for some time previous to get these debts settled, for the select Committee appear to have referred the matter to England, and the creditors, who are chiefly represented by Messrs Crichton, Crommelin, Hutton and Smith, appealed to the Admiral on the India station. The Admiral on this sent out H. M. S. *Sea-horse*, Capt. Panton, to assist them, but he, being unable to do any thing directly as might be expected, applied to the Select Committee, and soon went away, leaving the matter in their hands.

The Select Committee, in conjunction with the other creditors, seems to have contended with great spirit with the Chinese, and had frequent personal interviews on the subject with mandarins of rank. Several propositions were made for paying the debts, the most reasonable of which, as respected the largest claims, were, to cut off one half the amount, and pay the rest in ten annual instalments, some with and some without interest.

The creditors rejected these conditions. The Select Committee and some of the creditors appear to have given up the business for the time, throwing the responsibility upon the Chinese government. Some of the creditors appealed again to Sir Edward Hughes, who replied that he was fully occupied in India and could not spare a vessel, and thus the matter seems to have stood, some of the debts being paid however un il 1786.

On the 1st of July of this year the interest upon the unpaid claims had encreased them as follows

It was finally arranged, according to Milburn, to accept the terms offered by the Chinese authorities, viz:—one half of the original amount of debts, payable in ten annual instalments.

In the year 1790 again, we believe, a failure of a Hong-merchant to a large amount took place, but not having at hand where to refer to, we are at present unable to give particulars.

It was however in 1786 that the Consoo-fund appears to have been established for the payment of the foreign claims and the duty imposed for the raising of it, has, we believe, never since been abolished, so that, if it had been managed for it's original purpose only, it ought by this time to amount to an enormous sum.

We now arrive at a second period, where the embarrassments of the Hongs again become known.

So far back as October 1810 the select committee reported that the Hong-merchants Goowqua and Gouqua had become bankrupts. In the following year the Committee speaks of the unprecedented distress of the Hong-merchants, and after much litigation the Committee succeeded in obtaining payment for the debts owing them by these two Hong-merchants, by 2 t. 3 m. per pecul being paid into consoo on all Teas exported. The local Government for a considerable while opposed this settlement, and the Company's Agents describe the conduct of the Chinese in this affair as "exposing proceedings of villany and duplicity on the part of the Merchants and Mandarins, unprecedented even in China."

At that time, when the trade was exclusively the Company's, and when they were allowed to put up their teas at a profit of a certain percentage, it mattered little to them how much the British consumer had to pay; they were certain of a market, and it was at their option to raise prices. Thus though the price of Teas must naturally have risen, the Company was no loser, it was the consumer in Great Britain who paid for the money squandered by improvident Hong-merchants, or extorted from them by rapacious mandarins.

It was but natural, that such ready means being found by insolvent Hong merchants, the example just given would invite a continuance, and accordingly we find that in the year 1813 five Hong merchants, Consequa, Exchin, Manhop, Poonequa and Goqua, declared their insolvency. We find that of three of these the debts amounted.

| | | | |
|---|---|---|---|
| of Exchin, | to Taels | | 590,839 |
| Manhop | ,, | ,, | 897,290 |
| Poonequa | ,, | ,, | 534,040 |
| Total Taels | | | 2,017,969 or Drs. 2,813,485. |

We have no data for stating wether the amount owing by the other two were in proportion, if so, the whole of them cannot have fallen short of 6 Millions, and, in fact, at that sum we see them stated in the Select Committee's correspondence. We see that in the evidence before the Houses of Commons & Lords the cause of these failures is stated to have been the connexion of these merchants with illicit trade, from which we infer that, therein detected by the mandarins, they were obliged to buy their secrecy above their means. Another reason of their failure appears to have been that the senior or richer hong-merchants wished, by breaking them, to obtain the exclusive privilege of the foreign trade, and with that view to have refused to assist them in their commercial operations. The Hong merchants most active with the local Government to break the insolvent hongs, appear to have been Pwankeiqua and Chunqua. As reducing the number of Hongs to a few powerful and rich individuals, would have exposed the Company's trade to great danger, the Supracargoes made the most strenuous efforts to continue the insolvents in business, but the intrigues of Chunqua, Pwankeiqua having in the mean time retired from business, for a long time

(See Supplement.)

## SHIPPING INTELLIGENCE.

ARRIVED.—British, *Syed Khan*, Gallie, *Fort William*, Fraser, *Caledonia*, Lancaster, from Bombay and Singapore. *Bengal Packet*, Steward, from Calcutta and Singapore, left the Pilot 24th May, and Singapore 16th June. American, *Canton Packet*, Pearce, from Boston; Sydney, and Manila. *Horatio*, Howland, from Manila. *Duncan*, Randal, from Batavia 9th June. *Dos Amigos*, Pardo, from Manila.

PASSENGERS.—*Horatio*, Mr. G. G. Nicol and Capt. Chr. Biden.

SAILED on DESPATCHED.—British *Thames*, Horneblow for Madras. H. M. S. *Raleigh*, Quin, commander, on a cruize.

The *Antonio Pereira* and *Bengal Packet* for Singapore and Calcutta are both to be despatched at the end of next week.

When the *Syed Khan* left Bombay (25th May) the *Lowjee Family* was to be despatched a few days after. She is expected to bring out the March overland despatches, the arrival of which was daily expected in Bombay.

Freights for Canton were very scarce in Calcutta. The *Pottay Salam* and *Sultana* were returning to Bombay, not able to get cargo; the *Malacca* was loading very slowly from the same cause. The *Water Witch* was to sail on the 28th May.

The following vessels had passed Santa Helena from here by the 20th February. The *Jumna* had been spoken 8th January in 12° 43 S. Latitude and 94. 25 E. Longitude.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7824756 of a Tl. per cub
2nd „ „ „ 1200 do. & under 1600 „ 0.7221091 „ „
3rd „ „ „ 1200 do. 0.3062361 „ „

N. B. The cubit is 14½ inches; measurement is taken on each entry of t vessel with cargo (except Rice) and is from the Foremast to the Mizen ma or tiller head in Brigs; and across at the main mast; these are multipli together for the above measures. The largest class pay from $ 13 to $ 130 2d class from $ 3700 to $ 3780; 3rd class from $ 1780 to $ 1820. The Co sha; or Present Fee is paid by all vessels 1600 Tuns or $ 2323. Linguists $ $ 173½ and Comprador's fee $ 70. Also Pilotage $ 60, inwards and ou wards the same. On French and other Foreign vessels they are slight varied. Riceladen ships are charged only about $ 1300 in lieu of measur ment &c.,

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—Longcloths bleached and unbleached ha experienced some demand, without this procuring for them improvement in prices which are not remunerative.

WOOLLENS.—The demand for Longells has not continued as good during the last week, and our quotations, particularly for scarlet, of which the stock is heavy, are lower than before.

RICE.—The first crop will now be cut in a few days, and though part destroyed in very low lands by the heavy rains and inundation in spring, it has not suffered in the aggregate, and is expected to be an average one, whilst the stock of Rice is no country rice continues heavy, and the latter particularly bei pressed on the market, there is no immediate prospect of pric rising.

STRAITS PRODUCE.—BETELNUT has advanced a little in price, as h also TIN. PEPPER also finds more inquiry, and at rather a vanced rates.

QUICKSILVER.—Has advanced to our present quotation.

LEAD.—Also has improved a little.

SANDALWOOD.—The supplies have been but small, and the stock reduced, prices have consequently risen considerably during t week.

COTTON.—No transactions of any extent have been reported during th week, and previous rates could hardly be procured. We hav not heard of any sale of the new Bombay cotton, but as the sup ply is hitherto moderate, the finer qualities will command re higher quotations. Inferior quality of all descriptions is on saleable at a decline.

OPIUM.—The market has been very dull during the past week, no holders, we believe, would be willing to sell even under our quo tations, particularly the Bengal drug, but there appears little disposition to purchase. The deliveries of Malwa to the Jun proceeding to the northward continue, otherwise little is doing although some of the smuggling boats are said to be already b built. The Lintin deliveries to the 22nd were,

Patna, *Old*, 61, *New*, 234; Benares, *Old*, 40, *new*, 189; Malwa, 118 Total 1640 Chests.

### EXPORTS.

RAW SILK.—Of the first Crop of Canton Silk none of good quality r

# SUPPLEMENT.

## TO THE CANTON PRESS, No. 43.

CANTON, 1st JULY, 1837.

frustrated the Company's endeavours. In the mean time Fat-qua, another Hong, would have been declared insolvent had not advances from the Company prevented his fall. The senior Hong merchants then thought seriously of establishing a strict Co-hong, and even attempted to value imports at fixed rates, but this was effectually opposed by the Company, though not without a threat from the latter to suspend all trade. In consequence of the Company's remonstrances, Pwankelqua was, in 1815, much against his will, obliged to take his post again as head of the Co-hong, and in the next year the local Government consented that the five insolvent Hongs should remain open, though not without being bribed, to their consent, with 100,000 Taels.

It was then agreed on between the Company and the other creditors of the insolvent Hongs, on the one side, and the Co-hong on the other, that their debts should be paid in instalments of 6, 7 and 8 per cent, and we find that the 7th of these was paid in 1831. In which year of the above mentioned debts owing by Exchin, Manhop and Poonqua, 1 078,774 Taels, or 1,504,566 Dollars had been paid, out of which sum the Company made a set off against Exchin and Poonequa of the sum of Tls. 84 646, due to those mer chants by them. Manhop was indebted to them Tls. 1035.

The Hong-merchants meanwhile, though exceedingly poor, and though they traded, with the exception of 2 or 3 owners on the Capital furnished by them by houses of Agency and others here,* were not the less exposed to the rapacious exactions of the mandarins and we find accordingly one instance mentioned in November 1818, on the occasion of the then Emperor attaining his 60th year, when as customary, Salt and Hong merchants are expected to express their joy at this auspicious event by a present in money: the local authorities, having prevailed on the Salt-merchants to increase their present equal on such occasions, thought this a fitting opportunity to extort a similar proof of loyalty from the Co-hong, and insisted on a present of 300, 00 Taels. The Hong-merchants offered 200,000, which were for a time refused as insufficient, but it is probable that the mandarins were at last obliged to be satisfied with this sum.

Between the years 1818 and 1830 no official correspondence of importance between the Supracargoes and the Local-government concerning the Hongs seems to have taken place, but all the previously insolvent hongs had after lingering out some years without being able to retrieve their credit, dropped off one after another. Of the other previously existing Hongs, Manhop, Chunqua (sons of those before spoken of) and Fatqua also failed, soon after, and Mowqua and Kinqua were at that time in no better condition, leaving only three Hongs with whom foreign business could be transacted, namely Howqua, Pwankelqua, and Goqua.

The Company's Committee looking upon this state of things as exceedingly unfavorable to the Company's interests, addressed the local Government in the latter part of 1829, requesting that an additional number of Hong-merchants be appointed and complaining of the unsatisfactory state of the remaining Hongs insisting at same time on means being resorted to for paying the debts of the insolvents. Meanwhile the Company detained their ships outside to give additional weight to their representations. The Governor's answer was at first, though evasive, on the whole favorable to the Company's demand, which were backed by representations from the Parsees, and from the Agents of other European nations here. Soon however the local-government, irritated by the non-compliance with their orders for the British ships to come to Canton, assumed another tone and after a reference to the treasurer and judge, an answer was sent to the Company, which was completely unsatisfactory. Meantime the Governor had issued invitations to Chinese to become Hong-merchants, professing to remit all fees attendant on the enrolling of a Hong-merchant's name on the Hoppo's books. The elder Chunqua also was recalled from his retreat in his native country whither he had carried a great part of the Hong's property, leaving no assets in Canton wherewith to pay. This invitation Chunqua however found means to evade, and his brother, illtreated by the Chinese officers, whose prisoner he had become, found life so intolerable, that he committed suicide.

After a good deal of correspondence between the Committee and the Governor, and the latter having declared three new Hongs, viz the Hing-tae, Minqua and Saequa, as established, the Company's ships were, towards the end of February 1830, ordered to proceed to Canton, and the trade was declared to be again open.

The fears entertained by the Committee that the Fatqua, Mowqua, and Kinqua Hongs would soon, like Chunqua, declare their inability to pay, were soon after verified; the former and latter still exist, and time was allowed them for the payment of their debts the other's debts were paid off, as well as any other debts owing by insolvent merchants by the end of 1833; but Fatqua's hong, under the guidance of a young and inexperienced man was not upheld, and young Fatqua, though from his business having failed him entirely during the last few years, he owed nothing or next to nothing to Foreigners, was in debt to the Government, and has now lingered in prison in the city, where he still remains, during almost three years; a hard punishment even if he retains means to pay for decent treatment, but excessively severe if all we hear of the treatment of the poor in Chinese prisons, be true, in case he has no money left.

Three other hongs, those of Punhoequa, Samqua and Foo-tae were established a short time after.

In the year 1834 the China market was thrown open to the competition of the free-trade, and had unity existed between the new and old hongs, there can be little doubt but that now was the time for them to have it all their own way, and to make immense profit, particularly since, as we have before said, all claims upon insolvent hongs had been paid off before, and they had to begin with clear accounts.

The eagerness however with which the free-traders entered into the market, and, may be, also the distrust of the senior merchants in this new state of affairs, prevented any such unity, and they each of them singly entered into contracts, and bought and sold without reference to the others. During the first two years every thing went on well, supported by the favorable markets at home. The young Hong-merchants, apparently thinking that things must go on thus for a while at least, entered into contracts for produce with the foreign houses at fixed rates; but news of the improved demand had reached the country and the tea-merchants themselves wished to profit by this favorable state of affairs, and thus, on bringing their teas to Canton, allowed the Hong merchants, finding no union among them, and that they were at the same time pressed to fulfil their contracts, but a small commission for shipping the teas. The importations of manufactured goods also had been much greater than at any former period, and the Hong-merchants, in order to raise the money necessary for their contracts, had to submit to heavy losses. The year 1835-36 however on the whole was not unfortunate for them, but the bad accounts of the European markets during the last year, combined with the effects the Company's advances, being available only to the 31st December, had in raising the Tea and Silk prices far beyond the prices at which they had contracted to deliver them, have tended to shake their credit very much, besides entailing on them very heavy actual losses. During the last year two more Hongs were set up, that of Lunqua and of Takqua, and another early this year of which the acting partners in Allum, before an Opium broker.

None of the Heng-merchants established since 1830 were men of property, at least not of property adequate to the properly conducting of such large business as they were intended to carry on, and we believe that in most instances the greatest part of it was spent in bribes to the Hoppo and other mandarins before their names were inscribed in the Hoppo's books, and before they had begun to do business. They therefore from the very beginning were under the disadvantage of being obliged to raise money on heavy interest (generally 1 per cent per month and frequently more) and in order to attract business to their hongs, to do it at cheaper rate than the long established Hongs. The credit of several therefore was never properly established, and from causes before mentioned received a severe blow in the latter part of last year, and the Hing-tae hong then declared it's insolvency. This Hong had been doing ever since it's establishment, a very extensive business, probably the largest, and it's liabilities consequently were very great. The young man at the head of this hong was the son of a wealthy father, whose property at his death, being divided among many brothers, the portion each received was not very great. Though, as before said, on the establishment of the new hongs in 1830, the Viceroy declared that no fees were to be levied, it is well understood, that the Hoppo did not inscribe their names without a handsome douceur though not so much as usual was paid. The first disaster to which we may trace the subsequent failure of the Hing-tae hong was the burning of some ware-houses filled with Cotton, by which this hong is said to have lost 300.000 Taels, a large amount to make good; not long after that, Lord Napier came to Canton, in a ship secured by this merchant, and the Chinese authorities imprisoned him for it, though he could not even have been aware of Lord Napier's being on board the ship. He suffered an imprisonment of about six months, at the end of which his was released, but not without, as may be supposed, paying well for his liberty. Not only the expense of his liberation but the loss of business he sustained for a season, whilst the heavy Hong expenses continued, threw his affairs into confusion, and on emerging from prison he was not able to meet his engagements, but receiving cordial support from several of the larger houses of Agency he was enabled to go on, and to continue transacting the largest business of any of the Hongs. It was hoped that he might thereby retrieve his affairs, but the want of ready money seems to have obliged him to make many sacrifices, and the extent of his business only enabled him, for a while, to go on; he could no longer do it profitably, and his attempts to raise money must have been enormous, since in November last, his creditors having become urgent, he declared his utter inability to satisfy them, and having no assets worth mentioning, to pay even a dividend. At first it was thought that by continuing to support him, he might be able to work off his debts, and if we can credit his subsequent statement, it appears that he did lessen his debts, through that support, by about 200,000 Taels. But there being no hope of reducing them any further, the foreign creditors at last resolved on applying to the local Government for the payment of Hing-tae's debts, and the Governor replied that a statement of them should be made out. By this statement it appears that they amount to the enormous sum of Drs. 2,800,000, — to foreigners and probably 4@ 500,000 more to Chinese. This Hong must therefore have been losing money at the rate of @ 500,000 per annum! We give in this number the translation of some correspondence which has passed on the subject between Hing-tae and the Governor* from which it will be seen that the former objects to the accounts of the foreign merchants, and that he proposes as the best way of paying his debts that an additional duty should be levied on the Import and Export-trade, from which his debts are to be paid, and that, there being no difficulty in this, he hopes that the Governor will allow him to continue a Hong-merchant as before.

In the meanwhile the Governor has ordered the Hong merchants to investigate the accounts between foreigners and Hing-tae, and a meeting took place at the Consoo-house a few days ago between the creditors and Hong merchants, at which it was resolved that a Committee, to consist of three of the latter and three foreign merchants, (not creditors of Hing-tae's) be appointed to audit the accounts †

Nothing is yet positively known as to whether the Co-hong will be made liable for Hing-tae's debts, but it seems probable that after all, Hing-tae's suggestion of levying a new duty for that purpose, will, as the most convenient mode, be supported by the Hongs, and adopted by the Government. Many are the objections to this plan, and we hope it will be opposed as much as possible by foreigners;

* Mr. E. H. Toone's evidence before the House of Lords.

* For various reasons we have not been able to obtain it.

† See Hong-merchants's letter in another column.

the Consoo-fund, the contributions to which continues to be levied on the foreign trade ought to be quite sufficient to pay off these debts. There have been no calls upon it for it's legitimate purposes for the last three years, and a few years more, if it really were applied as it ought to be, must make it equal to it's present dimensions upon it. But we much fear the Consoo-fund exists but in name, and that the duties levied under it are spent for very different purposes. The foreigners have a right to demand from the Hong merchants, and if they will not give it, from the local Government, a statement as to the collection and application of the fund, and would not do their duty to themselves and their constituents if they allowed the trade to be burthened with an additional impost for the payment of Hong debts.

If Hing-tae debts are paid in the manner proposed, it will become a precedent to other Hong-merchants, who, careless as to consequences, will fall year after year, and additional imposts will be levied on the trade.

One other Hong has been established within the last week, and two more individuals have applied to set up as Hong-merchants.

We intended to have given a translation of the correspondence which has passed between Hing-tae and the Governor, but various causes have prevented us. The governor therein rates Hing-tae sharply for his inprincipled propositions of levying duties on the principal articles of imports in order to pay his debts, of which latter Hing-tae seems to make light. The Governor orders him again to give in a clear statement of his accounts, and threatens him with punishment in case he fails in doing so. We give a translation of a communication addressed by the Hong-merchants, which will be found in another column, to the foreign merchants here relative to the adjustment of accounts of the Hing-tae hong.

Another edict about the Bocca passage-boats has literally appeared during the week, confirming the former orders, but we do not hear that any coercive measures have yet been had recourse to by the Chinese to expel the boats from the river; instead of coming to Canton as before, they now play between Whampoa and the Moon and Macao.

The Arrivals during the week have been many. We have seen the *Calcutta Commercial Advertiser* to the 13th May, brought per *Bengal Packet*, from which we observe that rumours had prevailed that the *Pallet Pingoe* had spread over part of the Company's territory, but that on strict investigation it was found that the sickness which had caused these reports was not the plague but some malignant fever, of which however a great many persons were dying. The same vessel has brought us the *Singapore Free Press* of 8th, and the *Chronicle* of 10th June, from the former of which we give an extract.

An association has recently been formed here for the formation and encouragement of the manly and healthful exercise of boating and sailing. It has been taken up with very considerable spirit, and conversation almost the whole of the foreign community among its subscribers.

The first races will come off, we understand, about the 11 or 12th of this month, in that part of the river known as the Macao passage, but particulars have not yet been made public, though report speaks in the highest terms of the sport in preparation.

We always view with pleasure any attempt at adding to the very scanty means of recreation we possess here, and we think the "Canton Regatta Club" particularly worthy of support, its object being the promotion of the only description of active exercise available in our confined situation in this country.

The *Dutton* from Batavia 9th June, brings the report of a Dutch ship having arrived there with news from Europe to the 1st of March.

In another column will be found an account of the fire at Surat. Several subscription sheets for the support of the sufferers have been circulated here, and we hear that among our Parsee neighbours alone more than @11,000 have already been contributed.

Our best thanks are due to our correspondent P. for his very amusing and characteristic letter.

We, not being well versed in nautical affairs, must leave captain Bidea's remarks without other comment for the present.

VOL. 2d No. 44 CANTON, SATURDAY, JULY, 9th, 1837 No. 96

## FROM THE CHINESE REPOSITORY.

### American Consular Establishment in Eastern Asia.

We agree, therefore, with Mr. Livingston, that the consuls of the United States should be paid out of the public treasury. We have no objection now to his claim for their exclusive services. A little while ago we should have said, that it would be necessary, in China, to clothe the official, under the commercial, character. Now the exception given to the British superintendent has removed the difficulty. We only contend that the salaries of the consuls must be regulated by the amount of labor they are to perform, and the remoteness, unhealthiness and expensiveness of their official residences. Thanks to public economy, and that dire necessity—a surplus revenue—the American merchant is soon to be set free, under his Christian government, as if it were Mohammedan. We despair indeed of its ever coming quite up to the Dutch pattern, and remitting all duties, when the owner swears that he is a poor man, and cannot afford to pay them. Nevertheless there is one point of danger. The American legislators are very many of them lawyers from the interior. How many of them never saw a ship, or do not know; but we think our merchants have often suffered from neglecting to enlighten these freshwater disciples of Blackstone, touching trade and commerce. Hence this humble presentation of our own, and desire to elicit other's opinions, in time to obtain a consular establishment suited to the wants of eastern Asia. The subject cannot much longer escape the attention of Congress. We commend the following plan to its adoption.

1st. Let the countries around the Chinese sea be erected into a consulate general, Canton being the residence of the presiding officer, who shall also be consul for China.

2d. Let the islands subject to the Spanish crown, extending from the Bashee islands to Basilan, be made a second consulate, with residence at Manilla.

3d. Let the consular region lying between the Spanish claims on the north and the Dutch claims on the south, form a third consulate, with residence at the Sooloo group or at Borneo city.

4th. Let the Dutch islands be a fourth consulate, with residence at Batavia.

5th. Let the eastern shore of Sumatra and the Malayan peninsula form a fifth consulate, with residence at Singapore or Rhio.

6th. Let Siam be the sixth consulate.

7th. Let Cochinchina be the seventh and last consulate.

To each of these governments as are independent, the consuls should be duly accredited, and authorized to correspond directly with them, and protected by treaty stipulations. Recognition like this cannot, of course, be expected from colonial authorities. Let the consuls be required, in addition to their usual duties, to give annual information of their respective countries, to the consul general and to the state department. Let it be the duty of the consul-general, to collect and arrange this information, and to present it, in a digested form, with his further views, to the department. Let him report on the working of the consular system, and thus bring about its extension and perfection. Especially let all naval movements be made only with his concurrence, and no retributive measures resolved on, but with his concurrence, and responsible sanction. The annual cost of this establishment at $ 4000 or $ 5000 for the consul-general, and $ 3000 for the consuls, with some allowances for interpreter's services, and for commercial agents, would be about $ 30,000. It is not much for so important a region, and on which nothing is expended in diplomatic establishments.

In explanation of this system, we remark, that Canton, as the central seat of eastern commerce, exchanges, and intercommunication, is the best point for a general consular office. The intimate connection of the regions washed by the Chinese sea with each other, their remoteness, and the unity of the naval and other measures of the home government, in their behalf, require the presence of one able and responsible officer. It will be easier to find, and cheaper to maintain, one such officer than seven, and this one, if established at Canton, can seize the moment, come when it may, in revolution or gradual change, which shall throw open the Chinese empire.

The second consulate has long been on the American list, the officer residing at Manila. Should the Christino party triumph in Spain, the Philippine islands will feel the influence of a more liberal policy,* and the intercourse with them deserve more attention. If, on the other hand, factions arise there, and the tie which binds them to the mother country be parted, they are capable of becoming a commercial empire. The disturbed state of Spain has probably led to the recent appointment of a French consul, with extraordinary powers to those islands.

The region lying between the Spanish and Dutch possessions, has seldom been visited by American vessels. There is, however, reason to believe, that a little attention, on the part of government, would make it a safe and profitable resort, as well as save it, a poor remaining belt of independent soil, from sinking into a colony.

If we are not misinformed, the inhabitants of the Dutch colonies in this Archipelago, are equally far from the enjoyment of civil, commercial, and religious liberty. Whether the dutch colonial policy be worthy of the descendents of the patriots of the United Provinces, and consistent with the rights of maritime nations, should be considered in Holland, not in China. Our desire is that the American government should immediately inform itself of the nature and extent of the Dutch claims, how far they blockade the ports of eastern Asia, how far they restrict the native industry and stifle native improvement. Let an efficient consulate be the instrument of placing these data in its possession. The author of the existing consulate at Rhio or Singapore, may be expended, so as to meet our plan, over the ports of the Malayan peninsula and those situated on the eastern coast of Sumatra.

The western coasts of that island form a distrct commercial region, and any officer appointed to reside there,

* In this we differ with the writer of the above article; we know of no liberal act of the Christino government except its overthrow.

should correspond directly with the home government. We would not have these shores forgotten, though they do not come within our proposed establishment. One spot on this coast, has already been crimsoned by innocent, as well as guilty, blood, shed by the hands of Americans. The most solemn considerations call on the American government to guard against the recurrence of this sad event, to watch over the conduct of its citizens abroad, to ascertain what provocation has preceded outrage, before it inflict vengeance; remembering, that not only is it providential, that what a man soweth that shall he reap, but that often in this world *one* sows and *another* must reap—one must suffer from the outbreaking of savage passions, to whose excitement others have ministered. Interest, justice, and benevolence, look back to the mournful act referred to, and forward to future intercourse with the more eastern islands, and repeat, with united voices, this solemn memento.

The treaty lately ratified with the king of Siam, has we trust, fully prepared the way for the immediate appointment of a consul to that country. We refer to the Repository for April last, for an explanation of the real causes why we are not able, at this moment, to say as much in reference to Cochinchina.

## THE COORG INSURRECTION.

We learn that as late back as the end of November last, official information had been received at Mysore that a spirit of disaffection was spreading through the Mysore country, originating in a Brahminical conspiracy. Mysore, Coorg, and the southern Marhatta country were spoken of as most disaffected, and when it broke out in Banara no suspicion existed of its having spread into that district. Mysore indeed was so watched that no unforeseen rising could take place there, and the principal Coorg chiefs were not persons to be led astray.

*Bombay Courier, 6th May.*

In order to draw the Coorgs into the plot, it was given out that the Rajah had fled from the ill-treatment of the British at Benares, and had sought refuge among the Brahmins: this led away the Toolava Coorgs below the Ghauts, but did not impose on any above them, and their fidelity there is spoken of as astonishingly great.

A plot indeed, against the principal Coorg leaders was contrived to get them removed from the country, by accusing them of treason, but had failed through the firmness and sagacity of the commissioner in Mysore. Among other facts it appears that the Brahmins had converted the Pagodah of Sorlurmoonoeah, a place of pilgrimage from Mysore, Canara, Coorg, and the southern Mahratta country, into a regular magazine and storehouse, from whence ammunition and arms were liberally supplied to all who would use them against our authority.

Mangalore, by all accounts, was most gallantly defended by the handful of native troops collected there, aided by the civilians of the station with Mr. Lewin at their head. An idle report that Messrs. Bird and Dumergue had quitted the place voluntarily during the siege, is, we learn on unquestionable authority, utterly without foundation. It appears that these gentlemen had been deputed by their brethren, to proceed to the relief of their ladies and families, who had been embarked in haste from Mangalore on board a Pattamar, which during the night was run aground by the crew of the vessel, and lay in a very exposed and perilous condition. In the course of the ensuing day they were, by the exertions of these gentlemen, got on board another boat, and from thence to the *Kamaul*. Messrs. Bird and Dumergue on returning from them, were assailed at their entrance into the harbour by a heavy fire of musketry from the banks of the river, and from boats which pursued them, and were compelled to put about and recross the Bar, and—the *Kamaul* having then long sailed—to run for Cannanore.—*Ibidem.*

The intelligence from the westward continues to wear a favorable complexion.

Reports from Mercara of the 16th instant stated that Dewan Bapoo had brought over 230 out of 750 Coorgs, and seized the ringleaders by whom they had been induced to side with the pretender. The trifling remainder, who remained untaken, were individuals of no consequence.

Sunadar Nandiah, who is stated to have been forcibly carried away by the rebels of Canara, had returned to Coorg, having been released by the pretender at Soolyah.

Late letters received from Mr. Lewin, whose previous despatches had been delayed by the difficulty of communication, anticipates an early termination of the insurrection from the large force about to be employed in Canara.

The Bombay government we learn had in the readiest manner complied with the requisition of our government, and 200 men of the 6th king's had been ordered to embark on a steamer and other vessels for the Malabar coast. Before this, force however could be despatched, they will have receive a subsequent letter stating that it would not be required.

The steamer *Atalanta*, which had been temporarily detained on the coast, started from Cochin on the 9th in prosecution of her voyage to Bombay.—*Spectator 22d April.*—*Ibidem.*

## THE GOVERNMENT ADVANCES.

### TO THE EDITOR OF THE BENGAL HURKARU,

Sir,—Concurring, as I do generally, in your Editorial articles respecting the system of advances made by the Government in Canton and this Presidency, it strikes me you have omitted to press some points against your opponent, the *Englishman*, and his correspondent, in which they are vulnerable; and that you are wrong in supposing yours to be the less popular view of the subject, assuming for the moment that "*votes*," *per se* are an infallible criterion of truth in a matter of political economy.

Were the Members of the Chamber of Commerce polled, you would have a majority; but extending the circle of qualification, there is not a civilian or a military man, from Calcutta to Lindamanik, having occasion to make a remittance to his family, who would not give his vote against any measure of Government calculated to depreciate the exchangeable value of his rupee. They do not forget that for many years they were compelled by the course of trade, to be content with a bare bullion rate, or Is. 10½d. to Is. 11d. per sicca rupee; and reasonably enough deprecate the artificial "dam" now thrown across the current setting in an opposite and a more favorable direction. For supposing, with the *Englishman* that there has not been any fall in the exchange, that it remains on the same level as it was previous to the notification of Government; will he undertake to say, that without such notification it would not have risen, and that the good old times of 2s. 6d., ave of more, were not on the cards. I am inclined to believe, however, that the quotations which appeared in your cotemporary's columns, were rather indicative of a solitary transaction here and there, than of the general course of operations. The wants of individuals may be temporarily so emergent as to induce a submission to terms something above the market average; but certainly to my own knowledge, there has been generally a subdued inclination to sell bills, except at from ¼ to ½d. lower than was freely offered a few weeks ago.

In justa-position with the tendency to a fall in exchange, there has been an inclination to sustain produce at higher valuations than the home-market warrants. The holder finding he has a fund to fall back upon, *extra*-commercial, will not submit to such terms as the *bond fide* commercial capitalist deems it prudent, with reference to his service, to propose. Two effects follow—the latter withdraws from the field, or slept for a while in the 4 per cent. loan, in unproductive lethargy, in which he meets the revenues of Government as a competitor; and the former, supported here by the Company's "bladder," lands in the E. I. docks with an unsaleable article, or only saleable at a shark, which involves a "vacuum" and indubitably cuts away all chance of a "win-back." In the mean time a fictitious standard of value is created; the produce-grower hangs on to the "shadow" too, extends his cultivation, instructs upon shipping, not selling; and at no very distant period finds himself the victim of a system, which short-sighted editors have led him to suppose was a protection against the covetous propensities of commercial capital.

In fact, the real question at issue, is the expediency or inexpediency of employing the Revenues of Government in trade, or the revival, virtually, of the Company's Monopoly. In principle, there can be no difference, whether silk be produced, directly by the advances of Mr. A. B. the Commercial Resident, or indirectly by the advances of Mr. C. D. the Export-Warehouse keeper; and in degree, it is very slight. It is idle, therefore, to suppose that the merchants and manufacturers of England will be silent, when they see the continued interference of the Local Government with the natural course of commerce, so completely at variance with the principles on which the alteration of the Charter was based, and in violation of the intentions of the legislature and the promises of H. M. ministers among whom was Lord Auckland.

In a pamphlet, punished in 1833, entitled "The Reform Ministry and the Reformed Parliament," and which was considered, I believe, with truth, to have been a "joint stock" work of the "Cabinet," each department furnishing a chapter in defence or eulogy of the measures of the Government, the Board of Trade "*hesitates*," "India is thrown open to European enterprize and European capital. The anomalous and pernicious union of imperial and economical functions in one body is at an end. The settlement of the East India Company's Charter, destroys the monopoly of the China trade, and opens to our manufacturers and our merchants, that rich field for their enterprize and their industry. Facilities for conducting this branch of commerce are *considerably extended from that time, upon what has become a necessary of life to the population of the country*," we mean tea, have been given by a subsequent bill for regulation the importation of this article." Could any one imagine after reading this extract, that the hand which is said to have written or dictated, and at least approved of it, would have sanctioned, except upon grounds not before the public, a measure by which the "tea-pot" next year is likely to be filled at an enhancement of price of some 30 per cent.

In justice, however, to the noble Lord, it must be admitted, that he is still held as opposed in principle to the advance-system, and that the present deviation was been forced upon him by particular circumstances, "to this deponent unknown."

But it is not only at home that a strong feeling has been created, as you will observe by the accompanying copy of a memorial from Glasgow to the Board of Control—and which it is desirable to publish—against disbursements from the treasury for commercial purposes; there is a letter in town also from an influential and wealthy house in Canton, containing the following paragraph:

"We must sincerely hope the Government of India will discontinue their advances both with you and us. They operate very unfavorably upon the markets. You would have all the aid this community could give in support of any measures that might be proposed for accomplishing such an object."

With this extract, Mr. Editor, I shall conclude, sincerely hoping that the present will be the last interference of the Local Government in commercial operations; and that the Queen's Proclamation will be observed both in the letter and the spirit.

Your obedient Servant,

*LAISSEZ FAIRE.*

*Bengal Harkaru, April 29.*

## DELIVERY OF SHIPS LETTERS.

On Tuesday, Captain Clark of the brig *Adelaide*, lately arrived from China, appeared on summons to answer the complaint of the Postmaster General, for having refused and neglected to deliver the Post-office Mail and letters to the Canton house Officer, when he arrived in part, according to the provisions of the act of Council, 3d W. 4, No. 6. The Crown Solicitor appeared for the informer, and stated the case to be as follows:—On the afternoon on the 25th February the brig *Adelaide* arrived in the harbour from Canton, and about three o'clock was boarded by Mr. Jeffries, the Tide Surveyor, who found that the Captain had gone on shore, and on his asking the chief Officer for any letters or mail, he was told that the Captain had taken them with him. On the following day (Sunday) the ship *Kilmores* arrived from the same port, and her mail was sent to the Post-office and delivered the same day. On the Monday morning Captain Clark and his agent went to the Post office in order to sign the usual declaration that he had delivered all letters at the Post-office, and Mr. Smith produced four letters and eleven newspapers as the *Adelaide's* mail. Mr. Jeffries and Major Dibbs of the Customs, and Mr. Hunt of the Post office, prove the foregoing facts. Mr. Parbury proved that a letter directed to Messrs. Lamb & Co. which was marked as having arrived in the Colony by the *Adelaide*, was not delivered until the *Kilmores* had arrived; it was not brought by a person from the Post-office. Mr. Hunter, of the firm of Edwards and Hunter, stated that he was at Canton when the *Adelaide* sailed, and that he addressed a letter to his house in Sydney, which delivered to the agent of the *Adelaide* at Canton, for the purpose of being sent to Sydney by that vessel. Three days afterwards he sailed from Canton in the ship *Kilmores*, and arrived in Sydney the day after the *Adelaide*, and the letter was not delivered until after he had gone home. Captain Clark stated that he only had one parcel, which was directed to the consignee, and that it was not until Monday morning he knew it contained letters, and then they were taken to the Post-office. Mr. Jeffries said it was usual to allow a month to take letters addressed to their consignees. The Crown Solicitor was ready to admit that the letters might have been addressed to the consignee, but that still by the 11th section of the Act the Captain was liable it be delivered any letter which did not relate to the cargo. The Bench found Mr. Clark guilty of having failed and neglected to deliver up to the officers of Customs all letters on board his ship, and sentenced him to pay a fine of £50, one half to the informer, and the other half to the general purposes of the Colony. Mr. Raymond said, that as he merely brought the matter forward on public grounds, he should remit his half of the penalty. Mr. Clark gave notice of appeal to the Court of Quarter Sessions.

*Sydney Herald, March 8.*

Some observations having been made by the Colonial Sydney journals, on the recent case of Captain Clarke, of the *Adelaide*, respecting the alleged non-delivery of the mail, we are assured that the following is a correct statement of the particulars of the transaction in question:—Captain Clarke left the brig just as she was entering the heads, in his boat, taking with him the letters addressed to his consignee. The vessel did not come to anchor until five o'clock in the afternoon of the same day, and the Captain did not return on board until the following morning at eleven o'clock. At half past o'clock of that day, he again came on shore, bringing with him a parcel addressed to A. B. Smith & Co., which he delivered at the house. On Mr. Smith's return home, about two o'clock, he opened the parcel and delivered the letters contained therein to the parties whose address they bore, and who were then in town. The parcel delivered at the Post Office on Monday, consisted merely of three or four letters addressed to persons in Hobart Town, together with the ship's newspapers. Mr. Smith delivered them to Mr. Hunt, stating that they were received in a parcel addressed to his house.

Some of the truth of this statement, there seems to be a ground for any imputation of "lurking" against the Captain of the *Adelaide* or the consignees. And we are assured also, that all persons in Sydney, interested in the tea trade, knew that another mail from China was expected after the *Adelaide*. This week, however, more remark—namely, that there was no letter mail addressed to the Post Master General, further than on former occasions mails have been delivered, and the offending parties not prosecuted; in fact, plague or something worse seems to have accosted to turn parties in their vindictive proceedings towards Captain Clarke.

*Ibid, March 11th.*

The Coroner's Juries in Sydney are about as low in appearance as can well be imagined. Their grand duty being to ascertain positively cases of death by foul play, while stabbings appear to be considered a luxury not to be seen every day. It is not to be wondered at, that from such Juries, verdicts not consonant with common sense are often returned. More than half of the sudden deaths appear by the certificates of the surgeons to the different inquests to have been caused by the excessive use of intoxicating liquors, and yet the verdicts invariably have been "Died by the visitation of God." What a profanation it is to return such a verdict in a case where the death of the party is in fact as much the act of the deceased as if he had taken arsenic instead of rum. But the fact is, that the majority of the Coroner's jurors act on the principle laid down in *Justice*, "what is their case to-day may be our's to-morrow," and so do not like to be hard on the frailties of their friends. We recollect one case where the Coroner wished the Jury to return a verdict of died from the excessive use of ardent spirits, a sapient juror said, "but, sir, a woman had died before in having twins from that use she must be sure her death she could not raise her hand to the mouth) he "would not knock her down drunk." We can hardly think the Coroner is justified in recording a verdict that is so contrary to the evidence, as one half of the verdicts returned by juries under such circumstances are.—*Ibidem.*

## CORRESPONDENCE.

### TO THE EDITOR OF THE CANTON PRESS.

#### History of Honge and their Destruction.

Sir,—I have read with the deep interest of a party concerned the article in your Newspaper of 1st instant on this subject.

I thank the writer for drawing public attention to this affair!—I however wish that the matter had been handled by a party more enlightened; and more enthusiastic!—

In figures *correctness is every thing* yet your correspondent in dealing with dollars exposes himself to leave his whole fabric upon the ground by his stating what is not truth and known and appreciated *as false* by every resident in Canton! —— viz. that "Lord Napier came to Canton in a ship secured by this merchant!" (meaning Hong tae.)

Now Lord Napier came to Chumpee in China in the *Andromache* Frigate ——in the Hon. Co's cutter to Whampoa, where a squall coming on and a head wind, his Lordship as any other passenger would do borrowed the *Fort William's* boats, and in exposure in this squall Doctor Morrison's valuable life was shortened ——If Lord Napier had come out or even up to Canton per *Fort William* her pilot must have recorded it to government which he never did! ——

Having thus narrated the dangerous position of one not acquainted with facts writing on our Canton concerns I proceed to more important affairs, merely saying that I feel convinced the party addressing you (without signature) cannot have been himself resident here during Lord Napier's row, he is utterly ignorant of it and it's consequences as well as the minor facts, and no one on this spot at the time could conceal his acquaintance of those facts if he tried it ——he, your correspondent, is either a *new* man——or one absent and distant when these affairs took place.

Adieu to trifles, as these personals always are where large money is at stake.

I object to your correspondent for not stating thus:——"you Chinese government have been "levying a tax for half a century ——expressly "put on to meet foreign claims;——it is larger "than the Emperor of China's duties!——and "called the Consoo fund ——Howqua is the "treasurer!——we have all paid our shares to "it——let us have a balance sheet shown, —— "or pay Hing-tae's debts out of it!"

Were England where she should be with China, no answer except due discharge of the debts could be given!——*but by the skill of my lord Palmerston* Captain Elliot has to apply to this magistrate Howqua, to order him to command Howqua, treasurer of the Consoo fund, to pay the debts he owes as treasurer of that fund!!

The chance of success I leave to my readers and remain!

Canton, 5th July 1837. DELTA.

## TO THE EDITOR OF THE CANTON PRESS

Sir,—Curious to see *Mr. Chao's* reply to *Lo-gung's* three letters (which have been translated by your correspondent P. and myself) I yesterday called upon his secretary *Mr. Unexampled Fidelity* and requested him to procure for me a copy of it.

"Sir," said he, bowing profoundly "Our destinies are united! an hour hence, I should have called upon you with the original."

"Your candour charms me," replied I; "do me the favor to accept these (Five dollars) as a trifling return for your kindness."

"I despise bribery" said he pocketing the money, "pray do not endanger the continuance of my friendship by mentioning it. Two reasons have influenced me, in acting as I have done"

"Firstly, I wished to see the contents of the letter, as my master marked it private, and secondly I wish the barbarians to see how infinitely inferior they are, in every respect, to us, the happy offspring of Han."

I send you a translation of it, Mr. Editor, and let curiosity plead my excuse for treating with *Mr Unexampled Fidelity*. Q

### LETTER

I have received, virtuous elder brother, your three very instructing and luminously indited epistles. The depth of learning, beauty of expression, morality, and truth displayed in each line of these outpourings of a highly wrought genius, while they inspire we with rapturous delight, confirm me in my opinion that you rival the venerable and ever-to-be-adored Confucius.

Your first letter caused me to turn with disgust from contemplating the barbarians; your second roused my indignation at their daring crimes, and your last excited my contempt at their bullying cowardice. But, ah! with what different emotion my bosom heaved when I contemplated your conduct. What can rival the endurance, resplendent virtue, and tiger hearted valor, which you displayed in the situations pourtrayed in above letters. Never, never, can I be too grateful to the Gods for granting me such a friend!

I shudder when I think of the agony you must have endured while partaking of the *Gorge*. I shall never pass a buffalo without offering prayer to the Gods, for his speedy deliverance from the vicinity of barbarians who, from the nature of their food, must be like bamboos—thin and sapless. Your letter perfectly explains a circumstance which created much surprise at the time.

About three years ago, when the red bristled taepan Napier was detained a prisoner in Canton, a fire despatch arrived from the Governor, bringing the intelligence that one of the Bogue Forts had sunk 16 large war ships, and killed 2000 of the red bristled demons.

This report caused a great sensation here, and there were some so rash as to disbelieve it. I am now convinced of its truth, for it is not to be expected that men without nourishing food will be either strong or tyger-hearted. Compare the puny endeavors of their sailors to discharge their Pop-Guns, with the bold ardour and skill of our War-Dragons, when they opened that thundering and decisive fire of artillery which it is to be hoped, has sufficiently taught them how dangerous it is to provoke the wrath of the Son of Heaven.

With respect to your second letter, I shewed it to H. M. who quite agrees with me that these malignant demons *Now, Can do* and *Mota* are dangerous characters and should be secretly watched.

What you say in your last respecting the disturbance in the Macao passage is not surprising. Truly the Traders must have a very degenerate taste, if I have heard that one of the tanguns has actually been seen pulling like a sailor in one of the dragon boats. I would recommend to you to throw every obstacle in the way of the festival which (you say in the P S) is to take place on the 8th instant: We must not be too indulgent lest they presume.

I will now proceed to give you an idea of what is going on here. This morning the court was thrown into a paroxysm of admiration and gratitude by another proof of the gracious and overpowering condescension of the Son of Heaven. He did Miss Leung, a beautiful lily-footed virgin from the seraglio of three hundred, the honor to strangle her with a perfumed kerchief. The reason is unknown, but it is rumored that her breath smelt of Garlic.

In consequence of a petition accompanied by the fee of fifty thousand great rounds from the Hong, the Council are to deliberate whether it be advisable to pay Chinese debts to barbarians by placing extra duties on all foreign articles of import. It is contended that altho' the barbarians are decidedly not human yet must the Imperial mercy be extended to them, and their property be protected. It is therefore suggested that the compassion of the inner land should be manifested by raising the duties and paying off all debts due by the Hong-merchants to them.

It is recommended also that the Hong-merchants be severely reprimanded for borrowing money; which is contrary to law; and that they be ordered to subscribe 20,000 Taels towards the repairs of the yellow river. Do you not think, Lo-yong, that the very bones of the barbarians will dissolve with gratitude?

The Courier is now starting, so I must reluctantly conclude,

Your stupid younger brother *Chao*,
knocking head presents this at your
exalted board for felicitous perusal

To *Lo yung*, eminent man. May he flourish for ten thousand years.

GEOGRAPHY. More importance should be given to this science than heretofore. The want of a few lessons of geography to that adventurer CAVENDISH lost Britain Java, and its sequent, Japan. However his failure in this point gained to Britain, (probably) his own throat out:——so there is a balance to be struck.—

My Lord Palmerston knows nothing of geography, or he would not treat of political matters with the *local* Government of Canton, but go to Peking where the Emperor resides, different in geography 90 degrees of latitude.——As well might his lordship send the French ambassador to Glasgow, to treat of the politics of Europe.

We would recommend to his lordship to continue to purchase his *neckcloth* amongst the operatives: and advise his friends to lay in their teas at Canton. (Lat. 23. for his lordship's information) but when general national measures are in consideration, we humbly recommend Paris in France, Petersburg in Russia, London in England, and Peking in China!—

5th July 1837. DOUBLE DELTA.

To the Editor to the Canton Press.

Dear Sir,—If you can find a corner for the following you will much oblige yours truly

A HIT. A JOKE.

A Waterman being asked by a passer by if the cap he was wearing was a fools cap, quickly replied, "yes if you had it on"—

# CANTON PRESS,

July 8th 1837

Our Correspondent, "Delta" finds much more to blame in our article in last week's paper on the Hongs and their difficulties than we can see reason for. We stated: "not long after, Lord Napier came to Canton in a ship secured by this Hong-merchant;" this is apparently the whole error we committed; we ought to have said "Lord Napier came to Canton in a boat belonging to a ship etc." an inaccuracy no doubt, but which but very slightly affects if at all, the matter under discussion, for, whether Lord Napier had gone on board the Fort William, or merely into one of her boats, either were circumstances which the Hong-merchant could not prevent, control, or even have a previous knowledge of. The object of our relating the circumstance was chiefly to show the arbitrary manner in which the persons and property of Hong-merchants were treated by the Chinese government, who seemed to be utterly regardless of the probable consequences of pecuniary embarrassments brought upon these merchants by their measures, though the Government, making them the only channel through which foreign trade can be conducted, must naturally become their guarantee.

What the mistakes as to numbers are, which our correspondent says are "appreciated false by every resident in Canton," we are at a loss to guess and as he does not point out any of them but condemns merely without correcting, he must excuse if we persist in thinking our statements perfectly correct. We, with the assistance of some friends, had the statistical or numerical information, to be found in the article in question, from the very best sources, and we must require indubitable proof of its incorrectness before our belief in its exactness is shaken. As we however aim at nothing but truth, any demonstration of errors into which we may have been led, will be acceptable. We are further charged with want of enthusiasm, and with not having depicted in colors glowing enough, the misapplication of the Consoo-fund. We have so often already adverted to this subject in our paper, that in this cause our pen may have become *enuyée*, for which we must claim our readers indulgence. We have, if not in the words our correspondent, said virtually the same thing he recommends to us, with the exception of his statement that the Consoo duty annually levied is larger than the Emperor of China's duties. If the whole of the Consoo duty were levied upon the trade as it at present is, it would amount to about $1,65[illegible],000,* while we do not remember a single writer on China stating the direct duties paid from the foreign trade into the treasury at less than between $7,[illegible]3,000,000. No one, we believe, has had positive data, whereon to form this latter conjecture, which is however not improbable. Our Correspondent here has committed an error in numbers greater than any we can be reproached with, we believe.

In another column will be found some extracts we have taken from the Sydney Herald, relating to the non delivery of letters by Captain Clarke of the *Adelaide* from here to Sydney. Capt. Clarke was fined £ 50 for his sportiness: a heavy fine which we suppose will generally protect the public against individuals keeping back the general correspondence for their own private benefit, though we by no means wish to say that Capt. Clarke, in the case before us, was acting from any such motive. We chiefly give these extracts to the Canton public having heard frequent complaints of similar practices here with a view of asking whether no means may be adopted to abate that nuisance, which frequently operates to the great disadvantage of people having cargo on board of ships, the letters relating to which are not delivered at the time those to another consignee are. We are perfectly aware that, not having any courts of law here, nor the strong arm of justice, no fine in case of detention of letters can be levied, but the community by unanimously reprobating such practice, may do much towards it's discontinuance.

## HING-TAE'S AFFAIRS.

The Hong-merchants have selected three Gentlemen of whom H M Superintendent is one, to audit the claims of foreigners on the Hing-tae hong. Capt. Elliot has, we hear, very properly returned a negative answer to their application, and we have not heard of any other gentleman having been asked by them to take the office on him. The claims of the hong remain in statu-quo, whilst Hing-tae, or rather the managing partner Yen-Keaseng continues in concealment. The Hong-merchants, probably reluctant to turn one of their own body over to judgment have, as will be seen by the translation of their letter below, applied to the foreign creditors to demand his appearance from the Governor. This the foreign merchants have done on True day last, but up to last night no answer, we believe, was received from that officer.

### HONG-MERCHANTS LETTER.

This is respectfully to inform you, virtuous elder brother, that you, conjointly with the other Gentlemen, having reported Hingtae's debts to amount to upwards of Taels 2,850,000, we compared his accounts and found them not to agree with yours. Yesterday, however, virtuous elder brother, you and the other gentlemen denied the correctness of Hingtae's statement and requested us to select three disinterested individuals, to examine the accounts and thus prevent confusion and error.

We have therefore requested Messrs. Elliott, Dent and Green to act as arbitrators; and beg also to remind you how requisite it is that you should procure Yen-ke-tseang's attendance, he alone understanding your accounts, having been the manager of the Hingtae Hong. Yen Kechang is both ignorant of your language, and of the commercial transactions which passed between you and the Hong as he took no part in the sale department.

Requesting you to inform yourself of the contents of the present letter which we now forward to you.

We are &c.

Signed by the Hong merchants.

To Mr. ——

## CANTON REGATTA CLUB.

Some gloomy philosophers maintain that this sublunary existence is one of disappointment, troubles, & probation. However much we may be inclined to doubt the correctness of that proposition in the main, it is true enough in many instances, and bears out the old adage "*there is many a slip between the cup and the lip*." This was manifested a few days ago, when, as we hear, one of the Gentlemen of the Canton Regatta Club committee received a letter from the Hong merchants, his respectful younger brothers, requesting him to acquaint this companions, that the projected boat race, as endangering the boats and limbs of the river-dwelling sons of Han, cannot take place, it being contrary to custom and to law. Now, were attention paid to the Hong-merchant's recommendation much innocent enjoyment would be lost, and all the gay trappings ready to adorn the pullers' persons must be thrown aside as useless, and instead of seeing the large black gig or the small two-oared wherry come to the winning post in all the pride of victory, we shall then probably find their discontented hands perambulating Respondentia-walk, bitterly lamenting their disappointment and d....g the pusillanimity of the Hong-merchants which has thus shamefully deprived them of their sport. We believe however that in spite of the opposition of the thirteen, the races will take place, nor do we see any reason why they should not; the river is every evening covered with foreign sailing and pulling boats of every description without any accident having yet happened, and pulling matches have frequently been contested. The Macao passage is wide enough to afford ample room to ten times the number of boats that have yet been entered, and our foreign community ought not to submit to this infringement on our very few recreations, particularly where they do not, as is the case in this instance, afford opportunity to treacherous natives to plot with the barbarians.

* Vide Canton Press, 27th May.

The late fire at Surat broke out about 6 P. M. on Monday the 26th ult. and lasted until the morning of the 28th ult. when in consequence of there being no more houses left in the direction which it had taken, it burnt itself out. It originated we hear in a small quantity of ghee accidentally falling into the fire, when a woman was preparing her evening meal, the flame of which, ascending to the roof, ignited the building. Owing to this happening in the most populous part of the City, where the houses were chiefly of wood, which the recent hot winds had rendered dry and combustible, and a high wind rising at the time, the fire spread with unexampled rapidity, and it became absolutely impossible to get it under. This will be the more readily imagined when it is stated that the fire, within a few hours from its commencement, must have covered an area of at least three miles, and that there were only six or seven engines to play upon it. It is estimated that at least 5000 houses have been destroyed, including the residences of many of the most wealthy and respectable persons of the place. The loss of property in consequence has been immense, accompannid by considerable loss of life, as to which no accurate statements have yet been received.

Some reports state the number of houses destroyed at 20,000 and all dwell upon the misery, and distress, and destitution, of the inhabitants of Surat.

A petition on the subject, by the principal natives of this place, was presented to the Right Hon'ble the Governor in Council on the 3d instant, but previous to this, directions had been given by our Governor for the immediate relief of the sufferers; for which purpose, the principal collector and acting Judge at Surate, had been appointed a Committee, and a sum of 50,000 Rupees had been placed at their disposal, to be advanced either in gifts or on loan, or on both terms, or to be distributed at their discretion in money, clothes, or grain. In addition to this, all import and transit duties on all kinds of provisions and building materials, that may be imported at Surat, are to be remitted until the 1st August next, or until further orders. The Committee have been also authorised to grant a premium of two per cent, on all grain imported into Surat before the 31st instant, and a premium of one per cent, on all imported during June next, and information to this effect is to be sent to all quarters likely to afford a supply.

These prompt and effectual measures speak for themselves, and sufficiently evince the feeling of our local authorities on this calamitous occasion.

On the part of the native community not only have extreme instances of individual liberality been evinced, but a general and public subscription has been set on foot for the relief of the sufferers, and the greater part of a lac has been already subscribed.

N B. The cubit is 14¼ inches; measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Poremast to the Mizen mast, or other head in Brigs; and across at the main masts; these are multiplied together for the above products—The largest class pay from $ 4300 to $ 4320; 2d class from $ 3760 to $ 3780; 3rd class from $ 3700 and under. The Comshaw or Present Fee is paid by all vessels 1600 Taels or $ 2223. Linguists fee $ 173½ and Comprador's fees $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.,

# COMMERCIAL REMARKS.

## IMPORTS.

COTTON MANUFACTURES.—The stock of Longcloths is very small, and the first importations would sell readily.

COTTON YARN.—Rather looking up for the good descriptions.

WOOLLENS.—There is some demand for Longells at a slight advance upon previous quotations.

RICE.—No sales can be effected, and our very low quotations may be considered as nominal. The stock of native as well as foreign grain is very heavy.

STRAITS PRODUCE.—PEPPER remains firm. TIN is as before, but we do not hear of sales at the advance.

SANDALWOOD.—Continues in good demand at the advanced rates.

COTTON.—The inferior qualities continue without demand, at a decline of a few mace, but good cotton is wanted of which the proportion is very small in the late importations. A sale of new Bombay has just been reported to us consisting of about 3000 bales good, fine, and middling qualities at 10 T. average. The stock on hand on the 1st is given to us as follows, including all the late arrivals, but we think it is over estimated.

| Bombay. | Bengal. | Madras. | Total, |
|---|---|---|---|
| 38030 | 7268 | 5147 | 47.45 Bales. |

and the clearances in June

| | | | |
|---|---|---|---|
| 3380 | 6513 | 8 87 | 18.319 Bales. |

OPIUM.—Although the new smuggling boats are said to have commenced running, there is no favorable change in the market, new Patna being equally dull of sale at even a decline. Malwa is also in less demand, the Teen chan jun s being all fully supplied, and the trade on the coast is almost entirely suspended. For the deliveries in the last month see above.

## EXPORTS.

TEA.—Nothing doing. Letters received within the last day or two from the black tea districts state the second gathering to have been an abundant one; the quality is said to be fair, but with rather a coarse leaf. Prices had opened high for Pekoe-Kouk but had declined again. Very few Souchong Congous, new, were being manufactured, although they were to be bought cheap but there is likely to be a large supply of Souchong, of Campoi quality, brought down.

SUGAR.—very scarce, and our quotation must be considered therefore almost nominal There is consequently great difficulty in mak-

## SPAIN.

According to letters from Madrid of the 31st ult., several officers of the staff, who had accompanied General NARVAEZ to that capital, had been ordered to return forthwith to their respective corps. The advocates of the General in the Cortes were Messrs. OLOZAGA, GARCIA CARRASCO, and FERNANDEZ DEL PINO. The manifesto of General NARVAEZ having been alluded to in the course of the discussion of the 31st, M. LOPEZ moved that the matter should be immediately brought before the House. The sitting, it was expected, would be a boisterous one, from the number of members who had inscribed their names as intending to take a part in it. The conduct of ALAIX at Vittoria was said to have paralyzed the projected operations of SARSFIELD. It was reported that ALAIX even refused to obey the orders of ESPARTERO. M. MENDIZABAL did not yet despair of being able to contract a loan in England, by offering to engage, during 30 years, the revenues of Cuba and the Philippine Islands. It was feared that the new Budget, now preparing by the Minister of Finance, would contain the announcement of a frightful deficit. M. MENDIZABAL, wishing, no doubt, to prepare the public for this disclosure, had caused a statistical return of all the deficits in the budgets of Spain, since 1796, to be published in the journals. Some convent or other was daily levelled with the ground. No less than 100 had already been demolished in the provinces of Madrid. The Government intends to open an establishment for invalid soldiers the moment the state of the Treasury will admit, to also to remove to Seville the artillery school of Alcala de Henares. A bill for specifying and regulating the rights and duties of the military is shortly to be laid before the Cortes.

The Gazette of the 31st ult. contains a congratulatory address forwarded by the patriots of Nantes to the defenders of Bilboa.

Our letters from Bayonne of the 4th inst. contain no important intelligence from the seat of war. Advices from Durango of the 1st stated that a column of 2,000 men of the garrison of Bilboa having attempted a sortie in the direction of Munguia, the Infant Don SEBASTIAN had sent some troops to oppose them. The Christinos proceeded but a short distance on their reconnoitering expedition, and then re-entered Bilboa. The Infante Don SEBASTIAN, who remained watching their movements, returned to Zornoza.

Our correspondent at St. Sebastian writes to us, under date of the 2d inst., that the promised reinforcements from Santander had not yet been received. The James Watt steamer, which reached from the latter city on the 1st inst., brought intelligence of a corps of 6,000 men, intended for St. Sebastian, having been met a few days before at Pancorvo, so that it could not arrive at its destination for a full fortnight. However, in the evening of the 2d the Comet steamer came in from Portugalette, and announced that General ESPARTERO had resolved on detaching 7,000 men from his army, who had marched that very day for Castro Urdiales, whither five steamers had been directed to proceed, in order to take them without delay to St. Sebastian. The Carlist forces near Bilboa were between 10,000 and 12,000 men. The army of ESPARTERO amounted to 22,000.—*Times, Feby.* 10th.

## MARKETS IN ENGLAND.

TEA.—The free trade sales which commenced on the 30th ultimo, concluded on Tuesday. The total quantity put up was about 30,000 packages, of which about 30,000 were disposed of; the remainder was withdrawn and bought in. The sales upon the whole have gone off heavily, but towards the close more animation was evinced, and the prices, as compared with the December sales, show a fall of 1d. per lb. on Bohea and Common Congou; the blackish leaf kinds were not much in demand, but they brought nearly former prices; the finest Pekoe flavor brought fully their previous value. Hysons have declined 2d. per lb. and Hyson Skin and Twankay are barely supported. Orange Pekoe has gone at lower prices than at any previous sale. Campoi and Souchong of low quality are both dull and lower, say 2d. to 3d. per lb. where the importers pressed sales. Lower prices have also been accepted for Young Hyson, Imperial and Gunpowder.

Since the sales there have been enquiries for several lots at a slight premium.

The following is the quantity of Tea upon which duty was paid in the year 1836.

| | |
|---|---|
| In London—Bohea | 14465282 lb |
| Deduct exported and duty returned | 402857 |
| | 14062680 |
| Other sorts | 22036316 |
| Liverpool—Bohea | 1958949 |
| Other sorts | 2532371 |

| Cork | 480359 |
| All other Irish Ports | 657371 |
| Total | 48772389 |

*Prince's Price Current, February 16th.*

*London, 7th February, 1837.*

The January sales which commenced on the 30th have finished to day——a depression has pervaded them to a far greater extent than any in the previous year, and although the Trade was considered to have but light Stocks, yet not more than 30,000 out of the 81,000 pkgs brought forward have been sold.

Many parcels were withdrawn and several others bought in, yet prices were not improved thereby and where a determination to sell was shewn, the Importers were obliged to accept lower rates and our quotations are consequently under those of any period ever known.

BOHEA CANTON,—upon which the 6d. duty has been paid of superior quality and in Congo Chests sold at 6½ ₰ ℔ short price.
good in large Chests..... 6 "
fair common (at the close of the sale)..... 5½ "
Do. FOKIEN—liable to the 2s. 1d. duty has been bought in at..... 6¼ @ 7½ "
CONGOU—ordinary common sold at 9 @ 9½ "
good common and mixed blackish leaf..... 10. 10½ @ 10½ @ 11
contrary to the previous expectations the good middling qualities of blackish leaf have been refined at..... 1. 0 @ 1. 10
TWANKAYS—fair to good sold at... 1. 4½ a few 1. 4
200 chests (at the end of the sale) fair..... sold at... 1. 3½ & 1. 3¾
HYSONS—are rather cheaper than last sale.....
SOUCHONGS—are further reduced..
ORANGE PEKOE—for the most part unsaleable.....
The East India Company's March sale..... 4,000,000 lbs.
includes the Tea refused at the December sale—together about 900,000 lbs.
they put up nearly the whole of the Twankay in their possession.

Their total stock of unsold Tea at this time is 12,500,000 lbs. of which nearly 1,500,000 lbs. in Canton Bohea and 9,7-0,0000 lbs. in Congou——the greater part of this Bohea and Congou must ultimately be brought to sale without taxation, according to the Company's present plan of putting up at one sale without protection the Tea which had been refused at a former—and there seems no hope of improvement under this mode of disposing of their Stock.

COMPANY'S UNSOLD STOCK 31ST JANY. 1837.

| Souchong | 150,000 |
| Twankay | 501,000 |
| Hyson | 351,000 |
| lbs. | 12,298,000 |

P. S. We are yet without sufficient particulars to enable us to ascertain the Stocks and Deliveries of last year.—*From a commercial letter.*

Money continues to be made very scarce by those who possess it, in consequence of their being perplexed what to do with it for the best. There are great complaints of the scarcity of money, and yet there is much unemployed capital. Considerable distrust continues to exist, which has been increased by several failures that have taken place, and by an impression that the Bank of England itself is in a very perplexed position. Great dissatisfaction with the conduct of the Directors of the Bank is very extensively expressed, and we should not at all be surprised to hear of a public meeting being called to express that dissatisfaction in the proper quarter. Discounts continue very high for all kinds of bills except Bankers' bills, and no other paper but this last description can yet to any extent be got into circulation. Things do not appear to have improved at all this last week, and we have never become familiar with distress, perplexity and depression. The continuance of this state of things will do more mischief than the state of things itself originally did, as it will of necessity swell many people out. Parliament, though now sitting, cannot, so far as we can see, furnish any remedy to the evil, and at present we have to be reduced to evils that we cannot control. We get into this state by the workings of the monetary system—and the working of that system back again can alone and are quite sufficient to bring us back to a sound standing. Time is required for this, and in this, as well as in other disorders, it is much easier to get ill than well. In the course of the resuscitating process much distress, anguish and pain will be inflicted and are now felt, but of the issue we have no doubt. It will not be a prostration of public credit and a universal panic, but a sounder state of things, which it is to be hoped past and costly experience will actuate us more effectually to guard, and more permanently to preserve.

*Mercantile Journal, Feby. 7th.*

## CORRESPONDENCE.

### TO THE EDITOR OF THE CANTON PRESS,

### REWARDS & PUNISHMENTS.

PUNISHMENTS.—This is an engine of power infinitely more important and more difficult to wield than Rewards, and a deviation from an equal use of it not only entails greater confusion on society but a degree of pain to the mind and body of the culprit unjustly or over punished which renders even the disbursion of the subject distressing.

The clear principle to be gone on is that example for the future, not revenge for the past, is the duty of the governing power.

This so far as the imperfect nature of human intellect will admit of should induce the legislating body to provide for the party tried if guilty being punished beyond any possibility of failure because this certainty carries to the mind of all offenders that, as if by a decision of Providence itself, *punishment surely awaits crime.*—I am sorry to say in the practice of real life in England the very reverse of this exists as the chance of one guilty and tried escaping sentence is quite as great as of his being condemned.—This proceeds from a variety of faults in our criminal code, one of which is its voluminous extent, but what I consider the grand fault at present is the punishment of extensive classes of crime by the penalty of death or banishment for life, when public opinion by no means goes the length of such severe sentences for these crimes—thus the sympathy of mankind instead of being *with* justice and for visitation of the offence turns round entirely *for* the criminal, and all society is engaged in a series of evasion of the law and thus acquires a contempt for it.—One dangerous error of a legislator is to suppose a punishment can for any length of time, by legal enactment, continue to be inflicted, which is beyond what the public opinion awards to the offence.—The fate of the laws against forgery and duelling afford a strong illustration of this.—It is notorious that the crown lawyers and the bank cannot get a verdict; or often, a party to prosecute in these cases, but because the accused is not guilty, but because the punishment *is death?*

Let forgery be punished by some arbitrary conviction of a disgraceful and severe nature and no offender will escape from the fault of a jury or from the want of a prosecutor.

Let duelling be rewarded by a 3 year's solitary confinement and no more juries will bring in verdicts against truth and evidence.

Let human life not be touched for property value 40s. within dwelling house, and no juries will be found on oath declaring watches worth £3 of the value of £1, 10. 1 ℔

These are tricks and evasions caused by the folly of the law being kept contrary to public opinion; they are evasions on the side of humanity, but these and the quibbles of lawyers in their indictments ill bringing discredit and tending to bring law into contempt, would instantly vanish before a code reformed to the civilization or the opinion of the day.

The argument on this question I will try to exemplify by some cases to the point at a distance of time when passion and politics must have softened down, and in recent affairs it is enough to say that the respective of law amongst the abuse of the Tithe collection in Ireland as the greatest enemy to good order and to those who saw the Dorchester labourers banished for the very crime which was passed over to the King's brother and other Dukes, Marshals, and Lords, have manifest regret that such a case was persisted in.

Prynne's ears twice cut off, that time out of their sockets for merely speculative opinions and reflections on ladies dancing.—Muir dragged amongst felons to a convict ship and banished for life for supporting reform of Parliament—the Duke D'Enghien, and Ney's murders were not only revolting cruelties, but were absolutely useless nay detrimental to the dominant powers who inflicted them—let us pause on such as highly moral lessons if kings and rulers ever did from experience learn—Prynne's mutilation became a mark of honor—a bond of union and sympathy with millions—he became the the most popular man of his day—was attended on the revolution back to London in triumph by 5000 of his fellow countrymen on horseback, and the fees and damages awarded back to him from his unjust judges, and were received by order of the House of Commons.

It is by no means a strained view of the case to say that the torture Prynne was subjected to, and the bad feeling thereby created, hurried Strafford and Laud to their graves and prepared the block for Charles himself—yet the cause of free discussion did not stop!

Of all the cases recent story presents on the fatal nature of over punishments, Muir's is the most extraordinary—we here see a religious, quiet, moral man of property torn from his family, hurried amongst murderers and robbers into a hulk on the Thames, and destined to be buried alive in Sydney—he becomes a martyr in the cause of liberty—America; to her eternal honor, has sent a vessel to release him, and all France with open arms received him as a hero and a saint—Tells him living and bury him at the national expense when dead.—So much for the man—follow the cause this Scotch court of justiciary tried to put down by illegality, cruelty and chicane.

This cause *Reform of Parliament* so attacked by this precious Court, one of ordinary length of life has seen a brought into the Commons by a Russell thereby rendering himself as dear to his countrymen as his martyred ancestor, and the cause, for which Muir was sent to the hulks, solemnly voted the law of the land by Commons, Lords, and King "what effect then had this cruelty" "on a prevailing truth?" I consider it fair to say it hurried it on—but the effect on the character of the court and government was enduring—every man seeing a grave court of lawyers guilty of illegality to overwhelm their victim—and of cruelty to strike when down.—argue thus "the court of justiciary did injustice in such a case, how can I sure they will not do so again" ?—then sympathy with the culprit is produced, not horror of the crime; such conduct by a court of law is a crime against the state of the deepest dye—striking at all respect for, and obedience to the laws—because the purity of the execution is sullied.—I do not build much on heraldry but I would prefer the blood of the poorest peasant in my veins, to that of any of the cruel and bad judges who presided when Muir was tried.—The Duc D'Enghien was engaged in an unlawful act but the purity or the court who tried was doubtful; and the punishment exceeded the offence—he considering himself justified in any step to restore the French throne to his family—hence opinion turned against Napoleon and his wisest adviser told him he had committed a *mistake*; and in our code we must add also an *unnecessary* crime.—The war after Leipsic was a war of opinion and many a brave soldier did Duc D'Enghien's death raise against his murderer.

It is painful for an Englishman to discuss Ney's murder it involves the character of a British hero who, barring this case, never shed blood but in fair fight—though for our argument to say Ney died unjustly unless thousands of his fellow soldiers had attended him to the scaffold: and his execution was a *murder*, because his life was guaranteed by the treaty of Paris where the French king received a quid for it too.

Ney, if suffered to die in his bed, would have left a doubtful character—his murder sanctified him—and handkerchiefs dipt in his blood adorn some of the best houses in France—and still, the three days of July came on as surely as if he had never been murdered.

The length of the *facts* already stated, forbid a long moral; if I have succeeded in conveying my opinion to the public it is, that over punishment rescues, destroys the line of the example of the punishment, and converts it into incitement to support the error too severely visited.

"STAR OF THE LEGION OF HONOR."

12 July, 1837.

### THE REGATTA

Mr. Editor,

Having had the pleasure of attending the Races of the Canton Regatta Club, I shall do myself the pleasure of giving you a short account of them which you may insert or not as it pleases you. I shall not detain you with descriptions of the appearance of the course and of the varied classes of boats that were there assembled, that not being in my way, but shall proceed at once to the races.

The first was a wherry race with oars for which 8 wherries were entered and really, when they formed their line previous to starting, their different dresses had a pretty effect. At 15 minutes past six. Off I was the word, and off they went, and no doubt each exerted himself to the utmost, but, where they went, or what they did, no one could see for the crowds of Chinese boats that so completely took possession of both sides and at times the centre of the course that it was with difficulty a space could be kept clear to allow the boats to come in.

Of course you will have an official account of these races and therefore shall only add that there was but one opinion as to the *Dodo's* bipedic speed although the rigid rules of the Club prevented her spirited owner from having the Cup, for having deviated from the course; another boat was also disbarred for the same cause.

The second Race was by the nine boats over the sailing course, but, owing to the boats claiming the Cup for the first race, only four started for this, and this race was completely a second edition of the first, the same difficulty of keeping the Chinese boats out of the way—and the same mistakes about the direction of the course, in consequence of which *Clarinette*, although the first boat in, was distanced, and the second boats of both races got the Cups.

These mistakes have unfortunate disfavoured and created a good deal of discontent, but I think great allowances ought to be made, it being the first meeting.

The second day's sport, alas! the weather, the unfavorable, went off with more eclat than the first; things were better managed, and at the appointed time the scullers made their appearance, but leaves one of their number, and of the two that remained the odds were all in favor of *Primrose*, who of course had it all his own way; and won the Cup with ease.

After the usual time was allowed, the Gigs and Gallies took their station, and the first that attracted attention was the black gig, the *Fanny*, and Fanny was emblazoned on each man's breast and *Fanny's* flag floated proudly in the breeze sure to win—cannot possibly lose.—Go it *Fanny's!*

The next was the *Dragon* Gally with her fleet crew in gaudy red stripes perfectly confident that the Cup must be theirs.

To these succeeded the Rat with a crew evidently too young to compete with their older antagonists, indeed so great was the contrast that some one observed they ought to be called mice instead of rats, however, the youngsters were high in hope and were determined to win if they could.

At the proper time off they went, and a very interesting and well contested race took place between the *Fanny* and *Dragon*, the latter winning only by thirty five seconds; the young rats being far astern partly owing to steering the wrong way and partly thro' want of the propelling power. Thus concluded the first Canton Regatta and I confidently hope it will be the precursor of many more.

Your's

A MEMBER C. R. C.

TO THE EDITOR OF THE CANTON PRESS.

Sir,—The accompanying six lines of poetry on a Rose are entirely at your disposal.

I remain Sir,

Your most obedient Servant.

B.

Macao, 9th July, 1837.

*On a Rose.*

Mark on that bush the blushing rose,
That smiles and triumphs as it grows,
It soon will wither, droop, and fall,—
And soon it will not be at all;
Then tell me, reason it not to say,
Come now, and crop me whilst you may?

B.

## CANTON REGATTA CLUB.

REGULATIONS.

No boat will be allowed to pull, that was not entered on or before the 7th July.

None but members are allowed to pull at the Races.

No race can come off unless 3 Boats are entered for it; but if only one of the boats entered, appear at the starting time, the umpire will direct that boat to pull over the course, and win the Cup.

The boats to be alongside the Umpire's boat not later than 6 o'clock; and the first race to be started at ½ past 6 precisely.

The course will be pointed out by boats bearing the Club flag, blue with C. R. C. in white letters. The Umpire's boat with another boat in line at the North End of the Macao passage, will be the starting and winning post; and 2 boats will mark the turning point of the course, round one of which the racing boats must pull, and back to the starting post.

Lots will be drawn at the Umpire's boat, for the choice of station.

No fouling is allowed; and any dispute a rising, shall be left to the decision of Umpire.

Should two boats come in so near that the Umpire cannot determine the winner, those 2 boats start again and pull over such portion of the course as the Umpire may decide.

The Wherries will remain in line alongside the Umpire after the first heat; and 15 minutes will be allowed between winning the first heat and starting for the second.

The boat winning a Cup cannot start for any other race at this meeting.

No boat to use any more oars, paddles or other propelling power during the race, than were used at starting

It is expected that no member will appear on the course without wearing the badge of the Club.

Umpire Captain C. Elliot R. N.

---

UNITED STATES.—By New a York paper to the 25th ult. brought by the packet ship *Sheffield*, which arrived at Liverpool on Tuesday, we learn that on the 16th of January the Senate reversed a resolution passed on the 26th of March, 1834, condemnatory of the President General Jackson. At the above period the President gave great offence to the Senate, and to the majority of the people of the United States, by his interference with the Bank. The act of removing the deposits was declared to be illegal, and the opposition talked loudly of impeachment. The Senate then contained a majority hostile to the Administration, yet, as there were numbers who approved of the removal of the deposits, the scheme of impeachment was abandoned, and in lieu of so formal and formidable a proceeding, a solemn condemnation was passed by the following resolution:—

'Resolved—That the President in the late executive proceedings in relation to the public revenue has assumed to himself authority and power not conferred by the Constitution and laws, but in derogation of both.'

This resolution the Senate has reversed, with a declaration that it was not only arbitrary and contrary to the Constitution, but in every respect unjust and unmerited, and it has been ordered to be expunged from the public records. The objection which has been made to this proceeding is, that it contravences the provision of the Constitution, directing that Congress shall keep a record of its proceedings. The resolution for 'expunging' the obnoxious clause was brought forward by Mr Benton, and was carried into effect by drawing black lines round the resolution of 1834, and writing across the face of it, 'Expunged by order of the Senate.'—*Singapore Free Press*, 19th June

LATEST NEWS FROM EUROPE.

We have been favoured by a friend with the perusal of a *Bombay Courier Extra* of the 27th May, which came by one of the arrivals from that port during the week, from which the following is taken, viz.

"The *Hugh Lindsay* arrived this morning from the Persian Gulph: from Mohamorerah the 16th inst. bringing the Company's despatches up to the 1st April, but no packet for the Public

The following are the principal items of intelligence we have been able to glean. The Overland Packet from hence of the 16th September arrived in England early in February. Two new Steamers were to be built for the *Euphrates*, the management of which, and of the conveyance of despatches by that Route, was to be placed under Mr. Lynch of the Indian Navy, subject to the orders and controul of Colonel Taylor.

A coalition between the Whigs and Tories, and a quarrel of Mr. O'Connell and the radical party is alluded to in a letter from the Gulph; but at what date we have not been able to ascertain. The *Hugh Lindsay* met with very rough weather shortly after leaving this, and had a bare supply of coals left on reaching Muscat.

The General Overland Packets for April had been sent to Alexandria.

The following is an extract of a letter from a passenger by the *Hugh Lindsay*, dated Bushire 15th inst.

"Col Chesney is the only one of our party of 3 who is going thro' the Desert to Beirout but which he hardly expects to reach in time for the Steamer. —We left the Steamer at Carrack on Friday and arrived on Saturday morning at the Residency"

We have also seen some numbers of *Galignani* up to the 13th February, from which we have extracted, as much as the time we were able to put them in hand enables us to give for Post: they are however exceedingly meagre in intelligence."—*Singapore Free Press* 29th June.

CALCUTTA.

The following observations relative to the Opium trade are found in the *Englishman* of 31st ult. viz.

"The trade is, as we before observed, rapidly coming to the same state as the salt trade. It would not surprise us, if the *next*, were to be the *last* public sale that ever takes place, and in future to see the drug advertised deliverable from the Company's godowns at a fixed price. This would at once abolish the gambling which now goes on, and bring the trade to one between dealer and consumer. It would put an end to the operations of the Malwa folks, in bringing up Calcutta prices for their own advantage. Unless, indeed, they have capital and spirit to buy the whole of the Company's produce of the season and retail it to shippers. There is not much chance of this, but should they, it would be no more than a fair advantage obtained by real capital, provided no credit is given to the purchaser on the part of the Company. This year is evidently a critical one in the trade and a new system will probably spring out from it, ending in the substitution of a tax or export duty for the present monopoly,"

The following is from the *Calcutta Market* of 22nd ult.;—

"OPIUM.—Market without action and in abeyance of advices from China;—no transaction of sale or purchase is reported to have obtained whithin the past week, holders of the drug look with anxiety towards the 4th sale, as likely to decide the speculations of the season, which are expected to be productive of heavy losses to those who have engaged in it.

Much speculation exists as to the result of the 4th sale;—it is rumoured that petitions have been sent in to Government, for further indulgence; one report is that application has been made for the division of the quantity remaining into two sales in June and July, another that an allowance on the prices of the previous sales has been prayed for. We credit neither of these reports, for it would be compromising the integrity of the Government to depart from declared engagements, to favour particular interests; setting aside the consideration that any such concessions will be detrimental to the interests of Government itself in respect to its revenues.

The quantity *uncleared* of former sales in the Warehouse is 5,627 chests, allowing that one-third of the amount or deposite have been paid, it will require Co. Rs. 58,19,572 (taking the average of prices) to effect their redemption; the quantity on next sale consists of 5,256 chests, allowing the sales to average Rs. 1,250, the amount required to meet the purchases is Rs. 65 70,000 which makes a total Rs. 1,23,80,572 to provide for the drug yet to be cleared, and that intended for the 4th sale;—in the present position of the money market, so vast a provision of capital cannot but fail to affect prices; —and to support prices against such an amount of means and bad markets abroad under existing circumstances, is fatuous rashness."

The *Lord Auckland*, *Rob Roy*, *Water Witch*, *Cowasjee Family*, *Red Rover*, and *Anne* were loading for China, and the *Jane* and *Perth* for the *Straits*.—*Singapore Free Press*, 29th June.

## HING-TAE'S AFFAIRS.

LETTER OF THE CREDITORS TO THE GOVERNOR.

TO HIS EXCELLENCY,

The Governor of the two Kwang Provinces a respectful address.

On the 29th June we presented a Petition to your Excellency regarding the delays which had occurred in making any arrangements for the settlement of the debts of Hing-tae Hong.

In reply you gave orders that the accounts of the Hong should be immediately produced.

A statement from Yen Kechâng has been communicated to us by the Hong merchants in which all the accounts are disputed and objections raised with no other object apparently than to protract a just settlement from day to day, and showing a total ignorance of concerns of the Hong.

We have therefore now to request that your Excellency will order the return of Yen-ke-tsoung who has been the manager of all the commercial affairs of the Hong since its establishment, and who can alone afford the necessary explanations, thus will all further evasion be checked.

Canton, 1st July, 1837.

ANSWER.

Tang President of the Board of War, and Governor of the two Kwang Provinces issues this Edict for the information of the Hong Merchants.

WHEREAS on the 5th day of July a petition was presented by the english merchants *Jardine &c.*, stating the debts of *Yen Kechang* of the Hingtae Hong, to amount to $ 2,168,349.68 as shown by the accounts which were correct and not in the least exaggerated; and whereas *Yen Kechang* presented a counter petition, complaining that the accounts rendered by the foreign traders were false, and their claims were greatly exaggerated. I commanded the senior Hong merchants Howqua &c. to accompany the two parties to the Consoo House and there arrange the matter between them.

Now the said Hong merchants reported to me, that when they questioned *Yen Kechang* as to which of the accounts he objected to as incorrect, he shewed himself entirely ignorant of the matter and put them off with evasive answers. He then selected three barbarians to unite with them to examine the accounts and to bring them to an equitable settlement. On this *Yen Kechang* selected indiscriminately from the various accounts *five* which he objected to on the ground of incorrectness; but they, the Hong merchants, having carefully examined the said accounts, decided that they could not, in justice, be excepted. They also prepared two clear statements of all the Hongs accounts which they presented with a petition praying me to examine and decide.

On the same day—Dent and other barbarian traders of various nations presented a petition to the following effect (here follows above petition)

This coming before me the Governor, I investigated the matter and ascertained that balances of purchase money due for goods cannot be classed under the same head as balances of borrowed money. The Hongs have from time immemorial been governed by precedents which determine where interest *is* allowed and where it *is not*. But are there really no more intricate accounts than the above?

I have compared the statements of the barbarian traders *Jardine, Dent &c.* with that of *Yen Kechang* and lo! they differ widely. Which of them is to be relied upon?

Let the senior and junior Hong merchants give their whole minds in conjunction with the two parties to examine the accounts and come to some equitable arrangement. *Let the accounts at once be settled, and all disputes be put an end to.*

If these disputes are continued any more, and upon investigation I find that *Yen Kechang* actually owes, what the foreigners state him to do, and yet does not immediately settle with them, most assuredly he shall be visited with the most awful punishment. You the Hong merchants also, must not then plead ignorance of the subject and say to yourselves: Why did we not exert ourselves to settle the business?

Besides the warning ediet, issued by my orders, by the Poocheng and Gancha-sze's, I now issue this proclamation for the senior Hong merchants, Howqua, Mowqua, and Pwankequa instantly to obey.

Let them and their juniors in conjunction with the disputing parties proceed at once carefully to examine all the claims, and ascertain if any just deductions can be made. Let them ascertain and settle the exact sums owing by the Hong to foreigners. Thus when the tide ebbs the rocks appear. —Do not show the least favor but act with justice.

Let them instantly fix on some plan for repaying the foreigners the sums due to them, and report the same to the two sze's that I may be informed thereof. There must be no delay or remissness; the matter is most urgent.

Debts due by *Yen Kechang* he alone is responsible for; his servants and assistants in the Hong must not be troubled.

Let this ediet be transmitted to the barbarian traders for their information and obedience.

Let there not be the least delay in settling the accounts on pain of the most awful punishment.

Haste! Haste! A special Ediet.

July 7th 1837.

---

The above correspondence about the Hing-tae Hong has taken place with the local Government. It appears therefore that the Governor is well disposed to aid foreigners in the recovery of the debts owing by Hing-tae, though it appears strange that the principal object of the foreigners address, viz., that of bringing forward Yen-Ketseang the acting partner, who has hidden himself, should remain altogether unnoticed. This answer of the Governor's leaves the creditors very much as they were, since the accounts are to be settled, and in which only the partner now missing can elucidate any points that may be disputed. It is however something in this case to see the principle, that the Cohong is liable for the debts of it's insolvent members, acknowledged, though we much fear that the recognition of balances as well as the mode in which payment is to be effected will remain as doubtful and debated as ever. Why Ke-tseang should not be made to come forth, if indeed he has not found means to go beyond the sea, and this is said by some, though doubted by most, to assist in the settlement, the Governor must have reasons for which we hope may not have lessened to assets of the Hong.

---

We give in another column the regulations of the newly established Canton Regatta Club, as well as a letter from one of it's members descriptive of the races that took place our Tuesday and Wednesday last. We stated last week that the Hong-merchants, apprehensive of collison with the Chinese, had addressed a letter to one of the members of the Club with a view to present the races; the letter we give below. It was not attended to, and we are glad to have to state that not only did no quarrel with the Chinese take place, though, particularly on the first day the river was crowded with their boats, but that they behaved extremely well, leaving the course clear whenever told to do so, and being altogether as accommodating if not more so, as crowds of other people would be on similar occasions. The concourse of Chinese to witness the racing was immense, and we observed among then a good many of the richer people, as well as several of the Hong-merchants Capt. Elliot. H. M's. Superintendent who had accepted of the office of Umpire, not having arrived from Macao, Captain T. Wills was elected in his tead. For the particulars of the races we refer to the letter of a member in another column as well as to the following official account of the result.

FIRST DAY, 11TH JULY 1837.

FIRST HEAT FOR A CUP.

| | |
|---|---|
| Bee | wins in 10m. 29s. |
| Ariel | 2d. |
| Flower of Dumblane | 3d |
| Water lily | 4th. |

Daisy and Cutwater declared distanced for going round the wrong boat. The Daisy did the distance in 9m. 43s.

SECOND HEAT.

| | |
|---|---|
| Water lily | wins in 11m. 23s. |
| Flower O'Dumblane | 2d. |

Cutwater distanced for going round the wrong boat. She did the distance in 10m. 46s. The Ariel distanced for fouling.

SECOND DAY, 12TH JULY.

SCULLERS FOR THE CUP OF $50.

| | | |
|---|---|---|
| Mr. Compton's | Primrose | wins in 10m. 53s. |
| Mr. Drumond's | Tam O'Shanter | second. |
| Mr. Henry's | Toy | did not start. |

GIGS AND GALLIES FOR A CUP OF $50.

| | | |
|---|---|---|
| Mr. Robertson's | Dragon | wins in 13m. 32s. |
| Mr. Rawson's | Fanny | second in 14m. 0s. |
| Capt. Fraser's | Rat | third in 15m. 0s. |

Signed THOMAS WILLS, Umpire.

---

To Mr.————,

We beg respectfully to inform you, that we have heard it is the intention of our respected Elder Brothers, and other Chin-Te-le-mun, to pull about on the river and race boats. We know not if this is true, but heretofore, it has not been customary to race boats on the river.

Should the authorities hear of such doings, we, your younger brothers, would be sharply reproved, for permitting you to act so indiscreetly—moreover, on the river—boats are mysteriously abundant, and on every side do they congregate in vast numbers; like a stream, they flow unceasingly—thus are the chances numerous, that "*fouling*" will take place, even to the tearing to each others boats, the injury of men's bodies also, with other frightful mishaps, will inevitably occur. Therefore we beseech our worthy Senior, to make known to the other Chin-te-le-man, that they would do well, to refrain from contesting the speed of their boats on the river—thus will after-troubles not accumulate—and all will be well—daily may your prosperity increase without difference. Your Younger Brothers,

(Signed) HOU QUA,
,, MOU-QUA,
,, PWANKEI-QUA.

and 10 other merchants.

6th moon, 3rd day, July, 5th 1837.

---

We have had several arrivals during the week, and have, by way of Singapore received news from England brought by the *Formidable* to the 12th February, and that vessel having put into Ireland, whence she left again the 7th or 8th of March ought to bring still later accounts, of which we have however not heard anything certain. We give several extracts from the English papers, in which we find nothing of much interest in politics. The commercial advices are any thing but satisfactory; the difficulty of realizing produce was a consequence of the want of confidence, which had produced a great scarcity of money. Several failures had taken place, but not any immediately connected with this trade. The accounts from the continent are equally distressing. We observe in the papers that a large Silk house in Berlin had failed for $400,000.

---

After writting the above we have received the *Singapore Free Press* of 22nd and 29th June, from the latter of which we give several extracts. From the former we learn that another plot had been formed against the life of the King of the French, which was detected before having come naturity: hand regulations had at last been fixed on by the Government of Bengal for the Island of Singapore and Mr. Young C. S. was about to proceed to the straits as Ambassador.

Private letters state the money-market in England as distressing as can will be, and produce of any sort was utterly unsaleable. Many failures, and extensive ones, we learn from one of our letters had taken place in London, but we are unable to give names. The first vessels from here last season will have found the market totally unprepared for their valuable cargoes.

N B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

NOTE. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Camblets, Saltpetre, Ginseng* and other Goods, on which the duties at Whampoa are high.—Ships with *Rice, Cotton* &c. sometimes discharge at Macao or transhipt their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa. and thereby avoid Port Charges. The ship rests outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pictures &c, Confectionary Stationery, Cutlery Crockery ware*, &c., for foreigners consumption, are sold at Auction duty paid.

*Note. Alum*, and *Cassia* are procurable cheaper at Lintin, Macao, &c; and *Raw Silk, Silk* piece goods &c, are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if above than 100 Peculs are required for the ship when at Whampoa.

On French and other Foreign vessels they are slightly varied. Richelieu ships are charged only about @ 1300 in lieu of measurement &c.,

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—Longcloths are much enquired after and the first importations are likely to do well.

COTTON YARN.—has advanced a little, and within these few days the higher numbers, 40 @ 50, have been enquired for.

STRAITS PRODUCE.—We have heard of no sales of either Pepper or Tin but they would command our quotations.

RICE.—Without alteration, nor does there appear any prospect of advance for some time. The new crop is coming in rapidly and the bad weather in the commencement of the season mostly partially to have retarded or injured it; besides the large quantities on hand of native and foreign grain prevent any demand at all excepting on the present low prices.

COTTON.—The transactions during the past week have been principally confined to sales of old Bombay Cotton, which has been disposed of at from 7 @ 9. 2 some of it of fair quality—but the market continues more depressed for all descriptions of native Cotton—but good New Broach has sold at our highest quotation and good New Bunda and Jaloun have also been disposed of at from 10.7 @ 11—about these prices have only been obtained from their being almost the only parcels in the market; indeed the announcement of arrivals to day from Bengal and Bombay has rather damped the market. Of Madras Cotton there is little remaining and the price is therefore nominal at our quotation.

OPIUM.—The Lintin deliveries have been good for the first week of this month, particularly of Malwa consisting of,

Patna, Old, 84, New, 116; Benares, Old, 13, New, 89; Malwa, New; Total 1160 Chests.

but this is mostly for the supply of the Junks; otherwise there has been very little doing, and both Malwa and also Bengal drug are declining and holders anxious to realize.

### EXPORTS.

RAW SILK.—Musters of the third Canton Crop were brought down to day, but we have not yet heard any report. The price does not decline. The holders of old Nankin silk are offering it at very reduced rates, but there are at present no buyers.

SYCEE SILVER.—Very difficult to be procured at any premium.

VOL. 2d No. 46. CANTON, SATURDAY, JULY, 22ND, 1837. No. 98.

## ADVENTURE WITH THE REBELS.

The following demi-official letter from Dr. Palmer to Captain Le Hardy, detailing the former gentleman's adventure with the rebels, will interest our readers:

To Captain C. F. LEHARDY,

*Superintendent of Coorg.*

My dear Sir,—I shall, I fear, find no words strong enough to express my gratitude towards your brave fellows to me or to next to God I am indebted for the lives of myself, wife and little boy. To show you with what kindness and diligence they rescued us from the hands of our prosecutors, I will endeavour to give you an outline of the events which occurred to us from the time we left Soltanpett until our deliverance.

On our arrival at that place, information which was received from some respectable looking persons, gave us the first notice of a disturbance having taken place below the Ghauts. As I however saw no cause to apprehend that these disturbances amounted to any thing more than a mere retreat on the part of the inhabitants to pay their rents, I determined to proceed, and I accordingly marched the following day to Bangode at the foot of the Ghaut; on reaching that place we were told that the Rajah had taken the village, and that 500 of his men were close at hand, and would arrive that evening. We however saw nothing to alarm us during the day excepting the insolence and inattention which we experienced from the inhabitants. At about 11 o'clock at night we were awoke by the arrival of upwards of 100 men carrying moshals (torches) and armed with matchlocks, swords, and hatchets, headed by a Moorman. On entering the house he immediately rushed up and seized me by the throat, while others bound my arms behind my back and then tied me to a pillar of the cutcherry. This effected, they turned to Mrs. Palmer, whom the ruffian abovementioned also seized by the throat, tore off her clothes, and left her almost in a state of nudity. In this condition we were left for 24 hours, when a person apparently higher in authority arrived, and appeared disposed to treat us with less severity. We remained at Bangode three days, during which we scarcely received food sufficient to support us. On the morning of the fourth day we were informed that the Rajah had taken Manga'ore, and that his instructions were that we should be conducted to that place. We accordingly proceeded, myself and Mrs. Palmer being allowed our palankeens, under a strong guard of matchlock-men. On reaching Bantwal, which we did on the 14th or 15th, we were told that the Rajah had gone to Poottoor, and thither we were ordered to follow him. On reaching Poottoor, however, we found he had gone on to Soolya, and we were accordingly moved on to that place. On arriving within a few miles of Soolya I have reason to believe that the bands must have received instructions to treat us with peculiar harshness; myself and Mrs. Palmer were turned out of our palankeens, and told that we must in future walk. This occurred at about 11 o'clock in the day—they had before deprived Mrs. Palmer of her bonnet and myself of my hunting cap, the only one which I happened to have; and in this manner, bareheaded, all three of us, myself, my wife and child, the latter without even shoes, were made to walk over stony rocky ground over hills and through thick thorny jungle for upwards of three miles at the very hottest time of the day, and on reaching the cutcherry in which he was lodged, we were detained for upwards of an hour exposed to the sun, waiting until the rajah was prepared to see us.

Our interview was very short, he told Mrs. Palmer, whose state may be more easily imagined than described, not to be alarmed. A few words were also addressed to myself; he asked me if I would attend his wounded and said that he would pay me the same as the Company. To this humanity dictated a ready answer. I of course expressed my willingness to alleviate as far as I by in my power the sufferings of any person brought to me in want of medical assistance; at the same time representing my inability to do much owing to the want of medicines and instruments. He then kept Mrs. Palmer our own tent pitched about 50 yards from the cutchery 3 days, when an order was suddenly received to take us off to the jungle. Harsh and brutal or had been the treatment which we experienced before this, it was nothing to what we were now made to suffer; we were deprived of our tent, conducted into an unfrequented part of the jungle, and there exposed for four successive days without covering of any kind, except a few leaves to protect us from the heavy dew and rain which fell every night; the only food supplied to us at this time being the coarsest description of rice. On the second day we were led to entertain hopes of speedy relief by hearing the sound of distant shots, these however died away towards evening. On the following day our hopes were again revived by hearing shots, as if an enemy were skirmishing in the neighbourhood; these shots were evidently closer than the day before. On the fourth morning we were suddenly taken from this place and carried in our palankeens to a more remote and inaccessible part of the jungle, where we found the Rajah surrounded by about 250 men. As we arrived the Rajah was about to return in the direction from which we had just come, and we were told that we should follow on the next day.

The following day (the morning of the 24th) we were taken in the direction that the Rajah had gone the night before, and had proceeded about four miles, when our palankeens were suddenly stopped and sent in another direction, which we had pursued about 20 yards, when I was rudely pulled out of my palankeen by the ropes that had all along bound me, and was dragged into some of the thickest part of the jungle, the palankeens following me. I had not been there more than five minutes when I heard heavy firing apparently close to us; this however continued only a few minutes, when it altogether ceased. Here we were in a state of breathless suspense for upward of an hour—the firing again commenced, but at so great a distance as to leave us no hopes whatever of being discovered by our sepoys, who, we concluded, had encountered the enemy. Shots continued to be heard at intervals for about a quarter of an hour, when one, suddenly fired within a few yards of us, was immediately followed by the rush of a large body of men in our direction; they were dressed precisely in the same costume as that worn by the Rajah's (pretender's) troops, and I accordingly concluded that the Rajah had been defeated by our troops and that these men were running up to put us to death. Judge my surprise therefore, at finding myself suddenly set free, and the ropes which bound my arms cut, and ourselves surrounded by friends offering assistance and treating us with the most marked respect. I now found that we owed our deliverance from the hands of the ruffians into which we had fallen, to your brave Coorgs. It is impossible for me to describe the kindness with which they loaded us; it appeared indeed as if each man wished to outdo his comrade in attention; rice cakes, ghee, in short all they had to offer, were placed at our disposal. In coming out of the jungle we met your old friend Bachoo whose delight at seeing us appeared to know no bounds. I was now made fully aware of the peril to which we had been exposed: for not more than 200 yards from the place where I was pinioned, lay the corpse of the subadar who had charge of us; and it appears that he was in the act of running down and was calling out to the guards, by whom we were surrounded, to put us to death, when he received his death wound from one of your men. The shot had entered under the right arm, had passed through the body and causing instant death, thus saved our lives, at all events my own; for he would only have had to raise his hatchet to feel me to the ground, resistance being utterly out of my power.

I feel that no words can express what I would wish to say on the subject of my gratitude towards my deliverers; but I hey you will be kind enough to express to them as far as you are able my sense of the deep debt I owe them.

I remain,
My dear Sir,
Your's very sincerely.
(Signed.) OCTAVIUS PALMER.

*Mercara, 30th April*, 1837.

P. S.—I may as well mention that I was plundered by the insurgents of 251 Rs. in cash and other property, which I calculate at the most moderate estimate at 3,000 Rupees.—*Ibid.—Singapore Free Press, 22th June.*

## PINANG.

PUBLIC MEETING TO CONSIDER OF AND TO REPRESENT THE GRIEVANCES OF THE KING OF QUEDA TO HIS MAJESTY IN COUNCIL.

*(From the Pinang Gazette, June 3rd.)*

A very numerous meeting of the European and native community assembled on Tuesday last at the Library to take into consideration the petition addressed to the principal Merchants of the Settlement by the ex-Rajah of Keda, and to adopt measures for representing his grievances to the Supreme authority in India, and ultimately to His Majesty in Council.

The Sheriff having read the requisition addressed to him, Mr. GEORGE STUART was unanimously called to the Chair, when he opened the business of the meeting by a speech of some length, but from not being at the time exactly prepared to take notes, we are able to give only a very imperfect outline of what fell from him and the other speakers.

Mr. STUART said, that his Highness Sultan Ahmad Tajudin Halim Shah when lately here having made a written appeal to the merchants of Pinang, he (Mr. Stuart) and Mr. Anderson had waited upon the Governor in the hope that the local Government might be able to comply with a few of the requests, and also something to alleviate the hardship of his Highness's present situation;—that the governor had informed them nothing could be done here, but that he would forward any representation from the merchants to the higher authorities; that, in consequence of this, a requisition had been made to the Sheriff to convene the present meeting which had been readily complied with.

"By the ill advised treaty," Mr. STUART observed, "made with the Siamese in 1826, his Highness's rights "had not only been entirely forgotten, but he was prevented from returning to his Kingdom. How little "the Siamese were able to keep Keda had been proved "by the gallant exploits of the late Tuanku Kudin who "drove them out, and retained possession of the country until British ships of war rendered them assistance."

He trusted, "that if a representation of the circumstances of his Highness's case and of the unhappy state "of Keda were laid before the Supreme Government or "His Majesty in Council, the result would be such as "the community of this Island desired, deeply sympathising as they did with the misfortunes of his Highness and of his ancient Kingdom."

Mr. Anderson then rose and said, that he regretted his inability to express his sentiments for the unfortunate Rajah's grievance so fully as his sympathy for that Prince's present situation dictated. His highness had appealed to the merchants and the public to represent his sufferings to the highest authorities, and he hoped the result of the meeting would shew that that appeal had not been made in vain. The history of the connexion between the Rajah of Keda and the British Government was well known to the community, and surely it should in every way sympathise with the unfortunate Prince from whom alone a rightful possession of this Island was held.

Mr. A. felt certain that a public expression of the feelings of the community to the Governor General and eventually to the King in Council for his Highness's grievances could not fail to procure him redress. The honor of the British Government and of Englishmen generally, which had hitherto stood so high in Malayan countries, he had no hesitation in saying had been tarnished by the treatment of the Rajah of Keda. All this had been caused by the celebrated treaty of Capt. Burney with the Siamese in the year 1826, which was reprobated at the time by the local Government here and by all who were acquainted with the subject. It was a breach of good faith, execrable policy, and a most unheard of oppression on his Highness's personal liberty. Mr. A. asked what had been gained by all this? The Siamese had held possession of Keda for sixteen years, and the consequence was that that fine country had been almost depopulated by their cruel tyranny. Would it be believed in England that we were acting as the most *sentient* allies of these half barbarians and despotic people? He could prove by respectable natives now present that *slavery* (yes slavery, Gentlemen, Mr. A. repeated with considerable emphasis) was carried on to a fearful extent by these allies of the British Government. Five hundred malays of Keda had been marched over at one time to Ligore and thence to Bankok and three hundred at another. Young boys and girls were taken from their parents and sent into slavery like so many sheep to market.—Was all this to be tolerated? Surely not. Mr. A. concluded by stating, that the Siamese treaty had been so flagrantly broken as regards Keda by their treatment of the people that the British Government had now the best opportunity of revoking it and thereby doing justice to an old and faithful ally, the unfortunate Rajah of Keda.—Mr. A. then moved the following resolution, which being duly seconded, was carried unanimously.

Resolved.—That this meeting deeply sympathises with his highness Sultan Ahmad Tajudin Aalim Shah, and consider that the circumstances of his case should be represented by a respectful petition of the community of this Island to the Supreme Government and to His Majesty in Council.

The following Resolution was then proposed by Mr. STUART, seconded and carried unanimously.

Resolved.—That a Committee of the following Gentlemen be requested to frame the Petition.—Messrs. W. Anderson, Cannier, and Brown; and by desire of the meeting, Mr. Stuart was selected to be one of the number.

Several old and respectable native inhabitants who were present, and seemed to be deeply interested in what was going on, upon being made acquainted with the substance of the observations of Messrs. Stuart and Anderson, immediately came forward and confirmed the statement regarding the system of slavery that has been prevailing at Keda and the general ruin and distress which has been the misfortune of the inhabitants to suffer at the hands of the present rulers.

Thanks having been voted to the Sheriff and Chairman, the meeting broke up.

*For. Quarterly Review.*

On Thursday an aquatic animal of considerable size known to the Malays by the term *Dugong* was brought here by some Malay fishermen who had killed it on the opposite coast. We have had no opportunity of seeing it, but a friend informs us that the dimensions of the animal are in length 6 feet 9 inches,—in circumference 4 feet 2 inches,—and in breadth, 2 feet 3 inches. The carcase it appears was not weighed but some notion may be formed of its weight when the united strength of 10 men were required to carry the burden. This *Dugong*, or *Dugon* of the naturalists, perhaps has some claim to notice as being of greater dimensions than the specimen preserved in spirits forwarded to Europe by the late Sir Stamford Raffles. The latter was only 6 feet 8 inches,—breadth at center 1 foot 6 inches, and height at centre 1 foot 6 inches. —Marsden describes the *Dugong* as an animal of fish "of the order of Mammalia, with two large pectoral fins serving the purpose of feet, and having the head covered with a kind of shaggy hair. The tusks are applied to the same uses as ivory, especially for the handles of knives, and being whiter are more prized." The *Dugong* which we are now noticing has resemblance to the above general description given by Marsden with exception of the "shaggy hair," which the present has not. Its tusks projecting from its upper jaw are placed near each other, and may be a little more than 5 inches in length. In another account of the *Dugon*, or Indian Walrus, the animal is represented to have "four grinders on each side in the upper jaw and three in the lower, a bristly beard on the chin,—short ears, broad feet, and the legs so short that the belly trails on the ground." In the present specimen, however, the animal exhibits neither grinders in the upper or lower jaws, although the lips are adorned with some stoutly bristles, the ears are imperceptible to the eye, and its fins may be substituted for feet. Upon exenteration, the stomach was found filled with a quantity of green sea-weed and an incredible accumulation of earth worms all in a state of activity.—

Mr. Marsden further states the *Dugong* "has much general resemblance to the Manati of Lamantin of the West Indies and has been confounded with it."—*Singapore Chronicle, July 1st.*

## DEMONS.

*From the Indo Chinese Gleaner.*

CANTON, OCTOBER 23, 1817.

To the Editor, Sir,

In China, there exists, very extensively, a belief in ghosts or demons. I offer to you the following occurrence in illustration of the prevailing opinions.

A few days ago, in this neighbourhood, died, the wife of a wealthy individual, who lately occupied a respectable situation in the Government. The causes which led to her death, it is said, were these:

About ten years ago, she occasioned, by severe beating, the death of two slave girls. The eldest one was pregnant to her husband, and that circumstance is assigned as the cause of her resentment. After the two girls died, she hung them up by the neck, to induce a belief, that they had hanged themselves. The parents of the slave girls, however, were not satisfied, and appealed to the Government. The fact was too apparent to be glossed over by the method which this unhappy woman employed to conceal the truth; and very liberal advances of money were made to retard the progress of justice. The executors of the law were thus satisfied; but conscience could not be bribed. This woman became insane, and in her ravings, personated the two slaves whose death she had occasioned; or as the Chinese view it, the spirits of the murdered slaves possessed this woman and employed her mouth to declare her own guilt, and their resentment. In the midst of these ravings, she tore off her clothes and beat her own person, with as much severity as madness could inspire. After this, she recovered her senses for a time, or the demons which possessed her, left her for a while, but to return in greater fury; which took place a short time previous to her death.

In her last fit of paroxysm, she was even worse than the first time, and was confined to a room with an old woman servant. But the demons (as the Chinese view it) more incensed at this attempt to prevent their murdered souls from speaking to the hearing of all concerned, entered the old woman servant also, and employed her mouth to publish the tale. The mistress died. And the afflicted husband endeavoured to soothe the distracted old woman by suggesting to her, that to would restore her as a Nunnery, and she would become a goddess. She consented with some reluctance to this, on condition that he would worship her; which he forthwith professed to do, by falling down on his knees. The demons, however, speaking by the old woman's mouth, further insisted, before they would consent to forgive, that the two daughters, who had enlisted their mother in soul-tearing the murdered slaves, should also come and worship. A promise was made to this effect. The women was now in the nunnery; where the ghosts or souls of the murdered slaves, having been fully revenged, left the possessed woman in the full enjoyment of her former senses. The above effects are not by the Chinese, as by Europeans, ascribed to the power of concussion, or the delirium of remorse, but to what may perhaps be denominated demoniacal possession.

*( From the Indo Chinese Gleaner.)*

ON THE EVIL OF FORMING ILLEGAL ASSOCIATIONS.

*(Illustrated from a new Penal Enactment, or Code.)*

"In the reign of his present Majesty, the splendid powers overshadow and nourish the arts and human cast forth their radiance—the universe is regulated in peace—and the tribes of men are also universally tranquil. Of the people who live in this age, the scholar discourses of propriety, and endeavors the improvement of the ancient ones; while the illiterate cultivate their fields, and die their well, without attending to entertainments with all their might; enjoying the fruits of heaven even, in peace and tranquility. Truly, we know not why it is that the people, wrought upon by foolish means, have been induced to fall into the net of deception—but constantly searching into the matter we find, that the generality of disobedient and lawless remain, are at first nothing more than worthless characters without any dependence—wine poor, and having no fixed object in pursuit they ordinarily establish certain covert dogmas, in order to obtain a livelihood. The stupid, these must be lures of interest—the cunning, of misery—the victims, they blind by charms and witchcraft—the strong and vigorous, they tempt by gymnastic feats—the weak, they subdue by sharpening strength—and the poor, they tempt by bribes of money. Until their disciples and followers become numerous—then in their excursions, they plunder; and in their assemblies, they gamble—they flock into the markets to drink, and roar and bawl in the open fields;—the lesser among them entice dogs and chuck fowls (in order to steal them), and the more practised in villainy drive away oxen, rob the graves; so that honorable and virtuous families in the villages cannot but fear them, and cannot save from applying on them. These pernicious evils are what the names of sects engender, and are produced by the influence of *illegal associations*.

"To the south of the mountain Sia, a common belief in ghosts and demons prevails, and conjurors and necromancers are encouraged; the spirit of the people is hardened and imbecilitated, and they are pleased with frothy and self-complacent things. Also on the coast, the foreign merchants of the ocean carry on their trade; and, as to the Portuguese Romish Catholic Religion, who can know that it will not roll out, and modify by degrees, till it enter China? We also hear that on the north west of the province, which is a very mountainous district, there are continually some people who, having no possession, come from a distant part, and brimming their instruments of husbandry with them, cultivate the waste crown lands: some of they erect cottages by the banks of rivers, and form habitations in the skirts of the mountains, where they harbour banditti; these banditti go forth by day to plunder, and return to the covering; and although the crowd-magistrates and military officers have availed in order to apprehend them, yet the woods being deep, and the jungle thick, when they pursue them to the west they fly to the east; there are some bounds probably which have not come to the knowledge of the magistrate, but the observation of the people is more certain and real. It therefore rests with you, people, strictly to distinguish between corrupt and correct doctrines, and seriously to complete the culture of happiness attained thereby. For the benefit of body's sake, be not moved by strange and pernicious doctrines, but act for protection, and do not remain in wicked connexion from your guild. Awake the stupid—reject the

disorderly—suppress the boisterous—assist the weak—pity the poor; and then your persons and families will obtain uninterrupted tranquillity, and villainy and corruption will have no means of access among you. If you do not act thus, then corrupt teachers will deceive the people, notwithstanding the enlightened instructions of the sages, and the multitude will be turned aside from decision path, notwithstanding the express injunctions of the laws.

"Examine now in succession former generations, and you will find that these persons who have subjected by a stick of incense and a measure of rice, have with out exception come to an ill end, and their adherents and descendants have been extermi nated: for instance, formerly, in the provinces of Szechuen, and Honkwang, the plundering sect of the water lily over spread three provinces, and were confes edly numerous; but when the great army arrived, they were all put to the sword. And latterly, another instance occurred in the case of the rebel Lin-tsing, who had formed a band and excited insurrection: long before the appointed time for commencing their operations arrived, the principal ring leader was cut into small pieces, and the rest of the conspirators were slain. Also Choo-mang-le, of Yunkan, in the province of Kwang se, and Fang-yung shing, of Ho-chow, in the provinces of Gan-hwuy, having rebelled, before the affair was wrought to any head, their villainy was instantly defeated. You inhabitants of Canton province, have also been frequently injured by these disorders: for not long ago, the plunderers of the Brotherhood Society, having collected together a multitude of persons, excited an insurrection at Fungshe shan, in Pohlo; but those who associated with and followed them, were all of them instantly put to death; many of you peaceable people were on account of them, obliged to leave your families and indeed the whole neighbourhood was disturbed. I would only ask, with respect to Chin-lan keh-nae* (the leader of this band) where is he now? Last year also, the vagabonds who collected bands and formed confe deracies, with a design to plunder and rob, have all been apprehended and punished. Hence we may see, that this kind of p and r-ing banditti, certainly cannot by any means chance escape: wherefore it is that extensive insurrection and rebellion, the powers above will not suffer him to escape. Even those who in common convene meetings and collect money, with a design to obtain a paltry livelihood, when once information of it is obtained, will be punished either with sword or law, or be bound with ropes and cords: their accomplices also will be banished to some distant port, where they will not be able to cherish their aged parents, to take care of their wives and families, or to overlook their houses and fields:—their regret may be poignant, but there is no deliverance, alas! alas! is not this dreadful!"

* A foreign name.

# CORRESPONDENCE.

## TO THE EDITOR OF THE CANTON PRESS,

FOREIGNERS AND CHINESE.

Mr. Editor,—Nothing appears more ridiculous and unfounded in our eyes than the pretensions of the Chinese to superiority over the barbarians, i. e. over all such as have not had the happiness to have been born in the central kingdom, and do not wear their hair in a long tail behind. In this depreciation of every thing foreign the Chinese are similar to the Greeks and Latins of old and in fact similar to every nation, whose political power at the moment has seemed to preponderate. Self-conceit and vanity seem to be the natural bias of the human mind, and as a modern instance I may only mention that the *French*, after their military successes, called themselves "la grande nation" *par excellence*, as if no other nation besides themselves could have a right to that title. We English have not a small share of this self-conceit and are very apt to undervalue every thing foreign, because it is foreign, and on the contrary if we find any thing to commend in our countrymen, to call their virtues British, such as British valour, British generosity, British intrepidity, British faith, British honor, etc. etc. thus rendering national qualities which are, and ought to be, cosmopolitan. It certainly is a source of just pride to be of a nation who has, like the British, produced so many great men, able in the Cabinet, field, and sciences alike, ever foremost in the task of investigation and of discoveries and inventions tending to the benefit of mankind, by which the has been lifted to the most prominent and honorable station among the enlightened nations of the present day; but let us use our advantages with moderation, let we obtain the affections as well as the respect of the nations with which we come in contact. Pride and arrogance are but too frequently engendered by success, and in private life we justly despise the *persons* inflated with his recently acquired importance, pretending to look down with ineffable contempt upon those who in worldly matters but a short time before were his equals, and who continue to be so still in every other essential but success in money-matters. If such conduct merits condemnation in a private individual, I do not see any reason why it should not be equally condemnatory in a nation, or in individuals belonging to it.

This rather long introduction to the matter in hand, Mr. Editor, has been called forth by a consideration of our social position in this country, which it is my anxious wish to see improved to the utmost circumstances will admit of. Every one of my readers, probably, is more or less aware of the restrictions under which foreigners are allowed to be in China, and that the Chinese Government, on the ostensible plea of our *moral inferiority*, prevents it's subjects from having any intercourse with us, except that strictly necessary for the purposes of trade; that the fear of innovation so dangerous to a despotic government, is the real cause to of this line of conduct will however not be doubted. The only means therefore left us, a handful of commercial men, surrounded by a countless multitude, to counteract in a manner the inimical disposition of the Government, is to prove to the Chinese by our conduct that we are not such barbarians as their Government so sedulously represents us to be, and individually to obtain their respect and affections. It is therefore a matter of regret whenever any thing occurs which may lower the character of foreigners in the esteem of Chinese, and I am proud to say that in a commercial point of view, very few instances can be found, where the Chinese could justly complain of a want of fair dealing on the part of the foreign merchants; on the contrary these have almost invariably been distingui shed for uprightness and honesty, and a natural consequence has been the unbounded confidence reposed in, and credit given to, foreigners by Chinese, even when these are not well acquainted with the circumstances of the former. Whilst this character has been gained for us by our predecessors, and maintained by ourselves, let every foreigner zealously watch that it be not impaired.

More has been done to improve our relations with the Chinese. It is well known that thousands of them anually emigrate from the too thickly populated districts, both of Canton and Fo-kien provinces, chiefly from the latter, and that a great number of them seek their fortune in the British settlements of the straits, where, under a just and equitable government, many of them soon succeed in collecting a small capital, with which, with the characteristic attachment of the Chinese to their country and kindred, they return to their native country, and cannot fail to cause a favorable impression to be made on their country-men of British character, which in the end must tend to make them desirous of improving their acquaintance with us here.

My business in this letter is not to speak of the British alone in Canton, but of all the foreigners resident here, and I must therefore not fail to mention the efforts made by the Americans, efforts which must contribute greatly to cause a foreigner to be looked up to with respect by the natives, and in which the Americans have been cordially assisted by the British and other foreigners. The establishment of the Ophthalmic hospital, has proved to the Chinese, by the very excellent cures effected by the Revd. Doctor Parker, that the knowledge foreigners possess of medicine is far greater than any they can boast of, and it is gratifying to observe that the confidence in Doctor Parker's treatment of their diseases is daily encreasing, as well as the number of applications to him. The great success which this admirable establishment has met with has no doubt been forwarded by the humane exertions of the Company's former surgeons, Doctors Pearson and Colledge; the former of whom introduced vaccination, and the latter has for a series of years gratuitously devoted his time to curing the Chinese chiefly of diseases of the eye.

I may here also add the several publications in Chinese on sacred subjects, and on the useful arts, which are being made through the Society for the diffusion of useful knowledge.

Much has therefore been done to give to the Chinese a more flattering opinion of our character than their Government wishes them to entertain, and upon the whole, the people seem to be by no means averse to improving our acquaintance with them, were it not for the fear of Mandarins.

A gratifying proof of their friendly disposition was, in my opinion, given during the boat-races the other day, where, though thousands had assembled to witness the sport, nothing but courtesy was experienced from them, and they willingly moved from their stations in the river not cause to any obstruction to the racing boats.

We are in the habit of decrying the Chinese as cowardly because we frequently see them offer no resistance when, as sometimes happens, they are insulted or assaulted by drunken sailors, though numbers are so greatly in favor of the former; they are, as a people, certainly of a timid, peaceable, and placable disposition, which is inculcated on them in their earliest education, and which it is the policy of their government to encourage. It appears to me however that the fact of their not retorting insult for insult, or their not punishing the offender as they might do, is not so much owing to cowardice or placable disposition as to their dread of the police, which on occasions of riot is very active, and keeps the populace in check, shielding the offending foreigners from their violence. That now and then riotous scenes are occasioned by sailors is much to be regretted, as the Chinese may draw inferences not flattering to foreigners in general, but as writing about these will not probably cure the sailors of indulging too freely in drink, I will leave them and am now sorry to have to notice, that it sometimes happens, to see quiet Chinese, who in the streets are following their calling, rudely pushed aside by foreigners, and even beaten, if they do not immediately get out of the way, no matter whether theirs be the right or the wrong side of the street, and this merely because the Chinese have the astounding insolence to suppose that they have as good a right to their own streets as we have. I have really seen *well dressed, respectable looking* foreigners beat a Chinese severely for no better cause, overturn the load he carried for the same reason, and this I suppose from a feeling of *superiority*, fully as blameable as that the Chinese affect, and to which I have alluded above, and of *security* from retaliation from the well known character of the Chinese, and the efficiency of the Police. I hope, Mr. Editor, that you will notice this practice, which is, I am glad to say, far from common, as such acts not only do any thing but evince personal courage, but as they also may make the Chinese suspect that we really are the arbarians their government represents us to be.

Do your best to repress this practice, to prevent mis-apprehension, and you will much oblige every sensible foreigner here, and among the rest,

Sir,

Your obedient Servant,

COSMOPOLITE.

CHURCH OF ENGLAND.

Dear Mr. Editor,

I have read with great attention Lord John's and the Archbishop's plan for a reform.

I have also looked at Sydney Smith's remarks, and glanced through the report of the dissenters and *no churchrate!!*—

My attention has also (practically) been called to old buildings, spires, castles, and the like!—and their repairs.—

The *Church of England* is in that architectural situation that the edifice might, untouched, stand for a few years!—but if friend or foe touches her to amend or alter, down she topples!—

ONE OF THE INITIATED.

Canton, 17th July, 1837.

## TO THE EDITOR OF THE CANTON PRESS

THE REGATTA.

Dear Mr. Editor.—Not very well pleased with that part of "a member C. R. C." letter relating to the *Rat* and crew, as tending to injure the character of the former, and possibly interfere with the disposal of her, and being far from flattering to the latter, I beg to offer a few remarks on the subject.

Altho' I and the rest of her crew, were not like the Fanny's *flag*, which according to the above letter "floated proudly on the breeze *sure to win, !*" yet as we floated wet and chilled in the leaky "Rat" we determined to do our best:—and we did it;—with what ill success is well known.

"Give to the devil his due" is a very old adage and very expressive of the feelings of Britons and their descendants. Would that the adage had been kept in mind by the writer of that very interesting, elegant, and graphic description of the Regatta. He says "the young rats being far astern, partly thro' steering the wrong way, partly thro' want of propelling power." Begging his pardon, the young rats were not *far* astern; and if they came in last, it did not arise from steering the wrong way, but solely thro' want of strength; or, to use the more elegant expression of the above accomplished writer, thro' want of propelling power.—It must be remembered also, that they had never pulled together before in the boat, while the crews of the other boats had, at least, a week's previous practice.

It is my firm opinion, in which many experienced watermen bear me out, that the *Rat*, were she pulled by a strong crew, would beat the *Fanny*.

Do you not think, Mr. Editor, that "a member C. R. C." would have gained more credit, and pleased all, had he bestowed a few words of praise, gratifying, and withal, inciting us to fresh exertions, instead of applying to us that no-wise complimentary appellation of *mice!*

His evident ignorance on aquatic matters and the certainty that he is no waterman, plead his excuses with us. We console ourselves with the conviction that one of the cloth would not have treated us so.

I have much pleasure, Mr. Editor, in subscribing myself,

Your constant Reader,

ONE OF THE RATS.

P. S. Can you account for the mistake in the Umpire's report? The *Rat* is there stated to arrive one minute after the *Fanny*, whereas, she arrived only one minute behind the *Dragon*.

# CANTON PRESS,

July 22nd 1837.

In want of local news we have been obliged to make, contrary to our rule, or at least to our wishes, copious extracts from the pages of our distant cotemporaries. The arrivals from Bombay and Singapore, though of a later date, by a few days, than before, have not added to our stock of news; the latest Singapore paper we have received is the *Chronicle* of 1st July.

THE HING TAE AFFAIRS

## TO HIS EXCELLENCY,

The Governor of the two Kwang Provinces &c. &c. &c., a respectful address.

Your petitioners are compelled again to bring their claims upon the Hing-tae Hong to your Excellency's notice, for, notwithstanding your Excellency's orders literally nothing has been done towards either a settlement of the accounts or of the terms of payment.

A Committee has been named also with the Hong merchants to investigate Yen-Keching's objections to the claims of your petitioners. If he is serious in urging these objections why does he not come forward and substantiate them; It is so evidently a manoeuvre to put off time and procrastinate that your petitioners must entreat your Excellency not to permit such conduct being continued, and to order the liquidation of the accounts as they are rendered by us, should Yen-Kechang not *prove* them incorrect within a day or two, for surely he has had ample time to examine his accounts.

As arrangements must be made for the transactions of the ensuing season, your petitioners are thus urgent, in entreating your Excellency to enforce your former orders that old and new accounts may not be mixed.

July 11th 1837. *Signed by Hing-tae's Creditors.*

Tang, President of the Military Board and Governor of the two Kwang Provinces issues this edict to the Hong merchants for their full information.

On the 18th July I received a petition from Dent and other barbarian traders praying as follows (here follows the petition.)

This coming before me, the Governor, I enquired into the matter and found that when the barbarian traders, Jardine &c., presented a petition some time ago I commanded the senior Hong merchants to cause *Yen-Kechang* to produce his younger brother *Yen-Ketseang*, who was formerly the head manager in the Hong, but afterwards resigned. They were ordered to unite with the brothers and examine and settle the accounts and devise some means for their liquidation. They were to report the same to the two Sze that I might be informed there on. I also directed the Poo-ching and Gancha-Sze's to investigate and urge the speedy settlement of the accounts.—This is on record.

Let the barbarian traders now wait till Yen-Ketseang makes his appearance, when they must, in conjunction with the senior Hong merchants, and the two brothers, give their whole minds to the just and equitable settlement of the accounts and to determining the exact sums due. Let the three so arrange that the affairs may be instantly wound-up. (Until Yen-Ketseang makes his appearance) there will be constant wrangling and disputing of the accounts.

Let not the barbarians throw impediments in the way of settlement (by their impatience.) They must not so constantly petition me, for truly they will reap no advantage there from.

Uniting the circumstances, I issue this edict to the Hong merchants: let them transmit copies here of to the barbarian traders, for their information and obedience.

Do not oppose.—A special Edict.

July 20th 1837.

The above is the correspondence which has passed about Hing-tae's affairs since our last. Our readers will perceive that these have not in any degree advanced, since the Governor, tired of being so repeatedly disturbed on account of these debts, evinces his annoyance. In the mean time, as we learn from the Canton Court Circular, the elder brother of the partner whose presence was insisted on by the foreigners, and who, as far as we know, never attempted to escape, has been imprisoned, and is now in the City, whilst the other is not forthcoming. If the hong-merchants still persist in not making any satisfactory proposals towards the settlement of the Hing-tae debts another representation to the Vice-roy will not be amiss, backed, if that be not attended to, by others, with unflagging activity. We see no other way either for the settlement of these claims, or for bringing them into a fair way towards it.

The hong, the establishment of which we mentioned a few weeks ago, has again ceased to exist, from inability, it appears, to pay the enormous demands of fees made upon it by the Mandarins, estimated one with another at 88,000$. It is said that of this sum 13 or 14,000$ had been paid, and a shroff in the City had given his conditional chop or guarantee for the remainder, when the merited man among the partners drew back, content with the first loss. It must be a source of much gratification to the different Mandarins to have saved their 13 or 14,000$; restitution in such cases is, we believe, never thought of.

## MACAO INTELLIGENCE.

*From a Correspondent.*—Yesterday the 18th anew election of the members of the Municipal Chamber took place here, being the third this year and the second since the arrival of the new governor. It is understood that those who are elected are some of the most worthy and constitutional of the place, in consequence of which act of the citizens of Macao, the governor, judge, and their handful of followers are much annoyed as they wished that others, particular friends of their own, might be got in. The city is very much dissatisfied with the acts of the present governor, and it may be expected that he and the judge will shortly be recalled: all the people of Macao here made repeated complaints against him, and I also know that the citizens are quietly that the governor may order as many elections as he pleases for the Municipal Chamber, but that they will not the less again vote as now for those in whose disinterestedness and honor they have most confidence. He may continue the struggle as long as he likes, but while, as now proved, he has all the inhabitants against him or rather against his acts, it is impossible that he can do worse than continue the confusion and irregularity already caused by his strange misapprehensions of his powers and duties. All that the people of Macao ask for is for a government according to the Constitution; no very exorbitant demand one would think, and which, allowed in the mother country to all the other colonies, it seems strange should be denied here. If the inhabitants of Macao continue as now temperate and firm, they will doubtless carry their point, and for the good of all it is much to be desired that they should do so. The following are the names of the gentlemen, now composing the Municipal Chamber, Aldermen: F. A. de Aguiera, J. J. F Veiga, Bento J. G. Serva, G. Gonsaga and J. D. C. dos Santos. Judges: F. A Rangel and A. J. Cortella. Procurador: C. A. Pacheco.

*Boat-races.* Another boat-race came off on Saturday last. It was a match for a hundred dollars, between a black gig with four, and a green gig pulling six oars, the former manned by Malays and Lascars, and the latter by Chinese, to pull from the beginning of the Macao passage round the fort, and back again, a distance of about 3½ miles. The boats started at ½ past 5, and kept pretty close together until past the fort, when the green gig took the lead, beating the other by about 2 minutes in time The winning boat was, we hear, famous in Boston, for speed.

We recommend the letter from "Cosmopolite" to the attention *of our readers.*

Another of our correspondents "One of the Rats" is annoyed at some remarks in a letter descriptive of the Regatta, which appeared in our columns last week. As to the question which "One of the Rats" puts, whether it would not have been better had our correspondent bestowed praise on them, instead of a pleasantry, we must confess, that we do not see how more could be said than that the crew of that boat had done their best; all that in our opinion unsuccessful exertion on such occasions can call forth. As to the alleged error in time of which "One of the Rats" complains, as having been in our published official account, we have only to state that it was copied from the original official statement of the Umpire.

A rather severe gale was felt here on the night of the 19th, which, as far as we have learnt, has done no mischief on the river here, though it blew down a house in the suburbs of Canton. The only casualty occasioned by it at Macao, that we have heard of, has been the driving on shore of a Chinese Junk, opposite to the Franciscan convent. The Junk was in ballast, and will be got off again, it is supposed, with little loss. From the Cap-sing-moon we have had no communication since.

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—Longcloths, both white and grey, are much wanted and would command good prices. COTTON YARN is also enquired after.

WOOLLENS.—LONGELLS have been sold during the week at our highest quotations, and except from heavy supplies the market is expected to be maintained. Superfine BROADCLOTHS have been in more demand, and two or three lots have been disposed of lately.

STRAITS PRODUCE.—Holders being firm, TIN has advanced, and is saleable in small lots at an advance. PEPPER, from the small stock, would also sell readily.

COTTON.—The finer descriptions of Bombay and Bengal are held at the same rates as before, but purchasers are unwilling to come forward at the high prices. The middling descriptions of new are off more readily, and we hear of a sale of about 2000 bales fair quality Bombay at 9 3. and of Jalour a 10.3 @ 10.6. The old and inferior are very difficult of sale at even reduced prices.

OPIUM.—continues in the same unsatisfactory state with less demand for Malwa, and a decline in new Patna; new Benares has advanced to our quotation, but this arises from a partial demand, and from so small a quantity being in the market. The deliveries at Lintin to the 15th were,

Patna, *Old*, 10, *New*, 213; Benares, *Old*, 93, *New*, 94; Malwa, 2187; Total 2,587 Chests.

### EXPORTS.

TEA.—We have reduced our quotations for Canton teas, but very little doing in them, and prices are therefore nearly nominal. Letters have arrived in town confirmatory of former reports from the tea country of the second gathering having been abundant, though of not very good quality.

SILK PIECE GOODS.—The demand at present is limited to some orders for the West-coast of America.

CANTON RAW SILK.—continues very dear, whilst but little is being brought to market.

EXCHANGE ON ENGLAND.—nominal, no bills offering.

Just as we were going to press the report of the arrival on the 19th instant of the *Water Witch* reached us from the Pilot 19th ultimo and Singapore the 7th instant. The following is the result of the 4th sale on the 12th June.

2045 Chests Patna, average 1,448 Rs.
2068 ,, Benares, ,, 1,240 ,,

These prices, as the Calcutta Price Current remarks, are considered much higher than the state of the China market warrants, but not so high as it was generally believed they would go to, supported as it was known they would be by previous holders and shippers of the Malwa drug, and as our present quotations would leave a considerable loss at even these rates—holders may feel inclined to support the market. The latest arrival in Calcutta was the *Lady Hayes*. The only immediate departure after the *Witch* spoken of, was the *Ann* with a small supply of Opium nearly the whole for Singapore, to be followed by the *Governor Family, Red Rover*, and *Rob Roy*.

The arrivals from England, destined for China were, the *General Kyd, Vansittart, Abercrombie Robinson, George IV.* and *Protector*, but none of them had commenced loading Cotton, the stock of which was increasing, and prices declining.

## EXTRACTS.

The following story, among other instances of a similar nature, brings the "Arabian Nights" strongly to mind :—

"Were curious measures, such as we read of in some of the , Tales of a Thousand and One Nights, ' were often adopted by the police magistrates of Cairo, to discover an offender, before the late innovations. I may mention an instance. The authenticity of the following case, and of several others of a similar nature, is well known. I shall relate it in the manner in which I have heard it told. A poor man applied one day the A'gha of the police, and said, ' Sir, there came to me, to-day, a woman, and she said to me, ' Take this ckoors, and let it remain in your possession for a time, and lend me five hundred piasters : ' and I took t from her, sir, and gave her the five hundred piasters, and she went away : and when she was gone away, I said to myself,' Let me look at this ckoors ;' and I looked at it, and behold, it was yellow brass: and I slapped my face, and said,' I will go to the A'gha, and relate my story to him ; perhaps he will investigate the affair, and clear it up ;' for there is none that can help me in this matter but thee.' The A'gha said to him, 'Hear what I tell thee, man. Take whatever is in thy shop ; leave nothing ; and lock it up; and to-morrow morning go early ; and when thou hast opened the shop, cry out, 'Alas, for my property !' then take in thy hands two cloths, and beat thyself with them, and cry, 'Alas, for the property of others !' and whoever says to thee, 'What is the matter with thee?; do thou answer, 'The property of others is lost : a pledge that I had, belonging to a woman, is lost ; if it were my own, I should not thus lament it ;' and this will clear up the affair.' The man promised to do as he was desired. He removed every thing from his shop, and early the next morning he went and opened it, and began to cry out, 'Alas for the property of others !" and he took two cloth, and beat himself with them, and went acout every district of the city, crying, 'Alas, for the property of others ! a pledge that I had, belonging to a woman, is lost ; if it were my own, I should not thus lament it.' The woman who had given him the ckoors in pledge heard of this, and discovered that it was the man whom she had cheated ; so she said to herself, ' Go and bring an action against him.' She went to his shop, riding on an ass, to give herself consequence, and said to him, ' Man, give me my property that is in thy possession.' He answered, ' It is lost.' ' Thy tongue be cut out !' she cried ; ' dost thou lose my property ? By Al'lah ! I will go to the A'gha, and inform him of it.' ' Go, said he ; and she went, and told her case. The A'gha sent for the man ; and when he had come, said to his accuser, ' What is thy property in his possession ?' She answered, 'A ckoors of red Venetian gold.' ' Woman' said the A'gha, 'I have a gold ckoors here : I should like to shew it thee.' She said, 'Shew it me, sir, for I shall know my ckoors.' The A'gha then untied a handkerchief, and, taking out of it the ckoors which she had given in pledge, said, ' Look.' She looked as it, and knew it, and hung down her head. The A'gha said, 'Raise thy head, and say where are the five hundred piasters of this man.' She answered, 'Sir, they are in my house.' The executioner was sent with her to her house, but without his sword ; and the woman, having gone into the house, brought out a purse containing the money, and went back with him. The money was given to the man from whom it had been obtained, and the executioner was then ordered to take the woman to the Roomey'ieh (a large open place below the citadel), and there to behead her, which he did."—*Lane's Modern Egypt.—Literary Gazette.*

*A Dear Lobster.*—The late Duke of Norfolk was fond of the luxuries of the table, and, although apparently as joyous and blithesome as any one, he could be as morose and iltempered at any person breathing. Those who knew him could pretty well anticipate when a breeze was likely to spring up, as an ebullition of temper was always preceded by a convulsive hearing of his ponderous shoulders, as exemplified by the following trait. A select party, about twelve in number, had assembled in St. Anne's Square, and were partaking of a sumptuous dinner, when on a sudden the earl-marshal's shoulders began to undulate, and the following short colloquy between a then favoured servant and his grace took place. " I do not see a lobster on the table, Dodson." "No, your grace." "I think I ordered one, sir ?" roared the duke. "Yes." replied Dodson, "you did, your grace, and I bid as far as 4/- 16s. for one ; but, there being but one in the market, I could not get it; the same lobster being divided between the Lords Angleses and Sefton, who were resolved to have it!!"— Jockey of Norfolk said no more.—*Lit. Gazette.*

"One of the first English vessels that visited the Indian seas, fell in, when off the Coromandel coast, with a catamaran ; there were two natives on it, whose bodies, of course, seemed to be rising out of the water, and they were paddling in their usual manner, that is with quick strokes alternately to the right and left. The crew of the ship, as may well be imagined, were greatly surprised and alarmed at this strange and unheard of phenomenon ; and the report of it entered in their log-book, ran as follows ;—'Good ship. Too trades increase. August 15th, 1615—lat—, long.—, at 2 p. m.—sheld, distinctly, two black devils in the water, playing at single stick !!! They were within twenty fathoms of the ship, and the whole crew, saw, and can vouch for the truth, of this statement ; these infernal imps remained visible for at least an hour, and were then lost in the distance. ' They who go down to the sea in ships shall see the wonders of the deep ' and from this learn, ye incredulous, how vain be the hardness of your hearts ; N. B.—Certes, this matter should portend a great storm ; or some revolution in the states of Europe ; or, peradventure, something relating to the pope of Rome ! ! Heaven send no ill befide us ! "*Toid.*

### The Late Dr. Morrison's Chinese Library.

We have much pleasure in announcing that an endeavour is on the point of being made to dispose of the invaluable Chinese library brought to England by the late Dr. Morrison. The prospectus will probably be laid before the public in the periodicals of the present month ; but should that not be the case, it may be stated that the plan will embrace two important objects, which it is presumed will greatly interest all the friends of religion and literature, especially those to whom the character of Dr. Morrison is known. The donations to be invited are for the benefit of the doctor's family, as a compensation for the library ; while the grant of the library itself, to some seat of learning in the metropolis, is to be made on the condition of its carrying into effect the object for which Dr. Morrison brought the collection to his native country, viz. the institution of a school for the study of the Chinese language, for religious or other purposes.

It is somewhat remarkable that this long desired measure should have been brought to a practical bearing, just at the moment when the *reproach* of a discreditable neglect of the cultivation of that language, should have been cast upon the British nation in a foreign jornal. We shall quote the passage, as adding some force to to the appeal which will thus be made to national as well as individual feelings, though happily it can have no share in the merit of contributing to wipe the reproach away. That honour must belong to the memory of Dr. Morrison, though he was not permitted to carry his design into effect.

"Of all the nations of Europe, the two which have the greatest and closest intercourse with the Chinese are the English and Russians ; and yet there is no public teaching, no chair of Chinese, at either London or St. Petersburgh. This is unaccountable. At Paris there is a chair ; so there is at Berlin and Munich ; and all have respectable classes. Can we do without the Chinese, and ought we not to learn their language, now by no means of very difficult acquisition ? Look at their productions—tea, gums, silk, staffs, cottons, porcelain, rhubarb, ginseng, and all indispensable necessaries."—*Journal de Francfort.*

Those into whose hands this appeal may come, will find many more urgent reasons for enforcing the cultivation of Chinese, in Great Britain, than even this extract offers.—*Missionary Magazine, for January.*

### CALCUTTA.

The Opium sale did actually take place yesterday. We borrow the *Courier's* account of the sale :—

"The Exchange Rooms never within our recollection presented so large an assemblage of persons as at the Opium sale to-day. The crowd was so much greater than on any former occasion, that one would have supposed some favorable news had arrived, and that the exporters, having made their 50 per cent. by their early shipments, were all anxiety to secure the firstlots before prices should run up ; whereas hardly a man in the room (at least among the Christian part of the assembly) reckoned upon any probability of profit upon the purchases he might make, and it was universally known and felt that the market was in a most desponding and critical state, with between five and six thousand chests of former sales remaining in the godowns. Usually at these sales there has been great punctuality in the hour of beginning,—which is of course the more desirable, the greater the quantity to be sold, the more irksome the attendance from the heat of the weather. To-day, however, an anxious quarter of an hour passed away after the clock struck eleven before any one took the official chair, and then it was temporarily filled by a Member of the Board instead of a junior Assistant, in order to prevent further delay. Thus the first lot was knocked down under the presidency of Mr. Parker, who was presently succeeded by the Acting Secretary, the proper functionary (from some cause unexplained) still not having appeared when we left the room at half past eleven.

The biddings for the first lot ran up to 1483 Rs. per chest, the same buyer pulling down his price in successive lots 5 Rupees each till stopped by a bid of 1460 ; after a few lots sold at this price, the price went up to 1475 and then gradually fell back to 1445 the first half of the Patna averaging 1460 ; but the general average of this quality was 1448 and of the Benares 1240, the extremes of the former being 1485 and 1420, and of the latter 1285 and 1220. The quantity brought to sale was 3167 chests of Patna and 2082 of Benares, the proceeds of which will exceed 70 lakh's."—*The Englishman, June,* 13

### EXTRAORDINARY SUPERSTITION.

*(From Bells Life in London, Dec. 25)*

Some very remarkable facts have just been brought to light at a trial that took place on the 9th and 10th of this month, at the Court of Assize *des Bouches de Rhone,* in France.

It must be mentioned, however, that, though the trial be so recent, the circumstances that gave rise to it happened twelve months ago. They were shortly these :

On the 7th of December in last year, a little after two o'clock in the morning, the watchman of an 'abatoir' in Marseilles observed something that looked white on the pavement close to the door of the charity hospital ; and on examining it closely he found it to be a corpse. At the same moment three persons, who appeared to have been waiting at the corner of the street, ran away and were not overtaken.

The watchman called for assistance, and two of the night patrol having come up, the body was ascertained to be that of a quack named Antoine Arnaud. The hands and feet were tied together, but the clothes were not removed ; and the head was covered withe several handkerchiefs, that served to conceal a large wound in the throat.

At the Hotel Dieu it was found that the body had been opened by longitudinal incision from the breast, which had been subsequently sewn up. The wound in the throat had divided several arteries, and must have caused death from excessive bleeding, though no blood was any where visible. The medical men were astonished to see that the intestines, the heart, the liver, and the various organs had been apparently torn from their places, and afterwards crammed into the pectoral and abdominal cavities, without any care or proper arrangement. Notwithstanding the rough manner in which they had been handled, however all the organs were entire, except the liver, of which nearly the half had been taken away.

Of course no time was lost by the police in making such an investigation as might lead to a correct knowledge of the facts of the case ; and they ascertained that the deceased had been some years resident at Marseilles, where he carried on the double profession of day labourer and quack-doctor. It seems that he took the greatest and most disinterested care of his patients, for it could not be discovered that he ever received money, except in a solitary instance, when 1,500 francs had been given him by a man in better circumstances than the persons who usually employed him. After a few inquiries there was good ground for believing that he had fallen a victim to a system prescribed by himself. His system of medicine was decidedly the most extraordinary ever heard of. When ever a patient applied he gave the following directions : —' I am about to take a soporific, & when I am asleep you will pierce my neck with a knife. (Vous me plongerez ou coiteau dans le col). The blood issuing from the wound will entirely cure your disorder.' It appeared that this singular prescription had often been followed, for numerous scars were observed in his neck. To his liver Arnaud ascribed still more wonderful properties than to his blood. 'If (he repeatedly said) I should apear dead, from loss of blood, give me some of my own liver to eat, and it will at once restore me.'

The police at length, after having arrested and examined several persons against whom there appeared no proof, traced the house in which the deceased had last been seen alive. It belonged to a young woman named Camille Viacal who had been for some time under his care. A long series of circumstantial, but seemingly decisive evidence, left no room to doubt that to the too faithful adherence to his own prescriptions by this woman and one of her friends the death of Arnaud must be attributed ; and the case was brought before the regular tribunals.

But here an unexpected difficulty arose. Notwithstanding the skill of the public prosecutor it was accordingly puzzling to know how to frame the indictment, Homicide had clearly been committed, but evidently without 'malice aforethought.' The death of the practitioner, was obviously the result of his own instructions ; and his liver had been evidently cut out for the purpose of preserving his life.

An immense crowd was present at the trial, when several witnesses proved the directions given by the deceased.

M. Lieutaud acting for the procureur-General, left the case entirely in the hands of the Jury, who discharged the prisoners.

## CORRESPONDENCE.

### TO THE EDITOR OF THE CANTON PRESS,

Mr. Editor,—Your correspondent "Star of the Legion of Honor" has, in his essay on 'Rewards and Punishments' launched forth such a severe and unmerited strain of invective against the character of the Duke of Wellington, that I am induced to request you will give insertion to some historical facts bearing directly on the charge alleged against his Grace, and containing the most unqualified refutation of very erroneous ideas entertained by many persons on that question.

The paragraph to which I allude is on record in your journal of the 15th instant, as follows " It is painful for an Englishman to discuss Ney's murder, it involves the character of a British Hero who barring this case never shed blood but in fair fight."— The facts opposed to so grave an accusation are contained in the following State papers published in the Annual Register for 1816.

" Copy of a dispatch from Earl Bathurst to the Duke of Wellington. Downing Street July 7th, 1815.

" My Lord,—Although your Grace has stated distinctly that the Convention entered into by you and Marshal Prince Blucher on the one hand, and certain French authorities on the other upon the 3rd instant, while it decided all the military questions, had touched nothing political ; and although it cannot be imagined that in a Convention negociated with these authorities by Prince Blucher and your Grace you would enter into any engagement whereby it should be presumed that his most Christian Majesty was absolutely precluded from the just exercise of his authority in bringing to condign punishment any of his subjects as had by their treasonable machinations and unprovoked rebellion forfeited all claim to his Majesty's clemency and forbearance ; yet in order that no doubt should be entertained as to the sense with which the article is considered by the Prince Regent, in conveying his entire approbation of the Convention, I am commanded to state, that his Royal Highness deems the 12th article of it to be binding only on the British and Prussian Commanders, and the Commanders of such of the Allies as may become parties to the present ratification of it."

To His Grace the Duke of Willington, I have etc *Signed.* BATHURST.

Paris, July 13th, 1815.

My Lord,—I have had the honour of receiving your Lordship's letter marked *separate* of the 7th instant regarding the Convention of the 3rd.

So the Convention binds nobody except the parties to it, viz the French Army on one side, and the Allied Armies under Marshal Blucher and myself on the other ; and the 12th article cannot be considered, and never was intended, to bind any other persons or authorities whatever, unless they should become parties to the convention.

I have Sir, the honor etc,
*Signed.* WELLINGTON.

The Earl Bathurst' Memorandum of the Duke of Wellington interview with Madame Ney communicated by his Grace to the Ministers of the Allied powers.

" It is extraordinary that Madame la Marechale Ney should have thought proper to publish in print parts of a conversation which she is supposed to have had with the Duke of Wellington, and that she has omitted to publish that which is a much better record of the Duke's opinion on the subject to which the conversation related, viz the Duke's letter to the Marshal Prince de la Moskwa, in answer to the Marshal's note to his Grace. That letter was as follows. " I have had the honour of receiving the note which you addressed me on the 13th of November, relating to the operation of the capitulation of Paris in your case. The capitulation of Paris on the 3rd of July was made between the Commanders in chief of the allied British and Prussian armies on the one part, and the Prince d'Eckmuhl, Commander in Chief of the French Army on the other, and related exclusively to the military occupation of Paris."

The object of the 12th article was to prevent the adoption of any measures of severity under the military authority of those who made it, towards any persons in Paris on account of the offices which they had filled or their conduct or their political opinions ; but it was never intended and could not be intended to prevent either the existing government under whose authority the French Commander in chief must have acted, or any French government which should succeed to it, from acting in this respect as it might deem fit." It is obvious from this letter that the Duke of Wellington, one of the parties to the capitulation of Paris, considers that instrument contains nothing which can prevent the King from bringing Marshal Ney to trial in such manner as his Majesty may think proper. The contents of the capitulation fully confirm the justice of the Duke's opinion. It is made between the Commanders in chief respectively and the first nine articles relate solely to the mode and time of the evacuation of Paris by the French army, and of the occupation of the British and Prussian armies.

The tenth article provides that the existing authorities shall be respected by the two Commanders in chief of the Allies, that public property shall be respected, and that the Allies will not interfere "en aucune maniere dans leur administration et dans leur gestion," and the 12th article says " seront pareillement respectes les personnes et les proprietes particulieres, les habitans et en general tous les individus qui se trouveut dans la Capitale, conformement a joulr de leurs droits et libertes sans pouvoir etre inquietes, sous recherches on rien relativement aux fonctions qu'ils occupent, ou auront occupes, ni quant a leur conduite et a leurs opinions politiques."

By whom were these privileges and persons to be in like manner respected ? By the Allied Generals and their troops, mentioned in the 10th and 11th articles ; and not by other parties to whom the convention did not relate in any manner. —The 12th article provides that ' les troupes etrangeres' shall not obstruct the carriage of provisions by land or water to the capital,

Thus it appears that every article in the convention relates exclusively to the operations of the different armies, or to the conduct of the Allies, and that of their Generals when they should enter Paris, and as the Duke of Wellington states in his dispatch of the 4th of July, with which he transmitted the convention to England " decided all the military points then existing at Paris and touched nothing political." But it appears clearly that not only this was the Duke's opinion at the time it was signed, but likewise the opinion of Carnot, of Marshal Ney, and of every other person who had an interest in considering the subject. Carnot says in the Exposé de la conduite Politique de M. Carnot page 56. " Il fut resolu d'envoyer aux Generaux Anglois et Prussiens une commission speciale chargee de leur proposer une convention purement militaire, pour la remise de la Ville de Paris entre mains, en donnant toute question politique, puisqu' on ne pouvoit prevoir quelles seroient les intentions des Alliés lorsqu'ils seroient reunis."

It appears that Marshal Ney fled from Paris, in disguise with a passport given to him by the Duc d' Otrante, under a feigned name on the 6th of July. He could not be supposed to be ignorant of the tenor of the 13th article of the convention, and he must then have known whether it was the intention of the parties who made it, that it should protect him from the measures which the King, then at St. Denis, should think proper to adopt against him. But if Marshal Ney could be supposed ignorant of the 12th article, the Duc d' Otrante could not, as he was at the head of the provisional Government, under whose authority the Prince d' Eckmuhl must have acted when he signed the convention. Would the Duc d' Otrante have given a passport under a feigned name to Marshal Ney, if he had understood the 12th article as giving the Marshal any protection excepting against measures of severity by the two Commanders in chief. Another proof of what was the opinion of the Duc d' Otrante, of the King's ministers and all the persons most interested in establishing the meaning now attempted to be given to the 12th article of the convention of the 3rd of July, is the King's proclamation of the 24th of July by which 19 persons are ordered for trial and 38 are ordered to quit Paris, and to reside in particular parts of France, under the observation and superintendence of the Police till the Chambers should decide upon their fate. Did the Duc d' Otrante, did any of the persons who are the objects of this proclamation, did any persons on their behalf, even then, or now, claim for them the protection of the 12th article of the convention?

Certainly, the convention was then understood as it ought to be understood now, viz. that it was exclusively military, and was never intended to bind the then existing government of France, or any government which should succeed it. The facts relating to Marshal Ney's political crime, his

trial and execution, are as follows. Napoleon escaped from Elba and effected a landing on the coast of France on the first of March 1815, and on the 5th the astounding news reached the Capital—Monsieur, the King's brother, immediately set off from Paris with Marshal Ney who treacherously kissed the King's hand and swore to bring the Invader to the Capital in an iron cage.

Marshal Ney issued a proclamation dated March the 14th describing the Bourbons as unfit to reign, and recommending his troops to join the august Napoleon, went over to the Usurper at Louis le Saulnier. Marshal Ney commanded a division of the French Army at the Battle of Quatre Bras, and led the Imperial Guard on the great and fatal day of Waterloo The City of Paris capitulated on the third of July. Ney fled in disguise on the sixth, and was arrested on the twenty fourth of July; by an ordinance of the King he was tried before the Chamber of Peers, found guilty, and was shot on the 7th of December 1815.

The foregoing statements convey their own Commentary and need no further argument, they are "nothing extenuate nor aught set down in malice." Marshal Ney's splendid career of military glory in the service of his country, his dauntless display of courage in victory, and his unshaken energy and firmness in defeat, justly entitled him to the well earned reputation of the "BRAVEST OF THE BRAVE." But Mr. Editor, when we award the meed of valour, justice should be our guide with this motto "A scorn of flattery, and a zeal for truth"

I have the honor to be,
Sir,
Your most obedient servant,
CHRISR. BIDEN.

Macao, July 22d, 1837.

## TO THE EDITOR OF THE CANTON PRESS,

### INSOLVENT HONGS.

Mr. Editor,—It must, I think, be plain to all, interested in the settlement of the affairs of the Hing-tae Hong, that it is far more the object of the Chinese to delay this, as long as possible, on any pretence, than to meet the demands fairly, all the assurances of the Viceroy, to the contrary, nevertheless and notwithstanding.

I need not, I fancy, point out the impression that this must work on the other Hongs, many of which are notoriously not in so sound a state as they might be, nor will it be necessary that the probable consequences to commerce in general in case this first failure under the free-trade should be got over by the Government and Co-hong, be more than hinted at. The title "Security merchant," as applied to some, particularly the recent hong-merchants, is, at best, but a farce, though the result may be tragic enough.

In this state of things it is most absolutely necessary that vigorous measures should be acted on, and that *generally*; for he who escapes to day may be caught to morrow, and it is not so much the cause of Hing-tae's creditors that will be taken up as that of all foreigners, now, or in future, to be concerned, with any of the Co-hongs. The season of imports is rapidly coming on; and what security is there, I would ask, in any one sale, that can be effected? Is it not time that something was done? You will say what is that something, and I will point out, as far as my lights will allow, subject to your correction or that of any other, better informed than I am.

Let a general petition be got up to government here, showing the most unsafe condition of the trade, and the miserable state of the Co-hong—Let a demand (as you and the Register have before suggested) be made as to the past, present, and future funds of the Consoo, and most important of all, let all work "heart and hand" together. I know that it is said that in Canton this is not possible, but I look on such an assertion as nonsense. In this all are concerned, and none are so foolish as not to work a little *for themselves*.

It is a paltry excuse of the Hong-merchants that *Yen-Kaesang* is not to be found—it is not their interest, nor their wish—nor theirs alone, but those of the government—that he should be forthcoming, and it is not for us *foreigners*, I apprehend, to find him. All that we are called on to ask for is JUSTICE—if, for the attainment of this, his appearance is necessary, let the Government find him, as it could, ere this, have done, had he owed heavy duties to the hoppo etc.

Excuses the Chinese will not want as long as they will avail—but what we have had serve as a sample. A succession of manly and strait forward appeals to the local government, with a broad hint of a visit to Peking, if necessary, might, and I think, would procure (as the phrase was, with Pitt, in the French war) "indemnity for the past, and security for the future," and without these, it seemeth to me, the foreign trade with Canton must soon cease to be more than an unpleasant recollection.

Your's, Mr. Editor,
ONE OF MANY.

## THE LINTIN TRADE.

Dear Sir,—It can scarce have escaped your notice that considerable trouble is caused, and no little harm done to the Opium market, by the great quantity of inferior Opium now brought for sale. This makes purchases difficult, and, in some instances, dangerous. With your leave, I will propose a plan which, I think, may, in a considerable degree, counteract this, while, at the same time, it will benefit a most deserving and obliging set of men, the Lintin commanders and officers. It would also allow the whole of the cumsha to go to the ship, which, in these times, is, it is generally thought, little enough to defray her expenses. I am, as you well know, neither a ship owner nor a Lintin *wallah*; and, therefore, my plan is disinterested; deem as you may of it's goodness.

I propose that, on all purchases of Opium, by foreigners, the officers of the ship, on board which it is, shall be paid a small fee for examination, and certificate of quality and weight; say one or two dollars per chest. I say *on purchase*, though I would like to see the plan carried to *all Opium when received at Lintin*—the owner would then be freed from all trouble, and the Agent from responsibility and annoyance; and that at so small an expense as to be not felt, while a stop might thus be put to the nuisance of orders issued ten or twenty times, in the hope that some smuggler, in a hurry, or in careless mood, may take bad Opium for good; and a check would be put on the sending of indifferent Opium to the China market. In case of a survey being necessary, a small fee should also be paid to each of the examiners. One good effect of this plan would be that every one could at once tell what he was buying; and a yet greater would be, that an encouragement would be held out to the Lintin officers to become well acquainted with Opium; as, when paid for a certified opinion, they would of course be particular in their examination. We are told that "the labourer is worthy of his hire" and I do not see why he should be less so because afloat at Lintin. You will, I have no doubt, see what I aim at, and may probably make something better of it than I have done. I see much in favor of some such plan, and nothing against it; but perhaps the best way is to let the public judge of it.

Your humble Servant, and
CONSTANT READER.

19th July.

# CANTON PRESS,

July 29th 1837.

## COMPANY'S FINANCE COMMITTEE

The following representation has been addressed to the Bengal Government by some of the merchants of Canton resident in Calcutta. We hope that their demands may be complied with, since much of the inconvenience hitherto experienced would thereby be avoided, and since there appears to be no means of dislodging the Finance Committee altogether from Canton.

To H. T. PRINSEP Esq.
*Secretary to the Government of India.*

Sir,—As Canton Merchants, and therefore deeply interested for ourselves and Constituents in the proceedings and operations of the Honorable Company's Finance Agents at that place, both as those operations effect Exchanges and Prices of Produce; we avail of the opportunity afforded by our accidentally meeting together in Calcutta, to unite in offering, with great deference, for the consideration of Government, the following propositions for the future guidance of their Agents in Canton, in the management and distribution of the advances which hereafter they may be instructed to make against goods consigned to England: and which, if adopted, will, in our opinion, prove of great convenience to the general body of the Canton Merchants, as well as tend, materially, to prevent a recurrence of those serious evils which are inseparable from a want of correct information upon the points which our propositions embrace.

The propositions we beg to submit are as follows; against each of which we have appended a brief observation.

Prop: 1. That the amount to be advanced by the Honorable Company's Finance Agents in Canton, against shipments of Goods to Great Britain, together with the terms of such advance, be made known by public advertisement in Calcutta and Canton, as early as may be convenient.

Obs: 1. The importance of the information hereby sought from the Government, to all parties interested in the trade, whether in Calcutta, Canton or Great Britain, is so obvious, and the request, as it appears to us, in itself so reasonable, that we forbear to offer a single remark in support of the prayer.

Prop: 2. That the Honorable Company's Agents be instructed not to receive applications for advances until they are satisfied that the Goods are ready for immediate Shipment.

Obs: 2. With respect to this proposition it is only necessary to remark, that hitherto it has been the practice in Canton for the Honourable Company's Agents *to register* applications for advances against Goods to be shipped before 31st December in each year; which advances have frequently not been claimed for many months thereafter: that in many instances, it has occurred that that the whole of the sums thus registered by individual firms his never been taken up:—and further, that the amount appropriated by the Honorable Company has been so rapidly subscribed for that individuals have been excluded all participation therein.

Prop: 3. That the period within which applications for advances, hereafter, can only be received, be extended to the 30th April in each year, unless the entire amount to be advanced shall have been previously taken up, in which case notice shall be given.

Obs: 3. An extension of the period for receiving applications for advances from 31st December till the 30th April (when the monsoon generally changes) would embrace what may be considered the Commercial Year, & thereby enable the merchants of Canton to make their shipping arrangement with greater deliberation and more certainty than they possibly can whilst confined to the former very contracted period—moreover a large portion of the Teas do not arrive in Canton till the new year; consequently all such are necessarily excluded (unless the Company's Treasury should reopen) from being hypothecated with the Honorable Company.

It may further be observed, that in consequence of a protracted dispute last season, between the Teamen and Hong-merchants, about fixing the prices of Teas, the period within which the Company's advances could possibly be availed of was actually limited to something less than *three weeks* in consequence of which many houses were excluded from a large portion of the amounts registered in their favor; and as the Chinese merchants will know that most of the Canton houses had arranged for the payment, in part, of their Teas, by taking up advances from the Honorable Company, they were thence enabled to combine for the purpose of unduly forcing up of prices to a most extravagant height, and with more certain effect, than if the period for availing of such advances had been extended, as we now suggest, to the 30th April.

Prop: 4 That the Honorable Company's Agents be instructed to furnish to all parties applying, a memorandum of the amount that may remain from time to time in their hands unappropriated, of the sum originally advertised for advances; a facility which we believe has at all times been granted to the merchants of Calcutta, & by which they are enabled to make their arrangements with greater precision than would be possible were they debarred that privilege.

We are aware that application is intended to be made to this Government "that instructions be "sent to their Finance Agents in Canton, to assi-"milate the rate of the Honorable Company's Ex-"change to the current rate of the day for Private merchants Bills," but as doubts exist amongst some of the Canton merchants now present in Calcutta, of the expediency of such a measure, we have withheld our consent from that application; deeming it more proper that when the sense of the majority of the Canton merchants shall have been taken upon the question, their Chamber of Commerce will be a more proper organ of communication thereon with the Indian Government, than the small number of Canton merchants now accidentally assembled in Calcutta; who can only be regarded as acting for their individual interests in their present application to the Bengal Government.

The whole, or the greater part, of the propositions we have now the honor to submit, having been in practical operation in Calcutta since the period of the Honorable Company granting advances against goods, and without prejudice, as we believe, to their interests, we trust, on examination, that no difficulties, will be found to exist against an equal extension of the facilities sought, to the merchants of Canton.

We have the honor to be,
Sir,
Your most obedient servants,

Calcutta.

---

We have but few arrivals to notice this week, and those of little general interest with the exception of the *Water Witch* whose arrival we had just time to notice on our last page last week. The *Lowjee Family* has since come in, and the *London* from Java, but without adding to our stock of foreign news. There have been rumours of the arrivals of other ships which we think may have chiefly originated in the *hope* of seeing them cast anchor; it is not unfrequent in this corner of the globe to see "coming events cast their shadows before." The so much desired intelligence of 1st April still keeps out, but that is in character.

We give below the results of the first meeting of the Committee appointed to take into consideration the claims from foreigners on the Hing-tae Hong. We understand that the Committee has since met daily, and that they are proceeding in the investigation of accounts, several of which, we believe, have been settled to the satisfaction of both parties, and we hear that one of the most knotty points, viz. the charge for interest on money lent or owing is now before them. After this shall have been agreed on, we suppose that the labors of the Committee will be much simplified, and that, as far as recognition of claims goes they will henceforward not encounter much difficulty. The greatest obstacle which we foresee, but which it is without the attributes of the present Committee to determine, is the principle on which payment is ultimately to be made. We are afraid that the old german adage "wo nichts ist da hat der Kaiser sein Recht verloren" will prove true, perhaps in part only, in this instance. However we must hope for the best. The nominal Hong merchant, Yen-Keehang still continues, as far as we can learn, in prison, and his brother Yen-Ketseang, the active partner, but who, after Lord Napier's adventure, has had his name expunged from the Hoppo's books, is still where nobody can find him. After the accounts therefore shall have been audited and defined by the present committee, the real question, as to how payment is to be effected, must be discussed. We are by no means sanguine as to the result, turning in favor of foreigners, though the Governor has hitherto expressed himself favorable upon the whole, with the exception of being now and then annoyed at the pertinacity of the *generality* of creditors pursuing him with their memorials, as well as with the *familiarity* of expression to the representations of individuals, which latter however, otherwise, we are told, he has treated with much more indulgence".

We have to notice the contributions of several of our Correspondents. Captain Biden is too able a defendent of His Grace, for us to say either any thing in favor or against the Duke of Wellington. We do not much meddle with European Politics, conceiving China a spot ill adapted for such discussions.

ONE OF MANY of the sufferers by the Hing-tae failure will find his wishes as to unanimity and acting in concert anticipated. We have, as we have said above, the best opinion of the results which the present committee will elicit by it's labors, which are altogether confined to the auditing of the several accounts. After that shall have been accomplished, and after the net balances against the Hong shall be the only forces the Co-hong has to contend with, the "ways and means" of how to meet them, must be discussed, and we fear not but that unanimity will so far prevail as to make all "*work a little for themselves*," where there cannot be many different ways to chose to come to the result every one is anxious for namely, speedy payment.

We are obliged to "*A constant Reader*" for his communication, on the subject of bad quality of Opium now so frequently imported from Bombay, and from which many of the importers have been losers to a considerable amount. We have hardly had time to weigh well "a constant reader's" proposition, but we do not hesitate to say that many objections to it present themselves to us; but we have not yet well considered the subject, and shall therefore give it our early attention, and probably, next week, offer a few remarks. This subject presents many difficulties, the first of which is: will the Chinese abide by the certificate or valuation of the officer in command at Lintin? Will they consider Opium good because he does so? And, is not an intimate knowledge of the drug necessary before any body is able to give a certificate like the one our Correspondent demands? How is such knowledge to be acquired, or even, if acquired, how are we to induce confidence in it? We shall however recur to this subject, probably in our next.

## HING-TAE AFFAIRS.

First Meeting of the Committee appointed for the examination of Hing-tae's accounts with Foreigners.

CONSOO HOUSE CANTON, JULY 25th, 1837.

Present, HOWQUA, MOWQUA, PWANKEQUA
DENT, ARCHER, GREEN.

It was clearly understood that in the investigation of all accounts and differences, the decision of the Committee should be final as to the amount justly due to each claimant, and that the sum agreed upon should in no case admit of future question by Hing-tae, Hong merchants, Mandarins, foreigners, or any other party.

It was unanimously agreed that the accounts shall be taken up successively for examination, commencing with the lowest and proceeding to the highest, excepting those of Dent & Co., Russell & Co., and Wetmore & Co., in which the three foreign arbitrators are interested, which are to be postponed to the last.

The Hong merchants present informed the foreign arbitrators that answers to Hing-tae's objections to the accounts rendered to the Co-Hong, had been received from only three or four of the Creditors, and it was therefore decided that each should be called upon for their explanations, as their respective accounts came under examination.

To facilitate the business of the Committee it was determined to appoint a Chairman, whose signature in the name of the Committee to all communications and decisions shall be equally valid as if the same were signed by all the Members

The Committee then adjourned to meet to morrow, July 26th at 10 A. M. at the same place.

In the name of the Committee.
LANCELOT DENT.
*Chairman.*

---

*Melancholy accident.*—On the 23d inst. in the afternoon three gentlemen left Whampoa in a sailing boat on their way to Canton, when, having proceeded as far as the first pagoda, a heavy squall came on which capsized the boat, and, we are sorry to say, one of the party, Mr. John Everard, was drowned. The other two were saved by a Pilot-boat sent to their assistance by a Chinchew Junk then passing, the crew of which received them on board, treated them very kindly, offering them dry clothes etc., and sent them back to Whampoa in a boat. Had a Mandarin-boat, which was just passing when the unfortunate accident happened, behaved with equal humanity, there is little doubt but that Mr. Everard's life would have been saved, but the crew in that boat passed the sufferers laughing at and insulting them. The body was found by Chinese, who had been dragging for it, on the next day, and on the following was interred at Whampoa, several of the deceased's friends and other foreigners accompanying the funeral.

# DIED.

At Macao, on Sunday the 23d instant, THOMAS RICHARDSON, the second son of T. R. Colledge Esq. surgeon to this Majesty's Commission, aged eighteen months.

At Cap-shuy-moon, on the 25th June last, on board the *Jane*, CAPTAIN JOHN CROCKETT, aged 50, years.

[illegible]

* Vide Canton Register of 25th July.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874756 of a Tl. per cubit.
2nd ,, ,, 1200 do. & under 1600 ,, 0.7221091 ,, ,,
3rd ,, ,, under 1200 do. 0.5062341 ,, ,,

N.B. The cubit is 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products. The largest class pay from $ 43.0 to $ 4300; 2d class from $ 3700 to $ 3720; 3rd class from $ 3700 and under. The Canshu; or Present Fee is paid by all vessels 1600 Taels or $ 2223. Linguists fee $ 173½ and Comprador's fees $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Recinden ships are charged only about $ 1300 in lieu of measurement &c.,

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—The demand continues lively for Long-cloths of which there are none in first hands. The first arrivals would sell at fair prices.

COTTON YARN.—continues in fair demand at our quotations.

WOOLLENS.—We have no change to notice in these since our last.

RICE.—continues as low as before with no prospects of any early improvement.

STRAITS PRODUCE.—2 to 300 Piculs of PEPPER have been sold within this day or two at $ 8; little or none remains in importers hands.

TIN.—is selling slowly at our quotations. RATTANS are in more demand.

SANDALWOOD.—The demand is not quite so brisk,—the reports from the northern markets being less encouraging.

COTTON.—The market has been rather inactive in all descriptions during the week, and the brokers are not offering within 2 @ 3 mace for fine COTTON, having experienced some difficulty in obtaining saving prices for their previous purchases. The floods, which are said to have been very heavy in some of the neighbouring districts, have been no doubt partly the cause of the decline. Old COTTON is selling at a great sacrifice, and even then with difficulty.

OPIUM.—There was more enquiry for new Patna in the early part of the week, and several small sales were made at the previous currency, but the demand appears again to have slackened. New Benares is nominally held at 670, but since the arrival of the *Water Witch*, it would have been difficult to dispose of it within $ 10 @ 15 of that quotation, but we do not think there have been many new purchases lately—the clearances being generally of old bargains. It is said that the smuggling boats will be stopped again in a day or two. but we can hear nothing of the cause or probable duration. The deliveries up to the 22nd were:

Patna, *Old*, 15. *New*, 441; Benares, *Old*, 25½, *New*, 131; Malwa, 2780; Total 3,392½ Chests.

### EXPORTS.

The Exchange on England is nominal at 4s. 8d. No bills in the market.

## JAPAN.

*Chinese Repository for July.*

ART. I. *Remarks on the Japanese language: the subject but little understood: character of the oral language: its different forms, and grammatical structure.* From a Correspondent.

THE works written upon this country are very numerous, and partake of all the errors of Kæmpfer, their common source. Whatever he wrote, about a hundred and fifty years ago, is reiterated, with some additions, by almost every subsequent author. Like Du Halde's, his folios contain a mass of valuable information, the most authentic that can be obtained, but at the same time sadly disfigured by prejudice. Hence the opinion of the tranquil state of that empire, whilst grinding oppression and the feudal system are fraught with evils subversive of all good order. The rebellions, as we are informed by natives, are bloody, and the acts of government cruel. A dense population and the barrenness of several districts make famine a frequent occurrence. Then the number of desperadoes increases, order ceases to exist, and all the horrors of the most sanguinary revolution take place, with unbridled fury. Hitherto, however, the supreme government has always been enabled to quell these disturbances; while the leaders have been obliged to betake themselves to the mountains. It would have been impossible to retain in allegiance the many feudal princes, amongst whom the territory is divided, if resort had not been had to most arbitrary measures. These princes are either themselves prisoners at Yedo, or else, during their absence from the palace, send their wives and children as hostages. The same precautionary measures, for ensuring the fidelity of influential persons, are adopted in all branches of government; an officer dies with trembling his station. Yet even the laws of a Draco, written with blood, cannot fully establish absolute despotism. The rigid system of responsibility is there accompanied with the same result as in China, all-providing corruption and bribery. In speaking thus, we do not give our opinion, but merely record the sentiments of natives who are enthusiastically fond of their country, and always ready to represent their nation in the most favorable light. It is time, however, for foreigners to consider the welfare of a nation so long neglected.

The grand features of the Japanese, do not differ much from those of the sons of Han. That government is in the main, the same as the Chinese. Their philosophy, religion, literature, &c., were derived from China, but have received additional polish from the natives. Persevering industry is the most redeeming quality in the character of the people; they are moderate in their diet, living almost entirely upon vegetables and fish; but they indulge in spirituous liquors, and in every kind of licentiousness, to far greater excess than the Chinese. They are not, in the same degree, slaves to antiquated customs, and are shrewd observers and imitators of whatsoever they consider excellent amongst foreigners. When they were permitted to leave their country, they served with great credit in the armies of the Dutch and the king of Siam, and were even more useful than the Chinese as colonists. In their struggle, however, against the Roman Catholics, they had to invoke foreign aid, and it was only thus that victory was decided in favor of the pagans. The story related by Kæmpfer, about the attack upon a Spanish vessel, stands on a par with the fishing edicts of the ecclesiastics; and the account of barbarian vessels, which were loitering about in the inner seas, having been burnt and sunk by the courageous and invincible navy, are equally worthy of credit. The best comment upon the same heroic exploits, is an account we read in a late periodical, stating that an English frigate, having returned to the harbor of Nagasaki, it was resolved to burn her with straw, which a number of small boats, each rowed by three men, were to carry along side of her!

The exclusive system which the Japanese have long maintained is more owing to the willingness of foreigners quietly to submit, than to the actual strength of the government. If the power of the foreigners, which was employed to crush the Portuguese influence, had been used to maintain a liberal intercourse, Japan would have remained open to foreign commerce, according to all human probability, until this day. However, at no resistance was made, and every degradation submitted to, for the sake of visionary advantages, it was very easy to perpetuate this misanthropic absurdity. Let foreign influence be felt, and this unnatural prohibition will be annihilated. China and Japan placed in a similar situation as Turkey and Egypt, would soon have done with their vain and whimsical notions. The only safeguard of this embargo, which excludes the whole human race, results from the enmity of foreign powers; as soon as this is exchanged for a friendly interest in the real welfare of this nation, the rulers will soon be constrained to abandon their crooked policy. Only those in power uphold it; the struggle, therefore, when popular influence is once felt, can neither be long nor arduous.

Allowing that the substance of the statement respecting the antional conduct of the Japanese government be true, yet we ought, in fairness, to adduce the instances which show that it has often been relaxed. The attempts made by sir Stamford Raffles to open a trade with that country, are by no means very disheartening as to preclude all further hopes of success. A small British schooner, which subsequently went to a place near Yedo, was well treated and had intercourse with the natives. A whaler, a few years ago, went into one of the harbors and was not only well received, but most amply supplied with all kinds of provisions. A captain meeting with a Japanese junk, which had suffered very much in a gale, went on board of her supplied the vessel with a compass and water, and received in return a casket of gold bars, a present which the Japanese gave entirely on their own account. We receives have been on board of some of their junks, and met with unreserved kindness. To this we must add, that the present monarch, Teompen, is an enlightened man. A gentleman who twice went as an ambassador to the court of Yedo, and who had a long and interesting conversation with him, when he was presumptive heir of the throne, has spoken in high terms of his liberal sentiments. When the choice of presents for the ensuing embassy was proposed to him, he preferred a Dutch nautical dictionary to every other thing. We know that, some years past, commercial intercourse between the princes of Satsuma and an English house is to have been commenced; and that the individual who took the lead in this speculation, having previously become acquainted with this chief, was only prevented from accomplishing his purpose by the most untoward circumstances. The supreme government went even so far as to consult with a Dutch chief upon the feasibility of dispatching young men to the mother country, that they might be instructed in ship-building. These well authenticated facts may stand as counterparts to the continual cant, that there can be nothing done for this country. This, however, is certain, that hitherto nothing has been done. We conclude our prefatory remarks with the observation of a Japanese writer, who, in the preface to his Dutch-Japanese dictionary tell his countrymen: "that Asiatics, in general, are to be compared with wood, whilst Europeans resemble iron; now as the former will remain a shapeless block, unless it is fashioned by iron, so also the Asiatics, without intercourse with the Europeans, will continue rude and uncivilized tribes."

After this long digression, we proceed now to speak of the language of the Japanese. We ought, however, to inform the reader, that our remarks will be confined to the oral medium, from which the language of books differs very considerably. In performing this task we are not the first to venture upon this ground. The Jesuits of olden time have bequeathed numerous vocabularies, dictionaries, and grammars, the only fault of which is, that they make the Japanese assume the garb of the Latin. The language, moreover, has been amply cultivated by the natives themselves, who have compiled dictionaries and grammars in European fashion, and of their own accord published Chinese and Dutch dictionaries with explanations in their own tongue. In this matter they have far excelled the celestials, whom in the way of reciprocal compliment, they honor with the title *barachs* or barbarians. The Dutch themselves have also written a few works, or compiled them, in conjunction with natives; but of all these we have seen very little. The Japanese may be said to be an original language, which coincides somewhat, in its grammar, with the Mantchou, bears some affinity to the Corean, has imported a great number of words from China, and is, on the whole, the most polished and perfect language spoken by any of the inhabitants of Eastern Asia. Language constitutes the best clue for tracing out the origin of nations. We were rather astonished to find so much similarity in its sounds to those of the Mantchou, and therefore concluded, that the great and original stock of the inhabitants of Japan came from Tartary. As this emigration, however, took place in remote antiquity, we shall not enter upon a disquisition for determining the exact period. Though the Chinese language is of a most uncongenial nature, and might as easily conform to the idioms of the Japanese, as the Greek mix with the Russian, yet it has in some measure been amalgamated with the Japanese. For this process it has undergone far greater changes then the Latin, in the dialects of Southern Europe, and but few words have entirely escaped the general lot. China, according to the best authenticated accounts, sent a colony to that country as early as 300 B. C. The further progress of the intercourse is hidden in the darkness of ages, long past. Yet at the time of the introduction of Chinese civilization, the natives must have been in a rude state, the majority of abstract words being all Chinese: in numbers, there are no original words for a hundred and upwards, and all the arts and sciences have received a Chinese nomenclature, though now scarcely to be recognized as such.

---

ORIGINAL TRANSLATION.

### THE MINISTER HUNGMING.

On Hungming's return to the principal encampment he ordered the soldiers to dig wells and search for water. Having dug several more than 20 chung (about 230 ft.) deep without finding any water, they tried in other places, but with no better success, so their hearts began to fail them.

Hungming, fully sensible of the dreadful situation in which he and his army were placed, one night prepared an offering of incense, and addressed the following prayer to heaven;

"Altho' I, the statesman Leung, possess no talents, yet have I the felicity to be a servant of the glorious Han dynasty. In obedience to order I am now on my march to subjugate the *barbarians (man)*. Having halted in this plain, I can find no water, and my men and horses are withered with thirst. Do not, O ye mighty heavens, entirely exterminate the glorious Han dynasty, by longer withholding water from servants for if you relent not, I, the statesman, and my army shall never leave this place, alive."

He then concluded his devotion, and retired to his tent. When he rose the next morning from a sleepless couch, he discovered to his great joy, that all the wells were overflowing with beautiful water.

A Scholar, on hearing of this wonderful occurrence, composed the following stanzas:—

He marched, with gallant armament,
The rebels to subdue;
He chased them to their barb'rous lairs,
He routed and he slew.

The victory gain'd, the troops recalled,
His head prostrated low,
"Where e'er the Gods direct my steps,"
He vowed, "there will I go."

Guided by them, he pitched his tents
On a wide and barren plain,
Where the herbs and trees were withered up—
For the Gods denied them rain.

His warrior's bold, and gallant steeds,
Invincible in fight,
By maddening thirst, were driven, soon
To mutiny and flight.

When darkness o'er the camp had spread,
An offering he prepared;
In prayer he lifted up his voice
"O let my troops be spared!"

The morning comes; with the gushing springs
They mingle joyful tears;
"The generals' prayers are heard" they shout
"May he live ten thousand years."

## PORTUGAL.

LISBON, MARCH 1.

Since my last communication to you on the 23d inst., Ministers have succeeded in contracting a loan for 900 contos out of the 900, at a great sacrifice, with a M. Borges, who is to pay down one-half in cash, and the remainder in promissory notes, passed to the public employes during Don Miguel's time. These notes being of little or no value to the holders, he bought up at the very reduced price of 8d. and 10d. for each 100d. As a security for the payment of the sum he is to receive bills upon the Lisbon Custom-house, a commence payment on the 1st of June next, and he has the option of employing any quantity of the bills in the purchase of national property. But M. Borges re-considering that the number of bills already issued upon that department would preclude the possibility of his being paid for a considerable length of time, unless its revenue should increase far beyond the amount at which it is at present calculated, prevailed upon the Minister of Finance to sell immediately a portion of the national property situated in the Alemtejo, which he has for some time past had in view. This has been an exceedingly advantageous transaction for him, as he will realize nearly 100 per cent. in the space of two months.

A rumour has been in general circulation that the 4th Regiment of Infantry, stationed at Elvas, had sacked the city; but on inquiry I find it requires confirmation. Luiz Mousinho d'Albuquerque and M. Pastana, the deputies elected for the Island of Madeira, have refused to take their seats in the Cortes, alleging as an excuse that they cannot conscientiously take the oath to the constitution of 1890. M. Francisco Antonio de Campos, well-known from the circumstance of his having been twice secretary for the Finance Department, and at present residing in Paris, has been created Baron de Villa Nova de Fossoa, a town in the province of Tras-os Montes.

The British brig of war Chameleon sailed yesterday for St. Ubes, as a disturbance is apprehended there, in consequence of the Government not having, as yet, applied any measures to take up the quantity of counterfeit copper coin in circulation there, and which presses heavily upon the poor and labouring classes; and the Pearl corvette this morning, with secret orders, it is conjectured, for the coast of Algarve.

The Linnet and Camden packets have arrived, the former on the 26th ultimo, and the latter on the following day. These being three packets now in this river is the cause of a mail closing this night for the Nightingale by which this goes.

His Majesty's ship Pembroke sailed on the 27th for Cadiz, Gibraltar, and Malta.

Foreign Ships of War in the Tagus.—British, Hastings, Malabar, Russell, and Minden, and Linnet and Camden packets. French frigate, Dryad.

Exchange on London, at 30 days' sight, 35½, per milrei. Discount on paper-money, 37 per cent.

A. Y.

P. S.—Antonio Esteves Costa (a banker), a very rich capitalist, who was created Baron of Piccas by Don Miguel, and Viscount of that title by Don Pedro, died last evening intestate. It is said he has left about 600,000£ sterling, which will be divided among his sisters and nephews.

Brigadier Baron do Rio Sabrosa (Pinto Pizarro), who was confined in the Tower of Belem for a considerable time after the restoration, for writing a pamphlet against the Regency of Don Pedro, is appointed to command the forces, about 3,000, destined for the Algarva.—*Times, March 13th 1837*

### DEATH OF MR. DAVIDSON THE ARMENIAN TRAVELLER.

The following paragraph, sent to us last night confirms the melancholy intelligence (which we had some slight hope might prove undounded) of the death of Mr. Davidson;—"At the meeting of the Royal Geographical Society yesterday evening the melancholy intelligence of the death of Mr. Davidson, on his way to Timbuctoo, was confirmed by letters of the 15th of February received the previous morning at the Foreign—office from that British Vice-Consul Mr. Willshire. It appears from the letter read to the society that the traveller was committed on the 19th or 19th of December by the El Herth tribe, at about 56 days' journey from Timbuctoo"—*Bombay Courier, June 10th.*

---

ENGLAND.

## MISCELLANEOUS.

*(From February Papers.)*

It was observed by a member of the long robe, on the commencement of the great Conservative victory at Evesham, that Lord Mowbray Hill, inhabited the old English proverb, "They who play at bowls must expect rubbers".

SINGULAR CONTRADICTION.—It is not strange that one of the oddest animals in the Zoological Gardens is the *ostrich*, *Minerva*.

A PUN OF THE LATE JOHN BANNISTER'S.—"Dr. Spurzheim was lecturing one day on phrenology in the presence of this facetious comedian. What is considered to be the organ of amusement?" said the professor; "the beard organ," promptly answered our actor.

NAVAL ANECDOTE.—After the capture of Guadeloupe by Admiral Sir A. Cochrane and General Sir G. Beckwith, in the year 1810, the governor of the French Isle of Bourbon, in the name of the French King, demanded the restitution of the island. The British attention was arrested by a single word in the letter, which painted "*Bons citoyens et peuple.*" The British commander, upon whom was chosen interpreter, who thus explained it—"*Some stewed and fried.*"

ONE OF LORD JOHN'S WOULD BE RIGHTERS.—"The following *tit-my* production is not less than a curiosity of literature, sent by the author (who, from his high mental qualifications, is necessary to us Union) to the guardians of the poor of a parish on the south-east side of Blackfriars-bridge; and a genuine specimen our readers will find it:—

'SIR,—I beg most respectfully to solicit the favour of Your vote at the ensuing election for Registrars of Births and Deaths. The Parish having been divided, I intend becoming a candidate for the Borough Road District. I have resided in the Free-hom 3 years, nearly twenty four Years and have been a ratepayer for nearly twenty six should I be so fortunate has to obtain your Vote and be Elected, no effort on my part shall be wanting to fulfil the Office with every degree of Credit to myself and satisfaction to the Parish.

'I am Sir Your obedient Servant,

* * * *

'*January 27th.*'

ELECTRO VEGETATION.—A salad consisting of mustard and cress (says a recent writer), may be produced by means of the following process:—Saturate the seed for two or three days in diluted aquafortis acid, after which sow it in a very light soil, and place over it a metallic cover; on being it in contact with the electric machine, and the plants will be produced in a few minutes: by the same agents which are employed in this process, eggs may be hatched in a few hours; rain-water, apparently free from animalcules, in an hour can be rendered full of living insects; water, in a short period, separated into its two component parts, oxygen and hydrogen, and by the same power restored to its former state; and plating, the most difficult of the metallic arts, is performed and completed by the discharge of an electric battery. An hour later, by the discharge of a sufficient accumulation of the electric fluid, will become magnetic to such a degree as to lift more than its own weight; and if a pound of red lead and a pound of sulphur be mixed together into a mass, which no human ingenuity can separate, by exposing it to a stream of the electric fluid, it will, instantly be restored to its component parts.—*The Englishman, June 3rd.*

---

## BOMBAY.

*(From the Bombay Gazette, 11th June.)*

We have to record the occurrence of the severest gale that has visited Bombay within the memory of man. The wind which was at E. on the morning of Thursday last, freshened up about 3 o'clock A. M. and it veered round to S. S. and S. S. E. and gradually increased 'till about 2 past 8, when it blew a terrible hurricane; the Wonder in the Harbour drove at their moorings,—ran foul of each other, and several of them unfortunately swelled on shore. No language can describe the scene of confusion that the harbour presented about 9 P. M. when the gale abated a little; the bay was strewed with bales of cotton and part of the wrecks of boats and ships; in the back bay the dead were washed out of their graves and floated about the shore, the roofs of houses were

torn off, trees blown down, and buggies and other conveyances were capsized. There was scarcely a dry house on the Island; and goods to a great amount destroyed in the godowns. But, perhaps, nothing can shew the strength of the wind more than the state of the ligh thouse during the gale, for strongly built as it is, it tottered on its base, and seemed momentarily on the point of falling. The officer in charge was blown off his legs, and the copper roof of his Powder Magazine forced off entire, and pitched on the roof of an adjoining guard-room, which it completely demolished.

The Buggies and other conveyances that attempted to cross the green in the morning, were forced back by the strength of the gale, and the rain cut once face like a hail-storm in Europe; Indeed no house could or would face it; the roofs of some terraces were carried away in the mass, and were to be seen floating along on the wind as if they had been but mere pulicat handkerchiefs.

The following is a list of Vessels bilged & injured:

*Edinburgh* 1,414 tons.—On shore at the Borah Bunder, discharging cargo.

Ship *John Stamp* 400.—On shore at Borah Bunder, taking in water also discharging cargo.

*Adelaide* 338.—On shore at Borah Bunder, with loss of Main and Mizen masts and rudder; bilged.

*Aurora* floating Church.—On shore at Borah Bunder, with loss of rudder;—bilged.

Ship *Ranger* 516.—On shore at Juren Bunder, totally dismasted and broken up.

*Great Harwood* 400.—On shore close to flag staff shoal, bilged; full of water.

*Hind* 476.—On shore close to the Mint; total wreck.

Brig *Corsair* 127.—Dismasted—afloat, but making water.

Ship *Mary Dugdale* 375.—On shore, to the North of Masagone, bilged, discharging cargo.

*Richard Webber* 381.—On shore near Ship *Ranger* totally dismasted Rudder gone, broken quadships,—complete wreck.

Brig *Rapid* 282.—On shore off Muajid bunder, bilged, with loss of rudder.

*Northumberland*.—On shore at the Custom House bunder; bilged.

E. I. C. *S. Hastings*.—On shore at the Custom House bunder, loss of rudder; making water.

Ship *Briton* 503.—On shore at Colaba near the Gun carriage manufactory, total wreck, with loss of 3 men and 1 passenger, Mr. Campbell, late of the Steamer *Atalanta*.

E. I. C. Brig *Tapter*,—Dismasted.

E. I. C. Steamer *Hugh Lindsay*.—Parted her moorings; got foul of the *Berenice*, lost her paddle boxes, cut water, figure head, and suffered other severe damage.

E. I. C. Steamer *Berenice*,—Parted her moorings, was fouled by the *H. Lindsay*. lost her figure-head, boats, and suffered other serious damage, run up to Masagon.

*Julia*.—On side, but got off this morning, about 11 A. M. Damage sustained not precisely known, but supposed to be trifling in comparison with the others,

---

FROM A CORRESPONDENT.

On Wednesday evening the weather suddenly assumed a threatening aspect, and about half past 9 on the Thursday morning the monsoon seemed thoroughly set in with a degree of severity greater than what has been experienced here for many years, even in the memory of that gentleman of never failing recollection—the oldest inhabitant. During the course of the day the storm increased to a perfect hurricane, the effects of which have left this harbour a picture of its desolating influence. Viewed from any of the piers, out of nearly 80 vessels which, three days ago lay, to all appearance, secure, scarcely more than are to be found which have not to all appearance more or less suffered from the gale. Among those which were driven from their moorings, the *Northumberland*, a Liverpool Trader, now lies abreast of the Custom-house steps, and the *Hastings* receiving Ship, which at one time had seven feet water in her hold, is at the old Bunder Head opposite to the Dock pier—some idea may be formed of the manner in which the latter vessel laboured, even when brought so close in shore, from her having destroyed a large portion of the old Bunder pier, to which she lay so near that one might step with ease upon her deck from the shore. The *Bellow* outward bound is a total wreck; the cotton with which she was principally laden having swoln from being wet she may literally be said to have burst. A young Officer who was proceeding Home in her for the benefit of his health has perished as well as three European seamen. Three others we have been given to understand after coming on shore died in the European General Hospital. The *Mary Dugdale*, *Richard Webber* and *Ranger*, with the exception of no lives having been lost, have suffered in an equal degree. The *Rapid*, *Great Harwood*, *Hind*, *Edinburgh*, *John Stamp*, *Adelaide*, *Floating* Chapel *Aurora*, *Corsair*, and *Tapter*, have all suffered, some partially, others very seriously. The *Hugh Lindsay* and *Berenice*, having been driven against each other are much shattered Enormous sums were offered by Commanders desirous of going on board their ships, but in no case could a single boatman be prevailed upon to push off from the land. Nor was the fury of the elements confined to things afloat. Upwards of 600 houses in the Native town have been destroyed, and in the Fort, the Courier office and that of Messrs. Ritchie, Stewart & Co. have been materially injured. The proceedings of the Supreme Court were suspended, the Chief Justice upon his arrival in Town having adjourned business to next day. Upwards of 200 European seamen will, we hear, be thus thrown destitute, a circumstance which we hope it is only necessary to mention to excite that sympathy with their distressed condition, which Bombay has so often displayed upon every similar occasion.

*Communicated from Singapore.*

---

STRAITS TIN.

The merchants of Singapore have, we know, more than once had reason to complain of the treatment which their consignments of Tin have experienced in Canton and Calcutta, but more particularly at the former port, where a great deal of pains has been ur- sentence taken to bring the whole into disrepute, and to reflect injuriously upon the shippers of it, and where also the interest of the Singapore constituent has been frequently subjected to the most inordinate sacrifice, in consequence of some alleged impurity in the shipments of Tin which he has made to that quarter. Of this the following interesting particulars of a case of which we have been put in possession, enable us to lay before our readers a startling example.

In the month of January last, Messrs A L. Johnston & Co. of this place bought from Messrs. Hamilton, Gale & Co. a quantity of Tin, which the former shipped on board, of the *Rob*, and consigned to Messrs. Shaw & Co. Canton. The Tin was from Junk Ceylon, and in small square pieces, and at the time of the bargain being made between the parties for the purchase and sale of the Tin, Messrs H. G. & Co. were in the act of smelting it so as to have it run into slabs of the usual size, and 58 were completed, stamped on the bottom with the initials of that firm, and also marked "Pure," the purchasers dispensed with the remainder being examined, and shipped the whole parcel, the small unmelted pieces being cast into packages of gunny. On arrival in China the Tin was sold at Dls. 28 per picul; but when the purchaser, Mowqua, was in the act of receiving it, he objected to the 58 slabs on the ground of their being of inferior quality, and claimed a reduction at the rate of 1 ms. 13 per picul on the rejected portion, which was allowed by the consignees.

A paper in the Chinese language, stated to be a certificate as to the inferior quality of the 58 slabs refused, was sent down here to Messrs. A. L. J. & Co., accompanied with 5 pieces of Tin as musters of the whole consignment, four of them being of the rejected Tin, and one of that which was received as unexceptionable. These musters were marked A, B, C, D, & E,—B being the mark of that portion of the shipment which was approved of in China; and together with a muster of Penang and another of Banca Tin procured here, and marked F. & G. were forwarded by that firm to Mr. Prinsep the Assay-Master of the Mint in Calcutta, to be analysed and reported on. That gentleman's report was received here a few days ago by the parties who handed it to us, and we have much pleasure in publishing it below. The report proves that the analysis of all the musters submitted has been carried to the greatest possible nicety—and establishes in the most satisfactory manner the utter impropriety of placing any reliance upon the Chinese broker's reports as a criterion of the purity of Tin. Their opposite is, we apprehend, ultimately more to be questioned than that of the worst Tin ever received by them from this—and to suppose after a perusal of the Report, that the pretended discovery of inferiority in the 58 slabs, to such an extent as demanded a reduction of nearly one half its price, was any thing but a gross imposture, would, it appears to us, argue a degree of confidence in Chinese probity much beyond what the occasion demands. If Mowqua the purchaser of the Tin, and who is a Hong merchant, has any regard for his character, he will, if called upon so to do, before now will be, refund the full amount of the reduction which he pocketed by such unfair means—we will not say put in practice by himself, but by those under him, or about him.

SHIPPING INTELLIGENCE.

ARRIVED.—*British*, *Rosalind*, Crouch, from London, left the downs on the 19th March. *Lord Castlereagh*, Tuite, from Bombay 23d June, and Singapore 19th July.

SAILED.—None

The *Motichund Amichund* arrived at Bombay on the 19th June. The *Charles Grant* and *Claverig* left Bombay for China the 17th June.

The *Sylph*, Vyall, arrived in Singapore from here on the 19th July, just when the *Castlereagh* was coming away, after a passage of only 28 days.

It is said that a Brig, supposed to be the *Princess Ann* from Liverpool has arrived at the mouth. We do not know whether there is good foundation for for this report.

The *Reform*, for Manila is to be despatched this afternoon at 3. P. M.

---

Vessels passed Anjer.—June 15th Dutch, Spring, Sherman, from Batavia for Penang; John Cockerell, F. Bibbie, from Batavia for Amoy; 16th Ship, Bute, Ann, Pinkney, from Batavia for Bombay; 18th Dutch, Frank, from Batavia for Amoy; 19th Dutch, Hoffman, from Batavia for Macao; 20th Dutch, Hoffman, from Batavia for Batavia; 21st Ship, Adam, Stephens, from Chusan; 22d Ship, Ann, Pinkney, from Chusan; 23d Ship, Bute, Pinkney, from Chusan; 24th Ship, Ann, Pinkney, from Chusan; 25th Ship, Bute, Pinkney, from Chusan; 26th Ship, Ann, Pinkney, from Chusan; 27th Ship, Bute, Pinkney, from Chusan; 28th Ship, Ann, Pinkney, from Chusan; 29th Ship, Bute, Pinkney, from Chusan; 30th Ship, Ann, Pinkney, from Chusan; July 1st Ship, Bute, Pinkney, from Chusan; 2d Ship, Ann, Pinkney, from Chusan; 3d Ship, Bute, Pinkney, from Chusan; 4th Ship, Ann, Pinkney, from Chusan; 5th Ship, Bute, Pinkney, from Chusan; 6th Ship, Ann, Pinkney, from Chusan; 7th Ship, Bute, Pinkney, from Chusan; 8th Ship, Ann, Pinkney, from Chusan; 9th Ship, Bute, Pinkney, from Chusan; 10th Ship, Ann, Pinkney, from Chusan; 11th Ship, Bute, Pinkney, from Chusan; 12th Ship, Ann, Pinkney, from Chusan; 13th Ship, Bute, Pinkney, from Chusan; 14th Ship, Ann, Pinkney, from Chusan; 15th Ship, Bute, Pinkney, from Chusan; 16th Ship, Ann, Pinkney, from Chusan; 17th Ship, Bute, Pinkney, from Chusan; 18th Ship, Ann, Pinkney, from Chusan; 19th Ship, Bute, Pinkney, from Chusan; 20th Ship, Ann, Pinkney, from Chusan; 21st Ship, Bute, Pinkney, from Chusan; 22d Ship, Ann, Pinkney, from Chusan; 23d Ship, Bute, Pinkney, from Chusan; 24th Ship, Ann, Pinkney, from Chusan; 25th Ship, Bute, Pinkney, from Chusan; 26th Ship, Ann, Pinkney, from Chusan; 27th Ship, Bute, Pinkney, from Chusan; 28th Ship, Ann, Pinkney, from Chusan; 29th Ship, Bute, Pinkney, from Chusan; 30th Ship, Ann, Pinkney, from Chusan; 31st Ship, Bute, Pinkney, from Chusan; 1st Ship, Ann, Pinkney, from Chusan; 2d Ship, Bute, Pinkney, from Chusan; 3d Ship, Ann, Pinkney, from Chusan; 4th Ship, Bute, Pinkney, from Chusan; 5th Ship, Ann, Pinkney, from Chusan; 6th Ship, Bute, Pinkney, from Chusan; 7th Ship, Ann, Pinkney, from Chusan; 8th Ship, Bute, Pinkney, from Chusan; 9th Ship, Ann, Pinkney, from Chusan; 10th Ship, Bute, Pinkney, from Chusan; 11th Ship, Ann, Pinkney, from Chusan; 12th Ship, Bute, Pinkney, from Chusan; 13th Ship, Ann, Pinkney, from Chusan; 14th Ship, Bute, Pinkney, from Chusan; 15th Ship, Ann, Pinkney, from Chusan; 16th Ship, Bute, Pinkney, from Chusan; 17th Ship, Ann, Pinkney, from Chusan; 18th Ship, Bute, Pinkney, from Chusan; 19th Ship, Ann, Pinkney, from Chusan; 20th Ship, Bute, Pinkney, from Chusan; 21st Ship, Ann, Pinkney, from Chusan; 22d Ship, Bute, Pinkney, from Chusan; 23d Ship, Ann, Pinkney, from Chusan; 24th Ship, Bute, Pinkney, from Chusan; 25th Ship, Ann, Pinkney, from Chusan; 26th Ship, Bute, Pinkney, from Chusan; 27th Ship, Ann, Pinkney, from Chusan; 28th Ship, Bute, Pinkney, from Chusan; 29th Ship, Ann, Pinkney, from Chusan; 30th Ship, Bute, Pinkney, from Chusan; 31st Ship, Ann, Pinkney, from Chusan;

torn off, trees blown down, and buggies and other conveyances were capsized. There was scarcely a dry house on the Island; and goods to a great amount destroyed in the godowns. *Hind* 476—On shore close to the Mint; total wreck.

Brig *Corsair* 127.—Dismasted—afloat, but making water.

Ship *Mary Dugdale* 375.—On shore, to the North of Mazagone, bilged, discharging cargo.

*Richard Walker* 381.—On shore near Ship *Ranger* totally dismasted. Rudder gone, broken amidships,—complete wreck.

Brig *Rapia* 282.—On shore off Muzjid bunder, bilged, with loss of rudder.

*Northumberland.*—On shore at the Custom House bunder; bilged.

E. I. C. *S. Hastings.*—On shore at the Custom House bunder, loss of rudder; making water.

Ship *Briton* 505.—On shore at Colaba near the Gun carriage manufactory, total wreck, with loss of 3 men and 1 passenger, Mr. Campbell, late of the Steamer *Atalanta*.

E. I. C. Brig *Tapiee*.—Dismasted.

E. I. C. Steamer *Hugh Lindsay*.—Parted her moorings; got foul of the *Berenice*, lost her paddle boxes, cut water, figure head, and suffered other severe damage.

E. I. C. Steamer *Berenice*,—Parted her moorings, was fouled by the *H. Lindsay*. lost her figure-head, boats, and suffered other serious damage, run up to Mazagon.

*Julia.*—On side, but got off this morning, about 11 A. M. Damage sustained not precisely known, but supposed to be trifling in comparison with the others,

FROM A CORRESPONDENT.

On Wednesday evening the weather suddenly assumed a threatening aspect, and about half past 2 on the Thursday morning the monsoon seemed thoroughly set in with a degree of severity greater than what has been experienced here for many years, even in the memory of that gentleman of never failing recollection—the oldest inhabitant. During the course of the day the storm increased to a perfect hurricane, the effects of which have left this harbour a picture of its desolating influence. Viewed from any of the piers, out of nearly 50 vessels which, three days ago lay, to all appearance, secure, scarcely more than six are to be found which have not to all appearance more or less suffered from the gale. Amongs those which were driven from their moorings, the *Northumberland*, a Liverpool Trader, now lies abreast of the Custom-house steps, and the *Hastings* receiving Ship, which at one time had seven feet water in her hold, is at the old Bunder Head opposite to the Dock pier—some idea may be formed of the manner in which the latter vessel laboured, even when brought so close in shore, from her having destroyed a large portion of the old Bunder pier, to which she is so near that one might step with ease upon her deck from the shore. The *Briton* outward bound is a total wreck; the cotton with which she was principally laden having swoln from being wet she may literally be said to have burst. A young Officer who was proceeding Home in her for the benefit of his health has perished as well as three European seamen. Three others we have been given to understand after coming on shore died in the European General Hospital. The *Mary Dugdale*, *Richard Walker* and *Ranger*, with the exception of no lives having been lost, have suffered in an equal degree. The *Rapid*, *Great Harwood*, *Hind*, *Edinburgh*, *John Stamp*, *Adelaide*, *Floating Chapel Aurora*, *Corsair*, and *Tapiee*, have all suffered, some partially, others very seriously. The *Hugh Lindsay* and *Berenice*, having been driven against each other are much shattered Enormous sums were offered by Commanders desirous of going on board their ships, but in no case could a single boatman be prevailed upon to push off from the land. Nor was the fury of the elements confined to things afloat. Upwards of 400 houses in the Native town have been destroyed, and in the Fort, the Courier office and that of Messrs. Ritchie, Stewart & Co. have been materially injured. The proceedings of the Supreme Court were suspended, the Chief Justice upon his arrival in Town having adjourned business to next day. Upwards of 200 European seamen will, we hear, be thus thrown destitute, a circumstance which we hope it is only necessary to mention to excite that sympathy with their distressed condition, which Bombay has so often displayed upon every similar occasion.

*Communicated from Singapore.*

## STRAITS TIN.

The merchants of Singapore have, we know, more than once had reason to complain of the treatment which their consignments of Tin have experienced in Canton and Calcutta, but more particularly at the former port, where a great deal of pains has been sometimes taken to bring the article into disrepute, and to reflect injuriously upon the shippers of it, and where also the interest of the Singapore constituent has been frequently subjected to the most inordinate sacrifice, in consequence of some alleged impurity in the shipments of Tin which he has made to that quarter. Of this the following authentic particulars of a case of which we have been put in possession, enable us to lay before our readers a striking example.

In the month of January last, Messrs. A. L. JOHNSTON & Co. of this place bought from Messrs. HAMILTON, GRAY & Co. a quantity of Tin, which the former shipped on board of the *Ruby* and consigned to Messrs. DENT & Co. Canton. The Tin was from Junk Ceylon, and in small square pieces; and at the time of the bargain being made between the parties for the purchase and sale of the Tin, Messrs. H. G. & Co. were in the act of smelting it so as to have it run into slabs of the usual size, and 58 were completed, stamped on the bottom with the initials of that firm, and also marked "Pure." The purchasers dispensed with the remainder being smelted, and shipped the whole parcel, the small unsmelted pieces being put into packages of gunny. On arrival in China the shipment was sold at Drs. 28 per picul; but when the purchaser, Mowqua, was in the act of receiving it, he objected to the 58 slabs on the ground of their being of inferior quality, and claimed a reduction at the rate of Drs. 13 per picul on the rejected portion, which was allowed by the consignees.

A paper in the Chinese language, stated to be a certificate as to the inferior quality of the 58 slabs refused, was sent down here to Messrs. A. L. J. & Co., accompanied with 5 pieces of Tin as musters of the whole consignment, four of them being of the rejected Tin, and one of that which was received as unexceptionable. These musters were marked A, B. C, D, & E;—B being the mark of that portion of the shipment which was approved of in China; and together with a muster of Paharg and another of Banca Tin procured here, and marked F. & G, were forwarded by that firm to Mr. PRINSEP the Assay-Master at the Mint in Calcutta, to be analysed and reported on. That gentleman's report was received here a few days ago by the parties who handed it to us, and we have much pleasure in publishing it below. The report proves that the analysis of all the musters submitted has been carried to the greatest practicable nicety—and establishes in the most satisfactory manner the utter absurdity of placing any reliance upon the Chinese broker's reports as a criterion of the purity of Tin. Their own *purity* is, we apprehend, infinitely more to be questioned than that of the worst Tin ever received by them from this—and to suppose after a perusal of the Report, that the pretended discovery of inferiority in the 58 slabs, to such an extent as demanded a reduction of nearly one half its price, was any thing but a gross imposture, would, it appears to us, argue a degree of confidence in Chinese probity much beyond what the occasion demands. If Mowqua the purchaser of the Tin, and who is a Hong-merchant, has any regard for his character, he will, if called upon as he doubtless now will be, refund the full amount of the reduction which he pocketed by such unfair means —we will not say put in practice by himself, but by those under him, or about him.

ANALYSIS OF SEVEN SPECIMENS OF TIN FROM A. L. JOHNSTON ESQ. SINGAPORE, AND FORWARDED BY J. CULLEN ESQ.

27TH MAY, 1837.

Specimen Marked A (Rejected in China)

Specific Gravity 7. 351.

Composition.

| | In 10 parts. | | In 100 parts. |
|---|---|---|---|
| Tin | 9. 7 | | 97. 0 |
| Bismuth | 0. 0 | | |
| Lead | 0. 0 | or | |
| Zinc | 0. 3 | | 3. 0 |
| Cobalt | Trace. | | Trace. |
| | 10. 0 | | 100. 0 |

Specimen Marked B (pronounced good and received in China)

Specific Gravity 7. 359

| | In 10 parts. | | In 100 parts. |
|---|---|---|---|
| Tin | 9. 9 | | 99. 0 |
| Bismuth | 0. 0 | | |
| Lead | 0. 0 | or | |
| Zinc | 0. 1 | | 1. 0 |
| Cobalt | Trace. | | Trace. |
| | 10. 0 | | 100. 0 |

Specimen Marked C (Rejected in China)

Specific Gravity 7. 445

Composition.

| | In 10 parts. | | In 100 parts. |
|---|---|---|---|
| Tin | 9. 36 | | 96. 3 |
| Bismuth | 0. 00 | | |
| Lead | 0. 20 | or | 2. 0 |
| Zinc | 0. 17 | | 1. 7 |
| Cobalt | 0. 00 | | |
| | 10. 00 | | 100. 0 |

Specimen Marked D. (Rejected in China)

Specific Gravity 7. 388

Composition.

| | In 10 parts. | | In 100 parts. |
|---|---|---|---|
| Tin | 9. 67 | | 95. 7 |
| Bismuth | Slight trace | | Trace. |
| Lead | 0. 20 | or | 2. 0 |
| Zinc | 0. 26 | | 2. 6 |
| Cobalt | 0. 00 | | |
| | 10. 13 | | 101. 3—1.3 Excess? (probably zinc overrated.) |

Specimen Marked E (Rejected in China)

Specific Gravity 7. 393

Composition.

| | In 10 parts. | | In 100 parts. |
|---|---|---|---|
| Tin | 9. 78 | | 97. 8 |

| Zinc | 0. 1 | | 1. 0 |
| Cobalt | 0. 0 | | |
| | 10. 00 | | 100. 00 |

N. B. Ten Troy Grains were taken from each Specimen for Analysis.—*Singapore Free Press*, 13 *July*.

# CANTON PRESS,

August 5th 1837.

We have during the week received by way of Batavia accounts from England to the middle of the month of April and we regret to find that they are as disheartening as can well be. The scarcity of money among the merchants continued very great, and discount ranged at between 7 to even 13 and 14 per Cent. The bank refused to discount even the very best bills at a longer date than two months, which measure is said to have thrown the City into great confusion. Five of the largest houses, chiefly engaged in the American trade had, it is said, applied to the bank for assistance, and received two Millions Sterling from them. The acceptances of these houses were said to amount to 18 Millions. In Glasgow an extensive manufacturer had failed for £ 500,000, and one in Liverpool for £ 200,000. These are the only failure of any notes reported.

Produce of all kinds was almost unsaleable; Raw Silk was in no demand except here and there for a few bales for immediate consumption; the of the better descriptions of tea had begun to improve a little.

Consols continued as high as ever; this high rate proves with what distrust commercial affairs are looked upon; capitalists preferring the comparatively low interest government security affords to the much higher rates they would have upon commercial securities which have hitherto been unexceptionable.

Of political news none have been received to a later date than the 14th of March, per *Rosalind*, and per *Castlereagh* via Bombay. Our Singapore news reach to the 19th June and several extracts will be found in our columns from the *Free Press* of the 13th ulto., no *Chronicle* of a later date than the 8th, with which we were favored by a friend having come to hand. The *David Clark* had arrived there after a passage of just two months from Macao. We observe from the *Free Press* that in February last, a petition, signed by merchants, mariners etc. at Calcutta, for the establishment of lighthouses in the straits had been presented to the India Government. We hope that this petition may have the desired effect and with the different collections made towards the erection of a fit monument to honor the memory of the late Capt. Horsburgh, we suppose that the expense of these buildings will fall comprratively light on Government. In England also a meeting had been held to erect a monument to Capt. Horsburgh; it is to be hoped that when the news of the subscriptions made in Canton reaches home the monies there collected will be reserved for the same purpose, for which the sums here were collected.

Rumours were afloat at Singapore that the Dutch intended to take possession of the Island of Lingin. A frigate and a gunboat from Rhio had actually arrived at that Island, with. it was said the intention of taking possession of it. If this rumour should prove to be true, it would affect a valuable branch of the trade of Singapore, as, under the exclusive system of the Dutch Colonial Government, the free intercourse now existing between Singapore and Lingin, would probably no longer be tolerated.

We give in another column the report of Mr. Prinsep, the muster of the mint in Calcutta, of the assays he made of several musters of tin of a parcel shipped to this port from Singapore and refused here as being adulterated. It will be found from the assay that the rejected masters all are from one to three per cent worse than that which was pronounced to be good here, and than a muster of Banca tin assayed at the same time, though the numbers are, in many instances, apparently so incorrectly copied that we cannot well rely on them. We believe that the chinese here chiefly go upon the color and sound of tin, and according as they find the tin to be possessed of these qualities to their satisfaction, the article becomes marketable. To us it therefore appears that an addition of ever so small a quality of zinc or lead may injure both these qualities, and it is clear from the assay that on smelting down the 58 slabs some slight addition of either of these metals must have been made, or how comes it that both the Banca tin and that in small square pieces had only one per cent alloy, and the other four musters which were refused here contained from between three to four per cent with the exception of one muster of which an imperfect assay seems to have been made? We are far, very far indeed, to suppose that this comparatively trifling adulteration has been made with the knowledge of those who ordered the Tin to be smelted, but not even the smallest profit comes amiss to a native, and he will consider it a very good profit to have two catties of tin out of every hundred, for so many of spelter or lead, hoping at the same time that the smallness of the fraud will preclude detection.

## THE FAIRY.

At length that part of the crew of this ill-fated vessel, which reached the Chinese coast, have arrived in Canton, and the accountsone of which has given us of the cutting off of the Brig tallies pretty well with what has been stated before. Our examination of this man elicited the following particulars.

The weather had been very bad during two days, squally and with contrary winds; the crew had been worked very hawd in consequence; fair weather came on after and much fatigued all hands were asleep during the night following, when as our informant states, he and others were awakened by a scuffle between the Captain and the Manila men of whom there were six on board. The crew, as has been often done on such occasions jumped up the rigging, from whence the darkness of the night prevented them to discern what was going on on deck. After the Manila men had done their bloody work by murdering Capt. Mackay, an English boy, and probably several others, among whom the Serang, they beckoned those in the rigging to come down, promising to spare their lives. The men came down and the long-boat was given them, into which all the survivors went, among them six or seven wounded, most of them badly; the serang was not among these. When the boat put off the night was still quite dark, and they did not long continue alongside the vessel, being threatened to be sunk with cannonshot by the murderers if they did not put off immediately. The Brig, with a fair wind; and having all sail set when the dead was committed, the people in the boat soon lost sight of, nor could they when daylight came see any land. Without compass, they allowed themselves to be drifted along by the tide, and after about 24 hours came near the land, where their boat was capsized in the surf, and many of the wounded and some others were drowned, while fifteen reached the shore in safety. Our informant did not exactly know how many of them originally got into the boat, but judging that only one wounded man, a Portuguese from Macao, we believe, reached the shore, the 5 or 6 others and probably some others must have lost their lives on this occasion.

They landed, as we understood our informant, somewhere near Chinchew, when the Chinese, with threatening gestures, pressed them to state why they had come, to which they answered that, having come with a cargo of rice from Java, they had been shipwrecked off the coast and wished to go to Canton to be able to return to their own country. They were however taken to Fuh-chow-foo, and there imprisoned in a temple, where they staid upwards of 3 months, and where they were almost every day examined before the mandarins, particularly after the linguist from Canton had arrived. These examinations began at break of day and frequently lasted till eight and even ten o'clock at night, and the men whilst being interrogated, were made to kneel without being allowed to look up to their judges. The linguist chiefly addressed his question to one of the lascars who knew English. We know not what the nature of the evidence may have been, but from the generally kind treatment these men experienced, we suppose that nothing injurious to them in the eyes of the Mandarins can have transpired. They were provided with clothing and sufficient food, though not allowed to leave the Joss-house or having otherwise any intercourse with the people. The wounded man was taken care of and has now recovered. At the end of the eight months during which their examination lasted, they were under an escort of four mandarins and many soldiers conveyed on their way to Canton and each of the fifteen men had a sedan chair in which he was carried by two coolies, nor were they made to walk on foot a single day's journey; a comfortable enough way of travelling, the recollection of which our informant seemed to recall to his memory with particular satisfaction. After having thus travelled one month and a day, they embarked on board a boat, and after six days arrived in Canton, where they have been released from further surveillance or captivity.

Thus far our informant's story; natives are not implicitly to be relied on, but we see no particular reason why we should not give credit to it. The whole of the men are, we hear, to be sent to Manila, there to be tried for piracy by the competent authorities, accompanied by the depositions made here before Captain Elliott. Our readers will hear not without satisfaction, that the perpetrators of the atrocious murder on board the Fairy, have, at least part of them, met with their deserved punishment. The Brig, as we stated on a former occasion, made her way to the Soo-loo islands, where probably she way sunk and the men went on shore at Port Santa Maria in Mindanao where their being provided with a great many dollars and Chinese gold bars fixed suspicion on them. Four of then were afterwards secured, three, we believe in Manila, where they had gone, and one in Port Santa Maria. After having undergone their trial, they were executed at Manila about two months ago.

It is with much pleasure that we give in another column a short extract of the new Postage regulations in Bengal. It will therefrom be seen that the Postage hitherto levied on newspapers has been very much reduced, so much so in fact as to be at present no very serious obstacle to the sending by post foreign newspapers, which have hitherto been every thing but excluded from Bengal by the high postage levied on them.

We give an abstract of the destruction caused to the shipping at Bombay during the most severe gale ever experienced there. We hear that no less than 21 ships have been, some totally, and others more or less damaged. Freights to China had, in consequence of this misfortune risen considerably.

We find in the *Jarascha Courant* of 21st June, that Gustavus IV., formerly King of Sweden and latterly known by the name of Colonel Gustavson died some time in February last, which event put the Dutch court in mourning.

The same papers also mention new losses the Christinos have lately sustained near Bermani.

## SHIPPING INTELLIGENCE.

**ARRIVED.**—British, *Rosalind*, Crouch, from London, left the downs on the 19th March. *Lord Castlereagh*, Tonks, from Bombay 22d June, and Singapore 19th July,

**SAILED.**—None

The *Motichund Amichund* arrived at Bombay on the 19th June. The *Charles Grant* and *Clewelg* left Bombay for China the 17th June.

The *Sylph*, Vyall, arrived in Singapore from here on the 19th July, just when the *Castlereagh* was coming away, after a passage of only 25 days.

It is said that a Brig, supposed to be the *Frances Ann* from Liverpool has arrived at the moon, We do not know whether there is good foundation for for this report.

The *Reform*, for Manila is to be despatched this afternoon at 3. P. M.

Vessels passed Anjer.—June 16th Dutch. *Borneo*, Hermsen, from Samarang for Palembang; *Anne Catherine*, P. Hobbe, from Batavia for Amsterdam. 16th Brit. Ship *Ann*, Pearson, from Singapore for Bombay. 18th Dutch. *Fidelidad*, Uil, from Batavia 1st March for Batavia. 18th Brit. Schoon. *Mindanao*, from China, 2nd May, for London. 19th Amer. Ships, Norman, from Canton 27th April for Newyork. 27th Brit. *Ann*, Pearson, from Canton 20th May, for London. *St. Clair*, Malcolm, from China for Bombay. 30th Amer. Ships' Forbes, from China for Newyork. 1st April, Brit. Ship *E. Gaskell*, from Manila, for London. *Cassius*, Richard, from Liverpool 1st April, for Batavia. 20th French. *Steward*, from Singapore for Nantes. Amer. Cutter, *Tripp*, from China 10th May for Newyork. Brit. Ship *Mary Hatter*, Pollock, from China 16th May, for Calcutta. July 1st; Brig. *Mentor*, Worthington, from Newyork, for Batavia. July 3rd Amer. Ships, from Manila to Boston.

The *Lady Grant* has, we hear, been spoken by the *Hannibal* in the straits of Sunda.

Lascar Depot, from Bengal, 24th April via Batavia. United States 8th January via Gibraltar. Calcutta, 22nd June ✓ Ann, Singapore, 30th 10th ✓ *Lord Castlereagh*, Java, 9th July, Singapore, Harmon, 26th July via Macao, Bombay, 22nd June ✓ *Lord Castlereagh*.

**VESSELS EXPECTED.**—From England, *Ann*, Rayster, *Rhoda*, Gibson, *Prudentia*, Ann, Calcutta, *Bob Roy*, Grandpre *Pandora*, Ann, General Hill, *Red Rover*, Lord Castlereagh, Thomas, *Edinburgh*, Gleeds, *Mary Stephens*, Sister Castle, *Coromandel*, Great Harwood, Ann, Charles Grant, *Duchess Sutherland*, Java, *Fingalian*, Theodore, Brunel, *Lady Monnington*, Manilla, Ships and Barks.

NOTICE.—Is hereby given that the Honorable Company's Treasury is open for the receipt of Cash, for Bills upon the Supreme Government of India, at the Exchange of Two hundredand sixteen (216) Company's Rupees, per one hundred (100) Spanish Dollars, and payable thirty days after sight.

(Signed.) J. H. ASTELL.
,, H. M. CLARKE.
Agents to the Honorable E. I. Company

Canton, 2nd August, 1837.

NOTICE.—The undersigned begs to request that all parties indebted to the Estate of her late husband, will furnish their accounts to her; and all persons having Claims on the said Estate will please forward the same for adjustment to

C. CROCKETT.
Administratrix to the Estate of the late CAPTAIN JOHN CROCKETT.

Macao, 26th July, 1837.

NOTICE.—The Secretary of the Canton Book Society requests information concerning the following publications belonging to the Society.

Jesse's Anglers Rambles.
Penny Magazine No. 83.

NOTICE.—Mr. John Smith has this day been admitted a partner in my Establishment which will continue to be carried on in Commission, Ware-house keeping, and Auctioneering under the firm of Markwick & Smith. CHARLES MARKWICK.

Canton, 1st July, 1837.

NOTICE.—Referring to the above advertisement Charles Markwick and John Smith beg leave to solicit from their friends and the Public, a continuance of the Patronage that has heretofore been given to the Ware-house keeping and Auctioneering of the late Establishment of MARKWICK EDWARDS & Co.

Canton, 1st July 1837. (No. 3 Imperial Hong.)

NOTICE.

THE interest and responsibility of Mr. F. M. Gillanders and Mr. W. K. Ewart in our establishment ceased yesterday. Mr. Peter Ewart and Mr. Edward Lyon have become partners in our establishment this day.

GILLANDERS EWART & Co.

Bombay, 1st May, 1837.

NOTICE.—Samuel Wetmore Jr., is this day admitted a partner in our establishment,

WETMORE & Co.

Canton, February 1st 1837.

NOTICE.—The undersigned having been appointed Agents in Canton for the PERSIAN INSURANCE SOCIETY OF BOMBAY are prepared to receive application for Insurance of such risks as by the regulations of the office they are authorized to take.

H. & N. CURSETJEE.

Canton, 2d May, 1837.

NOTICE.—Translations made at the Canton Press Office from and into the English, German, French, Spanish and Portuguese languages at twelve cents a line or where under seventeen lines at two Dollars for each translation.

NOTICE.

ORDERS for printing will be carefully attended to at the Canton Press Office, at the following charges;

for printing Bills of lading, Bills of exchange, Opium orders and boat notes } ₱ 100 ₱1
,, Linguist reports, reports of Cargoes &c..... ,, ,, ,, 1. 50.
,, Policies and folio pages. ,, ,, ,, 5.

N. B. The Press cannot be set for less than 100 Copies.

NOTICE.

THE interest of Samuel Russell and Augustine Heard in our house ceased on the 31st December 1836. RUSSELL & Co.

Canton, January 2nd.

INDIA INSURANCE COMPANY OF CALCUTTA.

THE subscribers are duly authorised to grant Policies on account of this Company, payable in Canton Calcutta, or London. RUSSELL & Co.

Canton July, 6th 1837.

UNION INSURANCE SOCIETY OF CANTON,

PARTIES, previous to applying for Insurance, are requested to notify the same, that the vessels on which they intend to ship may be surveyed (free of expense to the assured) before any valuable Cargo is put on board.

*The Agents for the Society are from this day,*

In London,—Mess. Palmers Mackillop Dent & Co.
,, Calcutta, Mess. Mackillop Stewart & Co.
,, Bombay,—Mess. Forbes & Co,
,, Singapore, Mess. A. L. Johnston & Co,
,, Manila,—Mess. Russell & Sturgis,

DENT & Co,

Canton, 1st, July, 1836. *Secretaries.*

FOR THE STRAITS AND CALCUTTA.

THE new fast sailing Ship Shah Allum, of 851 Tons, E. Evans, Commander will be despatched positively from Whampoa on the 15th September. For Freight apply to

MUNCHERJEE JAMSETJEE.
No. 4 Chow-Chow Hong.

FOR GAP-SHUY-MOON & BATAVIA.

THE Ship London, Captain Beach, will leave Whampoa on the 13th inst. For Freight apply to,

RUSSELL & Co.

Canton, August 4th, 1837.

FREIGHT FOR NEW-YORK.

THE Champlain, Capt. Ritchie, can take 150 tons on freight. Apply to

WETMORE & Co.

1st August, 1837.

FOR SINGAPORE AND BOMBAY.

THE Ship Charlotte, C. L. Liebschwager Commander to sail from Whampoa on the 1st Oct. For Freight apply to

TAMOOLJEE RUSTOMJEE,
and
COWASJEE SAPOORJEE.
No. 5 Foongtay Hong.

FOR BOMBAY.

THE "Caledonia," J. T. Lancaster, Commander will leave Whampoa on the 15th Proximo, for freight apply to

SHAWUXSHAW RUSTOMJEE.

Canton, 6th July, 1837.

FOR STRAITS & BOMBAY.

THE Ship "Charles Forbes," Capt. Thomas Wills, will leave Whampoa on the 20th September next, for freight apply to

DHUNJEEBHOY MUNCHERJEE,
and
HORMUSJEE FRAMJEE.
No. 5 Powshong Hong.

Canton, 7th July, 1837.

FOR SALE.

THE Barque San Francisco de Paula, now in Macao harbour, with masts, rigging, etc. For particulars apply to

PEREIRA & Co.

Canton, 4th August, 1837.

ON SALE.

THE fast Sailing Clipper Formidable 335 Tons Register, length from the fore part of the main stem to the after part of the Stern post aloft 112 feet 6 in.
Breadth ot the broadest part taken above the main wales 26 feet 3 in.
Depth of hold 12 feet. Apply to

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

NOTE. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Camblets, Saltpetre, Ginseng* and other Goods, on which the duties at Whampoa are high.—Ships with *Rice, Cotton &c.* sometimes discharge at Macao or transhipt their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary Stationery, Cutlery, Crockery ware, &c.*, for foreigners consumption, are sold at Auction duty paid.

*Note. Alum*, and *Cassia* are procurable cheaper at Lintin, Macao, &c; and *Raw Silk, Silk* piece goods &c, are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

Note. Aboverates are from 20th April to 20th Oct. annually: during remaining 6 months the premiums are somewhat lower. Risks on Ships are @ 9 per Cent per annum, @ 4½ for 6 months, @ 2½ for 3 months and @ ¾ per month.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874756 of a Tl. per cubit
2nd ,, ,, ,, 1200 do. & under 1600 ,, 0.7221091 ,, ,,
3rd ,, ,, under 1200 do. 0.5062341 ,, ,,

N.B. The cubit is 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Misen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from @ 4300 to @ 4320; 2d class from @ 3700 to @ 3780; 3rd class from @ 3200 and under. The Chinchaa or Present Fee is paid by all vessels 1600 Taels or @ 2223. Linguists fee @ 173½ and Comprador's fee @ 50. Also Pilotage @ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about @ 1300 in lieu of measurement &c.,

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—The supplies by the late arrivals, the *Formiddable, Hinda* and *Rosalind* have been so moderate as to have little or no effect on the market, which holds out a very favorable prospect for the first arrivals of GREY and white LONG-CLOTHS and CHINTZES.

COTTON YARN.—The demand is not quite so brisk as during the last week, but prices continue about the same.

LEAD,—is dull at our quotation.

STRAITS PRODUCE.—Both TIN and PEPPER have been sold at our quotations.

RICE.—The price has, it is said, rather advanced—partly, no doubt, in consequence of the continued rains, but principally from the floods preventing the usual supplies coming in.

COTTON.—The market has been very inactive during the past week and previous prices could not be obtained for even the finer descriptions, owing no doubt in some measure to the floods causing an interruption to trade in the neighbourhood. Exaggerated reports of the loss of shipping and Cotton by the same hurricane in Bombay harbour, caused some excitement for a day or two, but no sales were effected.

OPIUM.—The demand for the Bengal drug has again revived a little within these few days, but without any improvement in price. New Patna and Benares selling at 670. We do not hear that many purchases have been lately made in Malwa which is held a $15 @ 580. The deliveries during the last month have been the largest on record we believe consisting of 4071 Chests as per statement above.—A report has just reached us of a Chop having arrived from the Emperor, urging the greatest vigilance in stopping the export of Sycee and the trade in Opium, and ordering that the ships outside should be sent away. It probably may turn out little more than one of the usual annual denunciations against the trade.

### EXPORTS.

RAW SILK.—Nankin, some small lots have come down but we understand it is only of the ordinary quality; nothing is yet spoken of as to probable prices. Of Canton Silk the third crop has come to market, and the crop in an average one.

Exchange.—Nominal on England, the Superintendents treasury bills

*Circulated in Bombay by the Chamber of Commerce.*

### EUROPE NEWS TO 1ST OF APRIL.

*From the Bombay courier extra of 29th June.*

The *Nazareth Shaw* arrived yesterday afternoon from Mocha the 11th inst.; bringing the April Packet. We give from the *Spectator*, the only weekly paper we have received, a summary of the political news up to the 1st April, with the *Gazettes* and extracts from the *Morning Herald* of the 1st and 3d April and from *Galignani's Messenger* to the end of March.

The debate on the Church Rate Question continued by adjournment to the 15th March, when the Committee divided.

| | |
|---|---|
| For the Resolution | 287 |
| Against it | 250 |
| Majority | 23 |

Loud opposition Cheers followed the announcement of these numbers. The tone of the ministerial papers in referring to them is that of much disappointment, but we observe no indication of a Coalition, or of the resignation of Ministers.

The death of Lady Canning had removed Mr. Canning to the House of Lords. Mr. Collins the Ex-Mayor of Warwick had been returned in his place, as the liberal interest, in opposition to Mr. Sergeant Adams. The Garter vacant by the death of the Marquess of Bath had been given to Lord Carlisle. Lords Cork and Portman were named for the succession to the Lieutenancy of Somerset. The Duke of Richmond was again mentioned as the successor of Lord Durham in the Embassy to St. Petersburgh.

Sir Hussey Vivian has promised his support to the Ballot, if the majority of the Electors of East Cornwall should require him to vote for it.

The Seizure of the *Vixen* was brought before the House of Commons by Mr. Roebuck on the 17th March. His motion for the production of certain papers to elucidate the subject, was negatived without a division, as calling for premature explanations which could not have any other effect, than that of marring the purposes and objects which the House and the Government had in view. The *Courier* on this subject says, that the debate on the case of the *Vixen* had no other result than to make known the opinion of members, but will not be wholly unsatisfactory to the public, as a proclamation of the whole empire, to all the rest of the world, that England desires to cultivate peace, but will not purchase it by the least dishonour.

On the 22d March Mr. Robinson moved the 2nd reading of the East India Officers compensation Bill, and after some remarks by him in support, Sir J. C. Hobhouse stated that he should oppose the Bill, and was proceeding to argument when the house was counted out.

Great difficulty and distress prevailed in the mercantile circles—several failures had taken place and among them—Messrs. Frye and Lightfoot Bullion Brokers London—Messrs. Fergusson Miller & Co.; Alexr. McGregor & Co; and Bentley Senior & Co. at Liverpool, and Messrs. John Miller Junior & Co. at Glasgow.

Lord Ashburton is mentioned as having come forward with no less a sum than a million in aid of Baring Brothers & Co. which was the only American House that had not received assistance from the Bank.

Several of the largest manufacturing houses at Glasgow are restricting their works—particularly the Steam Loom Proprietors, it is said that one of the largest houses had discontinued nearly 1000 of their workmen.

A Resolution was passed at a General Court of Proprietors on the 22d March congratulating Mr. Loch on his escape from Assassination; at the same Court Sir C. Forbes moved, pursuant to notice, for the production of the paper relative to the trial, conviction, and execution of Shumsoodeen Khan the Nuwaub of Ferozepoor. The Chairman defended the conduct of the India Authorities and suggested the propriety of withdrawing the motion until the Court were in full possession of the facts of the case, and ultimately said he would take the earliest opportunity of laying the papers before the Court.—Mr. Wedding presented and afterwards withdrew a petition from the Civil Servants of the Company at St. Helena for compensation for loss sustained by the discontinuance of the Company's trade.—The Chairman in compliance with a request from Mr. Poynder said that the despatch which had been forwarded to India containing the resolution of the Court of Directors relative to idolatrous Worship should be laid before the Court.—A Motion by Mr. Pickler for an account of the expences incurred in the recent attempts to establish a Steam communication with India was carried.

The inquest on the body of Kearney returned a verdict that he had died by taking oxalic acid being at the time insane.

Severe Frost and Snow had prevailed to the end of March.

By a letter from Alexandria 22nd April we learn, that the mail from hence by the *Hugh Lindsay* 18th January reached Alexandria 20th February—Mr. Waghorn's portion was forwarded the next day by the Penelope to Marseilles, and reached there on the 15th March, and was sent, on the same evening for London—the other portion of the Mail was dispatched by the Consulate on the 5th of March.

Intelligence of the loss of the *Stirling Castle's* packets had been forwarded to London via Marseilles.

Mrs. Fullarton, the *wife* of John Fullarton Esq. Calcutta, died on the 7th April between Esne and Assouan on the passage down the Nile from Kheneh. Mr. F. had arrived at Alexandria with the remainder of his family, and intended to proceed by the next packet to Malta where the remains of Mrs. F. were to be interred.

The following is an extract of a letter from London of the 31st March. "Steam Communication will be established I make no doubt, but I assure you the question is by no means settled yet, and notwithstanding the Chairman's flourish the other day, if they are not watched and pushed, they would be too happy to let the matter rest for another year or two."

The letter from hence by the *Hugh Lindsay* of January last, which was despatched through Mr. Waghorn's agency reached England on the 26th March and those through the Consulate at Alexandria arrived in London on the 30th March.

The Celebrated Mrs. Fitzherbert died at Brighton the 30th March aged 81.

The Bishop of Norwich was not expected to survive many days, and the Bishop of Litchfield was also dangerously ill.

### MONEY MARKET IN ENGLAND.

By advices from London the latter end of March, we learn that for some months previously, active endeavours had been made on the part of the Bank of England, to avert the consequences apprehended from the recent commercial embarrassments, and particularly in regard to the houses engaged in the American trade, but since the first appearence of discredit upon American paper, the credit of almost every house connected with America having been nearly annihilated, the mode of affording relief became much more difficult than had been anticipated. The first attempt made by the Bank, was to ascertain what extent of discounts were required by each house, until they could reduce their engagements within a manageable compass, and then to divide those wants between the Bank of England and the money dealers; this attempt however failed, and the only alternative left was, that the Bank should undertake the whole of the engagements if adequate security could be offered, and it appears on authority upon which reliance may be placed, that the result of an investigation was, that all the houses were really sound, although with engagements too extensive for their respective capitals. The houses more immediately affected were but three in number, and were those which were known to possess the smallest capitals, and it became necessary to ascertain their actual positions.

An enquiry took place under the inspection of one of the partners in Messrs. Baring's house, and of two other Gentlemen who were nominated by the Bank, and the result was, under the evidently extensive amount of engagements, exceedingly satisfactory; it was found that these three houses were possessed in the aggregate of Capital to the extent of nearly a million Sterling, that their connections were of the most solid character, their business almost entirely confined to ordinary Banking operations, and the exportation to the United States of British Manufactures, and that their Mercantile speculations amounting only to a few thousand Pounds, were scarcely worthy of notice.—Under these circumstances the Bank expressed a readiness to come forward in such a manner, as would in all probability enable all the houses to withdraw their engagements without difficulty, so as to bring them within the power of their respective capitals within the next six months, unless some very extraordinary disasters should occur across the Atlantic.

To facilitate the remittances from America the Bank opened a credit in favor of the Bank of the United States, which it was hoped would answer the purpose intended. Of the three houses more particularly alluded to, one was not expected to require any material advance if their remittances should arrive in due order; the second seemed to require greater temporary assistance, although the result was expected to be equally favorable; and the accounts of the third were so much within bounds that, but for the universal discredit, they would not in all probability have required any help.

The Bank required securities of two characters, one to be furnished by the private friends and connections of the respective houses for the Loans which they might seek, the other a general Guarantee bond, to be signed in London and in the Country, to indemnify the Bank against any loss, which by possibility might attach upon Bills of Exchange discounted for the three houses in question, in case the whole should eventually fall to the ground;—this last mode of security appears to have been uncalled for, as it is said that a loss of "a millions sterling in the concerns of the three houses before me, demand could arise upon it.—still, as the Bank would, if the guarantee were complete in amount, discount all commercial paper tendered by the parties in question, it became, for the sake of the restoration of credit and confidence, a matter of importance to the mercantile interests that the guarantee fund should be as large as possible, and great exertions were accordingly being made at London, Liverpool, and other places, to effect this object.

Notwithstanding the other difficulties created the credit of Messrs Baring Brothers and Co. has we believe remained unaffected—the assistance afforded by Lord Ashburton was we are informed the result only of an understanding upon his withdrawal from the concern, (viz.) that his money should be always at the command of the firm when wanted, and it seems more than probable that this is not the first instance in which his funds have been made use of.—*The Bombay Courier* 1 July 1837.

### SPAIN.

A letter received from Bayonne gives the following official report from General Evans:

REPORT FROM GEN. EVANS TO GEN. MIDDLETON.

"SAINT SEBASTIAN, MARCH 16.—It is with regret that I announce to your Excellency that the hopes I had founded upon the happy result of my operations of yesterday have not been realised. A little before day-break this morning we drove the enemy from their last entrenchments on the heights that command Hernani, and were preparing for a general attack when we perceived a considerable reinforcement arriving by the road from Tolosa. The enemy commenced an attack along the whole line. Three battalions moved against the rear-guard of our left wing by the bridge of Astigarraga. This was the point at which we had the greater force assembled, and had these three battalions been immediately charged they would probably have been repulsed and their retreat entirely cut off; but the first battalion of the English Legion being seized with a panic, fell back in great disorder upon a battalion of Castille which followed the example. The discouragement spread to the other regiments of the left wing, and the confusion became complete. The advanced heights of our left were soon abandoned and the troops retreated as far as the fort of Oriamendi. An attack on our right wing was made with a still more considerable force, and our advanced posts were driven back. The extremity of the line, however, was defended by a battalion of the Royal British Marines, which with admirable firmness and courage repulsed the enemy, and protected this side from any new attempt. The enemy next fell upon our right wing, but the 6th regiment of English Auxiliaries advanced and drove them from the heights they had gained. The enemy continued their attack on the centre, but as it appeared to me, with less vigour. All the essential points of our position were still in our possession, and the confusion had ceased; but the greater part of the regiments were so mingled together that it was impossible for the officers to re-form them, and I thought it better to retire, after having spiked the guns and destroyed the greater part of the fortifications of Oriamendi. Our loss amounts probably to 800 or 900 men, in killed and wounded, besides a company of the regiment of Oviedo, which, having been placed in a fortified house at a short distance, was surrounded and forced to surrender; I have only time left to inform your excellency that I am certain that this check will be repaired as soon as the army of Navarre shall have effected its junction with that which I command. We shall then be in a state to resume the offensive.

Signed DE LACY EVANS.

Extract of a letter, dated Evening of the 16th inst., from San Sebastian, written by an officer of the British Legion:—"I write a hasty line to say I am safe after this day's defeat and rout. Our operations of the week had been fatiguing but successful; we took the Venta Hill last night, and this morning prepared to go into Hernani, when the enemy, in full force, fell upon us, overwhelming forces, turned both our flanks, and the Spaniards ran in the most cowardly manner. The utmost disorder reigned. Nothing but the gallantry and steady discipline of the Royal Marine Battalion saved the whole artillery, and indeed the whole army. This famous battalion had one officer wounded, and thirty-one killed, and several officers and men killed and wounded; and the men declare that they hope never to take the field again in such a company. Gen. Evans is a most gallant fellow, and made incredible efforts to rally his men, but to no purpose. I must this off immediately, and am too much fatigued, not having taken my clothes off for six days, to enter into details; for which, besides, there is not sufficient time.—*Ibid.*

### ANSWER OF THE BENGAL GOVERNMENT TO THE MEMORIAL OF THE CANTON MERCHANTS AT CALCUTTA.

To W. BELL Esq.

Sir,

I am directed to acknowledge the receipt of your letter dated the 8th Instant, submitting a Memorial signed by you, and other Merchants from Canton relating certain suggestions relative to the future arrangements of the Honorable Company's Finance Agents in Canton, and in reply to communicate the following observations.

2. In the first place the assistance required in the China trade must be well aware that the Government remittances effected through the Agents at Canton are a double operation, the Agent's means of making advances upon Cargoes consigned to Bengal being derived from the sale of the Cargoes, and remittance money by Bills upon Calcutta; and as the Agent's The success of their advances upon Cargoes depends of necessity be in some degree proportioned to the sum that he can obtain for Bills, so on the other hand the Agent's power of remitting to Bengal by Bills must be limited by the amount of his funds in hand, which are required to meet those transactions. The rule evidently is, that the sum of the Agent's funds in hand, and the sum of Bills upon Calcutta which he can remit, must be equal to the sum of Bills which he can sell.

3. But the period for obtaining money by the sale of Bills on Bengal is not identical with that of making advances on Goods consigned to England; Bills are most readily obtained at the period when the Opium Speculators, having disposed of their Cargoes, are looking for a means of return to India for the proceeds. The season for negociating Bills on Bengal is accordingly from the months of April and May to August and September, the Season for advancing is from November to March. The Agents therefore being compelled to raise their funds under uncertainty of the probable condition of Exchanges with London at the season for making advances, which is some months posterior, and having the rate of Calcutta transactions direct with England indicated as the condition of their operations have necessarily a discretion of some duration to exercise in determining in the first instance, the terms on which to open their Treasury for Bills on Bengal, for the extent of their subsequent advances must of necessity depend upon the success of their measures for obtaining money for Bills on India.

4. Having premised this explanation, His Lordship in Council thinks the Canton merchants will see the impossibility of publishing by authority, either here or in Canton, a notice of the amount that will be advanced in China in any given season upon the security of Goods consigned to Europe, because this amount must of necessity depend upon the funds available for advances on one hand, and on the other upon the rate of exchange compared with India at which advances can be obtained during the season.

5. Under ordinary circumstances the Governor General of India in Council will have no objection to make known both here and in China the limit of rate and of amount that may be indicated to the Agents, but his Lordship in Council can enter into no pledge always to communicate even this information, or to abide by the limits indicated at the beginning of a year, because in case of disappointment in Bengal it may be necessary to extend the China transactions, and every fluctuation in the Exchanges between India and London will require a change of the rate indicated to the China Agents.

6. The above observations are an answer to the first proposition contained in your letter under reply. With respect to the second I am directed to observe that the Financial Agents to China are quite sensible of the disadvantages which attached their mode of receiving orders for advances in the past year, and similar fruitless investigations in the Register will not again occur, nevertheless it is not possible to restrict or tie down the Agents by specific instructions as to the manner of their offering the remittance transactions entrusted to them.

* This is not very clear—the three houses being possessed of as said above, one million only, the loss of two must render them insolvent.

Much must of necessity be left to their discretion, and amongst other things they must have the power of contracting for future advances if they should deem it necessary or expedient to do so, but such Contracts when made, should be by engagement binding of course on both parties.

7 With respect to the 3rd Proposition the Governor General of India in Council must decline to indicate to the Agents any particular date up to which they shall be obliged to continue to receive tenders. If the amount of their remittances be limited they will close their office for tenders when that amount is completed, otherwise they will probably find it for their advantage to continue to receive tenders on the terms fixed, even beyond the 30th April named in your letter. But the China merchants will not be ignorant that the Agents naturally desire to bring their operations of each season to an early close in order that the remittances may be realized in London if possible before the end of the official year viz. 30th April.

8. The 4th and last proposition of your letter to my address asks that access shall at all times be given on the application of merchants of China to the Books and Registers of Remittance transactions effected by the Agents, in order that the information may be available to them for other speculations. The Governor General of India in Council declines to enter into any pledge to make public this information, because circumstances may be imagined in which such publicity might be fatal to the success of the operations in hand. But under ordinary circumstances there will probably be no necessity for concealment, and the Agents will be instructed to withhold no information as to general results that may be likely to be useful. On the other hand, they cannot be expected to betray confidence or to furnish information in respect to individual transactions that may be sought for with doubtful views. As to the question whether the Agents ought to be instructed to effect their operations on the terms and at the rates of the market, the Governor General of India in Council can only say that the Agents will always effect their operations on the most advantageous terms for the East India Company that they may be able fairly to obtain.

I have the honor to be,
Sir,
Your most obedient servant,
(Signed) H. T. PRINSEP.
Secretary to the Gov. of India.

Fort William, 14 June 1837.

Add portion of Chunqua's debts liquidated from hong property 290,570

$ 2,960,066 Total foreign debts in ten years.

CONSEQUA died insolvent in the Autumn of 1823 owing foreigners Spa. Drs 171.091.

His foreign Creditors made incessant demands for the settlement of their claim which the Cohong, at length, with the sanction of Government, arranged for payment in five annual instalments. But the amount being small, the foreigners insisted on a shorter period being fixed and a party of them in the autumn of 1824 presented a petition at the City Gate, where they were determined to remain till better terms were granted. They maintained their post during the whole of one night, and till midnight of the second, when Howqua, after various unsuccessful attempts to drive them away by intimidation, expressed his readiness to agree to whatever terms might be demanded. On which the foreigners consented to receive payment in three annual instalments, in lieu of five as fixed by the Government.

PACKQUA, Hong-merchant, had, for several years, been in a tottering condition, and various compromises had been made of his debts, from time to time, notwithstanding which however, they continued constantly on the encrease. And after a protracted negotiation the Hong was finally broken in 1825, and he himself banished to Ele; for which destination, however, he does not appear to have started till 1828. His debts, then adjusted, amounted to Spa. Drs. 671,463,38.

His death at Ele was noticed in the Canton Newspaper three or four years ago.

* Duties to the Chinese Government.

POONQUA. Hong-merchant, died insolvent in January 1827, owing to foreigners $ 192,210.80 which were agreed to be paid by the Cohong, in three annual instalments, commencing in February 1828.

MANHOP. Hong-merchant, failed early in 1828, say in January, after having been several months in a very tottering condition. His debts to foreigners amounted to Sp. Drs. 1,125,538. Petitions for a settlement were immediately presented, which however was not arranged till December 1828. In February 1829 the first dividend of one sixth was paid and the whole completed in six instalments in February 1834.

CHUNQUA. Hong-merchant, failed in 1829—the Senior partner having retired to Nankin, carrying off all the property in charge of the Hong which he left, in debt, under the management of a stupid younger Brother.

His Debts to foreigners amounted to $ 869 762.32 The first petition for a settlement was in September 1829. The subject was pressed on the Government and Hong-merchants during the whole of 1833. It was not, however, till the 10th March 1831 that the first dividend was paid of 23 per ct. $ 198,140.20. In July 11½ p. ct. 99,075.10. both arising from the Hong property. In February 1832, $ 1 90,845,64. In 1833, $ 1.90 845.64. In 1834, $ 7.90.845.64 Total $ 8,69,762, 32 the three last from the Consoo fund.

# CANTON PRESS,

August 12th 1837.

We have had, during the week late arrivals from Calcutta and Bombay, from the former per *Cowasjee Family*, and from the latter place per *Ardaseer*. The Europe news brought by the overland despatch, of 1st of April will be found in another column. Our Singapore papers are of the *Free Press* to the 20th, and of the *Chronicle* to the 22nd July, but neither of them contain news of interest.

From the Europe news it appears that in Spain the Queen's party had suffered a severe defeat near Hernani; we have extracted General Evan's report of that affair. From allusions in the Calcutta papers it would appear that Don Carlos had rewarded the services of his General Gomez by having him executed: why, or in what manner this atrocious act of ingratitude was committed does not appear; the leaders of the two parties in Spain seem to vie with each other how best to merit the contempt and abhorrence of their followers; unfortunate country! whose blinded by faction the most detestable crimes are being committed with impunity! Demoralised to the utmost it will be long ere that country will again take it's rank amongst nations.!

The Peking court is again agitating the Opium-question, and it appears that they cannot attack that trade without including in it a prohibition, the exportation of Sycee Silver, which it would seem has much more of the attention of Government than the Opium trade.

We have seen a memorial of the Censor Le Pankeaou chiefly addressed against the export of Sycee, and of which want of time prevents us to give a translation to our readers, but of which the following is an abstract.

"The Censor deplores the evil consequences arising herefrom (the exportation of Sycee) and complains of the dearness of it, and cheapness of the copper cash, states the quantity of Silver exported from

Kwang-tung Province annually at 3 mill of Taels
Teen chun „ „ „ 2 „ „ „
Fuk kheen, Teetkong } „ „ 1 „ „ „
and Kungsoo }

also complains of the increase of the opium trade.

The Emperor complains of the remissness of the Governor and Lieut Governor of Canton and threatens them with punishment. Orders that no Fast Boat be allowed to leave any town without being searched; and promises all the sycee seized shall be given to the officer under whose direction the seizure is made. Enjoins diligence on all the mandarins military and civil to prevent the Silver "oozing out from the central kingdom.

The memorial seems to have called forth the following Imperial edict, which was taken round to the agents for the different Opium ships by the Hong-merchants themselves. Whether it is intended, by the Chinese Government, to be acted upon remains to the seen. We believe it to be one of the many governmental decrees calculated to blind the eyes of the subjects, by a shew of *paternal* solicitude, and that it will be consigned to oblivion very soon. Whether the non-appearance of the smuggling boats at the moon, of which we hear to day, is one of it's consequences, we do not know, but we would rather suppose that to be owing to local causes.

## OPIUM TRADE.

ANOTHER PROHIBITORY EDICT,

*Tsung* President of the Board of War and Governor of the two Kwang Provinces and *Ke* secondary Guardian of the Heir apparent, Member of the Board of war, and Lieut. Governor of Canton issue this Edict for the Hong merchants' full information.

On the third of this month a fire despatch from the Board of War having reached the Privy Council the following was transmitted to the Governor and Lieut. Governor with orders to make known its contents to *Wen* Commissioner of Customs.

On the 12th day of the 6th moon the following Imperial Edict was reverently received.

"The evil consequences resulting both to ourselves and the people, from the practice of exporting Silver Bullion from the various ports along the coast, have ere this manifested themselves and we have issued repeated orders to the Governors and Lieut. Governors of our several cities, to investigate, and adopt severe measures, to check the evil. The Censor Le Pankeaou has, this day, brought the subject under our notice by the following memorial."

In the 1st year of Taou-Kwang upwards of ten Opium store ships belonging to the English nation, anchored in the Cap-shuy-moon, where they remained till the 13th Year, when they removed to Cum-sing-moon. As regards the export of silver Bullion and the import of Opium, these vessels were employed in conveying away the former and storing and concealing the latter, which is brought into port by fast-crab boats belonging to traitorous natives. These boats start (from the ships) in the morning and arrive at their destination the same night and by means of these boats the various places on the coast are enabled to participate in the trade. They are employed by the opium dealers who, when they sell, agree to deliver it to the purchaser at their own risk. There are also several shopkeepers in the city who are nominally dealers in foreign goods, but are actually engaged in this secret trade, and in fact are no better than the Furnace keepers.

There have always been proper anchorages appointed for the foreign Ships. How is it, that none came (to Cap-shuy and Cum-sing-moons) before the 1st year of Taoukwang? Latterly they have constantly anchored there where it is plain traitorous natives league with them to carry into effect their nefarious scheme which they are thus enabled to do at pleasure.

It is desirable that orders be despatched to the Governor and Lieutenant Governor of Canton instantly to adopt the severest measures. They should command the Hong merchants to insist on the resident foreigners sending all the store ships back to their Country. They must not under any pretence leiter about. Investigation should also be entered into respecting the opium furnaces. The haunts of the keepers should be discovered and themselves dragged forward and visited with summary punishment. Not the slightest shadow of indulgence should be shown them.

Thus, may the source of evil be stopped up, and the pratice checked.

"Let our Privy Council transmit Copies hereof to *Tsung* the Governor and *Ke* the Lieut. Governor: let them make known its contents to *Wen*, Commissioner of Customs."

"Respect this"

On receipt of the Imperial mandate, the Privy Council, immediately despatched it hither, which, coming before us, the Governor and Lieut. Governor, we forward a copy of it to the Hong-merchants; Let them instantly accord obedience thereto and commence their investigations.

The laws of the Celestial Dynasty are reasonable. Foreign vessels are not allowed to anchor in the outer waters.

Let copies of this edict be handed to the several foreign heads of houses, who, in obedience hereto, must instantly send away all the foreign store ships from the outer waters. If they are so daring as to disobey you, the Hong-merchants, shall alone be held responsible. Why do these ships remain so long in the outer waters, and why do they not return to their country? Let the Hong-merchants, ascertain this point, and report same to us that we may act accordingly. If they practice the least concealment, most assuredly their punishment shall be awful.

Haste! Haste! These are the Commands.

In our paper of the 29th July we published the memorial presented to the Supreme Government of Bengal, by three merchants of Canton, on the Agency of the Finance Committee here. We now are able, through the politeness of a friend, to lay before our readers the answer from the Government. We are sorry to find it far from satisfactory, nor perhaps could it be so altogether, from the rather complicated nature of the Company's finance transactions here, the extent of which, being influenced by a variety of causes, the Government itself can never be able, or at least but rarely, to ascertain long before hand, and which even after an approximation to the amount probably required, is liable to be affected by circumstances not before existing.

We are glad however to perceive that the system which obtained last year of subscribing for a certain amount that may by each house probably be required during the season, or rather up to a certain date in the middle of the season, and which acted so disadvantageously on prices, is no longer to be continued, it being now left at the discretion of the Agents here to distribute the advances in the most advantageous and equitable manner. This, if the system of advances is to last, which we regret to find is likely to be the case, will do away with a good many of the objections urged against them before, though they will still, but in a comparatively less degree, continue to benefit the chinese at the expense of the British consumer, by introducing at a certain season of the year a large capital, which would not otherwise have been hoarded up, and which, the Bengal Government informs us, it must ever be the wish of the Finance Committee here to employ as early in the season as possible. The Chinese will therefore still be able, in a manner, to calculate on this money coming forward within a certain time and raise prices accordingly. We besides think it unfair at all times for a great and powerful Government to compete with individual merchants, which it does in China, persuaded as we are, that, if the Company did not supply this trade with dollars, our merchants would do it on fully as cheap terms, only they are now withheld, unable to cope against such enormous means and the public does thus not dervie all the benefit of the China trade it is entitled to.

The 4th paragraph of the merchant's memorial, the Bengal Government seems to have misunderstood altogether. The memorialists merely wished to be furnished by the Company's Agents here, on application, with the sum total of funds remaining in their hands applicable to advances, and had no wish to know how much every individual merchant had taken, or against what kind of produce the advance had been granted to him. In Calcutta we believe it is usual, that after the goods have been valued and the required documents delivered at the proper office, for a book to be sent to the applicant for advances, wherein he registers and signs the amount required upon the goods, and of this, any one who likes, may take a copy. If this has no bad convenient consequences in Calcutta we see no reason why it should be otherwise here.

The assurance of the Secretary contained in the last paragraph, "that the Agents will always effect their operations on the most advantageous terms for the East India Company they may be able fairly to obtain" no one, will even without that assurance disbelieve. We had an instance of this as late as the beginning of this month, when the Exchange on Bengal was raised from 218 to 216 C. R., the latter being equal to 209½ Sa Rs per $ 100, or 8½ Sa. Rs per $ 100 profit beyond par.

It is with pleasure that we generally agree with what falls from the pen of our Cotemporary of the Singapore *Free Press*, but we cannot with him find in his Canton Correspondent's letter which he publishes on the 20th July, any shrewdness in the remarks contained in it. The writer, if he has read what we have said on the subject of the Superintendents coming up to Canton, would have found that we never were opposed to, but even wished for, a British Consular establishment in Canton. We were not opposed to Superintendents or other British functionaries, under what ever denomination, coming up to Canton, but to the manner in which these superintendents came, who, it must not be forgotten, formed, though at that time in stations inferior to what they now hold, part of the mission under Lord Napier, and were promoted, after that Nobleman's death, by casualties and the original members of the commission having retired or been recalled, to the responsible situation they now occupy. The disgrace attending that ill judged attempt, though the present Superintendents may not have been parties to it, must still involve them in it in the eyes of the Chinese; and these, being told that Capt. Elliot still acts under the very same commission under which Lord Napier came out, must naturally look upon his having applied through the Hong-merchants for leave to come to Canton, as if the British had conceded to the Chinese a point which Lord Napier in vain contested, and a point which by that Superintendent was considered as of the utmost importance, and without gaining which, he refused having any communication with the local Government. The *Free Press*' correspondent says that the British have gained a point in the permission given to Capt. Elliot, a naval officer, to stay at Canton; but surely he does not mean to say that this permission would have been denied Lord Napier had he applied for it in the same manner; this was in fact repeatedly pointed out to him by the Chinese, and his coming to Canton without such permission was his chief offence in their eyes, and was what made it necessary for the Frigates to force the Bogue, and for Lord Napier to retrace his steps, consequences which would not have come to pass had he applied through the Hong-merchants; which, had he done, we might see him still living among us. We do not now wish to consider whether Lord Napier was *right* in his line of conduct; we only want to shew that the writer in the *Free Press* is *wrong* in his deductions.

What we always found fault with was that the commission under which Lord Napier came out, remained in force, and that, instead of it's continuing, a mere Consul was not sent to Canton, unconnected with the former mission. As to the hopes of the writer in question that the Superintendents should "be solely on the watch for an opening in the thickest hedge of abuses, prejudices, and jealousies" such watch will we fear be of very little use, and be as well mag kept by any one merely with a consular appointment. That they never will lend themselves to be Police Agents for the Chinese, we hope, but we are at the same time aware that the latter will try to thrust that office on them, and it is only within this week they have applied, we have been told, to the Chief Superintendent to enforce the Emperor's order for ships immediately to leave the Capshuy-moon & Lintin. The Chinese suppose, or affect to suppose the Superintendents to be possessed of great power over the British here, and prefer to have, as in the Company's time, an individual whom they *will* consider responsible for whatever illegal acts his countrymen may commit. In fact if the Vice-roy's report to the Emperor of Capt. Elliot's application to him is correct, the Chinese are perfectly right in this supposition, Capt. Elliot having offered himself as a sort of police-agent; this application is given as follows in that report. *

"Having received a despatch from my country, "requiring me to proceed to Canton in an official "capacity to controul my country's merchants and "seamen there; and at the present time, there being many ships in port, and many merchants and "seamen in Canton and in Whampoa, who are "*ignorant of the laws of the celestial Empire*; and "being really afraid that troubles may arise, I ag "*to be permitted to go to the Provincial city to con*"*trol them.*"

The writer of the *Free Press*, was, we imagine, not aware of the existence of such a document, or he would not have ventured his remarks. We repeat again that the powers vested in the present Superintendents, and the knowledge of the Chinese that such powers are intrusted to them, can only be prejudicial to the interests of British merchants here, if exercised, which from want of physical force they cannot be at present; but this latter circumstance may become, at no distant period, a matter of reproach by the Chinese for the assumption by the Superintendents, of authority they cannot exercise, and may lead to fresh insults of the person at the head of the British in China.

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER UNLESS IS PAID BY THE SELLER.

NOTE. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for Camlets, Sarsnets, Ginseng and other Goods, on which the duties at Whampoa are high.—Ships with Rice, Cotton &c. sometimes discharge at Macao or transhipp their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rests outside, and River Freights, are various and high.—Small invoices of Wine, Beer, Pickles &c, Confectionary Stationery, Cutlery Crockery ware, &c. for foreigners consumption, are sold at Auction duty paid.

Note. Alum, and Canes are procurable cheaper at Lintin, Macao, &c; and Raw Silk, Silk piece goods &c, are sometimes shipped there the latter Port to avoid double duties, chargeable on those goods, if more than 100 Pounds are required for the ship when at Whampoa.

3rd " " under 1200 do. " 0.5627351 " "

N B The cubit is 14½ inches; measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremost to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products—The largest class pay from $ 4500 to $ 4320; 2d class from $ 3700 to $ 3500; 3rd class from $ 3700 and under. The Canton Inner Port Fee in paid by all vessels 1600 Taels or $ 2223. Linguists fee $ 173½ and Compradore's fee $ 50 Also Pilotage $ 60, inwards and outwards the same. The French and other Foreign vessels they are slightly varied. Ricesiden ships are charged only about $ 1200 in lieu of measurement

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—Longcloths, both white and grey continued in very great demand, the market being entirely bare of them.

WOOLLENS.—There has been some demand for Spanish Stripes which have advanced a little in price. LONGELLS also are improving, the stocks in first hands being much reduced.

RICE.—The prices have slightly improved during the week, owing probably to the heavy rains which have fallen lately.

STRAITS PRODUCE.—TIN remains in fair demand at our quotations, and the price of PEPPER has again improved. The demand for BETELNUT has also caused an improvement in price of that article.

SANDALWOOD.—The recent arrivals have caused a slight fall in prices.

LEAD.—Improving.

COTTON.—The transactions have been limited, purchasers not being willing to come forward except at a decline which holders will not submit to. There is not so much enquiry for fine Cotton in consequence of the flood in the district where the demand for that description is. 3 @ 4000 bales of fair quality new BOMBAY COTTON have been disposed of at about previous rates 8. 3 @ 9. 5. Inferior kinds without improvement. The clearances in July are reported at

since, which the *Glenelg*, *Charles Grant* and *Castlereagh* have arrived.

OPIUM.—In our last we adverted to a chop having been received from the Emperor regarding OPIUM the consequences of which have proved more serious than we anticipated—there being again a complete interruption, within this day or two to the trade, but we trust it will be only for a short time. Meanwhile nothing is doing, and our quotations must therefore be considered as nominal. The deliveries to the 8th were,

Patna, *Old*, 5, *New*, 110; Benares, *Old*, 10, *New*, 0; Malwa, 560; Total, 685 Chests.

### EXPORTS.

TEA.—Musters of new Soucheng Pekoe, Hungmuey, and Ankoy teas of various descriptions and a few of the merchant's own Congous have arrived. There has been, we hear, a little inquiry during the last week for Pekoe and Hungmuey, but the teamen in general ask higher prices than the purchasers would be warranted in giving after the late accounts from the home market.

EXCHANGE.—on England, quite nominal at 4s. 8d.

# THE CANTON PRESS.

VOL. 2d. No. 50. CANTON, SATURDAY, AUGUST, 19TH, 1837. No. 102

FROM THE CHINESE REPOSITORY FOR AUGUST.

ART. V. *Chinese pagodas, their supposed influence on the productions of the soil, the prosperity of the people, and the government of the elements: with notices of the lions of Canton.*

TRIVIAL occurrences, and incidental remarks and the most artless actions, of no value when considered separately, sometimes afford the best materials for elucidating the principles and character of men. Ballads, placards, and the like, fall into the same category; viewed unconnectedly, they may seem unworthy of notice, but when collected and arranged, they often afford curious and valuable data, for ascertaining popular sentiments, taste, and manners. To natives, these sources of information are open; but to foreigners they are, for the most part, inaccessible. Hence, one of the reasons for our ignorance of the customs and usages of the Chinese. Processions and festivals, with a vast variety of rites and ceremonies, are frequently witnessed by the foreigner; whilst respecting both their cause and their object he knows nothing. The origin and design of the pagodas, prominent objects in almost every part of the country, are but little understood by foreigners; and indeed, not a few natives are equally ignorant respecting them. In former volumes, we have given a variety of notices on this subject, all confessedly incomplete: we have now only a fragment to add; it is a 'subscription paper;' it originated early this year, among the gentry of Canton; it has been placarded, and extensively circulated. The following is a free translation.

"Fellow-countrymen! The region of country southeast of the provincial city, on account of its watercourses, has an important influence on the destinies of the inhabitants. From an examination of old records it appears, that the pagoda on Pachow, and the adjacent temple dedicated to the monsters of the sea, were built in the twenty-fifth year of Wanleih (1598); and that the pagoda at Cheihkang, and the temple there consecrated to the god of letters, were founded in the reign of Teenke (about 1621); all these structures have had a most happy influence on every thing around them, causing the number of literati to be very numerous, and the productions of the soil most abundant. Recently, however, the winds and the rains driving furiously, have broken down the tops of the pagodas, and laid the temples in ruins, and injured even their foundations. Their appearance now is very unsightly; they ought to be repaired, in order to secure the return of happy and prosperous times. The pagoda on the north of the city, which rises five stories high and has its walls painted red, a color which is from its very nature productive of fire, ought also to be repaired, and painted with some other color. Already we have obtained the permission of their excellencies the governor in council, to proceed with the contemplated works, and also recommendatory papers in which they advise the people to assist in accomplishing this work. It being an affair which greatly concerns both our honor and prosperity, we have a right to expect, fellow-countrymen, that you will heartily cooperate, joyfully and promptly contributing, little or much according to your ability, so that by our united efforts the repairs may be soon undertaken, and the buildings rise again to their former splendor! Then, according to your deeds of merit, the gods will send prosperity, and your glory and virtue will become great beyond comprehension. A special solicitation."

The gentlemen who have put this paper in circulation, are styled *shinkis*, a term denoting that they are allowed to wear the sash of honor: they are all literary men, and are the most distinguished and honorable in the city of Canton; their number is supposed to be not more than three hundred. Their first 'solicitation,' not having obtained a very liberal support, they have just sent forth another, urging their countrymen to come forward with new contributions. Agents have been appointed to solicit and receive money; but it is said the whole amount now collected does not exceed $1000. The repairs which are contemplated will require several thousand dollars.

It is not easy to understand the motives which have induced these literary gentlemen, and their countrymen, to engage in this enterprise,—an enterprise which seems to be regarded as both benevolent and religious, one which, when accomplished, will be pleasing to the gods and beneficial to men. The Chinese pagodas generally, and these among the others, are, it is believed, of Buddhistic origin. The motives, therefore, which led to their erection, and which are now inducing such special efforts for repairing them, are purely superstitious, ideal, without foundation in reason or fact. It is supposed, by the authors of the paper given above, that these buildings have an influence on all things around them, and that, when in a proper state of repair, they will cause the soil to be productive, the people prosperous, and the elements (such as fire, water, &c.,) submissive and obedient. Here, then, we see not only the common people, but their rulers, with the most honorable and distinguished men of the country, lending themselves and their influence to support vain superstitions, which reason and common sense, when unbiassed, will ever condemn. These superstitions are based on an ideal system termed *fungshuy*, fully to elucidate which will require much more information than we can now command. Mr. Davis, in his observation on this subject, very justly remarks:

"The strangest and most unaccountable of the Chinese superstitions, is what they denominate *foong-shuey*, 'wind and water,' a species of geomancy, or a belief in the good or ill luck attached to particular local situations or aspects, which we had occasion to notice before, and which, among the more rational classes of the people, is admitted to be nonsensical. Before a house is built, or a burial-place selected, it is necessary to consult certain professors of the occult science, who, at the price of adequate fees, proceed with much solemnity to examine the situation. After frequently perambulating and examining the ground, and even deferring their decision for months, they will fix on some particular place. The lucky position of a grave is supposed to exercise some influence on the fortunes of a whole family; and if, after all the expense and trouble of consulting the cheats who profess the art, ill fortune rather than good should attend the parties, this is, of course, attributed to anything except the inefficiency of the *foong-shuey*. This term may in general be constructed by the word *luck*, and it has been supposed that in a country, like China, where nearly all long journeys are performed by water, 'good wind and water,' or in other words good luck on a journey, has by degrees come to signify good luck in every circumstance and condition of life." *See vol ii, p. 145.*

Connected with this 'wind and water' system there are, in and near Canton, what are called *pahing*, 'the eight lions,' as the phrase may be freely translated; the work king means, literally, a light, a prospect, a landscape; and in the pa king, it seems to imply, 'a remarkable locality.' In the history of Lewchew, noticed in our last number, we observed that the Chinese historian has described the eight remarkable localities of that country, and endeavored to illustrate the same by wood-cuts; in the following order: 1st, a landscape, including hill and dale, viewed by moon-light—it is a night-scene: 2d, a rocky coast, against which are dashing the billows of the ocean: 3d, a beautiful village surrounded with bamboos: 4th, a forest of lofty pines: 5th, a rocky precipice: 6th, a rainbow, as seen after the autumnal showers: 7th, a fountain of water: and 8th, gardens of plantain. In Canton, the 'remarkable localities' have been different under different dynasties. Those now in vogue are the following.

1st. *Yuenco leaufung*, or the peaks of Yuenco. This is the name of a ridge, or series of peaks, rising just within the northern walls of the city: the ridge extends from east to west about three *le*, or a little more than one English mile, and is crowned with a pavilion for the goddess of mercy. From these peaks, the spectator has a fine view of the city and its suburbs, and of the surrounding country southward, eastward, and westward. The place is often a resort for parties of pleasure.

2d. *Pachow tachao*, the pagoda of Pachow, or, more correctly, *Pagachow*. This is one of the structures mentioned on a former page in this article; it stands about east from the city, perhaps forty *le* distant; and is known to foreigners as the 'Whampoa pagoda.' The plot of ground on which it stands is an island, 'which rises,' as the Chinese say, 'abruptly from the middle of the Pearl river, about fifty feet in height, having upon it three knolls, resembling the shape of a guitar; and hence its name, *Pepa chow*, 'the island Guitar;' and hence, too, the name of the pagoda. It was built by permission of the local authorities, and rises nine stories high; and was originally called Fowtē (Bodhi?); and also 'the pagoda of the sea-monsters.' On the north, it has a smaller art dedicated to the god of the north, and a temple consecrated to the monsters of the deep.

3d. *Wanteen heatung*, 'the pavilion of the five genii.' The story of the five genii has been given in our second volume, page 148. Their pavilion stands in the old city, and was erected by a provincial officer in the reign of the *Ming* dynasty. Having completed the building he caused images of the five genii to be engraved and placed within its walls. Near its entrance there are to be seen the five stone rams, and a huge rock, forty or fifty feet broad, on which is the print of a man's foot; the hollow made by the foot on this rock is (said to be) always filled with water, as if it were supplied by a living fountain beneath—which is truly marvellous!

4th. *Kaouwā Yushan*, the rocks of Yushan. This locality is also within the city, and has nothing to distinguish it except a temple, and that presents nothing remarkable.

5th. *Chinhae stenghow*. This is the famous red building, described by the gentry of Canton, as being productive of fires in the city and vicinity. It stands on the northern wall of the city, and was built by Coo Kangtsoo in the first year of Hungwoo, A. D. 1368.

6th. *Fowkew tsuting*, the wells of Fowkew. These are situated in the western suburbs; the origin of the name, Fowkew, is involved in much obscurity, and connected with many legends and traditions, which are unworthy of notice. Their waters, however are reputed to contain divine qualities; and even the flowers, which grow in the vicinity of the wells, are sought for with great eagerness, since it is supposed they bring good luck to those who pluck them.

7. *Setsenau punpā* the cascade of Setzenau. The hills of Setzenau are in the district of Nanhae, about forty miles westward from the city. The surrounding scenery is described as very romantic; and the crystal stream, at the head of the cascade, pushes forth from the solid rock, "as the water from the bore of an engine."

8th. *Tungkae yuchoo*, literary, 'east sea fish pearl,' meaning 'the pearl of the eastern river;' this was once a beautiful round stone, which rose in the middle of the Choo-keang, a little distance from the southern gates of the provincial city; it is now the site of the Dutch Folly, called by the Chinese, *hae chaou tse*, 'the pearl temple of the river.'

In this enumeration, the reader will perceive that two of the buildings, which the gentry of Canton are about to repair, are included among the 'eight beautiful prospects' of the city. The other pagoda, at Cheihkang, is midway between Canton and Whampoa, often called the 'half-way pagoda.' While the Chinese are thus solicitous about, 'they know not why,' their indifference in certain cases where their present and immediate welfare is at stake, is truly remarkable. This point is very justly animadverted on by Mr. Davis: he says,—"In common with a considerable portion of the rest of mankind, they are pretty generally fatalists, or believers in inevitable destiny: and the practical mischiefs of such a creed cannot be more strongly displayed, than in the conspicuous resulting from their apathetic carelessness in regard to the use of fire. Notwithstanding the repeated conflagrations which every year devastate the town of Canton, the same unaccountable negligence is perpetually apparent to the most casual observer, who, in perambulating their streets, or taking notice of their domestic habits, cannot fail to be struck by the extreme carelessness with which burning paper and lighted sticks of incense are left a bout burning paper and lighted sticks of incense are left a bout their combustible dwellings, or pipes smoked and bunches of crackers discharged in temporary edifices constructed entirely of *matting*. * * * Some of these first are doubtless the work of incendiarism, who hope to profit in the confusion; but a large number must also be considered as the results of that stupid belief in fatalism, which tends to paralyse effort and to banish caution."

## TEA IN ASSAM.

At the last meeting of the Agricultural Society, a printed copy of the Report of Dr. M'Clelland, on the plantations in Assam, which had been laid by him before the Governor General, was placed upon the table. The information, which was obtained from Dr. M'Clelland's researches, will be found of the highest value in directing the future efforts of Government and of the community, to acclimate in this Empire, the cultivation of Tea. There are few objects of national interest which yield in importance to this question, whether we consider the magnitude of the consumer of which it is the element, or the risk to which that commerce is exposed in China by the caprice of a semibarbarous Government. It would indeed be a noble change in our commercial relations, if we were to become independent of China for tea, and the Chinese were no longer dependent on us for opium.

Dr. M'Clelland visited *five* tea plantations in Assam. The *first* was that of *Cuju*, twelve miles from the banks of the Noa Dihing river, and twenty miles south of *Sudiya*, in the midst of an extensive forest. The whole plantation appears to be comprised within a circular space of 300 yards in diameter. The plants were found to be smaller in size in proportion to their distance from the boundary line of the plantation. The *second* colony of plants was found at *Nigroo*, in a southerly direction from Cuju. Dr. M'Clelland thus describes his discoveries at this plantation:—

"Approaching the spot, from the river, we crossed a tract of almost pure sand, overgrown with reeds, and in the course of a few paces, reached a sandy clayey soil in which we found a few small tea plants; a few spots further introduced us to a dry, and less consistent soil, in which the plants were found larger, and more numerous. (I selected a specimen of each of these soils, marking the first, 1809; and the second, 1010.) Surrounded by tea plants, we ascended the mound, the soil of which light, fine, and of yellow colour, having no sandy character. Here the plants were found still more numerous than in the lower ground."

The *third* plantation was near the village of *Nondwar*, in the centre of upper Assam, twenty-five or thirty miles from the Burrumpooter. It is about fifty yards in length and twenty in breadth; but there is reason to believe that the plantation was formerly much more extended than it is at present. The *fourth* grove of tea was found at *Thegrey*, where the plant does not thrive more than thirty yards from the margin of a small stream. Here a number of young plants were found, which gave an encouraging instance of the disposition of the plant to accommodate itself to any soil; although the plants were found to increase in size and number as the travellers approached the light sandy soil, and disappeared again in a dark rich moist soil. The *fifth* colony of tea plants visited was at *Gubre Parbut*, three days journey E. S. E. of Jorehaut. The extent of ground covered by this group of plants was about sixty yards in diameter, and of circular shape. From the circumstances in which they grow Dr. M'C. argues that the tea plant grows spontaneously under slightly different circumstances as follows. 1. In the level plain. 2. On embankments or mounds somewhat raised above the plain. Cuju, Nondwar and Thegrai, are examples of the first, Nigroo, and *Gubre Parbut* of the second."

The researches of Dr. M'Clelland in Assam, have not, indeed' discovered to us any thing which could be denominated a tea forest, from which an immediate and exclusive supply of tea might be obtained, as soon as we have become masters of the art of manipulation. All the five tea colonies visited by him do not comprise an extent much exceeding one square mile. But his exertions have fully demonstrated the capacity of the soil of upper Assam for the cultivation of tea, and shews that nothing is wanting but care, perseverance, and a moderate outlay of capital, to ensure a considerable share of this valuable commerce to India. When indeed we have extensively naturalized the manufactures of tea in India, and enjoy the services of a number of individuals well acquainted with the culture and preparation of the plant, there can be little doubt, that the cultivation of it will spread through the countries to the East of Bengal. And when public attention is once drawn to the subject, and information has been freely circulated, other localities in the wide regions which have come into our possession in this quarter, will be found to be possessed of every qualification for rearing the plant.

Dr M'Clelland concludes the first part of his report with the following observations:

"There are however many spots of suitable structure in Upper Assam, that might be selected for new plantations; the most desirable might be at once chosen, while the old colonies should be carefully preserved for the supply of nurseries. This would seem to be the more necessary, as in case of the seed becoming exhausted by the injudicious treatment of the plants composing the original colonies, the difficulty that might arise in procuring a fresh stock from China might prove fatal to Assam as a tea province. From those tea seeds which were procured from China at an enormous expence to Government, few plants have been reared, and probably not one of those few will ever bear seed. The importance therefore of abstaining from officious interference with the original colonies must be evident. None of these are very great in extent, and it is possible to conceive that as they are all in retired forests some attempts may be directed to the transplantation of the trees in a more convenient but less appropriate situation, (as is almost sure to happen on such occasions if convenience be at all allowed to enter into our views) and thus exhaust, if not totally destroy the means of conducting more judicious experiments.

"Little is to be expected from any attempts that can at present be made to manufacture tea from the uncultivated plant; but still as there is a small establishment on the spot for the purpose, consisting partly of Chinese, they might be employed in constant trials upon the leaves afforded by the different colonies in order to detect what the nature and degree of difference may be, between the products of the different soils as well as of leaves of different size. The mode of manipulation adopted with regard to each specimen, and how dried, should be carefully noted, and reports upon the subject forwarded to Calcutta by the person in charge: together with specimens of the prepared tea packed in tender boxes containing those aromatics upon which some of the finer qualities of tea may depend."

(*Friend of India, June 29.*)

### THE SPIRITS OF THE LAKE.

*Original Translation, from the Chinese.*

When the pearly dew of fragrant evening,
Quick following in the sun-beams steps,
Usher in the coy and modest moon,
When the lily rears aloft its drooping head,
And the merry cricket chirpeth in the shade,
I'll wander forth and count my sorrows.
The soft Pe-pa, which dangles from my arm,
I'll strike, and court it's magic melody;
Perchance 't will scare intruding thoughts
Away, or sleep entice: then I'll forget
The sad reality of grief and misery,
And dream of fickle happiness once more.

I'll sit me down on yonder rose and weep:
But no—the wastes much, 't will source
Support so vile a thing as I: the chilly earth
Shall be my couch, a stone my pillow;
For them are but sad prototypes, of a
Cold blighted heart:—and such is mine.

This form so thin and wasted, once was fair
This heart so cold, once was warm and joyous.
Where is my beauty now? and whither gone
My happy heart? Flown with these flatterers,
Who, like the bee, flock round the blooming
Rose, which *faded*, they desert! What care I?

Cursed be that beauty which excited one,
So hated, to desire my love—or person;
Cursed be that love (in him, but sensuality)
That urged disobedience to a father.
Alas! Alas! that father greets him friend
And promises his daughter for a bride."

"I'll plunge into the stilly lake and die
And thus escape his loathed embraces;
My corpse shall be his bride, my nuptial bed
The grave! Merry will I be in Hades
And oft will I think of my fond lover *Pang*
Who wandereth now in some far distant clime."

Thus spake Miss Pooy, who hearing sounds
Of coming footsteps, fled from the spot
And hurried on towards the darkening lake.
Finding herself pursued and fearing interruption
She made the fatal plunge, and as the
Ruffled waters o'er her closed, she called on Pang

I come! I come! responded Pang, who near
Returned successful from the wars, passing
The house, had spied her in the garden,
And followed, but to witness her demise.
I come closed! he cried; another plunge
And all again was still save Crickets chirp.

A fairy skiff 'tis said, is sometimes seen
Sailing on the lake, guided by Pang, while
Seated by his side, Pooy chants some mournful
Air. When the bright moon retires, they
Also vanish, nor are seen again for days
Or months, or years. P.

## CORRESPONDENCE.

TO THE EDITOR OF THE CANTON PRESS,

"*Pursue me on the track the outlaws*
*When distant vengeance had not taught to fear.*"

Mr. Editor,—You have stated that three of the Brig Fairy's crew were executed at Manilla about two months ago, which I take leave to assure you is incorrect. I left Manilla on the 16th of June and at that time three of the pirates belonging to the Fairy were closely confined in separate cells, and the evidence each prisoner gave, fully confirmed their guilt, but as it tended to involve others of the surviving crew in the same horrible crime, *particularly the Sprang*, their fate would be held in suspense until those men now in Canton could be confronted with them at Manilla, but surely you are in error when you say those men are to be sent thither to take their trial! They served under the British flag and were to all intents and purposes British subjects. *Then what tribunal under any other flag can have jurisdiction in the case?* The pirates taken at Manilla are natives of a Spanish colony and were found within the jurisdiction of Courts and laws of Spain with a portion of the plunder of their vessel about them, but even their case involves a question of legality as to their final and well merited doom as the act of piracy and murder they committed was *while serving under an English flag!* I imagine you have been led into the mistake you have made, from having heard that two Pirates were executed at Manilla on the 20th of May last? I was present at their execution, they were two Manilla men, out of three, belonging to the Spanish Brig La Fama laden with a valuable cargo from Singapore and bound to Manilla, who murdered their Captain, the Mate and Boatswain near the Coast of Luconia, and after having possession of that vessel for some time were lulled into security, subdued, and lashed to ringbolts through the ingenuity, presence of mind, and exemplary conduct of the Steward; the third mate jumped over board and was drowned. The La Fama was carried safely into Manilla bay and the villains were seized, tried, and executed about twelve days after her arrival.

Some plunder of cargo had been effected and all letters, parcels, etc. had been thrown overboard by the Pirates during their temporary sway, but, up to the period of my departure from Manilla, no remuneration had been made to the Steward and those of the La Fama's crew who resolutely withstood the temptation within their reach, and with sound honesty and upright principles regained that vessel and rescued from the lawless hands of murderers and pirates a cargo estimated at 100,000 Dollars, chiefly belonging to British merchants.

I understand the question, as to what reward should be given, was in abeyance until the Insurers or officers here or elsewhere had determined that essential point. Justice and that liberality which is due to the saivors of a vessel and cargo in the hands of Pirates with a safe retreat under their lee, will not allow merit so conspicuous to be unrewarded, and whilst the crimes of one portion of the crew

have been expiated on the scaffold, and their heads and limbs are exhibited in chains as a te ror to evil doers, let the claims due to merit be dispensed with equal publicity, and thus proclaim to every seaman whether Manila man, lascar, or European, that a manly discharge of duty shall be duly rewarded.

I have the honor to be,
Sir,
Your most obedient Servant.
CHRIS. BIDEN

Macao, 9th August, 1837.

P. S. While at Manila I understood from very good authority that the top mast heads, with top gallant masts standing, of a vessel answering the description of the Brig Fairy, were discovered above water in about 18 or 20 fathoms, off the N. E. coast of Luconia some months ago and from all I heard on that lamentable subject, I verily believe the Fairy was scuttled, sunk, and abandoned thereabouts, with some specie in her hold.

In this endeavour to set you right upon some matters which have a public interest, allow me to add that you were mis-informed as to the cargo on board the ill fated Junk stranded on Francisca point in the late Gale where she still lies, instead of *being in ballast*, she had on board a very valuable cargo consisting of Opium, Bird s nests—Sandal Wood, Ebony—Pepper. Betel nut, Rattans and Sugar—supposed to be worth upwards of 200,000 Dollars.

Y's. C. B.

I observe your statement as elicited from the lascars late of the Fairy, mention the Syrang as one of the victims during the mutiny, whereas the prisoners at Manila (according to the account I heard from a gentleman who saw them) charge the syrang with having been one of the mutineers; I was much surprised at the accusation, as the well known conduct and character of lascars is so totally at variance with such diabolical schemes; their general failing proceeds from fear and a want of confidence among themselves in cases of desperate emergency. Y's. C. B.

## MACAO THEATRICALS.

### TO THE EDITOR OF THE CANTON PRESS,

Dear Mr. Editor,—We have enjoyed a most delightful evening, and indeed a very jovial night at Macao, and as all our good friends at Canton will like to have some account of our festivities, I will endeavour to gratify their wishes.

A party of Amateurs got up Sheridan's Comedy —The Rivals—I firstly give you the Bill of the Play, as it ought to have been printed, and will then proceed to describe the whole entertainment.

The Parts were thus appropriately cast and the performance took place at a house known to the Chinese by the name of "Sixteen pillars House,"—to the foreigners by the gay and memorable Fancy Ball held in it last winter. A few minutes before 7 P. M. I reached the house and was welcomed by the Stage Manager at the en rance, where he awaited the arrival of his Excellency the Governor.

This Gentleman bore a white wand and was bedecked with a mostgiaring red ribbon and rosette, which I presume were prepared for him by one of the ladies, whose generous and friendly zeal was conspicuous wherever their amiable assistance could tend to provide the wants and gratify the wishes of the Amateurs with dresses, decorations, &c.

My path to the theatre was through a neat vista of about 200 Chinese lamps arranged in the arches upon which "Six een Pillars House" is built.

The Theatre was erected upon the terrace which overlooks the small, but well laid out grounds and was protected from the effects of wind and weather by a temporary screen of mats. In the centre of the terrace, in a recess, stood the stage and scarlet curtain, surmounted by a neat ceiling board and well flanked by columns, concealed this portion of the theatre from view until the performance commenced. On the ceiling board stood the motto

PLACERE CONAMUR

in letters of gold en wreathed with laurel and a group of theatrical and musical instruments.

This motto was a puzzler to some of the company, who declared that they had forgotten their Latin; it really is a long time since I left school. One wicked wag, who certainly knew better, declared that "placere conamur" meant 'Give place to the company, and he had scarcely palmed this interpretation upon a certain jovial captain than the latter declaring he possessed a literal translation palmed upon his next neighbour another Hum—*The Place of Columns*. The Ladies a little doubtful of the propriety of the motto rather restricted their enquiries to the medical Gentlemen who were present in full number, and one of them at least had for gotten that ancient maxim of latin grammar that. "The second conjugation hath e long before *re* and *ris*."

About 7. the band struck up the Portuguese national air in very good style and announced the arrival of the Governor ushered in by the stage manager. His Excellency took his seat immediately in front of the stage. About eighty Ladies and Gentlemen formed the audience and it was gratifying to see the children of my English neighbours enjoying so rare and pleasing a scene. Eagerness and anticipated pleasure seemed to enliven every countenance.

The charming smiles of gladness graced each brow
And told how social joys are blended at Macao.

When the Prompter's bell rang the Honble. J. R. Drummond stood forward to deliver the prologue a copy of which I enclose you *

As a composition, this printed prologue is open to criticisms and even the writer of it, will not, I feel assured, be angry at my notice of it. The classical allusions in the introduction of it, I do not find fault with; although it "is really a long time since I left school." It is however clear that the author is not a frequent writer of poetry and that the prologue is the production of a young mind; a poet's mind, we are told, is always young; but there is a distinction between the young minds of young men, and the young minds of old poets. I however, am truly glad to find the tithe of a poet amongst us and if any thing from my pen could urge our friend to persevere and unfold with less diffidence and receive the stores of a mind gifted, as his is, with innate talent, I would write it with pleasure.

Modesty conceals the genius of a virtuous mind
Which knows no other impulse than be just & kind
Prone to do good, his generous heart expands
And with prompt zeal obeys humanity's commands."

I shall only add that the appeal to "Beauty's radiant eyes" was not lost upon the audience; the gentlemen, particular the Bachelors, sending forth a thunder of applause upon Mr Drummond's emphatic pronunciation of the concluding lines, which was responded to with many a lovely glance through sparkling eyes.

The curtain then drew up, and I have not been so well entertained by the performance of a good genteel old English Comedy for many years. The play opened with Captain Wills as the Coachman and Fag. The dialogue between them was supported with much spirit and with perfect self confidence, which is the very soul of play acting.

The second scene ushered on the stage Mr. Astell as Lydia. Mr. Compton as Julia and Mr. F Drummond as Lucy, this being their first appearance in female attire, and quite a novel scene to the audience generally, they were received with such humorous applause that the fair rivals themselves could scarcely refrain from laughter. Next entered Mr. Chinnery and Captain Biden, as Mrs. Malaprop and Sir Anthony Absolute; in this scene the by play and dry humour of Mr. Chinnery were inimitable, and probably as an amateur actor he stands unrivalled. Captain Biden, played his part with much energy and reminded me of Dowton and Munden, and in the second and third acts between himself and Captain Absolute, he really appeared to be in a most devouring rage. Perhaps the best and most interesting scene in the whole play was between Mr. Chinnery and Mr. Leslie, which abounds in genuine and ready wit, especially the quaint dialogue which accompanies the perusal of a letter from the pretended lover Ensign Beverly to Miss Lydia Languish, during which the audience were convulsed with laughter' Mr. Leslie as Captain Absolute acted well his part in full British regimentals he had quite a military air and looked extremely well. Mr. Dalrymple's Sir Lucius O'Trigger was very happy in the delineation of the duellist's cool and blood thirsty character, and yet pourtrayed the sterling worth of a true hearted Irish gentleman, manly in deportment, and frank and courteous in demeanour. Sir Lucius was also dressed in superior style and elegance. Mr. J. R. Drummond as Faulkland was distinguished by the clearness of his enunciation and the elegant pathos with which he delivered some portions of his part which were impressive and enthusiatic, indeed this difficult character was admirably performed. Mr. Rawson as David was excellent and strongly brought to my mind's eye poor little Knight "in Love in a village." His whimpering to Acres when he dissuaded him from the duel was a piece of really fine acting. Mr. Pattullo as Bob Acres evinced readiness of manner, a good memory, and displayed very great talent as an actor in the challenging and duel scene, although we cannot think his misinterpretation of Sir Lucius words "addressing the same Lady too" *undressing the same Lady*" quite correct. Lydia Languish, Julia, and Lucy played their parts with a degree of diffidence and modesty, and yet with excellent taste, and Lucy received the kiss from Sir Lucius in a manner characteristic of a Lady's maid. Thus Mr. Editor I have endeavoured to render that tribute of praise which is eminently due to the amateurs for their very capita' performance, which was conducted throughout with a most gentlemanly kind feeling, and is as earnest of what can, and may be done with limited means!

So well was every arrangement within the Stage contrived, that, although I am told the prompters services were invaluable and were, as I heard with pleasure, extolled at the supper table, yet the audience neither saw nor heard Mr. Mc. Kenzie who with great ability occupied that arduous and important post.

The scenic decorations delineated with a masterly hand, were excellent, and the machinery, the stage, and seats for the audience elevated on a raised platform stooping from the outer wall of the terrace were managed with considerable taste and ability—the result of most zealous and indefatigable exertions devoted to this department by the Hon Mr. J R. Drummond. The dresses were remarkably appropriate and evinced both judgment and good taste; Mrs. Malapro s was capital and so beautifully fitted that I doubt whether it could have been surpassed in London. The whole management, the play, the ball and the supper, the feast and the enjoyment were complete, and when we consider in how short a time the whole was got up too much praise cannot be bestowed on the amateurs, whose generous endeavours to promote the harmony of the society of Macao have been crowned with complete success. —Ardent zeal and hearty good will with exceeding liberality prompted their kind wishes and realized them in the highest degree.

At the conclusion the curtain dropped amid the universal and reiterated cheers of the audience who in the twinkling of an eye were led to grace the ball room, the amateurs enlivening the festive scene in their rich and gay costumes. Dancing was kept up with much animation till midnight when the doors were thrown open to the supper room; the repast was profuse and sumptuous and at one a. m. a series of spirited quadrilles and waltzes were resumed, followed by a second supper after which I left the votaries of Terpsichore to trip on the light fantastic toe. The jovial party did not break up till near three a. m. and the remembrance thereof leaves one general feeling of grateful acknowledgment for the enjoyment of a really cheerful and happy feast of pleasure.

May it be the herald of future plays, but not few
and far between, is the wish of,
Dear, Mr. Editor
Your's truly
FIAT JUSTITIA.

Macáo, Friday August 11th, 1837.

* The Prologue for want of room we have not been able to insert.

# CANTON PRESS,
August 19th 1837.

We have no arrivals to notice during the past week, nor have we to present to our readers much news of local interest. The heavy rains which have lately fallen have caused the river to swell very considerably, and to render intercourse among the different Factories almost impossible during a number of hours every day, whilst that with the Cap-shuy-moon and Macao is also rendered more difficult from the freshes preventing boats from thence to ascend the river in the usual time. The season for transplanting the second growth of rice has arrived, but has necessarily been retarded by the high water, which also is an obstacle to the general intercourse among the different districts, on account of which this is a dull time for trade; carpenters and bricklayers will however reap a benefit from it, many houses having been sapped by the water, and deprived of their foundations, fallen down, even in the suburbs of Canton.

On Thursday the 10th of this month a comedy "*The Rivals*" was performed by amateurs at Macao, from which the foreign community, who hear derived much amusement. The play, we are informed, came off with eclat and we particularly hear the performance of *Mrs. Malaprop*, much praised, and that it would have done great credit to any stage. The actor of this character was a Gentleman long known and esteemed for the excellent productions of his pencil, and endeared to his acquaintance by his amiable social qualities. We much regret that none of our friends has bethought himself of giving us a more particular account of this play, which we should have been glad to have laid before the public.

*Just after writing the foregoing, we received the letter from Fiat Justitia, which we had only time enough to insert.*

On Monday last a great many of the foreign community assembled at the Consoo-house to hear a case of robbery tried, which had been committed on the river some three years ago, the accused having till now succeeded to evade being brought to justice. It was understood that the trial was to begin at 10 o'clock, but the Nam-hoy-yune did not make his appearance until three, when, instead of the above trial, two Portuguese, father and son, were brought before him. These Portuguese, of whom the elder had acted as sailing master in a Chinese junk, had, on her return from Pontianac to Amoy, near the coast of China, been put by the Captain of the Junk into a boat, in order to find their way back to Macao. This is, we understand, a practice generally observed towards these sailing-masters, and resorted to by the Chinese to avoid the trouble of being found, on arrival, by the authorities with a foreigner on board. While these two Portuguese were making the best of their way back to Macao they were caught in a gale, and were obliged to put into the port of Capchee, where they were arrested for being foreigners, and with their luggage conveyed to Canton, where they arrived on the 11th of this month, and were lodged in the Consoo house. On the 14th as before said, they were brought before the Nam-hoy-yune and underwent a very long examination, in which the above circumstances were elicited, and afterwards their luggage was inspected and an inventory taken of it, to the apparently great amusement of the judges, the Nam-hoy-yune having by this time given up the first seat on the bench to an officer of high rank sent by the Governor, and who arrived during this trial. Among the articles brought from the trunks several arrested the attention of the judges, such as a straw and razors, the latter being very different in shape from those used by the Chinese; but the sailing master's quadrant appeared to them most surprising, and the judges, the use of them having been explained, there happening to be a pair, caused the question to be put, whether he looked through both of them at the same time, a question which caused a rather irreverent ebullition of laughter. Next came the charts to be inspected, and some of the foreign gentlemen present volunteered to give their honours a lesson in geography which was very attentively received. After this examination, which lasted near two hours, the more important business of the day was entered on.

This case was as follows: About three years ago a shipment of 22 cases of Cotton manufactures value about $ 7000, were shipped to China in the *Orwell*, Capt. Dalrymple for a market, and to be transhipped at Macao or Lintin; by some mistake, instead of effecting the transhipment at Lintin the goods went on in the ship on her way to Whampoa. Unfit for that market, their Consignee was anxious to send them to Lintin again, which could only be effected by shipping them in a smuggling boat before the ship could reach Whampoa, since, had they gone through the Canton Customhouse they would have been liable to pay both import and export-duties. A Chinese boat commanded by a man (the prisoner) named Acha, was accordingly found, who undertook to deliver the 22 boxes at Lintin; they were transshipped outside the bogue, and never since heard of. A petition was then (at the end of 1834 or beginning of 1835) presented at the City-gate, in consequence of which the pilot of the *Orwell* was imprisoned, but Acha was not taken until lately, after the vessel had long returned to Europe, in consequence of which the proof of the delivery of the boxes to this boatman became defective. Two conjectures presented themselves, either that Acha had run away with them, or that he had been seized by the Government authorities, which latter suspicion was somewhat confirmed by one of the Hoppo's servants having been seen with a handkerchief evidently part of those goods, which it was not difficult to identify on account of it's being of a perfectly new muster none of which had heretofore been sent to China. The Customhouse officers however denied all knowledge of the seizure of these goods, and refused making good his loss to the consignee, nor could Acha be found, until now.

The prisoner appeared before the Court in chains, and, after having been charged with the robbery by the consignee, Mr. James Innes, for whom some foreigners, looking on, volunteered to interpret, pleaded not guilty, denying his ever having had any knowledge of, or been a party to, the transaction. The evidence which the complainant could bring forward not appearing to the judges sufficient, the case was for the present postponed, and the prisoner remanded.

We did not observe in this Chinese Court of J the "pomp and circumstance" of our own; nothing imposing or striking the culprit with awe, except be the dirty fellow standing at some distance opposite to the judges with an enormous whip in hand, and two or three others, equally ragamuffin looking, with iron wire caps on their heads, w when required, execute the law with the bamboos. A Chinese Court of law is perfect open to every one, and the natives seem as u concerned there as they would be in the street any where else talking and laughing, and occasionally giving their sentiments on the case in question

From Capt. Biden's statement in his letter another column it appears that the mutineers of th *Fairy* now in prison in Manila have not yet bee executed, as we wrongly stated in our last saturday' *Press*. It is possible that our informant was misled by the execution of the mutineers of the *La Fem* and since the remainder of the crew of the *Fair* has been sent to be *confronted* with the murderer (not *tried* as we incorrectly stated) it is to be hope that some new facts may yet be elicited. As to th Serang's being implicated in the mutiny, as th prisoners in Manila have declared, though soul crime has been but rarely committed by men of hi class and nation, nothing as far as we know has ye been elicited to disprove the charge. From his n entering the boat in which the remainder of th crew escaped he was supposed to have met the fat of the Captain, the mate and others, it being thought unlikely that he should have sided with th Manila men, but if he is guilty and still alive it i to be hoped that he will not much longer be abl to elude justice.

Captain Biden, we presume, is mistaken as t place the *Fairy* was sunk, being on the East Coast o Luzon; our information (see *Canton Press*, 18t March) was that she had been seen in the stat described near the port Santa Maria on the weste coast of Mindanao, the largest of the Sulu Islands and in which port also some of the men were seen and we think afterwards apprehended.

The circumstances of the mutiny on board th *La Fema* are correctly stated by Captain Biden and agree with our account of it (Canton Press 10th June). The conduct of the steward who saved the ship and valuable cargo deserves th warmest praise, and a more substantial acknowledgment besides. We doubt not that the owners o the ship as well as of the Cargo and the under writers, to whom the excellent behaviour of th steward has been the means of saving a large pro perty, will reward him as well as he deserves.

Among the several errors which Capt. Biden corrects for us and to most of which we must plea guilty, we now come to our statement of a Junk in ballast having drifted ashore during a gale at Macao. We heard afterwards that instead of being in ballast she had a valuable cargo on board, which was, until the Portuguese Government had been solicited to put a guard on board, which was don accordingly, exposed to the depredations of thieves. Most of the Cargo was however saved, we believe, and we thought not of correcting our former report.

*Feast of lanterns.* On Sunday night last the river presented as usual a very animated apparence, great number of beautifully illuminated boats gliding along its surface. The manner in which the boats are lighted up produces the most brilliant effect; they are generally of the largest description, very high out of the water, and on both sides three tiers of lanterns, one close upon the other are hung, and in each tier the lanterns are so close together that not the smallest space intervenes, the vessels thus appearing to the eye as one mass of light. They are generally beautifully fitted up inside, and accommodate parties of pleasure, who spend the night in going up and down the river, not forgetting to store the boat with substantial fare and wine. It was the good fortune of some of our friends, who were pulling on the river, to be noticed by a magistrate, a mandarin apparently of high rank, who was amusing himself with a party of friends in one of these boats; the magistrate invited them into his boat, treated them very handsomely, and they passed several hours in his company much gratified by the polite attentions he shewed them, they being able to converse with him through one of their number, who happened to be well versed in Chinese. When the party of Europeans left, the magistrate invited them again to meet him on the river a few days afterwards. We are glad to notice such occurrences, since they tend to shew that the prejudices entertained against foreigners seem to be wearing off little by little.

*Governor Tang Tingcheng degraded.* Foreigners sometimes have been much surprised to see so many, successive appointments of commissioners from Peking to Canton, within the last few years. And it has not abated their surprise to be told, that, whatever *secret* objects there might be, the first ostensible one was, to investigate a case, which arose out of a quarrel between two officers, originally together at Peking, where each brought accusation of criminality against the other, and each defended himself by charging the other with spiteful motives, and falsehood. The two officers were degraded; one was a native of Canton. His mother appealed against the decision; and, on every confirmation of the original decision by the commissioners, renewed her appeal. At length, the persevering appellant has been silenced, and her son transported, for his own or his mother's contumacy, to the cold regions of Sungária. But one of the parties of commissioners, in conjunction with the present governor, had formed a judgment so inconsistent with what now appears to have been the facts, that his majesty has deemed it necessary to correct them with severity. Though retained in office, they lose their rank and the small allowances attached to it, and are to regain it, only after six years of *unerring* conduct.

*Chinese Repository for August.*

## ERRATA.

In our No. 99, first page, third column, 11th line from below, "So" to be omitted.—Same page and column, 8th line from below, instead of "The Earl Bathurst" read "*To the Earl Bathurst*,"—and instead of the three lines following, read "*Memorandum of the Duke of Wellington communicated by his Grace to the Ministers of the Allied Powers.*"

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

*Note.* Opium can only be delivered at Lintin &c, where also higher prices are obtainable for *Camboets, Saltpetre, Ginseng* and other Goods, on which the duties at Whampoa are high.—Ships with *Rice, Cotton &c.* sometimes discharge at Macao or tranship their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary Stationary, Cutlery Crockery ware, &c.*, for foreigners consumption, are sold at Auction duty paid.

*Note. Alum*, and *Cassia* are procurable cheaper at Lintin, Macao, &c; and *Raw Silk, Silk piece goods &c*, are sometimes shipped there the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

| Mauritius - - - | | Gt. Britain via Sg. | 3½ 3 | Coast of China - - | 1 p m |
| Australia - - - | | „ direct - - - | 3 - | Lintin &c. - - - - | ½ do |
| Sand. Islands - - | | France - - - - | 3 2½ | | |

Note. Above rates are from 20th April to 20th Oct. annually: during remaining 6 months the premiums are somewhat lower. Risks on Blocks are @ 9 per Cent per annum, @ 4½ for 6 months, @ 2½ for 3 months and @ 1 per month.

The local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

| | | | |
|---|---|---|---|
| 1st class ves. measg. 1600 cubits & upwards pay | 0.7874736 of a Tl. per cubit. | | |
| 2nd „ „ „ 1200 do. & under 1600 „ | 0.8661091 | „ | „ |
| 3rd „ „ under 1200 do. | 0.9842341 | „ | „ |

N B The cubit is 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or other head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from @ 4300 to @ 4339; 2d class from @ 3700 to @ 3799; 3rd class from @ 3700 and under. The Cumshaw or Present Fee is paid by all vessels 1600 Tuels or @ 2223. Linguists fee @ 173½ and Comprador's fees @ 50. Also Pilotage @ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Ricevalen ships are charged only about @ 1300 in lieu of measurement &c.,

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—No fresh supplies of LONGCLOTHS have been received and these continue in lively demand, whilst none are remaining in first hand. COTTON YARN is improving in price.

WOOLLENS.—The demand for LONGELLE continues fair, and at rather improving prices.

STRAITS PRODUCE.—The first moderate supplies will do well—all descriptions being in fair demand from the short stock, and being generally bought on speculation.

SANDALWOOD.—We hear of no transactions, but from the markets to the westward being unfavorable, our quotations could hardly be realised.

RICE.—The floods and heavy rains are said to have done a great deal of injury, and prices advanced for a day or two, but they appear again to have receded.

COTTON.—The floods have interfered a good deal during the past week with the CORTON business, and although prices remain as before, there have been few sales. About 1,800 bales good Broach is the last sale reported to us at 10.8 @ 1L.—Should the arrivals be moderate it is expected that the market will be supported, for a time at least.

OPIUM.—The stoppage of the smuggling is becoming more serious than we expected it would be, and it is reported to day that the proprietors have hearty sense of the boats, from apprehension of rigid measures on the part of the Mandarins. Little of course is therefore doing, and the prices are nominal; although the deliveries to the 18th are tolerably good, consisting of

Patna, *Old*, 11, *New*, 232; Benares, *Old*, 11, *New*, 8; Malwa, 1018½; Total 1,280½ Chests.

With these constant interruptions the prospect is very gloomy particularly for PATNA OPIUM.

# THE CANTON PRESS.

VOL. 2d No. 51 CANTON, SATURDAY, AUGUST 26TH, 1837. No. 103

## NEWS OF THE WEEK.

*( From the Spectator, March 21. )*

Short reckonings are cleared. The first act of the Session being over, we shall, following our usual custom at Easter, take a retrospective view of the eight weeks work. And first let us see what Ministers have done.

They have *introduced* every important measure promised at the commencement of the session, except the Irish Tithe Bill; but what progress has been made in each? A glance at the following table will put our readers in possession of the state of Government business. The following bills have reached the House of Lords.

1. Mint Regulation.
2. Municipal Corporation Amendment.
3. Irish Grand Juries
4. Marriages & Registration Act Postponement.

These measures were carried almost as a matter of routine: even the second met with no opposition worth mentioning.

Next come the Government Bills, which are still in the House of Commons.

1. The Irish Corporation Bill; brought in 7th February—not yet reported.
2. The Irish Poor-law; brought in 14th February—waiting for second reading
3. Imprisonment for Debt Bill; brought in 6th February—in Committee.
4. Registration of Voters; brought in 6th February—read a second time, but not yet committed.
5. Pluralities Bill; brought in 2d March—read a second time, but not yet committed.
6. Church-rates; bill not yet brought in.
7. Prison Regulations; brought in 12th February—withdrawn 27th February.
8. Post-office Regulations; four bills brought in 2d March—read a second time, and waiting for Committee.
9. Scotch Court of Session, Court of Exchequer, Sheriffs' Court, Small Debts Bills; brought in 3d February—all read a second time, and waiting for Committee.
10. Affairs of Canada; resolutions partly discussed in Committee on 9th March.
11. Irish Church Bill; not yet brought in.
12. Bills for the amendment of the Criminal Law; brought in 23d March
13. Mutiny Bills; brought in 18th March—read a second time, by waiting for Committee.

It thus appeares, that, with the exception of the Irish Corporation Bill, not a single Government measure of importance is nearly ready for the House of Peers. On the Irish Corporation Bill the Ministers have staked their official existence—is that the reason why they havesuffered it to lie in abeyance in the House of Commons, instead of vigorously pushing it forward? The Irish Poor Law concerns the physical existence of millions; that measure, in all probability, will not reach the Lords for months to come. Then, look for their Church-rate Bill—where is it; their plans for the reform of the Criminal Law—introduced, but not discussed, the night before the Easter holydays; their Imprisonment for Debt Bill—still lagging in Committee; and their Registration of Voters Bill—the Committee on which is deferred day after day, and week after week, till the chance of its being passed in time to prevent, for this year, a renewal of the expense, abuses, and injustice of previous registrations, is all but desperate. There is no bill before Parliament of more consequence to electors, and to the success of Liberal candidates, than this last; and yet in eight weeks it has only reached the second reading. Before the next registration, if this bill should not become a law, thousands of electors will be disfranchised, by that absurd enactment which compels a man to reside in the same house which he occupied when registered, on pain of losing his vote. The 20th of June is the day on which the first step in the registration process must be made; but what hope is there that, under its present management, Sir John Campbell's bill will before that period become law? And this is the vigour of the Melbourne Ministry. This is the way in which they "bombard the House of Peers with measures." A bombardment! why, they have not discharged a single shot. The "spear," which was to have been so "ripe at Easter," is as hard as a stone. Sluggishness and timidity on the part of the Whigs, triumphant destruction by the Tories of every measure not positively bad, will signalize the close of the session of 1837. *The measure of the session will probably be the Pluralities Bill.*

Turn now to the Bills which have been brought in by individual Members; not one of which has reached the House of Peers. Few of them were brought in till several weeks after the session had commenced, in consequence of the ground being occupied by Ministers, who assume the precedence and monopoly, and keep all business in "most admired disorder." In this fourth year since the Reform Bill was passed, not a single efficient step to improve the 'working" of the House has been taken by its leaders "the *Reform* Ministers;" and nobody can tell from the Vote-paper, which professes to set forth, in regular order, the proceedings allotted to each evening, either what portion will be staved off, what portion permitted to come on, or the time of night at which any one subject will be taken up.

1. Law of Libel Amendment, (Mr. O'Connell)
2. Bribery at Elections. (Mr. Mardy.)
3. Controverted Elections. (Mr C. Buller.)
4. Expenses at Elections, (Mr. Hume)
5. Rate-paying Clauses Abolition. (Mr. Duncombe.)
6. Public Records. (Mr. Buller.) [&c.)
7. County Rates, (Mr. Hume.)
8. Public Walks. (Mr. Buckingham.)

Of the Motions to be brought forward by Members not connected with the Government, nine have been disposed of.

1. Publication of Divisions in Committee, (by Mr. Ward); carried.
2. Bollet Bill, (by Mr. Grote); rejected.
3. Modification of the Corn-laws, (by Mr. Clay); rejected.
4. Exclusion of Bishops from Parliament. (by Mr. C. Lushington); rejected.
5. Poor-laws Inquiry, (by Mr. Walter); rejected; but an amended Committee of Inquiry (by Lord John Russell) appointed.
6. Fictitious Votes. Committee of Inquiry, (by Mr. Horsman); carried.
7. Property Qualification of Members of Parliament to be abolished, (by Sir William Molesworth); rejected.
8. Russian Attack on British Commerce in the Black Sea. (by Mr. Roebuck); rejected.
9. Stafford Writ to be postponed,(by Mr. Divitt); rejected.

Then follows the more formidable list of subjects, all of which were to have been brought forward before Easter, and all of which have been postponed or dropped

1. Inquiry into Oxford and Cambridge Universities. (Sir William Molesworth.)
2. Colonial Waste Lands Managment. (Mr. Ward.)
3. Sabbath Bills. (Sir Andrew Agnew).
4. Repeal of Septennial Act, (Mr. Tennyson D'Eyncourt.)
5. Reform of the House of Peers, (Sir William Molesworth)
6. National Education. (Mr. Roebuck.)
7. Government of the Army, (Colonel Thompson)
8. Military Punishments, (Major Oanecourt.)
9. Suppression of Mendicaney, (Mr. Scrope.)
10. Welsh Bishops, (Mr. Jervis.)
11. Repeal of the Duty on Raw Cotton, (Mr. Mark Phillips.)
12. Local Courts, (Mr. Roebuck.)

With the exception of Mr. Tennyson D'Eyncourt we are not aware that any Member who had the charge of one or more of the above motions can be blamed for not having made them. In the instance of the Colonial Lands Bill, it has been found advisable to wait for the detailed discussion on the Irish Poor-law; and illness actual, not feigned—compelled Sir William Molesworth & Mr. Roebuck to put off their respective motions on Peerage Reform and National Education. It is only when, as in the case of Mr. Tennyson D'Eyncourt, an opportunity of pressing his motion on the House is given up through suspicious complaisance, that no Independent Member is obnoxious to reproof for not bringing forward a promised measure.*

On a candid review of the conduct of the English Independent party, the balance of praise and blame must incline to the side of praise. It is the general and the correct impression, that this party has gained weight and importance in the House of Commons and in the country. Lord John Russell is the only Ministerial Member who has displayed ability not of the most ordinary kind, (for Mr. Spring Rice has not even shone as a debater this session). Mr. O'Connell has spoken little, and with less than his usual success. Sir Robert Peel has certainly not improved since last session, and his Church-rate speech was a ludicrous failure. Lord Stanley, with no diminution of virulence and vigour, has exhibited, if possible, less tact, and rendered himself more unpopular, than in any former session. But Mr. Roebuck, Mr. Grote, Mr. Charles Buller, and Sir William Molesworth, have in some cases added to a reputation already high, and in all have sustained the character of philosophical statesmen. Mr. Grote has, as usual, delivered the best and finished single speech of the session; while Mr. Roebuck has on several occasions distinguished himself by observations remarkable for truth, clearness, and courage, and, despite of the tax they inflict on lazy reasoners, in a capital Parliamentary style—he even bids fair to be a favourite in the House, and no Member is better listened to. When, in addition to the Members above-named, we recollect that we have in the Independent ranks, and taking part in the daily business of Parliament, Mr. Ward, Mr. Hume, Mr. Warburton, Mr. Ewart, Mr. Aglionby, Mr. Hatt, Colonel Thomson, Mr. Harvey, Mr. Hawes, Mr. Clay, and Mr. Watson, we may safely challenge both Whig and Tory parties to produce an equal amount of industry, acuteness honesty, usefulness, and influence out of doors. We think the Independent Members are also begining to act more in concert. On the whole, then, although there has been a deplorable inertness on the part of Ministers, and we do not anticipate that a single good measure of importance will be passed this session, we have cheerful hopes of the future, founded upon evidences of growth and improvement in that party which implicitly follows principle, shuns faction, and despises unreasoning prejudice.

*The above lists comprehend the principal but probably not all the motions of which notice has been given

## MISCELLANEA.

*(From the Atlas, April 2.)*

The son of Sir F. Burdett, is to succeed Lord Bingham in the Colonelcy of the 7th Lancers—*The National* of Paris imputes to England an attempt to buy off France from the colonization of Africa by an offer of four millions of guineas.... Up to the 1st ult., no intelligence had reached Constantinople respecting the captain and crew of the Vixen, a fact which caused some uneasiness to their friends. Captain Allan, who proposed undertaking a journey to central Asia, died shortly after his arrival at Smyrna.... We learn from Vienna, that the Duchess d'Angoulesme and her niece, the Countess de Rosny, are expected in that capital.... It is said, that the Duchess of Leuchtenberg will visit her sister the empress mother.... Up to the 6th March, the petitions were for the abolition of church rates, 774; against it, 670; majority for the abolition, 104 petitions—but the signatures to the former, averaged 373 names, and those to the latter 77; the number of petitioners for abolition being 239,099; the number of anti-abolition signatures, 51,920.... The number of persons who visited the British Museum on Monday, amounted to 23,985.... The frost on Thursday night was more severe in many places than it had been known to the in the depth of winter within the last ten years .... The pitmen in the collieries are in great distress a number of hands being un employed.... George Smith, Esq., has been superseded in the office of Receiver General of Jamaica, by Lord Glenelg. Mr. Edwards succeeds him.... It is said at Alexandria that the Grand Seignior has determined to employ American naval officers in the command of his fleet, and that measures have already been taken to carry this resolution into effect.... The Bishop of Norwich is still alive, contrary to the anticipations of his physicians; and, although there is not the slightest hope of his recovery, his dissolution appears to be more distant than was at first imagined.... The reported death of the Baron de L'Aigle, Dr. Becker, in Ireland.... Mr. Stewart Mackenzie will have been in a few days for the purpose of assuming the government of the Island of Ceylon.

.... Dr. Villoura, an erudite Spanish Liberal, author of a Latin History of Phœnician Ireland, died on Sunday, in Dublin, in the 84th year of his age.... Major General Sir Lorenzo Moore, K. C. H. died on the 18th, and was buried on the 21st ultimo at Dresden.—*The Bengal Hurkaru July* 15.

## CALCUTTA.

SUPREME COURT,—JULY 12, 1837.

*Admiralty Side.*

REX V. MALAY PRISONERS—*(brought up from the Straits by H. M S Wolf.)*

This being the last day of term.

*Mr. Justice Grant*, delivered the sentence of the Court in the above Case. The Learned Judge addressed the Advocate-General, as counsel, deputed by Government to conduct the prosecution, and Mr. Clarke and Mr. Osborne as counsel who had kindly undertaken the defence of the prisoners. Having called the attention of the aforenamed learned counsel to the case in question, the learned Judge said he would give the grounds upon which the Court had determined to inflict a mitigated punishment on the prisoners, and also would assign the grounds which had caused the delay. Whenever a conviction of the prisoners, and the gaming nuisance upon them, as the counsel who acted for the defence, will now attend to the law of the judgment are about to be visited by the Court, the learned Judge intimated that an interpretation of the law and reasons contained in the judgment need not be made to the prisoners. The jury had found the prisoners guilty on the second, and all the subsequent counts, in the indictment. And the counsel for the prisoners had abandoned any intention to move in arrest of judgment. The learned Judge then stated, we believe, that he had no doubt but that as the evidence stood, the piracy was proved, and that there was nothing to support the objection started by the counsel for the prisoners, that the Cochin Chinese, to which nation the people belonged, whom vessel had been captured by the Malays, were not at ware with the people to which the prisoners ought to be considered to belong. He also thought that there was no evidence to show that the party of Malays in question, were of a nation whose custom and habit was robbery; a people described as a people qui tamenst *latrones sunt*, nihil hominum, *celatius* sunt. It was under these circumstances that the learned judges had considered whether the injunction was to be construed as strictly against the nations in the Straits, the habits of these people considered, or against the offenders belonging to more civilized communities; in other words, whether the common interpretation put generally by all nations on the jus gentium, was to obtain in the present instance. And in order to determine this point, the learned judges all agreed, that the situation, condition, &c. of the barbarous states to which the prisoners might be considered to belong, should be enquired into; the Governor-General in Council accordingly directed that these enquiries should be made; and those enquiries are now before the Court. From the result of these enquiries it would appear, that there is no reason to believe, that these little states in the Straits of Malacca, recognize or sanction any private considerates of their subjects to commit acts of piracy; but whether there be countenance between the states and its subjects, or what is the punishment inflicted, or whether any be inflicted, rests upon conjecture. There is nothing in evidence to lead to any knowledge of the state to which the prisoners belong; they were, however, found near *Pulo Tingy*, and on being pursued fled to that Island, and in the absence of evidence to the contrary they must be held to belong to Pulo Tingy. Now upon enquiry it appears that this island is in the territories of the Rajah of Johore with whom and this Government there is a treaty. There was no ground for concluding, that any war subsisted between Johore and Cochin China, at the time of the commission of the act of piracy. On the other hand there is sufficient presumption that this piracy, and all others, are disclaimed generally through the small states in the Straits of Malacca, and in one of them an edict has been promulgated punishing the offence with death. Robberies on the seas, by persons of these nations, must be considered therefore on the footing on which it is placed by writers on natural and international law; it is therefore the duty of all good members of a civilized state, to apprehend pirates and vow robbers. The main point is for the counsel for the prisoners has had influence upon us in mitigating the sentence. All that could be urged in their favour has been ingeniously brought to the notice of the jury; but there is one fallacy which runs through the petition, which is an attempt to draw a distinction between the law of nations, as to the regulating the rewards for capture and communication between enemies, and the law of nations. Now with reference to this view, and consideration of the application of the law of nations, and the law of nations, in the instance to which it is particularly applied in the present case, the law of nations is nothing but the law of nature, common to all mankind, there is no such thing as a state (civitas) of robbers.

The reasons for mitigating the sentence we are about to pronounce are: Lapse of time, the suspense and anxiety the prisoners have undergone; the partial good effects likely to be the result of their conviction; the greatly diminished effect consequent on it, if now ordered to be carried with effect in the streets; the inutility of it as a warning to future offenders, inasmuch as there is now by act of Parliament, a Court of competent authority constituted to try their offences on the spot, (Court of Admiralty at Penang and Singapore)—and from the steps now taken by Government, the petty states, have been brought to an acknowledgement of the law of nature common to all men, and a reprobation of piracy. The Sentence of the Court therefore is that judgment of death be recorded against the prisoners, and that they be transported to the Eastern Coast of the Bay of Bengal, to the Southward of the Gulf of Martaban, for the period of their natural lives.

*Chief Justice*—I may as well mention, that a case which has not been cited at the bar, and which certainly could not be cited by the counsel for the prisoners, with almost similar facts, quite similar as to the circumstances and the nature of the crime committed, was tried in this Court in the year 1804, present Sir John Anstruther, *Chief Justice*, Sir John Royds, and Sir Henry Gamell, *Puisne* justices.

The men were convicted, and the capital sentence was *carried into effect*. I was led to the case by a note in Mr. Clarke's compilation of the rules and orders.

The case was the KING on the prosecution of—— RAMZAN ORANG, SEDOCK and KEMBIT ORANG, called JEMBY.

N. B. The able and learned judgment of Mr. Justice Grant is of course not done justice to in any degree by the reporter; but generally, our report will, we believe, be found correct.—*Hurkaru, July* 13

## SKETCHES OF NEW ZEALAND.

The *New Zealanders* are heathens in their manufactures, as their mats will sufficiently prove, many of which have been imported into Sydney, and much admired; but their baskets (ketes) are perhaps more to be prized, although assuredly no dandy has thought them how to make both. Some of their mats are very large, varying from twenty to upward of one hundred fathoms long, and from five to twelve feet deep; they are made of the *pua* flax, and are very durable, for which is, however, taken the common flax of the European one, being taken over-hand instead of under; the mats are made of pieces of very light wood, and the ends are generally pubble-stones. In loading the ship ashore no person must assist or speak, until they have all the Europeans to go on board them, as in that manner only, can the chiefs see that every thing is done properly, and if they by chance or accident happen to touch any part of it when not intending it, they take a piece of live in their hands and repeat a short prayer to purify themselves from the unintentional sin which they have committed.

Many of their houses are very neatly and well built; after the frame work is erected, which is made from most richest timber they can procure, they proceed to cover the outside with kakaho (reeds), after which twenty-five or more (rushes) is lashed with the flax in a great state, and the whole is then thatched over with the wiwi or pahut. A house thus built will stand for ten years with very little care; a small house when built in this manner is very warm, but a large house is cold, from the want of a chimney to let the smoke out. In the first covering of reeds they are generally lashed very tastefully with *kaka*, which is naturally white, many of it they dye black, and the remainder therein to the sun perfectly white; when thus used it is placed crossways each other into diamonds and squares, which have a very pleasant and handsome appearance on the yellow reeds.

Their canoes vary considerably in size and name; the pitau waka is the canoe with the carved head and stern; the *tete waka* has a plain head and stern, while the *teriui* has neither head, stern, or top-sides; the bottom part is generally made out of a single tree, but when this cannot be accomplished in one piece, they fasten a short piece both at the head and stern, the former of which is called a taki, and the latter a tuaraki; the head are formed from the wood with a handsome figure on the appearance of lattice rails turned upside down, the lower part being elevated twelve or fifteen feet into the air. Their war instruments, which are now hardly to be met with, being entirely superseded by the use of the musket, had never anything particular in their appearance;—the tohotoho and wenia (spears), *wher* and mere were their principal weapons, and were only remarkable for the simplicity of their workmanship. Carved boxes, ornamented baskets, and a plaited belt made of scented grass forms nearly the remainder of their manufactures; although their fishing-lines, hooks, paddles, and green stone ornaments to wear on the neck, should not be overlooked; about the East Cape is considered the best place for collecting curiosities, the natives of that part of the coast being the most expert in their manufactures.

Laziness is considered as a distinguishing feature in the New Zealand character, and it has been fluently remarked, that they are capable of enduring a deal of sleep; this is too true, for when their present wants are supplied (they can hardly be called busy under that) they think but little of working for another day; following about your provisions, and observing your most trifling actions are their delight, as they will sit gossiping to the sun for days together; when they fall short of ammoco (which is their staple luxury and want) or any other article which they are actually, or imagine they are in need of, their whole powers of persuasion are then exerted in endeavouring to obtain it from you, either by way of present or on credit; for this purpose their usual practice is to call at a native settlement, and say "I am hungry let something be done for me;" then they begin by informing you that their best *ariki* friends at a distance who have a great deal of flax, which they are going to bring down to you for sale; that they have told their friends how liberal you are to them, and that you are, in all respects, a white pai-pa (good white man); they then tease how greatly the chief man of the tribe would like a little tobacco, or a cutlass, or a tomahawk, (I forget which) or some such trifle, and, should you, through a rather liberality, unfortunately gratify him this kind of blarney, his name was Charles Rose Forde, and he was residing at Mahina, in the Bay of Plenty, in the years 1830 to 1837, and *imagine himself* to be white (they of the East Coast), and that if you were to let them have the article to give their friends, it would be loaning the flax to yourself, and that no other white man would get it; if they were unsuccessful in their application to you, and the article

was not to be got elsewhere, they very probably would go away, and return in an hour or two afterwards with such articles as they had to sell, and which they have had by them all the time, but which they would not part with unless actually compelled to do so. In some instances it is policy to *give* them a trifling article or two, but never on credit, as in that case they will generally proceed to the next nearest European (perhaps one of your own traders) and endeavour to obtain the same articles, or anything from him, the one from whom they are unsuccessful in obtaining anything of, will generally get their flax (if they have any), as if they took it to the party who trusted them they know that the value of the article would be deducted from the weight, while by paying you talbos (by and bye) will do equal if as well; on this principle a New Zealander will never work for what he can obtain by begging, and they really appear to imagine that our property costs us nothing, and that when it is out, we can send to our friends at Home (Sydney), and procure more. Certainly flax cleaning is laborious work, and it will take a good cleaner to scrape fifteen pounds weight cleaned in a day, but the average weight of it in a day by one person will not exceed ten pounds, for which they will obtain one negrohead on tobacco and a pipe; or perhaps two sheets of cartridge paper or pound of lead. They are beginning all over the country to leave off dressing flax, not from any scarcity of the article, which appears inexhaustible in their swamps, and of spontaneous growth, requiring no cultivation, but from finding that rearing pigs and planting and cultivating potatoes and corn pay better; as independent of the vessels that go round the coast of New Zealand, from Sydney, in search of those articles, there are several small craft belonging to Europeans, who live at the Bay of Islands and other places, that are always trading backwards and forwards on the coast to keep up the supply for the numerous whalers that frequent the Bay of Islands—particularly as they do not grow sufficient there for the necessary demand, and potatoes never fetching less than 30s., but very frequently as high as 80s. and 100s. per ton, although purchased on the coast for a mere trifle.—*Sydney Herald, June 1*—*Singapore Free Press 3d Aug.*

## THE FEJEE ISLANDS.

The Rev Mr. Watkins, a missionary of the Wesleyan Society, at the Friendly Islands, mentions some of the cruel customs of the Fejees. One is, the immolation of widows on the demise of the husband, by strangling. "When the husband dies, the hapless wife seats herself—the cord is placed round her neck—one person places his hand on the head of the victim—others seize the extremities of the cord, and, pulling it to effect strangulation; and the few struggles made are succeeded by the stillness and stiffness of death." Another is, burying alive,—a practice not unfrequent in Fejee. "Individuals, too old or too ill to be of further service, are the victims of this cruel practice. Sometimes it is done at the request of the individuals themselves; no effort is made to dissuade them from it, but the willing murderers proceed forthwith to dig a hole of sufficient capacity; they then convey the sick or aged person to it, and, having placed him in the grave in a sitting posture, cast the earth upon him, which is pressed down by the feet of his own relatives or neighbours." He adds: "Connected with their wars is an evil for which I should think the Fejeeans to be pre-eminent, and that is cannibalism. Fejee, I think, exceeds New Zealand in that abominable vice. The accounts which we hear are startling. It is not one man and then who furnishes a meal for his savage countrymen—not ten—nor twenty—but hundreds! When I first heard it, I was confident that the statement was exaggerated; but on appealing to the authority of a Fejeean chief at present here, I was assured by him that it was '*mooni mubito*' (most true), and that some short time ago there were more than two hundred human bodies prepared for a single feast! They were the victims of war."—*Asiatic Journal.*

## THE SACRED SHIRTS OF THE TURKS.

Two of these curiosities are preserved in Austria; one found in the tomb of Kara Mustafa, the Grand Vizier, at Belgrade, being kept in the civic arsenal at Vienna, and the other in the Cistertian New Monastery at Wienerisch-Neustadt. The first of these is richer in gold-work and more tastefully decorated; but the last, which bears evident proof of having been worn, as part of the inscriptions on the neck are obliterated by perspiration, is far more copiously enriched with *suras* (devices from the Koran,) prayers, cabalistic tables, and talismanic formulæ. Von Hammer, the celebrated Orientalist, has lately decyphered the whole of these inscriptions, which are in a very small character, and, when put together, sufficient to form a bulky volume of prayers. Abdulkerim Bey, Ayan of Pirawshta, who was taken prisoner at Varna, while on his journey from Vienna paid a visit to the monastery at Wienerisch-Neustadt, and, after inspecting the shirt in question, communicated the subsequent particulars to Von Tatischeff, the Russian envoy. "The majority of these shirts are made in Arabian Irak, or at Bazdad; but there is only one night in the year during which they can be made, and this night must be determined previously by astrologers as a fortunate one. During this single night it is requisite that the cotton of which the shirt is made should be spun, woven, cut out, and sewed, before the sun rises, by forty immaculate virgins. Should the wearer of such a charmed habiliment chance to be struck by a ball, the mishap is evidence either that due regard has not been had to the exact time prescribed, or that reasonable grounds exist for suspecting the immaculacy of the fair fabricants." Abdulkerim Bey wore a shirt of this description at Varna, and ascribes his escape, from even so much as a scratch during the siege, to its talismanic virtues.—*United Service Journal for January.*

## AVA.

We find from the Calcutta papers that in the Burmese Empire revolutions have taken place which threaten, for a time at least, the British interests in that country; After the decease of the late King of Ava, his rightful heir, we believe, ascended the throne, but the Government fell into the hands of Mentaghee and the Queen, the former's sister. Meanwhile Prince Tharawaddie, the King's brother, excluded from the Government, raised the standard of rebellion, and the Queen sent 20,000 men against him, who half of them speedily deserted to Tharawaddie, a report, supposed to be a false one, having been circulated that this chief had at Dibayen obtained possession of an immense treasure belonging to the Queen and Mentaghie, and which treasure he was liberally bestowing on his adherents.

Public feeling in favor of Tharawaddie began to shew itself, and Capt. Burney, the British Resident, in vain tried to bring about an amicable arrangement, Mentaghie continuing deaf to his remonstrances. Prince Tharawaddie had taken up such position that the Queen's party was altogether in his power, and this latter at last applied to the Resident to do what he had recommended before, and implored him to intercede for them with Tharawaddie. But it was now too late; that prince's power was too great now to make concession on his part necessary; the resident notwithstanding, at considerable personal risk, sought the camp of Tharawaddie, who would not listen to any of his proposals, but is said to have promised to spare their lives, if the King, Mentaghie, Queen, and their adherents would lay down their arms. Success had emboldened that Prince, who now, for the first time, seems to have resolved on placing himself on the throne; he expressed his intention of giving up Ava to plunder, from which the Resident dissuaded him, though he having promised that city's plunder as a reward to his followers, his non-compliance with his promises may expose perhaps even his life.

Mentaghie and 12 of his ministers were given up to Tharawaddie, who confined them in chains in the common gaol and it is said subjected them and some of their wives to the cruellest tortures to extort from them a confession of where their treasures were hid. The Resident remonstrated with him against the cruel treatment of the late Ministers, but found that the new King who had not yet assumed the highest title of regal dignity, treated his representations very lightly, and seemed to look upon the presence of the Resident as an irksome control of which he would take the first means to rid himself. He intends to remove the seat of Government from Ava to Moutshoubo, the birthplace of the founder of the present dynasty, and it was generally feared that the departure from Ava of Capt. Burney would be the signal of destruction of that city.

We have since heard that Tharawaddie has declared that he does not acknowledge the former treaty of the King of Ava with the Company, and that the provinces ceded to the latter must be again returned under his sway. The Resident is said to have left Ava in consequence, and the British will probably be involved in a new Burmese war.

From the proximity of the Burmese Empire to that of Chinese we have no doubt that such an event will be looked upon with much interest at the Court of Peking and it is not easy to foresee what may be it's consequences to the British trade at Canton.

---

Within the last few days there have been two arrivals from Siam—one of which is the Hamburgh brig *Emma & Matilde*, which left this port the 8th of January last for Bankok, and now brings account from that port up to the 15th ultimo. The other arrival is of a rather more interesting description, being His Siamese Majesty's Frigate *Chaupacor*, a vessel of 600 tons, and carrying 40 guns, which was built at the port of CHANTIBOON, and the voyage she now makes to this port is her first trip to sea. Notwithstanding her warlike destination and appearance she is intended to be employed as a trader, between this port and Siam and instead of going upon the odious principle of monopoly, and, like the ships of the King of Cochin China, trading only on the sovereign's account, and refusing to carry freight for the private merchants, the *Chaupacor* is open for "freight or charter" to any of the king of Siam's subjects. Another vessel of 1,000 tons burthen has also been laid down at Chantiboon and will soon be in a condition to put to sea. She is to be similarly equipped with the *Chaupacor* and is intended to trade to this port upon the same liberal footing. The rate at which this vessel has taken in freight, is, we believe, one *tical*, or about 60 cents, per picul, and the principal part of her present cargo is taken in on these terms. She is not a teak built vessel, that description of timber not being procurable at the place where she was built.—*The Singapore Free Press July 27.*

# CORRESPONDENCE.

## TO THE EDITOR OF THE CANTON PRESS,

*Precaution against fire.*

Mr. Editor,—Twice or thrice during the last winter the foreign factories were on fire, occasioned by the bamboo or lath of the chimneys. I was not aware until very recently, that nearly all the factories have their chimneys built of this material, than which nothing could be better fitted to set on fire our houses. I hope you, as one of the "guardians of the public weal," will suggest to your neighbours such precautionary measures as the case demands. Every lath-chimney is a *public nuisance*, which ought forthwith to be removed.

Perhaps you will think fit to recommend this subject to the attention of our Chamber of Commerce, where, I am sure, it will receive a fair hearing. Should the Chamber take the matter into consideration, they might also make some suggestions for the organization of fire-companies in the foreign factories. Whenever I have been at the fires that have occurred in the suburbs of the city, I have observed that the Chinese always welcomed the presence of foreigners. On such occasions they need perhaps to lead them on. If a few select companies, say two or three, could be formed, and occasionally trained under the superintence of some of the foreign gentlemen who have themselves served as fire-men, they might become models for others. Fire-hooks, and other apparatus, are also needed. Sometimes, at the fires, there has been great difficulty in procuring water—which, considering the situation of Canton, should never be the case.

Any measures adopted by foreigners to guard against fire, will most surely meet the approbation of the Chinese—both of the people and the authorities. Confident that you will urge this matter much better than I can, I leave it in your hands, and remain

Sincerely yours.

SENEX.

August 23d, 1837.

## TO THE EDITOR OF THE CANTON PRESS,

Sir,—Mr. G. Tradescant Lay, who accompanied me in the late expedition of the Brig Himmaleh having assailed my character in an article signed by himself which appeared in the Singapore Free Press of the 27th ult., I feel called upon to defend myself from the unmerited censure which he has cast upon me. Mr. Lay states that I prevented the distribution of religious books among the natives at Borneo Proper, but says nothing respecting the cause of my doing so, at all the places where we touched. It was only necessary for him, to express the desire, and the Books were sent immediately.

I was well aware of the object of the voyage before I sailed, and was determined to forward the views of my employers, by every means in my power, on our arrival at Borneo Proper. I asked the gentlemen who accompanied me whether it was their intention to distribute Books at that place. Their answer was 'that they considered it would be highly impolitic to attempt it, at that time, that their object was to ascertain the character of the natives, and what might be done at some future period; I remained then nearly four weeks, and although a constant communication was kept up, between the vessel and the city, a distance of twenty miles, no Books were called for. Mr. Lay states that a boat could not be had for love of money. This is but a poor acknowledgement for all the kindness he received, from a people who have hitherto been represented as the most treacherous and inhospitable to be found in the Archipelago.

They received us friendly, we had the same accommodations as themselves, they gave us the best provisions they were possessed of, and Mr. Lay was furnished with a boat, men, guides, and frequently one of the chiefs to protect him, every day. My boat could not carry him about, as she would not be safe.

I found them kind, hospitable, and strictly honest in their dealings; a have had hundreds on board and about the ship at a time, and never had a dispute, or lost the value of one dollar; when ready for sea I went in company with Capt. Macalister of the Brig Helen of Singapore, and who had arrived a few days before, to town for the purpose of taking leave and bringing the gentlemen on board. On my arrival at midnight at the Sultan's house I found all uproar and confusion. The gentlemen had their effects already in a canoe; I demanded the cause, when they informed me that their lives were in jeopardy, and that an attempt had been made to rob them; I told them I thought the alarm was unnecessary, but that they could take the boat and go on board, and leave me behind, which they did. On enquiry the next morning I found that all the excitement had been produced, merely by the Sultan having been endeavoring to obtain Mr. Lay's watch as a present. On coming on board I was accompanied by the chiefs and their attendants to take leave of us. I found the gentlemen were delivering copies of the Bible in the Malayan tongue; I immediately obliged them to be given up, and gave the following reasons for so doing: That we had been then nearly one month, and had plenty of time to make the distributions and witness the effect; that in doing it on the point of sailing would appear in a bad light to the natives. That if any offence should be given, the English brig which could make no resistance might suffer and that Capt. Macalister himself had begged me to act so. I then told Mr. Lay distinctly that, if he desired it, I would detain the vessel, accompany him to the city, then distribute the Books, and watch the result, but no, he felt no hesitation in jeopardizing the lives of others, but felt no disposition to risk his own.

I am accused of vilifying "the messengers of good in the presence of the Heathen;" nothing can be more false, and Mr. Lay is aware of it. He knows just enough of the Malayan language, to stumble into error continually; but in this accusation there was no mistake, it was malicious; I gave Mr. Lay offence early in the voyage, by doubting his assertion that my future reputation, must depend entirely upon his representation. He accuses me of worldly mindedness, but he is, as I have had sufficient evidence, as fond of the good things of this world as any person. I feel no ill will, but feel more of pity than of anger that our professing Christianity should practice deception. Should this communication meet the eye of Capt. Macalister I call upon him to substantiate my assertions, and as the editor of the Singapore Free Press published the communication alluded to in my absence, he is requested to copy this. The contemptible manner in which it was published, is a sufficient evidence of the feeling of the writer; To leave it to be published in my absence, and while my name was being gazetted to the world in that light, the writer was messing at the same table with, and professing friendship for me, and this man harps upon the awful state of the heathen, when he is not himself in possession of one half of their share of gratitude, or sincerity.

ALEXR. V. FRASER.

Commander of the Brig Himmaleh of New-york.

# CANTON PRESS,

August 26th 1837.

The arrival of the *Rob Roy* from Calcutta, where the *Reliance* and *Imogene*, from England 5th and 6th April had arrived, have put us in possession of a few additional items of European intelligence. Parliament reassembled on the 3d of April. The advices from the United States by way of England are that the President Jackson advised, that, as no settlement for monies due by Mexico to the United States could be effected, to have recourse to reprisals, the execution of which duty was to be entrusted to the U. S. Navy.

No news of interest have been received from Spain. The quarrel between England and the Republic of New Grenada has been adjusted by the latter country acceding to Lord Palmerston's demands that Mr. Russell should be released and that £1000, be paid to him as indemnity for the insults offered him. Mr. Russell was Brit. Vice-Consul, and, some time ago, had a quarrel with some person in the street, which ended in a pugilistic rencontre, after which the fighting parties were taken before a judge and Mr. Russell was sentenced to six years imprisonment, from which, as already said, Lord Palmerston has released him.

The *Fizen* has been declared by Russia a lawful prize, and the several discussions about the capture of this vessel in the House of Commons have led to no results. Ministers seem to side with the view the Russian Government takes of this affair.

From the Judgment we recopy from the Calcutta papers, on the Malay Pirates taken to Calcutta by H. M. S. Wolf, it will be seen that Admiralty jurisdiction has at last been given to the Recorder's cout in the straits.

The following commercial news of 1st April from London we copy from the *Calcutta Courier* of 8th July.

TEA.—Since our last report, considerable parcels of Tea have changed owners at a slight improvement on the prices of the late free trade sales which may be attributed to the accounts brought by the Hellas from Canton to the beginning of March. Low Congou commands 10½d. per lb. Bohea, and there are many enquiries for Bohea at about 5¼d. per lb. but few sellers. Duty was paid on 384,255 lbs Tea in the week ending last day.

SILK.—The market remains very quiet, and the transactions are too unimportant to be any criterion of prices, which continue consequently quite nominal.

The anticipated large arrivals of China Silk have rather increased the indisposition to purchase, and of the parcels recently arrived only a very few have been sold—Tsatlee at 15, and Taysaam 5 per Cent. from the previous rates. Bengal Silk is not quite so difficult of sale, and what has been disposed of realised the currency of the last public sales in February.

---

We are obliged to our Correspondent "Senex" for having brought to our notice and that of the public, the danger our houses are exposed to from fire, owing to the peculiar construction of the Chimneys. These chimneys, from the proximity of the houses to each other, are generally built high enough to carry the smoke over the roofs and generally rise from the kitchen, frequently a low outhouse, to above the houses, many of which are two storied. Their being reared of lath only, with nothing but an outside covering of cement makes them ignite easily and many are the alarms of fire caused by them, by their being found burning. Every resident in Canton is well aware how much more destructive fires in Canton generally prove than elsewhere, on account of the buildings being so close together and from their being provided with venetians to their verandahs and windows, which will catch fire immediately and communicate it to the whole building. It becomes therefore the duty of every resident as much as possible to remove the causes of fire, and of these, one of the most dangerous are the lath chimneys. We would recommend, that a representation be made to the senior Hong-merchant How-qua, who, we believe, has the management of most of the foreign factories, and to their other owners, that the lath chimneys be removed and brick ones be erected instead, a change, which, while it would give us additional security against fire, would be easily effected and at little cost. We agree with our Correspondent that as this project tends towards the security of commercial property it is a fit subject for the Chamber of Commerce to take in hand, and hope that our Correspondent's and our own notice will have the desired effect of causing the necessary change to be made.

In another column will be found a letter from Capt Fraser of the Himmaleh, defending himself against some attacks made upon him by Mr. G. T. Lay, his passenger on an excursion to the Indian Archipelago, on account of his resistance to the distribution of bibles. We thought it but fair to give a place in our columns to this defence, since the attacks, which have elicited it, are likewise before the public, having appeared in the Singapore Free Press of the 27th. July.

---

POST OFFICE. The following was circulated two days ago by the Chamber of Commerce.

"Capt. Elliot having professed himself ready to institute a post-office establishment upon the condition of the Chamber guaranteeing him against pecuniary loss in it's management, it is the opinion of the Committee, that a Post-office instituted by him on the condition prescribed, would work more efficiently than were it under the direction of the Chamber, and that accordingly trial should be made hereof for one year.

In order to ascertain the sense of the General Chamber on the subject it is determined that the plan be submitted to the respective members by circular, and also that the signatures of other foreigners, who would participate in the advantages of the post-office, be solicited to the guarantee, although it is believed that the rate of postage to be levied on letters and packages, will be fully adequate to meet all the expenses of the establishments and render recourse to the guaranty unnecessary."

We congratulate the Public that measures are at last to be taken to ensure a regular delivery of letters, particularly since of late many complaints have come to our ears, about delays suffered under the present system. It is impossible that where, as at present, we have two establishments of that kind, each of them conducted by the respective owners of the Passage boats, delay in the forwarding of letters should not at times happen, or that the boats should be so managed as for one of them to leave at Macao & another at Canton regularly every day, and we have lately seen two or three boats start on one day, and as many arrive, whilst on the following days we neither received news from the coast, nor had any means of sending letters there.

---

On Friday a Washing boat left Macao for Casshuy-moon with 15 men—4 being English sailors and two other Goss people, passengers. When near the moon they were attacked by a Ladrone boat and 9 were reported killed by the remaining three, who returned to Macao on the sunday following, and of whom one has been taken to the Hospital having a spear wound in his thigh. Four more it was reported at Macao, three of them Englishmen, had reached the *Jane*, eight remained consequently missing. A Chinese boat in Macao harbour was pointed out by one of those escaped as the pirate; she has been hauled on the beach and seven men found in her were arrested, and now await their examination. Many rumours were afloat in Macao on this subject; it was said that some officers soiled with blood had been found in the Chinese boat etc. It is said that the first fire was given from the boat with passengers, which latter fearing the Chinese to be ladrones thought thus to prevent an attack.

| For three " | " | 4 |

Single numbers of the Canton Press and Price Current may be had at the Office No. 3, British Factory, at 50 cents, and Price Current at 25 cents each, of at Messrs. Starkwick & Smith in Canton.

## SHIPPING INTELLIGENCE.

ARRIVED.—Brit. *Rob Roy*, Mackinnon, and *Ruby*, Hews, from Calcutta and Straits; the former left Calcutta on the 16th July, anchoring at Cap-shuy-moon on the 17th inst.

SAILED.—British. *Formidable*, Stagg, and *Hinda*, Lowthean, for Manila. This day at 10 P. M. Amer. *Champlain*, Ritchie, for New york; *Asia*, Cole, for Batavia.

The shipping ban, in consequence of the Hongmerchant's request to that effect, moved from Capshuy-moon to Hong-kong bay; this is to complement to the imperial edict we published a fortnight ago.

We are also informed that a Mandarin boat captured a fast-boat containing the despatches for the *Emily Jane*, which are consequently lost, though endeavours are being made for their recovery. One of the Pumpo-boats was, we hear, overhauled by Lascrons on her passage up, but the thieves finding nothing, left her without further molestation.

Latest Dates, from Bengal, 10th April via Batavia. United States, 20th February via England. Canton, 18th July P *Rob Roy*. Singapore, August 6th P *Sutg. Java*, 12th July, P *Brooklyn*. Manila, 24th July P *Enfield*. Bombay, 6th July P *Glenelg*.

VESSELS EXPECTED.—From Bengal, *Alexander Baring*, *Ann*, *Exporter Glendon*, *Fremont Ann*. Calcutta, *General Hill*, *Red Rover*, *Lord Auckland*, *George IV*, *Sir Archibald Campbell*, Bombay, *Edinburgh*, *Duke Gotha*, *Cornelia*, *Ann*, *Buckinghamshire*. Java. *Athenian*, *Thompson Trident*. Sydney, *Lady Monaghan*. Manila, *Ellice and Sons*.

Note. Aboverates are from 20th April to 20th Oct. annually; during remaining 6 months the premiums are somewhat lower. Risks on Bombay are $ 9 per Cent per season, $ 4½ for 4 months, $ 2½ for 3 months and $ 1 per month.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7074256 of a T. per cubit.
2nd " " " 1200 do. & under 1600 " 0.7221091 " "
3rd " " under 1200 do. " 0.8063241 " "

N B. The cubit is 14¼ inches; measurement is taken on each entry of the vessel with cargo (except Rice) and is from the foremost to the Mizen mast, or taller head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 4300 to $ 4320; 2d class from $ 3760 to $ 3780; 3rd class from $ 3700 and under. The Cochin or Present Fee is paid by all vessels 1600 Tons or $ 2223. Linguists fee $ 1734 and Comprador's fee $ 58. Also Pilotage $ 60. inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riccidoes ships are charged only about $ 1200 in lieu of measurement &c.,

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—Not a piece of grey or white Longcloths remains in first hands, and they are much wanted.

COTTON YARN.—else is more enquired for.

WOOLLENS.—SPANISH STRIPES have advanced 5 a 10 cents, there being no late arrivals. LONGELLS are in demand with a reduced stock, and they have been sold our quotations.

LEAD.—has improved, and is saleable at $ 6½ a 7.

RICE.—has receded to nearly it's former low rates, with little prospect for the present of any improvement; the stock of foreign Rice being large, and much native being forced on the market, which the late rains have injured, and rendered unfit to store.

COTTON.—Sales of small lots are daily making, but good and middling qualities will hardly command the highest quotations, and the market generally does not evince that spirit which was expected, we believe the Bombay although they have opened here, will prevail in some of the neighbouring districts.

OPIUM.—The stoppage of the smuggling in the river is most rigidly enforced, and nothing therefore is doing, all the brokers having gone away. Some deliveries are still being made to the South, and the clearances to the end were, Patna, old 17, new 192, Benares old 11, new 48, Malwa, 1800; total 1,068 chests.

### EXPORTS.

NANKEENS RAW SILK.—arrives down very slowly, not more than a few hundred bales having yet reached Canton, and the supply altogether, it is said will be very short for this market, the cost being so high; the holders are asking 400 a 450 for middling quality, but there are no purchasers.

SILK MANUFACTURES.—Our prices for most of them will be found considerably lower than before; contracts can readily be made at our quotations.

VOL. 2d No. 52. CANTON, SATURDAY, SEPTEMBER, 2ND. 1837. No. 104

From the Chinese Repository for August.

Art. II *Philippine Islands: their discovery by F de Magellan; and a brief narrative of the fleet under his command, including some particulars respecting his death.*

The following notices are drawn from the 'Historia General de Philipinas, por el R. Fr. Juan de la Concepcion,' and the "Chronicles de la Apostolica Provincia de S. Gregorio, de Religiosos Descalzos de N. S. P. San Francisco, en las islas Philipinas, &c.' The former work was published at Manila in 1788, in fourteen volumes octavo, and is considered the best of several histories of these islands. The Franciscan chronicles were published at Manila, in two volumes folio, in 1738. The Augustine, Dominican, and other conventual orders have, we believe, similar chronicles. Both these works are introduced by adulatory dedications and prefaces, which we pass over. They are written in a rambling and confused style, and abound with expressions of extravagant devotion to the Spanish crown and to the holy see. We shall not stop to criticise our authorities on these points, but limit ourselves to a brief notice of the discovery and settlement of the rich islands which lie so near us, and which have, for more than two centuries, been an appendage of the crown of Spain

For the honor of this discovery, and the colonial acquisitions which have resulted from it, Spain is indebted to Fernando de Magellan or Magalhaens, a Portuguese of noble birth. We find no account of the early life of this distinguished man. He must have been one of the earliest adventurers beyond the Cape of Good Hope, for he is said to have travelled extensively in eastern Asia, and to have distinguished himself under Albuquerque in 1510 and 1511. Returning to Portugal in 1514 or 1515, he found his services unappreciated and unrewarded by Dom Manoel, the reigning prince. It is probable that this disappointment in his expectations of reward for past services, was the reason of his transferring his future services to Charles V. of Spain. The statement which makes Magellan to have laid before his sovereign his proposal to reach the Moluccas by a western passage, seems inconsistent with the acknowledged shrewdness of the man. He must have known that the line drawn by papal authority between the Portuguese and Spanish claims, made it the interest of the Portuguese to conceal the western passage, if such did exist. We therefore prefer to regard Magellan simply as a disappointed or injured man, who carried this proposal to Charles V. because he knew, that this was the service which would best recommend him to the Spanish crown. Charles V. then held his court at Valladolid, and there Magallan accompanied by his friend Talero, a distinguished cosmographer, presented himself in 1517. The rich islands of a great western ocean beyond America already been well attested by M. de Balboa and others, and Brazil, had been coasted as far south as the river La Plata. Magellan brought with him the information respecting the Moluccas, which he had gained from Francisco Serrano, their discoverer, with whom he had been intimate while in the east. Fonseca, the superintendent of Indian affairs, introduced him to the king. There he again evinced his thorough acquaintance with the subject of his propositions, and demonstrated to the satisfaction of all, that the Moluccas could be reached by a western passage, and rightfully belonged to Spain.

The Portuguese embassador, Alvaro da Costa aware of the proposals of Magellan, sought to defeat them, by misrepresenting him to the king. But Charles V. had discovered, under a small and unprepossessing person, the great mind of Magellan, and gave no credit to the story of the embassador, that he had been dismissed the Portuguese service for incompetency. Perhaps he was also informed that da Costa was secretly urging the navigator to return to Portugal, and assuring him that his past services would receive a proper reward. These intrigues were, however, of no avail; Charles V having determined that the proposals of Magellan should be carried into effect. He invested Magellan and his friend with the order of Santiago, and gave them rank in the service of Spain. He moreover bound himself to furnish five vessels of between sixty and 130 tons and 334 men for the voyage, to confirm them and their heirs in the governament of the discovered countries, to secure to them a twentieth of the profits of the commerce which shall be carried on there with, &c., &c., reserving to the crown of Spain only the supreme authority and the appointment of facal officers. They, on their part, engaged to find islands bearing spices, by a route which should not pass the line of demarcation between the Spanish and Portuguese claims. Notwithstanding this favorable arrangement, the preparations for the voyage went on slowly. It was necessary to offer bounties to procure the requisite number of men. Money failed, and the final preparations were completed by the aid of some merchants of Seville. As the time of departure approached, the two friends, who had thus far labored together in harmony, began to quarrel about their respective rank. The king was called on to decide who should bear the royal standard, and he directed that Talero, on account of his health, should remain behind. The Franciscan Chronicle suggests that it might not have been the will of God, that the glory of this expedition should be shared by a man, whose knowledge was derived, as his countrymen said, from intercourse with an improper person, 'un *maldito familiar*.' Talero died, soon after, of disappointment and rage. Magellan was thus left sole commander of his fleet, consisting of the Trinidad; Victoria, Conception, San Antonio, and Santiago; and after prayers, he set sail on the 10th of August, 1519.

After touching for a few days at Teneriffe, they again sailed the 3d of October, but, being unacquainted with the proper course, lost much time by following the African shore. Standing to the westward, the winds became more favorable, and on the 13th December, they anchored in the bay of Rio de Janeiro, the present capital of Brasil. The natives brought them fruits, fowls, &c., giving a slave for a hatchet, and six or seven birds for the king of a pack of cards. Magellan forbade the traffic in slaves, because they would serve only to consume provisions, and, perhaps, to embroil him with the Portuguese. Having remained in this harbor until Christmas, the fleet again resumed its course, and on the 13th of January, entered the river La Plata. Sailing again the 6th of February, they reached the 41st degree of south latitude, when the cold began to be severe. Landing again to procure refreshmentsat they took the opportunity to celebrate mass on shore. Magellan here discovered that the insubordination, for which he had already placed one of his captains in confinement, extended to the rest. His crew, too, pressed with cold, hunger, and dread, begged to be carried back to Spain. Magellan quelled this mutiny, by putting to death one of his captains and sentencing one other, along with a French ecclesiastic, to be left to perish on this inhospitable shore. That these severities were not the result of indiscriminate cruelty may be inferred from the fact, that Magellan afterwards freely pardoned his mutinous crews. To look out for a better harbor, the Conception was dispatched southward, but was lost, with her cargo, on the return. The harbor, in which they were thus constrained to pass the winter, was in 49° 15' south latitude. Leaving it, on the return of the milder weather, Magellan discovered, early in November, the strait which still bears his name. Here he was deserted by the San Antonio, her officers taking advantage of a separation from the fleet to imprison their commander and to steer again for Spain. On their arrival at San Lucs in March, they declared that the cruelties of Magellan had compelled them to return. Their representations had too much weight: the ship was libelled, the commander and some of his accusers retained in custody, and the wife and children of Magellan confined at Burgos, until the truth should be disclosed.

The undaunted navigator, finding that he was not to be rejoined by the San Antonio, pursued his course with the three vessels which remained. Clearing the straits the 27th of November, he followed the western coast of South America to 22.° south latitude, and then steered northwest to the equator and the Molucca islands. On this long passage, provisions failed, and much had been suffered from want and disease, when two islands were discovered, on the Sunday of S. Lazaro. These islands were small but beautiful; the people idolatrous and rude. Magellan resorted to force to keep off the crowd, which curiosity had brought on board. They resisted, but fled at the discharge of a piece of artillery. Afterwards they returned to traffic, and at length stole one of the ship's boats; irritated by this theft, Magellan landed about ninety of his men, killed some who resisted, recovered the boat, and took with them what provisions could be found. Returning on board with one of the captured natives, as interpreter, he pursued his course. Sailing westward, and passing several islands, he made the southeastern point of the island of Mindanao. He was now quite near to the long sought Moluccas, but mistaking their direction, he steered north, coasting the eastern shore of Mindanao. Landing at the town of 'Butuan,' he celebrated Easter day on shore, the friendly natives aiding their visitors in setting up a cross, and admiring the ceremony by which their island was declared to be a possession of the crown of Spain. Passing through the strait which separates Mindanao from Leyte, he landed on the island of Limasava. The chiefs of this island, in reply to the inquiries of Magellan for the Moluccas, conducted him to Zebu. The Zebuans, equally sagacious, but less unwilling than their other islanders, came down to the shore to the number of 2000, armed with spears. Assured by the chief of Limasava, that the Spaniards came with peaceful designs, and brought rich merchandize, Hamadan, the king or rajah, laid aside his hostile garb, and gave them a friendly reception. The treaty or alliance, which followed, was solemnised by the ceremony common among the Dayaks, of drawing a little blood from the contracting parties, and drinking it together. The salute which was fired by Magellan, on the completion of this ceremony, had its usual effect, in astonishing the natives of Zebu. The influence of Magellan is said to have been further increased by the favorable effect of some medicine, administered to the nephew of the king. Abundant refreshments were now furnished to the Spanish crews, in exchange for beads, bells, looking-glasses, &c. Magellan proceeded to build a house of trade, and one where mass might be celebrated with due effect. The king, his wife, and son, were present at the first celebration, and marked with attention and reverence. When the sacred mysteries were explained to them, they expressed their desire to become Christians. This request was acceded to; and they were catechised briefly and forthwith baptised. Our chronicler adds, "so hasty an admission might have been censurable, had it not been hastened and sanctioned by special miracles." The example of the chief was followed by 800 of the principal people of the island. Their conversion being thus effected, another day was employed in receiving the submission of Hamadan to the Spanish crown. Regarding the Zebuans as already Christians and vassals of Spain, Magellan now though it incumbent on him to evince his devotion, and the reality of the protection under which they were taken. He therefore offered his aid to subdue their enemies, beginning with the people of the neighboring island of Maktan. He had already been successful in one or two battles, and had burnt some village when, with fifty followers, he was surrounded in a marsh, by 2000 Mactans. Against such odds, the Spanish valor was of no avail; and Magellan, with most of his men, fell under the arrows of their enemies, the 26th of April, 1521.

*( To be continued. )*

## LATEST EUROPE INTELLIGENCE.

*From the Bombay Courier, Extra of the 15th July.*

The *Pulinurus* arrived yesterday afternoon in 19 days from Mocha, with the May Packet which reached Alexandria on the 22d May in 18 days from England, so that 33 days were occupied in conveying the packets from Alexandria to Mocha.

London news to the 1st May, has arrived by the Regular Packet, we have however received from our Agent at Alexandria via Marseilles, a complete file of *Galignani* up to 5th May, giving London News to the 2nd, from which we have extracted a summary of the Political News is given in the 4 Extracts from the *Spectator*, under the head of News of the Week.

The following also are items of intelligence from our various files.

The stability of the Ministry may be gathered from a declaration of Lord Melbourne in the House of Lords on the 21st April on a discussion of the affairs of Spain, His Lordship said, "my Lords I can only say in conclusion, that I see nothing in the state of affairs of this country, either at home or abroad, to induce any Minister to withdraw from Office, or to deter any one not in Office to hesitate to accept it, if in other respects he deemed it advisable to do so." This negatived the reports in circulation as to the retirement of Ministers,

Considerable apprehensions were entertained respecting the state of the Queen's health.

Sir James Carnac is to continue Chairman of the Court of Directors for a second year.

The Rev. Mr. Stanley, a brother of Sir John Stanley of Alderly, and Uncle to the Members for North Cheshire and Anglesey, was the new Bishop of Norwich

The King had instituted a new Military Order for Hanover, to be called the order of William.

The French Government have established a regular tri-monthly Communication by Steam Vessels between Marseilles, and Malta, Alexandria, Smyrna, Constantinople and the other ports in the Mediterranean and Levant. The Vessels commenced running on the 1st May.

No intelligence from home as to Steam appears to have reached this place.

Bills remitted from America by the last packets have been refused acceptance by the drawees, both in London and Liverpool. Some houses have even refused to accept bills drawn or indorsed by their own agents, others, whose bills are drawn against shipments of produce refused to accept the drafts, but hold the produce as security against previous advances.

At Manchester several assemblages of people took place in the month of April. One of the most formidable of these turb ulent mobs, committed many outrages. The terror was so great that a number of shops in all parts of the town were ent rely closed. It is a fact more true than singular that out of the 700 persons who received relief from the parish lately, 300 claimed Ireland as the place of their birth. The prospects of trade are gloomy in the extreme, as it is the opinion of the best informed on the subject that we are yet a long way from the worst situation to which we must come at last. Private letters, from America, are of the most discouraging description. At no period during the last ten years have the state and prospects of the manufacturing and commercial interests connected with this district been so gloomy as at the present moment: The pressure of the times is felt as severely by the manufacturers of silk goods as by those of cotton fabrics; and the losses which will be sustained upon stocks in consequence of the fall of prices will be great.

30,000 Bags of Cotton were sold at Liverpool in the last week of April, the demand appeared to be increasing.

Sir Francis Burdett in compliance with a resolution passed at a public meeting of the electors of Westminster has resigned his seat in Parliament but he appeals to the sense of the great body of his constituents and will become again a candidate to represent that city; he was to be proposed by Sir James Graham. Mr. Temple Leader is his declared opponent on the liberal side in politics.

Messrs. A. Lees & Co. extensive manufacturers at Manchester and Messrs. Porter & Co. of Liverpool had also failed.

By the last advices from Manchester it appears that many of the Mills had been set to work, that the disturbances had ceased and trade was again brisk.

Notwithstanding the many failures that have occured the advices from England shew symptoms of returning confidence in the money market in consequence of large remittances that had been received from America during April.

It is said that this Packet brings a short and pithy Letter from the Court of Directors to the Bombay Government, in reply to the recommendation transmitted from this in January last, in favor of a Charter being granted to the Bank of Bombay. We hear that the dispatch conveys the distinct refusal of the Court to sanction the measure, and in strong terms cautions the Bombay Government not to hold out to the parties here, the least expectation that the application will be entertained at a future period.

It also appears that the Board of Control have without hesitation confirmed the view taken by the Court of Directors of the matter.

## CITY,—Saturday Evening.

Much more anxiety has prevailed in the mercantile classes more immediately connected with the American trade in consequence of the contents of the commercial advices from New York, of the 8th instant, by the packet ship *Independence*, and which were received this morning. However anxious the state of commercial affairs at New York may have rendered the merchant on this side of the Atlantic, it is admitted that it has been anticipated by precautionary measures, which will, at any rate for a time, relieve the pressure here. The difficulties in New York and the other principal cities of the Union have, however, proved to be greater than some very sanguine parties anticipated. The failures since the commencement of this commercial panic amount to about 80, and the amount of the liabilities of the unfortunate parties are to be calculated at from 6,000,000, to 8,000,000. It has also been confidently stated by parties who have received advices that some of these firms had been driven to the necessity of suspending their payments in order to avoid the continued payments of an enormous rate of interest to enable them to meet their engagements, and that many of them would eventually pay in full. Great difficulties existed in obtaining bonds from the Bank of the United States, and as that establishment required a premium of 7 per cent., for money, and also refused to draw upon England under 10½ per cent. none but the most opulent firms could bear the enormous charge of this mode of remittance, and of course, the weaker houses suffered much more under the general pressure, which was considerably augmented by the receipt of the advices from this country of the 11th ult., at New York. Another general meeting of the merchants had taken place in New York, in consequence of the bad prospects of commercial affairs, but it does not appear that any measure of importance for their mutual relief was decided upon. Some few letters are very sanguine upon the results of the then trying period, upon what grounds it is, however, difficult to imagine, since, although these newly-created American banks have nearly a year to run, there must be a very great reaction in the commercial affairs of the United States to enable the United States Bank to meet them without creating a future pressure in the money market there. We find that almost every letter received bears a different tone upon the existing state of affairs, but many of them concur in the statement that it is not expected that the Bank of the United States will extend the issue of them new bonds over the amount of one million and a half sterling. The entries for the exportation of specie previous to the selling of this packet amounted to about 3½,000 dollars, and it is stated that the late arrivals of specie have been smuggled out from New York with great risk to the exporters. No f rmal resolution had been adopted on the part of the United States Bank, for forwarding specie to this country from thence, and the arrangement for the opening of a credit account between that establishment and the Bank of England had not arrived out; but some of the banks had discounted more freely a few days previous to the date of these advices

By a statement in one of the New York journals, the late distresses are said to have arisen out of overtrading and land speculations. There is a great similarity in this remark and that which was advanced by the bullionists at the period of our panic in the year 1825-6, and there is a coincidence in the circumstances of the two countries, although at different periods, upon the great British. But that of the late American panic, followed an extended resumption of cash payments, with the extension of a paper currency.

This Journal defends its arguments by the following long comments, and so many figures as to the correct returns.

"From November, 1834, to July, 1836, the United States Bank suddenly expanded its discounts from about 45,000,000 of dollars to 60,000,000, and created a further issue of notes from about 10,000,000 dollars to 23,000,000 of dollars. In 1836 the importations of foreign goods were to the amount of 189,000,000 of dollars, and in 1834 to 120,000,000; whilst in the same period the sale of lands increased in amount from 4,000,000 to 12,000,000 of dollars.

"In 1836 all the banks of the United States expanded their discounts from 253,000,000 to 470,000,000 of dollars, the imports from 120,000,000 to 190,000,000 dollars, and the sale of lands from 12,000,000 to 24,000,000 of dollars. This year the difficulties have increased in consequence of the rapid construction of discounts and the consequent diminishing of imports; whilst the sales of land amounted to only half the average of the past months of the present year as compared with the like period of the last year.

Some considerable anxiety was created in the mercantile interests generally by the announcements of the failure of Messrs. Meyer, Parish, & Co., a firm which has borne the highest character in the East Indi a and China trade. Their loans are ascribed to the great decline in teas and other China and India produce, and as this failure is likely to cause much of that kind of produce to be thrown upon the market, it is feared that other houses will be involved. The adoption of our new free trade theorism, at present has turned out to be a very dangerous experiment, and it will be long ere our commercial interests finally recover from its effects. The greatest attention is, however, fixed upon the Bank of England. The state of our commercial relations to the Empire and the Western world must involve the directors of that corporation in very great responsibility; an artificial expansion of the currency in Great Britain and America, with a reckless contraction of the same in both countries, bids fair to shake the commerce of the two to its foundation. The greatest caution, combined with liberality, ought to be now exercised by the bank direction here. The policy of their opening credit accounts with the principal banks of the United States, whilst so large an amount of bonds is in circulation, has been seriously questioned, and the directors have taken more pains than formerly to obtain correct information of the state of the commercial money market on the other side of the Atlantic."

By the return of the aggregate amount of notes circulated by private and joint stock banks in England and Wales, between the 31st. of Dec. 1836, and the 1st. of April, 1837, as compared with the like previous quarterly return, it appears that the issues of private banks have decreased in the amount of 469,716£, and those of the joint stock banks in the course of 309,979£, the total decrease accounting to 800,695£. This great reduction in the rural currency during so short a period must very considerably the profits of the private banks has been felt at a distance from the metropolis, and a large amount of the reduction of the circulation of joint stock banks may be attributed to the gradual winding up of the affairs of the Northern and Central Bank of England.

Some objection has been made to the new bonds of the United States' Bank to day which have been received by this arrival in consequence of their having been made payable to order, and not to bearer, which has rather checked the desire to deal in them: it is obvious that temporary speculators on the Stock Exchange are not desirous of incurring the responsibility of endorsing a species of paper that, after all, is founded but upon questionable principles, since upon every bargain an indorsement will be required, that would open a field to compound liabilities, that yet have not been rightly calculated upon. The bonds payable to bearer have been sold to a small amount at 94½ to 95, and Morris's Banking Company at 98 to 98½.

The dealings in Consols and the Unfunded Debt continue to be effected by the new tide of speculation in these new description of security. Consols fluctuated about ⅛ per cent, the highest quotation being 90⅞ for time, and the last 90⅛ buyers; for the next transfer day they are 90¼ sellers. The Three-and-a-Half per cent. Reduced Annuities are 97⅛ to 97½, and the New Three-and-a-Half per cents, 98⅛ to 98⅜ Bank Stock is 201½ money, and 204½ account. The premium upon Exchequer Bills is 31 a 33, and on India Bonds 29 to 31.

There has been but very little disposition manifested to speculate in Foreign Funds to-day, and as the dividends due upon the Spanish active Bonds on the 1st of May have not been advertised, it is considered the bondholders will be placed in the same situation as on the 1st of November. The meeting of the Chilian bondholders is fixed for Monday (this day), when M. Rosales is expected to propose a composition. Spanish Bonds closed at 21⅞ a ¼; Portuguese New Bonds of 46½ a ⅝; and the Three per Cents at 29⅛. Brazilian Bonds are 84½; Chilian have advanced to 39; Danish Bonds are 72½. Dutch Stock is 53, and the Fives 99⅝.

There has been a little more demand for shares to-day. Great Western are 1¼ prem; Stephenson's Brighton 3¼ dis.; Blackwall 2⅛ dis. Birmingham have advanced to 31 prem.; and North Midland to 6 dis. Monday being a holyday at the Bank, the Stock Exchange will be shut by order of the committee.—*Morning Herald, May* 1.

## ENGLISH MARKET.

SILK.—The Silk market during the past month has continued in the same quiet state as reported in our letter of the 1st April.

The large arrivals of China Silk this season, say 8,000 Bales, combined with the expected further imports, have caused prices to recede about 15 or 20 per Cent, below the price of last month; at these rates about 200 Bales of the new Silks have been sold. Two or three parcels of very inferior quality that remained of last season's Silk have been cleared up at 10s to 11s.

In Bengal Silk, sales have been effected to a small extent at a reduction of 5 to 10 per Cent, upon previous prices.

Within the last few days there has however been more enquiry, and evidently more inclination to purchase this valuable article, and we therefore hope that the present reduced prices may have at length attracted the attention of dealers and others. We annex the state of the Warehouses, as also the prices at which a few sales have been recently made, these rates however holders are not generally inclined to accept.

SALTPETRE continues in very limited demand, and some parcels of 6 a 9 per cent., refraction have been sold at 24s per cwt.

CASSIA LIGNEA.—The arrivals of late have been considerable, and the market remains flat for Shipping orders, but the two prices have brought a few speculators into the market, who have taken several parcels at 46s. per cwt. for ordinary, and 50s. for middling quality.

TEA.—The extensive Free Trade sales of Tea, amounting to nearly 100,000 Packages, commenced this morning, and have proceeded very heavily, as many anticipated from the very large quantity; but few Teas could be sold, and those were at a reduction of ¼d a 1d per lb. from the last sale's prices. The following are the prices current:—

A sensation has been created in the money-market this week by the appearance of a new description of American Securities. In consequence of the extreme difficulty of procuring unexceptionable bills of exchange to remit to England, the merchants of New York called upon the Bank of the United States to supply them with the promissory notes of that establishment, payable in London. This application was immediately acceded to; and the consequence is, that a very large amount of paper, of which the following is a specimen, has been remitted to this country.

"No. 86. 1,200L.

BANK OF THE UNITED STATES.

"Philadelphia, Mar. 30, 1837.

"The President, Directors, and Company of the Bank of the United States promise to pay to the bearer, on the first day of April 1838, Twelve Hundred Pounds Sterling, at the Counting-house of Messrs. Baring, Brothers, and Co. in London.

"L. S. "Witness the seal of the said Company and the signature of their President and Cashier.

"S. JAUDON, Cashier "N. BIDDLE, President."

Not only the Bank of the United States, but the Manhanttan Company the Bank of America, the Morris Canal Company, and the Girard Bank of Philadelphia, have issued promissory notes of the same description; which have been discounted in London at the rate of between 6 and 7 per cent. No doubt seems to be entertained of the legality of circulating paper of this description; and we may expect to have as much of it as the market will bear.

The consequences of this operation may be very serious, in several ways. The first effect appears to have been to relieve the American trade; and the second to knock down the premium of Exchequer Bills, which fell yesterday to the extent of 11s. or 12s. How this inundation of American paper will affect our circulating medium permanently, is a difficult question to decide. It would seem to destroy the control of the Bank of England over the currency, by bringing foreign money into establishments out the British market. It is very probable that the existing notes will be replaced not with gold but with fresh notes; and it is possible that gold may be shipped to the United States in return for a supply of this paper. But there is no end to speculation on the working of this new financial achievement of the enterprising and sagacious Mr. Nicholas Biddle. We must wait till we are instructed by some experience before we can speak confidently on the subject.—*The Bombay Courier Extra, July* 13, 1837.

## RUSSIA.

A few facts will show the extent to which the military and naval resources of this empire have been increased during the last forty-five years. In 1791, the Army expenditure amounted to 16,000,000 silver roubles (about 1,000,000*l*.); in 1804, to 26,500,000 s. R., or about 3,675,000*l*.; and at present they are estimated at 30,000,000 or about 4,500,000*l*. The Navy expenditure, in 1791, was 4,000,000 s. R. or about 500,000*l*.; in 1804, 9,000,000, or about 1,350,000*l*.; and at present they are estimated at 12,000,000, about 1,800,000*l*. When Peter the Great came to the crown (1689), the regular troops amounted to 15,000; at his death they amounted to 108,35?, exclusive of the Guards. Catherine increased them to 270,000.; Paul to 399,000; under Alexander, in 1805, they amounted to 408,100, besides 88,672 irregulars; under the same monarch, the official returns state them to have been, on the 1st of January, 1821—Russian soldiery, 778,951, and Polish 50,006, being in all 828,951; besides 210 pulks of irregular horse—105,534; and veterans, garrison, and commando troops, and extra corps, divided into thirty-seven regiments, 104,632: so that, if credit is to be given to these official returns, the whole military force of the empire consisted of 1,019,117. The present peace-establishment is the same as in 1831, when the regular army was stated to amount to 612,322 men, independently of thirty-eight regiments of Cossacks, each consisting of 500 effectives.—*United Service Journal.*

## ACHEEN

*(From the P. W. Island Gazette, July* 15*th,* 1837.)

The Barque *Baggiana*, which arrived from Pedier on Tuesday last, has conveyed hither one of the six seamen who deserted from the ships *Francis Stanton* and *Genton* on the west coast of Sumatra on the 28th May last, as reported in our number of the 27th ultimo. This man, named *George Thompson*, is the survivor of three who brought alongside of the *Baggiana* when laying off Pedier on the 23rd June by a small trading prahu from Acheen bound to the eastward, on which they had been embarked by order of the Rajah of that place with instructions to put them on board the first English vessel they might find on the coast. They gave out there, as well as upon being received in the *Baggiana*, that they were Englishmen belonging to a whaler of 600 tons called the *Perseverance*, of London, out eighteen months and were fishing near St. Pauls and Amsterdam, when, having consumed all their fresh provisions they made for Sumatra, but the vessel sprung a leak which gained on them so much that she could scarcely be kept afloat notwithstanding constant and unremitting labour at the pumps. On reaching a port on the west coast, called *Tampan Tuan*, however, she was run on shore on the beach, with a cargo of 218 barrels of Oil, and before the men left the place, the Achinese had commenced plundering the ship. They also stated that having been furnished with 2,000 dollars and documents from their commander, they were seeking their way to this settlement in order to charter a vessel to save the valuable cargo, but that they had been robbed by the Achinese of every thing except the clothes on their backs at Sanangan near Analaboo, from which last place they had found their way overland through jungle and forest to Acheen. Such was the statement of their spokesman, named *William Porter*, who said that he was the second mate of the wrecked whaler, and that the others, named *George Thompson* and *John Shees*, were two of her crew. *Porter* and *Shees* appeared to be labouring under fever and ague and otherwise much exhausted, but it did not require a very practised eye or ear to discover that these three persons were not Englishmen, but subjects of the United States. They were however received on board the *Baggiana* and every relief administered to them, but the two last named were much debilitated and sinking daily, *Shees* dying on the 27th and *Porter* on the 29th June. Before the death of the latter, the American ship *Grand Turk*, which left this on the 27th ultimo, arrived at Pedier, when her Commander, Captain Easterbrook, and the Supercargo, Mr. Sholfield, went on board the *Baggiana* by invitation and developed the true character of these deserters; Captain E. identifying *Porter* in particular, with whose previous bad character he was well acquainted. *Thompson* has since been sent on shore and delivered over to the Superintendent of Police, who has sent him to the hospital, in consequence of being afflicted with fever and dropsy. *Singapore Free Press* 3*rd August*

## JAVA.

From Batavia we learn also, that the Dutch government in granting lands for the coffee and sugar cultivation, had drawn up a scale to regulate the competition which is represented to be great. It is said the preference of all contracts are to be disposed in the following order;—first, to government servants actually in service; secondly, to government servants on half pay; thirdly, to pensioned servants; fourthly, to natural born subjects; fifthly, to Foreigners, and lastly, to the Chinese. From this classification it will be obvious to all foreigners having in contemplation the idea of proceeding to Batavia on such speculations, even admitting they had obtained permission to remain on the island, the poor prospect they would have of realizing their expectations. The competition to obtain government contracts is so vehement, and likely to prove so abundantly advantageous to the parties obtaining them, that the utmost solicitude in all quarters is evinced to have them concluded. One dession alone of lands has lately been made, the expected produce of which, we are told, in Sugar, is estimated as likely to exceed ten thousand piculs per annum. The acquisition of such flattering anticipations is reserved however for a favoured few, or at all events until the first four classes are satisfied, which itself is a vain expectation; a foreigner designing therefore to become resident at Batavia with a view of following the particular description of agricultural pursuits mentioned, would only meet with certain disappointment, as well as loss of valuable time and money. We shall be happy if the above intimation prove useful to those who had such views without knowing the exact situation in which they would be placed under the present regulation on their arrival in Java.—*Singapore Chronicle* 12*th August* 1837.

# CORRESPONDENCE.

TO THE EDITOR OF THE CANTON PRESS,

Sir. I regret very much that I was prevented by indisposition from attending the Palmerston meeting advertised in your last number, however, I feel confident my sentiments would find expression from various quarters more ably than I could have given them. But Sir, this is a case I am not to be satisfied with giving mere words; I intend to put at the disposal of the Committee the entire Profits of one shipment of Tea and Silk made by me to Britain last season—and I have no doubt so appropriate a mode of remittance will be followed by others—moreover, I *think* it probable that H. M.'s Superintendents, if properly applied to, would place at the disposal of the Committee, all the honor remaining to the crown of England on these shores.—Such a mass of wealth and distinction has seldom been placed in the hands of a body of prosperous and grateful traders—to bestow on a deserving minister of the Crown.

Your's obediently

"A BRITISH TRADER."

1st September 1837.

# CANTON PRESS,

2nd September 1837.

We have had numerous arrivals during the week. The *Buckinghamshire* from Bombay 15th July, has put us in possession of English news to the 2d May, and we give an abstract of them in another column. No political news of any importance have been received. Since the defeat of the Christinos at Hernani, the two parties seem to have continued inactive, watching each other, and giving time to Don Carlos to get over an attack of the Influenza under which he was suffering. The commercial news are as unsatisfactory as can well be. Many failures had taken place, and the scarcity of money continued very great, nor was there much prospect of immediate improvement. All kinds of Produce, but particularly *tea* and *silk* were selling at ruinous prices—quotations will be found in another part of the paper. From North America letters had been received to the beginning of April, and after very numerous failures, most of them of great account, things appeared to be assuming a more cheerful appearance. It will be seen from one of our extracts that the United States Bank had sent a new kind of paper to England, promissory notes, payable to bearer on a fixed date. These notes which would fall due in about a year's time, were discounting at 7 a 8 per cent. Other American banks were following the same plan, and much American paper was consequently in the market. A proof that commercial securities were by no means in favor is that the English funds continued unaltered at 90¾ a ⅞, in spite of the high discount on what were considered first rate bills.

By the *Sir Herbert Compton*, from Bombay 30th July, we have received Bombay papers to the 25th, which contain no further news of interest. The June mail had not arrived there. Last year we received the June overland despatches here on the 26th August, and are consequently more than a month later this year.

Per *Sir Herbert Compton* we have received the Singapore *Free Press* of 10 & 17th August, and find nothing for extract except the following account of the accident which happened to the Bengal Packet.

"We are sorry to announce that the *Bengal Packet*, which sailed from this on Tuesday evening for Calcutta, was reported ashore yesterday morning on the South East reef of Middle Island between *St. John* and the *Rabbit and Coney*, upon which she drifted during the night, an accident which Capt. Steward is understood to attribute to an error in his compass, the ship appearing to have the proper bearings on when she grounded. By the latest accounts which we received of her last night, she was still fast, and endeavouring to get off with the assistance of the gunboats, which had been sent out to her, but it then seemed doubtful whether she would get clear by last evening's tide, altho' having up to that time made no water; it was believed that if she then got off, she would escape without material injury. The whole of her cargo between decks had been sent back here in cargo boats."

The Committee for auditing the accounts of the Hing-tae hong Creditors has, we learn, completed it's labours, and the amended accounts, as agreed on between the Chinese and Foreign Committeemen, or at least the balances, have been sent to the Government. The total of debts owing by Hing-tae as shown by that account is between 23 and 24 lakhs of Dollars. The easiest part as to the arrangement of these debts has thus been got over, and it now remains to settle on what principle the debt will be *paid*: this, we imagine, will have to be referred to the Court of Peking, nor do we think, will the present Governor, seeing that he is in great disgrace with his Imperial master, be very anxious to bestir himself in this case, and we are afraid that the creditors will be put off for an indefinite time, before they will receive the value for their claims.

We have been requested to state that, instead of reporting, as we did a fortnight ago, in giving an account of a judicial investigation at the Consoo-house, that the 22 cases of manufactures had been shipped from the *Orwell* into a smuggling boat, that those goods were transhipped into a boat belonging to one of the Hoppo's servants, and that the bills of lading for these 22 cases had been endorsed to the Ship *Hercules* at Lintin.

The Opium trade continues more harassed than ever. It would almost appear as if the Peking Government had it seriously at heart to do away with it, and recent events have proved that the Government is not quite as inert as many had been led to suppose. Ever since the question was first mooted by Hew-naet-sze, that excellent friend to the Bengal revenue, the trade has been harrassed by periodical persecutions, and, having once engaged the attention of Government in so public a manner, that it's functionaries dare no longer affect ignorance, we see for the present no chance that we shall ever again enjoy the trade so uninterruptedly as it was before the censor proposed it's legalization. This friend to Opium has, we are sorry to say, proved the greatest enemy to the trade, nor do we venture to predict when the time will come that the Government will again think fit to ignore these practices. The foreign shipping is now driven from one station to another, being in the very inconvenient station, as far as communication is concerned, of Hong-kong, nor is it quite certain whether, after the fear from typhoongs shall be over, the ships will be allowed to resort again to Lintin as they have hitherto done.

In the Shipping report of this day we observe the arrival of the Amer. ship *Morrison*, from a cruize to the Eastward. This vessel, we believe, was despatched by the spirited owners to try whether intercourse with the Japanese was really so very impracticable as it has hitherto been represented. We do not yet know what success may have attended this expedition, the passengers, Mr. King and Doctor Parker having but just landed at Macao, but we hope that they may have met with the deserved success, and that they will bring us agreeable news from the Japanese. It is much to be wished that these Gentlemen will acquaint the public with the result of their expedition.

We have noticed, on several occasions, the anomalous situation in which H. M. Superintendents have placed themselves by coming to Canton under the Commission Lord Napier held. The Chinese, having been told by them, that they have come to exercise controul over such of their countrymen as are unacquainted with the laws of the Celestial Empire, expect of course that whenever their laws are infringed by any of the British, H. M. Superintendents will exert their *controul* in favor of the Chinese institutions. We have frequently pointed out the very awkward consequences that might arise to the Superintendents from their assumption of this power over their countrymen, and if report is to be trusted, we have now lived to see our predictions verified.—In consequence of an Imperial edict it became desirable that the shipping at Cap-shuy-moon should move it's anchorage, and the Hong-merchants representations to the foreign merchants having produced no result, a Linguist, we are told, informed the Chief-Superintendent of Howqua's intention to call on him to request of him to order his countrymen to remove their ships from the before mentioned anchorage. In order, it is said, to avoid so unpleasant an interview, H. M. Commissioner set sail for Macao in his cutter, and the Hong-merchant's application was consequently not made or at least deferred. The shipping at the moon moved last monday, with exception of a few sail, to Hong-kong bay.

In is rumoured that the present Governor Tang is about to be removed from his government. Great venality in the exercise of his functions is assigned as the reason of his disgrace.

We can assure our Correspondent "A British Trader" that, had the meeting to which he refers, really taken place, we should probably have voted with him, or, if not so, we might have insisted that the secretary for foreign affairs be presented with the Emblem of the Canton trade, "a poppy head" or burying "in sweet oblivion" every thing that may possibly tend towards effecting, at present, a change in the national intercourse between the two countries. We however, with the exception, always, of continuing the Superintendent's commission as it was first extended, do not think activity in Chinese affairs *at home* can possibly be of any advantage to us and let us therefore allow Lord Palmerston to sleep on until some real cause of dissatisfaction with the Chinese Govt. may arise, which, in our humble opinion has not hitherto been the case, but which, at the same time it is by no means out of the way to suppose, may possibly very soon happen. As to losses on tea and silk on which our correspondent harps, we must say that the Minister of Foreign Affairs appears to us to be no party in causing them, but the rather heedless wish for speculation here as well as at home is chiefly guilty of having brought about the unfortunate situation of the present China trade, though other causes, over which our neighbours had no control, also contributed towards depreciating their ventures.

1st class ves. measg. 1600 cubits & upwards pay 0.7874016 of a Tl. per cubit.
2nd ,, ,, ,, 1200 do. & under 1600 ,, 0.7281491 ,, ,,
3rd ,, ,, under 1200 do. 0.5061341 ,, ,,

N B. The cubit is 14½ inches; measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from @ 1200 to @ 1300; 2d class from @ 1200 to @ 1200; 3rd class from @ 1100 and under. The Chinchew Port Present Fee is paid by all vessels 1000 Tuns or @ 1222. Linguists fee @ 1.75 & 2nd Comprador's fee @ 56. Also Pilotage @ 20, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Rizzolon ships are charged only about @ 1200 in lieu of measurement &c.,

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—LONGCLOTHS continue in great demand there being none in first hands.

WOOLLENS.—There has been less demand for all descriptions during the week.

LEAD.—The demand for this metal, and decreased stock have caused a considerable advance in price.

SANDALWOOD.—The markets are reported to be bad in the interior, and our quotations can hardly be obtained.

RICE.—Continues as depressed as before, and the weather is said to be favorable for the next crop.

STRAITS PRODUCE.—TIN is as before. PEPPER has receded, owing to parcels lately arrived.

COTTON.—The several arrivals during the week from Bombay and Bengal have rendered parties anxious to realize, particularly the Bombay holders, of which description the sales have been considerable at a reduction on the lower kinds of 1 a 2 mace per Picul. The stock on the 1st inst, exclusive of the late arrivals is estimated at

| Bombay. | Bengal. | Madras. | Total. |
|---|---|---|---|
| 46,816 | 6,324 | 866 | 54,006 bales. |

and the shipments in August have been,

| | | |
|---|---|---|
| 11,920 | 2,900 | 1,078 | 15,897 ,, |

OPIUM.—No arrangements have yet been made between the Chinese and Mandarins, and the exclusive measures are now extended to Macao, so that the only deliveries are to the Junks.

### EXPORTS.

NANKEEN RAW SILK.—The last accounts from England went and to depress this article still further, and as the chinese will not at present submit to any heavy sacrifice, there have been no transactions.

TEA.—There seems to be a disposition on the part of the Hongs to sell their old Congous at less than our quotations, but we hear of nothing being done. A shop of Hung-muey has been bought at 37 Taels. Prices have not been fixed for any other description of Tea, and it is to be hoped that the accounts just received from England will prevent any being settled, until the season brings their teas a little.

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER BOATHIRE IS PAID BY THE SELLER.

Note. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Camblets, Saltpetre, Ginseng* and other Goods, on which the duties at Whampoa are high.—Ships with *Rice, Cotton &c.* sometimes discharge at Macao or tranship their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary Stationery, Cutlery, Crockery ware, &c.*, for foreigners consumption, are sold at Auction duty paid.

*Note. Alum*, and *Cassia* are procurable cheaper at Lintin, Macao, &c; and *Raw Silk, Silk* piece goods &c, are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about @ 1300 in lieu of measurement &c.,

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—Longellas continue in great demand there being none in first hands.

WOOLLENS.—There has been less demand for all descriptions during the week.

LEAD.—The demand for this metal, and decreased stock have caused a considerable advance in price.

SANDALWOOD.—The markets are reported to be bad in the interior, and our quotations can hardly be obtained.

RICE.—Continues as depressed as before, and the weather is said to be favorable for the next crop.

STRAITS PRODUCE.—Tin is as before. Pepper has receded, owing to parcels lately arrived.

COTTON.—The several arrivals during the week from Bombay and Bengal have rendered parties anxious to realise, particularly the Bombay holders, of which description the sales have been considerable at a reduction on the lower kinds of 1 a 2 mace per Picul. The stock on the 1st inst, exclusive of the late arrivals is estimated at

| Bombay, | Bengal, | Madras, | Total. |
|---|---|---|---|
| 46,219 | 8,391 | 866 | 55,476 bales. |

and the clearances in August have been,

| | | | |
|---|---|---|---|
| 11,939 | 3,586 | 1,072 | 16,597 ,, |

OPIUM.—No arrangement has yet been made between the smugglers and Mandarins, and the restrictive measures are now extended to Macao, so that the only deliveries are to the Junks.

### EXPORTS.

NANKIN RAW SILK.—The last accounts from England must tend to depress this article still further, and as the chinese will not at present submit to any heavy sacrifice, there have been no transactions.

TEA.—There seems to be a disposition on the part of the teamen to sell their old Congous at less than our quotations, but we hear of nothing being done. A chop of Hung-muey has been bought at 37 Tuels. Prices have not been fixed for any other description of Tea, and it is to be hoped that the accounts just received from England will prevent any being settled, until the teamen lower their tones a little.
